How to Prepare for a Disaster

[Learn what you can do to be ready for when a disaster happens.](#)

Steps to Follow After a Disaster
Your Disaster Recovery Plan

Step 1

Address your immediate needs.

For emergencies, call 911.

To help find immediate shelter, contact your local government or the Red Cross at 1-800-RedCross. The Red Cross may also assist you to obtain essential food or medicine.

Monitor the media or engage with your local government representatives for important announcements.

Step 2

Check for disaster declaration.

When the President declares a major disaster, relief opportunities including financial assistance from FEMA and SBA become available. Use the tool below to search active declarations in your area.
