General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally, their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Narrative	Project involves:(1)reconstruction of previously existing development consisting of restaurant and residential dwelling authorized by DEP; and(2) addition of two dwelling units authorized by DEP under CAFRA General permit on adjacent lot. Net result is to consolidate DEP authorized structures into single building while preserving half the total site area (lot 16) as open space/parking. Preservation will maintain open view corridor to Egg Harbor Bay (EHB) equal to 50% of site's water frontage. Preservation of lot 16 view corridor will allow continued visual access to EHB from Anchorage Tavern/Restaurant, the oldest continuously operated establishment (1874) in Somers Point. Project does not include setback from the waterfront pursuant to NJAC 7:7-16.10(d)2, due to small lot size and circumstances of redevelopment. Specifically, DEP has authorized a greater scope of development on the properties that would preclude the 50% open view corridor proposed and would adversely impact ability to provide public access. Rather than pursuing authorized development and in an effort to provide enhanced environmental and public benefits in the form of physical and visual access to EHB, the project would consolidate all uses into one structure on lot-15.01 and preserve lot 16 through conservation easement for parking and public access. The result of construction will be reconstruction of previously existing development with no water ward expansion. In addition, strict compliance with referenced setback of NJAC7:7-16.10(d)2 would be unduly burdensome and represent an exceptional hardship as it would render the proposed redevelopment unfeasible as sufficient area of upland to construct project would not be available.

Narrative

EHB, the project would consolidate all uses into one structure on lot-15.01 and preserve lot 16 through conservation easement. Construction will be reconstruction of previously existing development with no water ward expansion. In addition, strict compliance with NJAC7:7-16.10(d)2 would be unduly burdensome and represent an exceptional hardship as it would render the proposed re-upland to construct project would not be available.
