Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

PUBLIC NOTICE AND STATEMENT OF BASIS

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to restrict and control the discharge of water from the United Water Toms River Parkway Wells Numbers 26, 28 and Interceptor Well #26B. The water from these wells are treated by an air stripper and pumped via a 12 inch main to two sets of Granulated Activated Carbon (GAC) Contactors which can be operated in parallel or series mode. The treated water from the GAC Treatment System is conveyed to the Garden State Parkway (GSP) storm sewer headwall structure via approximately 2,200 feet of 12-inch diameter ductile iron pipe. The treated water is piped into a pipeline under the Garden State Parkway on the East Side and discharges to the ground once it exits the pipeline on the West Side of the Parkway. The system design flow is 1,400 gallons per minute. In addition to this continuous flow, a small amount of ground water associated with periodic monitoring related to the Reich Farm plume will be treated and discharged under this permit.

This notice is being given to inform the public that the Department has prepared a draft NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM / DISCHARGE TO GROUND WATER (NJPDES/DGW) permit NJPDES NO. NJ7002114 in accordance with the provisions of the New Jersey "Water Pollution Control Act" (N.J.S.A. 58:10A-1 et seq.), its implementing regulations (N.J.A.C. 7:14A-1 et seq.), and the Ground Water Quality Standards (N.J.A.C. 7:9-6 et seq.).

The implementation of the New Jersey Pollutant Discharge Elimination System requirements are the enforcement mechanism by which pollutant discharges are brought into conformance and compliance with laws, regulations and standards. The pollution control requirements are those conditions necessary to restrict the discharge of pollutants and protect the public health and the environment. This particular discharge has no exceedances above standards mandated by the Safe Drinking Water Act, the Ground Water Quality Standards or any Federal Maximum Contaminant Levels. This discharge is being performed as a precautionary measure, since the toxicity of the group of substances found, referred to as "SAN trimer", is unknown. It should be noted that the "SAN trimer" has not been detected in the discharge.

The draft document prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, between 8:30 A.M. and 4:00 P.M., Monday through Friday. Information regarding appointments for inspection may be scheduled by calling Richard Yarsinsky at (609)-633-0763.

Interested persons may submit written comments on the draft permit to the Assistant Director, Responsible Party Cleanup Element, PO Box 028, 401 East State Street, Trenton, New Jersey, 08625. All comments shall be submitted within 30 days of the date of this public notice. All persons, including the owner or operator, who believe that any condition set forth in this document is inappropriate, must raise all reasonably ascertainable issues and submit in writing to the Department all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All comments submitted by interested persons in response to this notice, within the public comment period, will be considered by the Department with respect to the requirements being applied to this facility. After the close of the public comment period, the Department will make a final decision. The Department will respond to all significant and timely comments when a final decision is made. The owner or operator and each person who has submitted written comments will receive notice of Department's final decision.

Any interested person may request in writing that the Department hold a nonadversarial public hearing on the draft document. This request shall state the nature of the issues to be raised in the proposed hearing and shall be submitted within 30 days of the date of this public notice to the Assistant Director, Responsible Party Cleanup Element, at the address cited above. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period in this notice shall automatically be extended to the close of the public hearing.

Additional information concerning the draft NJPDES Permit may be obtained between the hours of 8 A.M. and 4 P.M., Monday through Friday from Bob Marcolina of the Bureau of Case Management at 609-633-7237.

Olbrys Landfill NJPDES Permit No. NJ0055476 Ground Water	Spotswood-Englishtown Rd. Monroe Twp. Middlesex County	Judy Majoras Bureau of Nonpoint Pollution Control (609) 292-0407	II-A	This action is a permit renewal for Olbrys Landfill, which is a 35.6 acre site whose actual landfilled area is 14 acres. Blue Heron Plaza NJPDES Permit No. NJ0077127 Ground Water	86 Blue Heron Road Sparta Twp. Sussex County	Ron Bannister Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The proposed Blue Heron Plaza Facility will consist of 206 assisted living and senior care housing units. The Department has accepted an alternate method for the determination of design flow for this facility which equates to 80 gallons per day per unit and is based upon actual flow from similar facilities. Therefore the total projected wastewater flows from the facility will be 16,500 gallons per day (gpd). The sanitary wastewater generated by the proposed facility will be managed by an on-site Wastewater Treatment Facility and will be treated to Ground Water Quality Standards (GWQS) (N.J.A.C. 7:9-6) for all parameters, except fecal coliform bacteria, prior to discharge. Although ultraviolet disinfection will be provided, final treatment to Ground Water Quality Standards for fecal coliform bacteria will be provided by unsaturated soils within the disposal area.
Ames Rubber Corp. NJ0103675 SIU	23-47 Ames Blvd. Hamburg, NJ 07419 Sussex County	Nilesh Naik Bureau of Pretreatment and Residuals (609) 633-3823	Sussex County Municipal Utilities Authority's Upper Wallkill Valley Water Pollution Control Facility (SCMUA-UWVWPCF)	The applicant at this facility manufactures rubber products for office machine, automobile equipments, etc., SIC Code 3069. Approximately 7000 gallons per day (gpd) of wastewater from manufacturing processes along with 7500 gpd of sanitary wastewater is discharged to SCMUA-UWVWPCF. The permittee, pursuant to N.J.A.C. 7:14A-21.9(c), has requested revocation of their individual NJPDES/SIU. The permittee has indicated that the average process wastewater discharged from the facility is approximately 7000 gallons per day. Therefore, the permittee has ceased to meet all criteria under which an individual NJPDES/SIU permit is required. Hence, the Department proposes to revoke the individual NJPDES/SIU permit in accordance with N.J.A.C. 7:14A-16.6 and 21.9. The facility may continue discharging after the permit is revoked in accordance with the SCMUA-VWVWPCF's requirements and requirements specified under N.J.A.C. 7:14A-21.2.
