The mobility of the population of this country and the resulting increasing cooperation between social and welfare agencies has brought about the need for a great number of specialized directories or handbooks.

We hope that this handbook will facilitate the more effective functioning of agencies dealing with the mentally deficient.

Sanford Bates  
Commissioner

January 1951

"State Services for the Mentally Deficient in the United States"

This handbook was developed out of a need for a compilation of properly identified services for the mentally deficient. It is limited to the services at the state level and identifies:

- A. - Person responsible administratively for institutional services for the mentally deficient.
- B. - Person, at state level, to whom persons should be referred for information regarding admissions.
- C. - Person, at state level, to be contacted regarding home investigations and supervision of the mentally retarded.

Also are given (1) the number of private schools for the mentally retarded and (2) the names and addresses of the executive officers of the state schools or institutions for the mentally deficient.

The compiler assumes no responsibility for the accuracy of the listings, all of which were received from an authoritative source in each state. The final entry was checked prior to mimeographing.

If this handbook proves to be helpful, it may be brought up-to-date perhaps biannually. Suggestions for the improvement of it will be deeply appreciated. The aid given by all states is deeply appreciated as is that contributed by Miss Miriam B. Lerner, Assistant to the Director of the Division of Classification and Education.

L. N. Yepsen, Ph. D., Director  
Division Classification and Education
