Daniel Gafurson
Jean Debrosse
Tushar Japi

Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized."Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

With YTD Sept. growth up 5.5%, the region's narrative this year has been remarkably consistent. It began with stronger-than-anticipated first-quarter growth boosted by a relatively mild winter. This was followed by consistently steady growth in the next two quarters, driven in part by steady economic growth, complimented by a 4.1% gain in seat capacity and a 4.3% decline in overall ticket prices. These factors translated into a record third-quarter passenger count of 93.1 million, putting us on pace for another record year. YTD-Sept. domestic and international traffic are up 6.4% and 3.8% respectively. The tentative regional cargo recovery that began in the middle of last year and showed so much promise earlier in the year is barely hanging on as YTD Sept. cargo grew 1.7%.
