

Brooke

1) How has your life changed since March as a result of the COVID-19 pandemic?

It changed dramatically over the months especially with school. I'm not getting the full college experience I pictured. Everything is Virtual and it's hard to get to know people and your professors during the epidemic.

2) What were the main or most trusted sources you received information about COVID-19 from?

The news, work, school, and social media!

2a) How did you act upon the information you received?

Calmly and tried to still get certain things done as best I could just work around the epidemic.

2b) Have you developed any new sources of information?

Yes, I can say the news has been a major factor, and social media because the word spreads fast in both media.

3) What was the hardest/biggest challenge for you or your family during/amidst COVID-19?

Trying not to get sick and making sure to save and make money.

4) In what ways did you address the challenges of COVID-19? What challenges do you expect will remain post-COVID-19?

I feel as though wearing a mask is a challenge. I don't believe it helps, actually makes it worse, and I expect that the government will make us remain to keep them on.

5) What are your greatest fears moving forward?

That Covid will never go away!

6) Did you have any conversations with healthcare or other service providers about COVID-19? What did this conversation look like? Who said what?

I actually didn't have a conversation about healthcare services.

7) What COVID-19 resources are you aware of, or have you benefited from?

They give a free test in Camden at virtual.

8) Do you think that all communities have been treated equally during COVID? Were there populations who were favored over others?

Actually, I feel as though everyone has been treated the same, only in certain areas where companies were open more than others.

9) Who do you think was left out of NJ's emergency COVID response? Why were they left out?

They are left out because New Jersey strongly discourages all non-essential interstate travel at this time.

10) What do you think NJ could have done better?

Had a better plan and did a vaccine to get rid of Covid, or even try to.
