## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Hammonton was required to cease discharge to surface water and propose an alternative wastewater disposal site. The proposal for the Hammonton Wastewater Treatment Facility Land Application Site involves pumping the 1.6 MGD of advanced treated effluent from Pleasant Mills Road to a storage lagoon and slit trench forest system located off of Boyer Avenue in the Town of Hammonton. A three acre storage lagoon will be located at the eastern corner of the property and effluent will be distributed to a network of slit trenches by a pumping network. The five slit trenches will then discharge the effluent to the Ground Waters of the State. The slit trenches are classified as infiltration/percolation lagoons. The proposed storage lagoon will be lined and is classified as a surface impoundment.</p> <p>A subsurface drainage system will be constructed along the northern perimeter of the discharge site to mitigate the potential hydraulic impacts the discharge of the advanced treated effluent may have on adjacent septic systems and subgrade structures as a result of seasonal high ground water elevations. The drainage system will collect the recovered ground water and will discharge off site. This permit is a renewal of the original permit issued for the proposed project.</p>
