

7:13-7.1 Delineated floodways

(a) The streams listed in (b), (c), (d), (e), (f) and (g) below have been delineated following public hearings by the Water Policy and Supply Council, and information concerning these delineations is on file in the offices of the Division of Water Resources:

1. Type 1: A flood hazard area map has been prepared setting forth floodway limits and extent of flood

hazard area limits. Water surface profiles are included for both the floodway and flood hazard area design floods.

2. Type 2: There is no flood hazard area map available. Delineation must be determined on a case by case basis from the water surface profile which have been developed for both the floodway and flood hazard area design floods.
