

1. An applicant and spouse shall be considered separated when each maintains a separate residence and the applicant does not have access to or receive support from the spouse's income.

2. An applicant and spouse shall be considered separated when the spouse has been institutionalized in an assisted living facility, long-term care facility, either skilled or intermediate, or in a State or county psychiatric hospital at least 30 consecutive days prior to application.

(b) Income shall be determined in accordance with the standards delineated at N.J.A.C. 8:83-6.2.

#### 8:61-3.5 Residence

Residence shall be determined in accordance with the standards delineated at N.J.A.C. 8:83-6.4.

#### 8:61-3.6 Third party coverage

Individuals who are eligible to receive the covered medications from entitlement programs or third party payers are not eligible to receive benefits under this program.

#### 8:61-3.7 Application process

(a) Applications to enroll in the program can be obtained by calling toll free, at 1-877-613-4533.

(b) Once an interested individual receives the application, the form should be completed and returned to the address indicated on the application. The application requires personal information on residency, immigration status, race/ethnicity, marital status, household income, employment status, insurance coverage, certification by a pharmacist and physician.

(c) If approved for participation in the Program, the Department or its designee will notify the individual, his or her physician or other licensed health care practitioner acting within his or her scope of practice, and the pharmacy from which the prescription will be filled.

### SUBCHAPTER 4. HIV COUNSELING AND TESTING OF PREGNANT WOMEN

#### 8:61-4.1 HIV counseling and testing of pregnant women

(a) A physician or other licensed health care practitioner acting within his or her scope of practice who is the primary caregiver for a pregnant woman, or who makes a diagnosis of pregnancy, or who is the primary caregiver for a woman who seeks treatment relating to the pregnancy within four weeks of giving birth (hereinafter referred to as "provider"), shall provide information on HIV and AIDS and offer testing for HIV infection to all pregnant women or a woman who seeks treatment within four weeks of being postpartum

to whom he or she is providing care, unless it is known by the provider that the woman has already been given the required information and has been tested for HIV infection during her pregnancy or within four weeks of being postpartum. The provider may delegate the tasks of providing to the patient information on HIV and AIDS and offering the patient HIV testing to another licensed health care practitioner whose scope of practice would include these tasks, or to a trained HIV counselor.

1. The provider, as the patient's primary caregiver, shall retain the responsibility of ensuring that the delegated tasks are actually performed in the manner required under this section and that the performance of the delegated tasks is within either:

- i. The scope of practice of the health care practitioner to whom the tasks are delegated; or
- ii. The level of capabilities in which the HIV counselor has been trained.

(b) The provider shall comply with this section when the provider in the reasonable exercise of professional judgment and within the provider's licensed scope of practice knows or should know that a patient is pregnant.

(c) The provider shall ask that the woman sign a form, prepared by the Department, acknowledging that she has received the required information and indicated her preference regarding testing for HIV infection. Blank copies of this form will be made available to physicians, who may reproduce as many copies as necessary for use in their practice. In addition, the form shall be available for download from the Department's website at <http://nj.gov/health/forms/index.shtml>, and shall be available upon request by writing to the Division of HIV/AIDS Services, New Jersey Department of Health and Senior Services, 50 East State Street, 3rd Floor, PO Box 363, Trenton, NJ 08625-0363 or by telephoning (609) 984-5874.

1. If the woman refuses to sign the form, the provider shall enter a note into the woman's medical record. The note shall document the provider's provision in good faith of the required information and offer of testing in a manner that afforded informed consent, and shall describe the provider's efforts to address patient-specific needs and factors such as language barriers and comprehension ability.

(d) The provider may use a different form than the one provided by the Department, provided that the woman's signature is obtained and the physician's form contains, at a minimum, all of the information on the form prepared by the Department. Specifically, any substitute form shall contain a statement that the woman has received information concerning:

1. How HIV is transmitted;

2. The benefits of voluntary testing for HIV infection and of knowing whether or not she is infected with HIV;

3. The treatments that are available to her and her child should the test be positive; and

4. The right to refuse the test and without fear of denial of appropriate prenatal care due to this refusal. The form shall also indicate whether or not the woman has decided to be tested for HIV infection.

(e) The provider shall make every reasonable effort to provide the woman with the results of the test for HIV infection, and the meaning of those results. The provider shall advise women who have a negative test result of measures to prevent HIV infection. The provider shall advise women who test positive or indeterminate of:

1. The appropriateness of and need for further testing;
2. Methods to prevent transmission of HIV;
3. Appropriate medical care for the woman;
4. Recommended treatment to reduce the risk of mother-to-infant transmission of HIV; and
5. The availability of appropriate social and other necessary services.

(f) A provider who cannot follow through with counseling or further care of a woman with a positive or indeterminate test result shall initiate a referral to another health care practitioner who, within the scope of practice of the particular practitioner, is able to and will provide counseling and care for the woman.

(g) Information and test results obtained pursuant to this section shall be held confidential in accordance with N.J.S.A. 26:5C-5 et seq., as amended and supplemented, and N.J.A.C. 8:57-2, as amended and supplemented. For the purposes of disease prevention and control, the provider may make the woman's test results known to the health care practitioner caring for the woman's infant. The Department or its designee may contact an HIV-positive woman or her infant's health care practitioner to follow up on the HIV status and HIV-related care of the infant. The health care practitioner caring for the infant shall also keep this information confidential in accordance with N.J.S.A. 26:5C-5 et seq., as amended and supplemented, and N.J.A.C. 8:57-2, as amended and supplemented.

(h) The following guidance documents containing recommendations for counseling and treating pregnant women with respect to HIV are available upon request by writing to the Division of HIV/AIDS Services, New Jersey Department of Health and Senior Services, 50 East State Street, 3rd Floor, PO Box 363, Trenton, NJ 08625-0363 or by telephoning (609) 984-5874:

#### SUBCHAPTER 5. DISCLOSURE OF INFORMATION TO FULL-TIME CAREGIVERS

##### 8:61-5.1 Disclosure of information to full-time caregivers

The contents of a child's HIV/AIDS records may be disclosed by health care providers to the Division of Youth and Family Services. The Division of Youth and Family Services may disclose such information on a need-to-know basis to private adoption agencies certified by the Division of Youth and Family Services and to foster care agencies with which the Division of Youth and Family Services contracts. The Division of Youth and Family Services, private adoption agencies certified by the Division of Youth and Family Services, and foster care agencies with which the Division of Youth and Family Services contracts may disclose the contents of a child's HIV/AIDS record on a need-to-know basis for the care and treatment of the child to any full-time caregiver. Individuals receiving such information shall keep the information confidential, pursuant to N.J.S.A. 26:5C-10.
