FRESHWATER WETLANDS PROTECTION ACT

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to execute an Administrative Consent Order to settle enforcement claims as to specific violations of the FRESHWATER WETLANDS PROTECTION ACT, N.J.S.A. 13.9B-1 et seq., and the rules promulgated pursuant thereto, N.J.A.C. 7:7A-1 et seq.

IN THE MATTER OF: Ramapo College of New Jersey
SUBJECT PROPERTY: Block 18, Lot 3

The proposed Administrative Consent Order requires that Ramapo College treat all stormwater from existing parking lots on its campus in excess of Department requirements prior to discharge to Darlington Brook or its tributaries, provide and deed restrict wetland buffers of 150 feet to the wetlands nearest the tributaries of Darlington Brook upstream of the current development project and permanently preserve the northern most wetland / upland complex as open space to serve as habitat for wood turtles. Ramapo College is constructing dormitory buildings outside of certain of these reduced buffer areas. In addition the proposed Administrative Consent Order requires that Ramapo College fund and participate in a Wood Turtle Study Plan and upon Department approval of the completed Study, participate in the development and implementation of a Wood Turtle Management Plan. Ramapo College will also be required to pay a penalty settlement of \$37,350. Based on compliance with this Administrative Consent Order, Ramapo College may engage in certain specified construction activities enumerated in paragraph 32 of the Order. Subject to this Administrative Consent Order becoming effective, the Department also anticipates issuing to Ramapo College a freshwater wetlands general permit 10 for the construction of three road crossings and a freshwater wetlands general permit 11 for the construction of five stormwater outfall structures.

Greenwich Township WTP NJPDES Permit No. NJ0130273 SIU	1200 Memorial Ave. Greenwich Twp. Gloucester County	Gary Torres Bureau of Pretreatment and Residuals (609) 633-3823	Greenwich Township Sewage Treatment Plant	<p>This application is for a new NJPDES permit to regulate an existing discharge.</p> <p>The applicant operates potable water treatment plants, SIC Code 4941. Potable water is treated to remove iron and manganese, which are filtered out. The discharge to Greenwich Township Sewage Treatment Plant consists of filter backwash, i.e. water used to clear solids from the filters along with the solids themselves. About 57,000 to 72,000 gallons daily of filter backwash is discharged from each of two filter houses, for a total discharge of about 129,000 gallons daily if operating continuously. The operation is in fact intermittent, and depends largely on the demand for potable water. Because groundwater in the area contains low levels of naturally occurring radionuclides which can become more concentrated in the filter backwash, the Department is also proposing monitoring and limitations for radionuclides present in the discharge.</p> <p>Submitted to <i>Gloucester County Times</i> for newspaper publication.</p>

The Department has determined that the limit found in Table III-A-1 (Residuals DMR Limits and Monitoring Requirements – page 1 of 3) of NJPDES Permit NJ0109525 for Parameter: Operating Capacity, Sample Point: In, Limit: 5.9 Dry Metric Tons/Day, Statistical Base: Reporting Period Maximum is unwarranted. Instead, the Department believes that an Operating Capacity Limit with a Statistical Base of Reporting Period Average, not Reporting Period Maximum, better reflects the nature of SCMUA's residuals composting facility.</p> <p>As a result, the Department issued a Stay of Permit Limitation for Parameter: Operating Capacity, Sample Point: In, Limit: 5.9 Dry Metric Tons/Day, Statistical Base: Reporting Period Maximum dated February 6, 2002. As indicated in the February 6, 2002 Stay letter, all other conditions of the existing NJPDES permit remain in full force and effect.</p> <p>The Department intends to:</p> <ol style="list-style-type: none"> 1) modify the NJPDES permit, as outlined above and in the Stay of Permit Limitation letter dated February 6, 2002, to establish an Operating Capacity Limit with a Statistical Base of Reporting Period Average, not Reporting Period Maximum; 2) amend typographical errors made to Part IV – Land Application of Class A Biosolids, specifically condition A.1.c (page 4 of 10) and condition D.1.b (page 7 of 10) where reference to Table III-B-1 should be Table III-A-1; and 3) revise Form RMS-10 “Sludge Derived Product Generator’s Inventory of Distribution Outlets” as suggested by the permittee to require all “Distribution Sites” be reported, not just “Distribution Sites Receiving in Excess of 100 Cubic Yards”. <p>Only those conditions proposed for modification in this draft action are open for comment.</p>
