

NEW JERSEY DIVISION OF VOCATIONAL REHABILITATION SERVICES

Volume 6 Number 3

Summer 1988

In Memoriam

We all mourn the passing of Joseph L. Weinberg a leader in the rehabilitation field in the State of New Jersey. Joe served as Executive Director at Jewish Vocational Service in East Orange for 30 years and was a major force in the professional development of our facilities.

His contributions, influence, and personal dedication will be remembered.

The MSEPU "X" Factor

From time to time a client transfers from one facility to another. This has been creating a problem for one or both facilities in some instances. The difficulties arise when the facility from whom the client is transferring does not promptly report the client as leaving.

The facility that the client goes to does tend to report that fact promptly. A month or so later when the other facility reports the client as gone, usually by declaring them a "T", or terminated, the client's name gets removed from the EE file. This causes Mr. Selby to deny attendance credit for the client and the specialists must go back and recertify the client.

In order to clear up some of confusion that results from these transactions we are adding a new code, X, to the existing codes. If a client transfers from one facility to another, the facility from which the client leaves should enter the code "X" and the last date that the client was in attendance at their facility.

The int goes should and the first date cactually attends their This should alleviate the process we are currently experiencing.

Having reviewed Dr. William A. Anthony, Tor K.S. Danley, and Joanna Howell, . S. who are associated with Center for Rehabilitation Research & Training in Mental Health, as well as the research finding by Thomas J. Malamud on the "Clubhouse Model for Psychiatric Rehabilitation", one is encouraged with the outcomes being achieved with the Psychiatric Popu-While it is recognized that the Vocational Rehabilitation system places much emphasis work, the literature suggest "that psychiatric clients are confronted with a mental health/rehabilitation system that historically has not attached a high priority to the vocational rehabilitation of verely psychiatrically disabled clients. In addition, clients seem to be caught between philosophies of two service providers. Mental health service providers believe that clients need to work so that they can get well, while the vocational rehabilitation service providers operate on the assumption

DVR-111 (R-3-86)

that clients must be well in order to work. The complexities involved in rehabilitating the psychiatrically disabled for a work environimmense. ment are The living, learning and working environment in which the individual will function must be addressed separately but then viewed as a whole. Other facts noted for the psychiatrically disabled include:

- Clients often lose their jobs not because of inability to perform job tasks, but because of skill deficits in the interpersonal area of functioning, which must be assessed and treated as a part of the vocational program.
- Clients who have lost their jobs often do not possess the skills necessary to obtain a similar job due to the lack of job seeking skills.
- 3. Clients who are no longer interested or unable to maintain jobs for which they have previous experience or training often do not know how to choose a new vocational objective due to the lack of career counseling.
- Disincentives to employment, 4. such as loss of social security benefits, medicaid, food stamps, cannot be ignored by practitioners and clients. The advantages and disadvantages of obtaining employment must bе addressed directly with clients. Issues of why to work as well as what work to choose need to be discussed.

As I have found in my review of Partial Care Centers and as pointed out in the literature, a common mistake is waiting until the treatment program is nearly complete before vocational rehabilitation issues are even considered. Many may perceive the V.R. process to be simply a matter of finding a

job for the client and placing the client in it, thereby totally misperceiving the <u>time</u> and complexity involved.

Research from Fountain House on the "Club House" model indicate that from agency intake to securing full-time successful employment can be five years or more. However, there is far more optimism in working with the mentally ill population than has been previously expected or reported. Again, my review indicates that the basic tools and resources are contained in our Partial Care Centers but we lack application of comprehensive psychiatric rehabilitation proach! While the new initiatives Supported Employment for chronically Mentally Illclient will provide new avenues for some, this effort will not be the total answer, but a starting point commitment for agencies to work together. Hopefully as we exchange ideals, program refinement and additional staff training will occur in vocational rehabilitation of the psychiatrically disabled. All will benefit - especially our clients. We invite your ideals. Ιf you would like additional information or a copy of "Vocational Rehabilitation of the Psychiatrically Disabled" let us know.

It is recognized that many of our former readers have changed positions, both internal and external to the facilities movement and appreciation is expressed for your contributions. However, a welcome is also extended to the new staff, especially ones I have not formally met, and we hope for a long partnership. Best wishes for a pleasant summer!

Occupational Training Center of Burlington County recently opened a large recycling center. This provides employment to a number of extended employees in positions of sorters, material handlers and truck helpers.

The center also has developed outstation job sites in Burlington County which provide employment to several persons. One of these locations is manufacturer of household A divercleaning equipment. sified number οf jobs are filled by clients and several job placements have been made with this company. The center is negotiating with a restaurant firm for training and placement positions. This company has several locations in accessible Burlington County to public transportation.

TRIS and CamCare Centers have been awarded a Supported Employment grant. This grant provides for two job coaches, one stationed at each facility, as well as office and travel expenses. Job descripand duties are candidates prepared and are being interviewed. I will be advised when the persons are hired for these positions.

Very Special Arts New Jersey

VISIBILITY, a coalition professional artists with disabilities is seeking artists who happen to be disabled for its Second Annual Juried Art Show to be held in October 1988. The exhibit will run for one month at the Center for the Arts in Southern New Jersey Marlton.

The Center for the Southern New Jersey is housed in a corporate setting. Works will be on display in the Center for the Arts Gallery and the corporate lobstaffed by. This is a encouraged sales are thirty percent commission will be

charged. Works will be insured while on the premises and cash prizes will be offered to works judged most outstanding.

VISIBILITY is a project of Very Special Arts New Jersey who is co-sponsored by the Middlesex County Cultural and Heritage Commission with funding in part from the New Jersey State Council on the Arts, the Geraldine R. Dodge Foundation, and the Morris J. & Betty Kaplun Foundation. VISIBILITY is dedicated to improving the image of the artist with a disability.

Works will be juried by 35 mm slides. For prospectus and further information please contact VISIBILITY-VSA/NJ, 841 Georges Road, North Brunswick, N.J. 08902 or call 201-745-3885.

National Endowment for the Arts Awards \$40,000 Grant to Blindness Organization for Tactile Exhibition

WASHINGTON, DC -- The National Endowment for the Arts has awarded a \$40,000 matching grant to the American Foundation for the Blind to construct and install tactile scale models of historical Washington, DC, buildings and monuments so that blind and visually impaired visitors can appreciate their architectural design.

Called "Capital Sights Not Always Seen," the exhibition is scheduled to open at a yet undesignated permanent location in downtown Washington in the fall of It will include tactile 1989. scale models of such major buildings and monuments as the U.S. Capitol and the Lincoln Memorial, while additional information about the historical, political and cultural forces that shaped the nation's capital will be provided through an audio component and brochures in braille and large print.

To determine the effective scale, amount of detail and appropriate materials which can communicate through touch information about architectural design, AFB is working with a research team headed by Joseph W. Wiedel, a leading tactile cartographer and associate professor of geography at the University of Maryland.

"The tactile models will allow blind people to understand the beauty of these structures through touch," said U.S. Congressman Bill Green (R-NY). Green, who represents New York City's 15th District where AFB is headquartered at 15 West 16th Street, announced the National Endowment for the Arts grant at a special ceremony at his Washington office.

"AFB's Mid-Atlantic Regional Center Advisory Board in Washington has enthusiastically undertaken 'Capital Sights Not Always Seen' as a special project," said AFB Executive Director William F. Gallagher. "The volunteer board has raised \$40,000 to match the federal grants."

To complete funding for the project, the board is planning a Washington's Birthday benefit auction of mock "quit claim deeds" to the model structures. Mr. and Mrs. Livingston Biddle are honorary chairpersons for the benefit, which will be held on February 22, 1989. Biddle is a former chairman of the National Endowment for the Arts which pioneered the concept of access to the arts for persons with dis bilities. For more information abo t "Capital Sights Not Always See , " contact Patricia Beattie, Community Consultant, AFE Atlantic Regional Center, 1615 M Street, NW, Washington, DC 20036; (202) 457-1494.

AFB is a national, nonprofit organization that advocates, develops and provides programs and services to help blind and visually impaired people achieve independence with dignity. The organization maintains regional centers in Atlanta, Chicago, Dallas, New York, San Francisco and Washington, DC.

News! News! News!

BUSINESS WEEK - JUNE 20, 1988 reported Prab Command, Inc. of Kalamazoo, Michigan has created two highly sophisticated robot aides for the handicapped.

- 1. a robotic arm
- 2. a voice controlled work station

Prab plans to train the disabled to use the robot at rehabilitation facilities around the country.

Cost Study Report on Facility VR and Extended Employment Programs Operated by Facilities During Fiscal Years 1985-1986

by David P. Selby, Grants Manager

Our Grants Management and auditing staff recently completed their review of the VR (Evaluation and Work Adjustment Training) and Extended Employment Program costs vocational rehabilitation facilities on the basis of their annual auditor's reports which were filed with us for their fiscal years ending between March 31, 1985 and December 31, 1986. A similar study was conducted during the previous 1983-1984 fiscal years and the results of it were reported in the Winter 1986 issue of "Facilities Facets".

In each of these two-year periods, the facilities' VR and Extended Employment program costs were reviewed by us for reasonableness, allocability, and appropriateness to the programs and services it provided, in accordance with Principles and Procedures for Determining Costs of Rehabilitation Facility Programs, Services, Revised October 1, 1986, per N.J. VR Facilities Rules and Regulations 12:51-8.2(b).

It is our opinion that this study and report, as summarized on the following pages, both demonstrates and documents that DVRS funding policies have continued to provide adequate funding and financial support to those facilities which were managed in a costefficient manner, at levels of service consistent with DVRS requirements, and effectively utilizing all of the resources available to them.

In our 1985-1986 Cost Study, we found that in ten of the 15 facilities reviewed, DVRS VR programs costs averaged 15 to 18 per cent higher than the average DVRS fees which were paid in them. In the other five

facilities reviewed, the DVRS VR fees which were paid equalled, or exceeded the DVRS-sponsored VR program costs. Overall, DVRS VR fees averaged 93% of the total program costs which we considered to be reasonable during those two years, at an average rate paid then of \$13.00 per day.

On June 30, 1986, this average VR fee paid of \$13.00 was authorized by our Director, George Chizmadia, to be increased to \$14.25 per day, an effective annual increase of 9.6%.

In the same study, we also found that the average actual facility cost to evaluate and train a VR client for employment was \$1,960 for which it received an average fee of \$1,815. This compares to both an average cost and fee paid per client of \$1,790 during the 1983 and 1984 years.

In fiscal year 1985, State Extended Employment funds were appropriated to fund 96% of the eligible programs costs reviewed in the 15 facilities which were coststudied. This percentage represents an actual appropriation per EE client annually served \$2,364, and an average annual cost to a facility \$2,475. Facilities also expended an additional ten, or more per cent in funds for other client services transportation which were covered under our contracts with them. Funds for these expenditures were usually tained from local community and/or other governmental support and grants.

Between 1983 and 1986. the average EE facility cost per client increased by 17% from \$2,145 per year to an estimated \$2,509 per year. During same period, the funds appropriated by the Legislature annually increased by 50% from\$1,670 to an estimated \$2,509 per year, increasing the State's funding share of the EE program's cost from 77% in 1983, to an estimated 100% in FY

However, in 1987, the State's funding share dropped to an estimated 88% due to an increase of 9% in the total number of clients served in the program during that year without any increase in appropriations for it, despite the DVRS Director's request for such additional fundings.

Commencing in FY '88, legislation and funding to support 100% of facilities' EE program costs have been recommended and approved by both our Department of Labor and the Legislature.

1985 and 1986, During eleven out of the fifteen facilities reviewed reported in their annual auditor reports to us annual Agencyaverage wide net operating gains οf \$50,000, over after consideration of local community support and all Agency expenses. Only four reported average Agency-wide annual losses of less than \$50,000 in each facility.

In our previous 1983-1984 cost review, only two-thirds of them (twelve out of eighteen) reported similar net annual operating gains in the annual reports which they issued.

Independent Living News

NEW BRUNSWICK - At a meeting of the New Jersey Independent Living Advisory Council, George Chizmadia, Director of the New Jersey Department of Labor's Division of Vocational Rehabilitation Services (DVRS), announced Governor Kean and Legislature have provided \$500,000 to create five new Independent Living Centers around the state to provide services to disabled persons. This will bring the number of centers funded by DVRS to DVRS is the state agency that provides services to disabled persons to enable them to become employed and live independent lives. An Independent Living Center assists with advocacy, housing, rehabilitation engineering and other services to enable physically disabled persons to live as independently as possible.

Chizmadia thanked the members of the Council and their constituents for their support to DVRS efforts to expand these services. "There has long been a need for the expansion of these services as many disabled persons are unable reach the existing centers," "We plan to Chizmadia explained. have an improved marketing effort in this area to inform the public of these services."

Any organization or group of disabled persons wishing to organize and operate an Independent Living Center may request an request an application kit from Carroll Mrowicki, Program Manager for Independent Living Services at 609-292-7498.
