# Preface

#### PREFACE – A MESSAGE FROM THE CHAIR/CEO, CIVIL SERVICE COMMISSION

I am pleased to present the 2011 edition of the State Government Workforce Profile. Since 1992, when the first edition was published, this Profile has been one of the principal sources of information about the State Government workforce. I hope it continues to be a valuable resource for legislators, State and local government officials, researchers, students, and members of the general public.

It is important that stakeholders and the general public know how public sector employees are managed. The Workforce Profile gives information about how State employees are deployed, what kind of salaries they are paid, their distribution by age, length of service, race/ethnic identification, gender, and occupational specialty, and the employee organizations that represent them. It also monitors human resources dynamics such as hiring and separation. In addition, it gives some basic information about employment in local jurisdictions that operate under the Civil Service system (counties, municipalities, and a number of school districts and special districts).

I hope that you will find this Profile useful, and I look forward to receiving your feedback.

Respectfully yours,

Robert M. Czech

Chair/CEO, Civil Service Commission

# New Jersey State Government Workforce Profile

## STATE OF NEW JERSEY STATE GOVERNMENT WORKFORCE PROFILE 2011 INTRODUCTION

This Workforce Profile was compiled by the New Jersey Civil Service Commission from data captured by the Commission's automated personnel files, Office of Management and Budget automated payroll files, and a telephone survey. It includes profiles of New Jersey's State Government workforce as of December 31, 2010, comparisons of the workforce at the end of Fiscal Year 2010 with its composition at the end of previous fiscal years, and summaries of personnel actions during Fiscal Year 2010.

The Workforce Profile includes trend data where significant trends exist, and where data have been retained long enough to document trends. In cases where we have charted a distribution of employees by some variable (for example, by age or by salary), we have compared the most recent distribution with the previous year's distribution where possible. Longer-term trend charts typically plot a single value (an average, total, or net change) by year, to avoid excessive complexity. However, we have reproduced total counts by agency for every year since 1960.

Workforce Profiles since 1995 reflect many changes in the structure of State Government. Where possible, we have noted changes in staffing that are due to these structural changes rather than to routine movement into and out of the State Government workforce. We annotate the current changes where they appear on the corresponding charts. Historically, changes include:

- The addition of county-level Judiciary (Superior Court) employees to the State Government workforce in 1995.
- The elimination of the Departments of Higher Education and Public Advocate in 1995, the reestablishment of the Department of the Public Advocate as a principal department in the Executive Branch in 2005, and its second elimination in 2010.
- The merger of the Departments of Banking and Insurance in 1996.
- The creation of the Juvenile Justice Commission in 1995.
- The transfer of the Division of Motor Vehicles from the Department of Law and Public Safety to the Department of Transportation in 1995, and its subsequent reorganization as the Motor Vehicle Commission, allocated in but not of the Department of Transportation, in 2003.
- The creation of the Higher Educational Student Assistance Authority to succeed the Office of Student Assistance in 1999.
- The creation of the Commerce and Economic Growth Commission in 1998 to replace the Department of Commerce and Economic Development (it was re-designated the New Jersey Commerce, Economic Growth, and Tourism Commission in 2006).
- The creation of the Office of Information Technology by executive order in 1998, evolving from the Office of Telecommunications and Information Systems (OTIS), which was created in 1984. OTIS was developed to centralize statewide information processing and data storage.
- The reallocation of the Office of Administrative Law and the Office of the Public Defender from "in but not of" the Department of State to "in but not of" the Department of the Treasury in 1999.

## STATE OF NEW JERSEY STATE GOVERNMENT WORKFORCE PROFILE 2011 INTRODUCTION

- The reorganization of the State Parole Board to an autonomous agency "in but not of" Corrections in 2001. The defining law changed the Bureau of Parole, Department of Corrections to the Division of Parole, State Parole Board.
- The establishment of the Office of the Child Advocate in 2003 and its inclusion as an independent office within the Department of the Public Advocate in 2006.
- The reorganization of the Office of the Ratepayer Advocate in 2006 as the Division of Rate Counsel in the Department of the Public Advocate, and the reassignment of the Division of Rate Counsel to the Department of the Treasury in 2010.
- The establishment of the Department of Children and Families in 2006. The new department was staffed by over 6,600 state child welfare employees who were already working in divisions of the Department of Human Services.
- The creation of the Office of Homeland Security and Preparedness (OHSP) by Executive Order in 2006. OHSP absorbed the functions of the former State Office of Counter-Terrorism in the Department of Law and Public Safety. Although the Office is allocated "in but not of" the Department of Law and Public Safety, the Director reports directly to the Governor as a cabinet-level official.
- The elimination of the Department of Personnel in 2008 and the transfer of its functions and powers to the newly established Civil Service Commission, allocated in but not of the Department of Labor and Workforce Development, and to the Office of Workforce Initiatives and Development in the Department of the Treasury.

Most of these reports are based on the Civil Service Commission's own records. However, some of this information, such as union representation of State Government employees, is available only from the Department of the Treasury's Centralized Payroll Office. The Centralized Payroll system, which produces data that frequently appears in budget documents, tracks different information than the Civil Service Commission's automated personnel files. Civil Service Commission counts include all employees, including those on leave without pay. Employees on leave without pay are not included in paycheck counts from Centralized Payroll. We count these employees because they are still legally employees while they are on leave.

## STATE OF NEW JERSEY STATE GOVERNMENT WORKFORCE PROFILE 2011 INTRODUCTION

This Workforce Profile includes breakdown data for agencies whose employees are paid through Centralized Payroll and that State law places "in but not of" the constitutionally authorized departments. One exception is the Palisades Interstate Park Commission (PIP), which was established by compact between New Jersey and New York, but is allocated within the State Department of Environmental Protection. Data on PIP employment is limited to employee counts from their payroll office records. It is reported in our "Other State Government" section on Page 12. The following breakdowns are included in the main body of this publication:

- The State Parole Board is "in but not of" the Department of Corrections.
- The Juvenile Justice Commission and the Office of Homeland Security and Preparedness are "in but not of" the Department of Law and Public Safety.
- The Commission on Higher Education, the Higher Education Student Assistance Authority, and Public Broadcasting are "in but not of" the Department of State.
- The Motor Vehicle Commission is "in but not of" the Department of Transportation.
- The Office of Administrative Law, the Office of the Public Defender, the Casino Control Commission, and the Board of Public Utilities are all "in but not of" the Department of the Treasury.
- The Civil Service Commission is "in but not of" the Department of Labor and Workforce Development.

On all appropriate tables, departments that include "in but not of" agencies have the department proper in boldface and all capital letters and the "in but not of" agencies indented and shown in regular typeface and letters.

A general overview of the number of State Government employees in each agency is provided, along with some important statistics for the entire State Government workforce. We have provided the January 2009 and January 2010 employee counts for comparison, with the actual and percentage increase or decrease alongside. Overall, there has been a decrease of 4.3 percent in the size of the State Government workforce over a two year period.

The Civil Service Commission welcomes your comments and questions regarding this report, which can also be found on the Commission's website at **www.state.nj.us/csc/publication/index.htm**. The Commission's Office of Planning and Research can assist individual agencies with specific workforce analyses. For more information, contact Jeff Richter at (609) 984-1044.

## STATISTICS BY AGENCY

INTRODUCTION

The following group of tables shows statistics for each of the Executive Agencies, the Judiciary, and the Office of Legislative Services. Page 7 presents counts of employees by work schedule. In addition to full-time salaried employees and part-time salaried employees (who are paid a percentage of a full-time salary), some agencies employ seasonal or intermittent employees who are paid an hourly wage and employees on a "per diem" (daily) basis. A pie chart summarizes the totals for the entire State Government workforce.

Since 1992, when the Department of Personnel – the predecessor agency of the Civil Service Commission - first published a State Government Workforce Profile, the public has had two principal sources of information about the State Government workforce. One is the Workforce Profile and the other is the annual Budget Recommendation which is prepared by the Office of Management and Budget (OMB). For cogent administrative reasons, these two publications, and the organizations that prepare them, report employees differently. Because OMB's primary concern with employees is their impact on the State Government's fiscal resources, it counts only those employees who actually draw paychecks during the pay period in which they take the measurement. Because the Civil Service Commission's primary concern with employees is their legal and administrative status, we count all employees who are in active status, regardless of whether they are drawing a paycheck during the pay period in which we take the measurement. It would not be an advantage for either publication to abandon the way in which it counts, because it would then sacrifice this historical perspective.

This year, we continue to bridge the gap between the two publications. This is a worthwhile effort, because fiscal concerns are still prominent in the conduct of State Government. The chart on Page 7 presents a breakdown of all employees who were in active status for the pay period that included December 31, 2010. To get a feeling for the differences in results that are associated with the two different ways of reporting, compare that chart with the similar chart on Page 8. The chart on Page 8 addresses the same employee-related variables but includes only the employees who were drawing paychecks for the same pay period. Employees may be in non-pay status for a variety of reasons, including unpaid personal and family leave.

Page 9 shows a breakdown of employees' titles by class of service. It includes a pie chart to show the classification breakdown of State Government titles at a glance, but there is considerable variation in the proportion of employees in career titles among the various agencies. In addition, the employee's appointment does not always match the class of service to which the title is assigned.

Page 10 presents a profile of the "average" State Government employee by agency. In addition to average age, length of service, and salary, we have also computed the median salary for each agency. The "average" or mean salary is the sum of all salaries divided by the number of salaries, while the median salary is the salary of the employee whose name appears at the exact middle of a list of employees sorted by salary. Most employees earn a salary that is below the average, because most jobs are at the lower levels of organizations. As a result, the median salary is usually lower than the mean or "average" salary. Some agencies have a median salary that approaches or exceeds the average; this may indicate a narrower or more uniform distribution of salaries, or a greater proportion of high-level employees.

#### You are Viewing an Archived Copy from the New Jersey State Library

The table on Page 11 shows the distribution of State employees according to the source of funds from which they are paid. State Government organizations are funded from three basic sources: the General Fund, which is raised from general State revenues; Federal funds; and special purpose funds like the Property Tax Relief Fund and the Casino Revenue Fund. In addition to these three sources, one other is shown in the table: revolving funds. Revolving funds are funds that have been established from the General Fund at some point, but sustain themselves from year to year as the organizations that they support charge other State agencies for their services. Examples of organizations supported by revolving funds include the State Government Distribution Center and the Office of Information Technology.

Page 12 lists other public sector employers whose employees are sometimes considered part of the State Government workforce. These agencies include public colleges and universities, agencies that operate across state borders, and various commissions and authorities that do not enter employee information into the Civil Service Commission's automated files and are not on the State Government Centralized Payroll. We have presented data on these employers collected by a telephone survey, and have included information on the sources of funds for each agency.

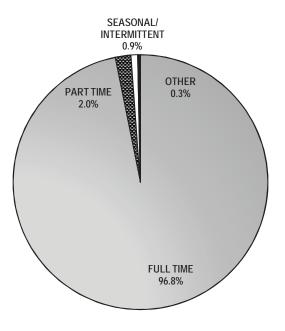

For additional information on State College employees who fall under the Merit System, please see Pages 51 and 52.

<sup>5</sup> On June 30, 2008, the New Jersey Commerce Commission was abolished and the functions were transferred to the New Jersey Economic Development Authority.

## AGE, SERVICE LENGTH, SEPARATION AND HIRING DATA FOR STATE GOVERNMENT EMPLOYEES

INTRODUCTION

The next group of charts shows the distribution of State Government employees by length of service and age, and presents information on hiring and separations of employees. The first two charts provide a "snapshot" of the age and length of service for State Government employees on December 31, 2010 (the darkest columns) compared with a similar "snapshots" from previous years. The length of service data indicates that the average length of service in the State Government workforce is 13 years, while the median length of service is 11 years. From 1996 to 2001, the percentage of the State government workforce with more than 10 years of service rose from 50 percent to more than 60 percent. An Early Retirement Initiative program instituted in 2002 ended that trend, and that reversal continued until 2007 and 2008, when 48.2 percent of the workforce had more than ten years of service. Today, the number of employees with 10 years of service or greater represents 52.6 percent of the total workforce.

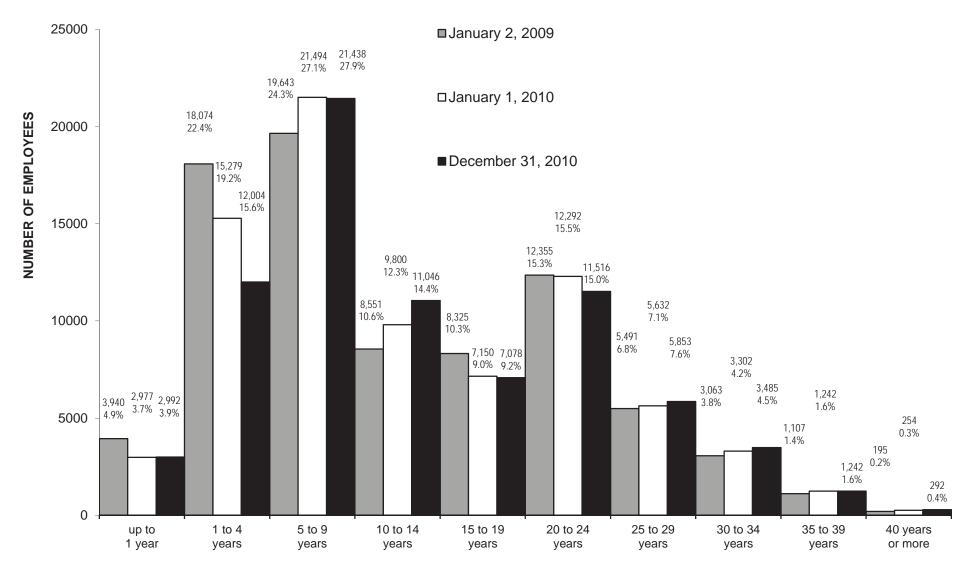

The number of employees age 60 or older has fluctuated slightly during the past several years. Year to year increases occurred in 2000, 2004, 2005, 2006, 2007, 2008, 2010, and 2011. There were decreases in 2001, 2002, 2003, and 2009. In 2000 there were 7,427 employees age 60 or older; two years ago there were 8,182 employees in that same group. The current employee count for age 60 or older is now 9,149, or 11.9 percent of the workforce. For 10 years before 2006, the age group 40 to 49 was the largest employee age group. That breakdown is changing as the workforce ages. Currently, the age group 45 to 54 is the largest, with 24,307 of the State's 76,946 employees, approximately 31.6 percent, in that bracket.

On Page 16, we compare separations during Fiscal Years 2008, 2009, and 2010 by the length of service of separated employees. Separations include voluntary separations (resigned and retired), involuntary separations (terminated and laid off), and deaths. Overall, the total number of separations in Fiscal Year 2010 decreased by 1,095 from the previous Fiscal Year. The separation rate declined from 7.4 percent in Fiscal Year 2009 to 6.3 percent in Fiscal Year 2010. Since 1995, the mean annual number of separations of full time employees has been 5,843. Pages 17 through 23 present additional data for separations from State Government service.

We present similar statistics for hiring activity in State Government on Pages 24 and 25. The overall number of hires during the last 20 fiscal years is presented on Page 24, and the average annual salary for full-time employees hired since Fiscal Year 1991 is represented graphically on Page 25. The average number of new hires in those years is 5,588; however the most recent information shows a significant drop in hiring during the past five years. Counts of new hires dropped from 8,698 in Fiscal Year 2005 to 3,156 in Fiscal Year 2010. From Fiscal Year 2005 to Fiscal Year 2010, there was a 63.7 percent drop in the number of employees hired. The average age of employees hired held steady at 37 years from Fiscal Year 2009 through Fiscal Year 2010. The median age in both fiscal years was 33, which indicates that half of the new hires were age 33 or below. The plotted average salaries of individuals hired during this period followed a relatively stable incline.

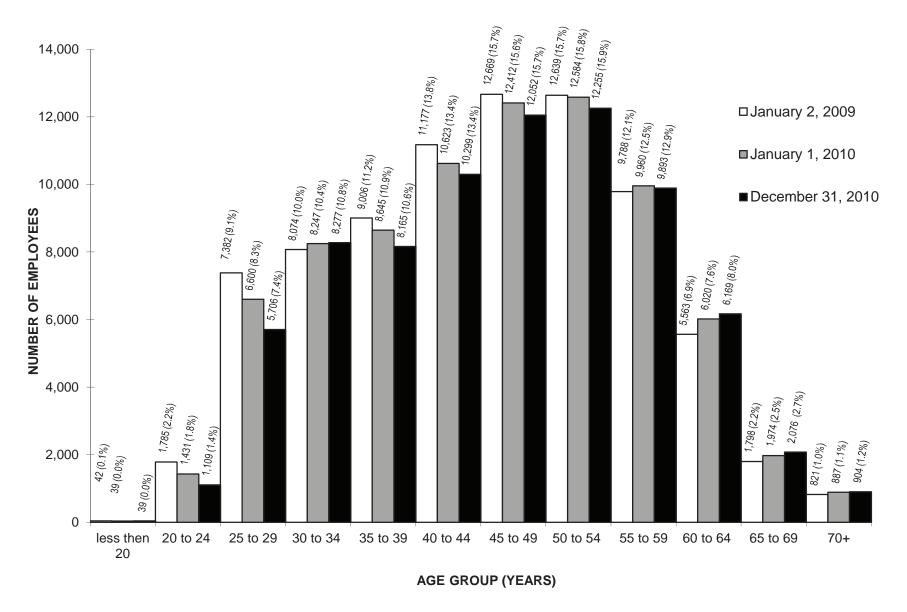

## STATE OF NEW JERSEY DISTRIBUTION OF STATE GOVERNMENT EMPLOYEES BY YEARS OF SERVICE

Some of the difference in separation rates between the earlier and later years in this table may reflect differences in methods of counting. Data is from Civil Service Commission separation reports (1980-1986) and automated files (1990-1994).

Due to transition to a new recording system, data from 1887 through 1989 is incomplete.

An Early Retirement Incentive Program (ERI) was signed into law in 2002 in order to reduce the State's payroll.

Full time State employees were eligible for the additional retirement benefits of the ERI if they retired between February 1 and August 1 of that calendar year and met age and service requirements.

Some extensions beyond the July 1st deadlines were granted. These extensions were made at the convenience of the State Government.

Data from automated Personnel files.

## EDUCATION, LOCATION AND OCCUPATIONAL DATA FOR STATE GOVERNMENT EMPLOYEES

INTRODUCTION

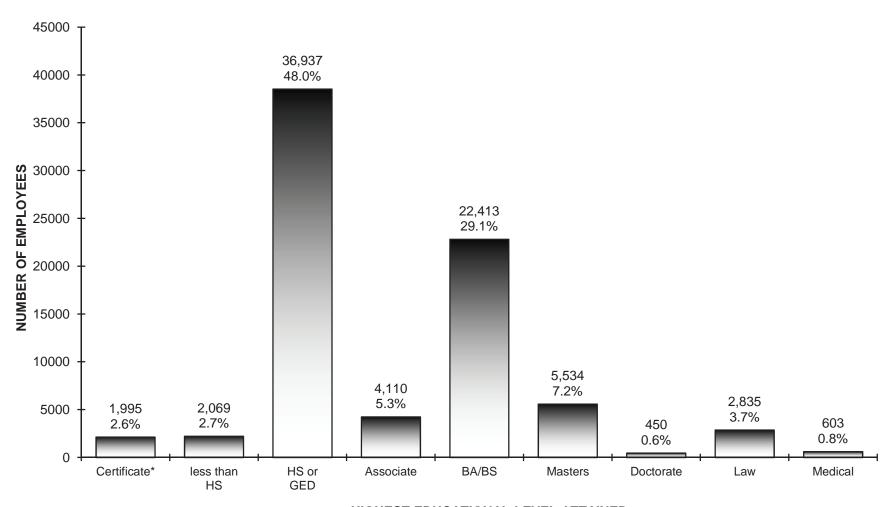

The table on Page 27 counts State Government employees by the highest educational level recorded in the Civil Service Commission's automated personnel files. Each column does not necessarily represent the total number of employees with a given educational degree. For example, even though the category "BA/BS" shows a count of 22,413 employees, the true number of employees with a Bachelor's degree (or equivalent) is 31,835 (or 41 percent of the workforce). That is because people with Master's, Doctoral, Law, or Medical degrees almost always have a Bachelor's degree or its equivalent, even though it is not the highest educational degree on record. This information is collected from State Government employees at the time of hire, and may understate the education credentials of some employees who have continued their education since being hired and have not had their highest degree made a part of their personnel file..

Our analysis of State Government employees by work location (Page 28) shows that more than a third of these employees are stationed in Mercer County, the location of the capital city (Trenton). Essex County ranks a distant second, with many State offices located in Newark, the State's largest city. A bar graph alongside the table shows the number of State Government employees by county. The individuals listed in the table as "out of state" are either out-of-state Tax Auditors or, in the case of Washington, D.C., a liaison officer to the Federal Government.

There is a breakdown of the State Government workforce by EEO categories on Page 29. Page 30 shows the various occupations in each occupational category and a breakdown of occupations by branch of government. Page 31 presents a pie chart showing a breakdown of State Government employees by occupational categories. The employees' titles are categorized according to an Occupational Code Directory developed by Civil Service Commission's Classification and Compensation Unit. This taxonomy groups employees by the type of work performed. We do not show the employees' levels in the organization. For example, the "Professional/Technical/Managerial" category includes employees whose work is in a professional, technical, or managerial area even if they are at lower levels of the organization.

### DISTRIBUTION OF STATE GOVERNMENT EMPLOYEES BY OCCUPATIONAL CATEGORY

### SALARY DATA FOR STATE GOVERNMENT WORKFORCE

INTRODUCTION

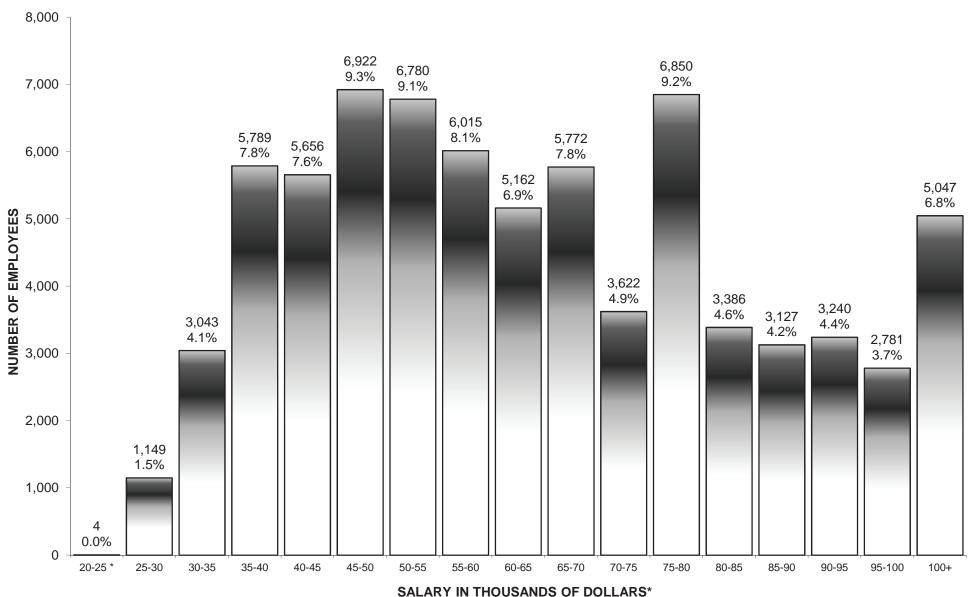

We continue to report salary data in this edition of the Workforce Profile. Employees earning below the average for State Government employees (\$65,179) account for 55 percent of the full-time State Government workforce. The median salary is \$61,874. See Page 5 for a discussion of the computation and significance of average and median salaries. Additional information on salaries is included on Page 10 (by agency) and on Page 46 (for union-represented employees).

A distribution of the entire State Government workforce by salary appears on Page 33. We have retained the grouping by \$5,000 salary bands to maintain consistency and aid interpretation. The employees earning between \$45,000.00 and \$45,999.99 outnumber those whose earnings fall into any other \$5,000 salary interval. Employees earning from \$45,000.00 to \$59,999.99 account for approximately 27 percent of the State Government workforce and outnumber those whose earnings fall into any other \$15,000 interval. We have plotted average salaries for five years on Page 34. In addition to labeling each point on the curve with the average annual salary, we have computed the percentage of change from the previous year.

Part-time and hourly employees have always been excluded from our analysis of average annual salaries. Since 1995, we have also excluded per diem employees. We also have excluded certain Commission and Board members such as those in the Department of Law and Public Safety's Division of Consumer Affairs, the Merit System Board (now the Civil Service Commission), County Boards of Taxation, and the Labor Department's Board of Mediation, to name a few examples. These employees typically receive compensation based on attendance at meetings which are held intermittently, but are nonetheless categorized as "annual salary" employees in the Civil Service Commission's automated files.

### DISTRIBUTION OF STATE GOVERNMENT EMPLOYEES BY SALARY

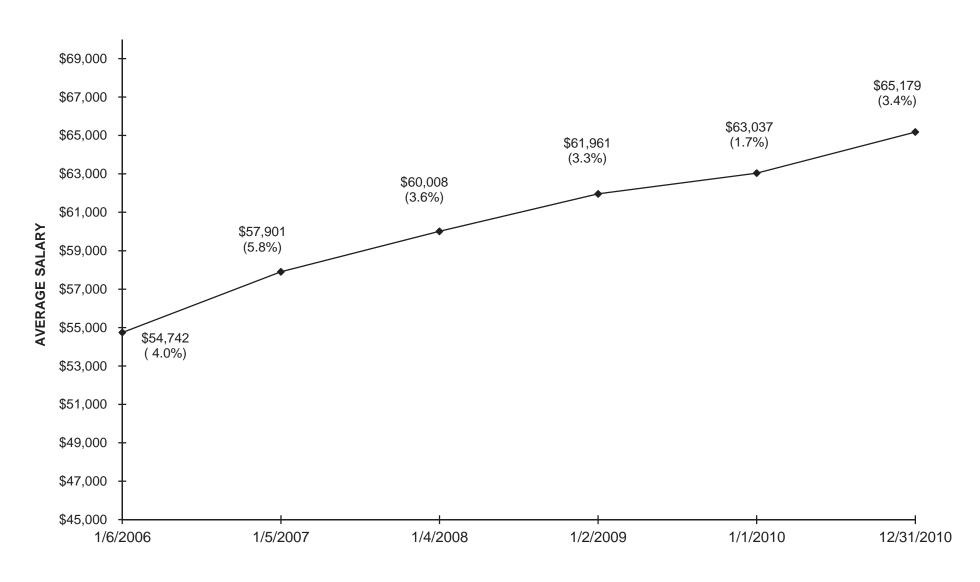

DECEMBER 31, 2010

Numbers and percentages reflect full-time employees; excludes Board and Commission members. (As of 12/31/2010, 74,345). \*20-25 = \$20.000.00-\$24.999.99 and so on.

### FIVE-YEAR TREND OF AVERAGE SALARIES FOR STATE GOVERNMENT EMPLOYEES

2006 through 2011

### STATE GOVERNMENT WORKFORCE: RACE/ETHNIC AND GENDER DATA

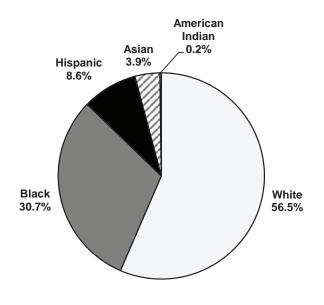

INTRODUCTION

We include several charts and tables that analyze the State Government workforce by gender and race/ethnicity. There are three tables that give employee counts by agency. The first table gives the race/ethnic distribution by agency and is accompanied by a pie chart that gives the overall race/ethnic distribution for the entire State Government workforce. Next is a similar table giving the gender distribution by agency. To the right side of the chart, there are two pie charts showing the race/ethnic distributions for males and females and the overall gender distribution in the State Government workforce. On Page 38, there is a table giving the gender and race/ethnic distribution by agency.

Pages 39 and 40 show historic trends for minorities (Blacks, Hispanics, Asians, and American Indians), and Pages 41 and 42 show historic information for women. These charts are based on counts of full-time employees at Fiscal Year intervals, while the three preceding tables count all employees in a Calendar Year snapshot. Since the EEO/AA reports providing historical data were limited to full-time employees, we eliminated part-time employees from our counts for the purposes of trend analysis. The solid line on each chart plots the number of employees (as measured by the scale on the left side) at the end of each fiscal year since 1974. The dotted line on each chart shows what percentage of the full-time State Government workforce (as measured by the scale on the right side) the number of minority or female employees represents. Although there has been growth in the representation of both minorities and women in the State Government workforce in the last thirty years, the increase in minorities is more dramatic. Minorities made up just over 19 percent of the full-time State Government workforce in 1974, and represent almost 43 percent of that workforce today. Women, on the other hand, made up 46.2 percent of the full-time State Government workforce in 1974 and represent 56.0 percent of that workforce today. It would not be appropriate to show the changes in totals of minorities and women on the same chart, since this would result in "double counting" of minority women. It is also important to note that, although the total number of minority employees has declined slightly since the previous year, the total State workforce has also declined. The result is a slightly higher minority percentage in Fiscal Year 2010 than in Fiscal Year 2009.

### UNION REPRESENTATION OF STATE GOVERNMENT EMPLOYEES

INTRODUCTION

Under the provisions of the New Jersey Employer-Employee Relations Act, State Government employees are entitled to union representation. For this purpose, the Public Employment Relations Commission has approved the division of the State Government workforce into 43 employee relations groups, 33 of which are represented by unions. The other ten groups include employees in executive, managerial, and confidential titles. Additionally, there are employees who are designated as confidential because of the nature of the organizations in which they work; for example, all employees of the Civil Service Commission are considered confidential because Commission employees have access to information which is directly related to the conduct of labor negotiations.

Most bargaining units in State Government are represented by particular unions. The Communications Workers of America (CWA) represents the professional, supervisory, clerical, and administrative bargaining units. The American Federation of State, County, and Municipal Employees (AFSCME) represents the direct care workers in State institutions, most of whom are employed by the Department of Human Services and the Department of Military and Veterans Affairs. The International Federation of Professional and Technical Engineers (IFPTE) represents the workers who maintain State highways and the State Government's physical facilities. The International Brotherhood of Electrical Workers has been chosen to represent the Deputy Attorneys General who provide the State Government with legal representation.

The Fraternal Order of Police (FOP) represents employees in Bargaining Codes 1, 8, J, 2, K, 4, and 4A, and the Police Benevolent Association (PBA) represents Bargaining Codes F, FA, and L. Both of these unions represent employees involved in State law enforcement activities. Independent organizations represent uniformed State Police officers and probation officers. Court reporters, Bargaining Code 5, are represented by the Office and Professional Employees International Union (OPEIU).

Bargaining Units 3, 6, and 7 are represented by the "Judiciary Council of Affiliated Unions" (JCAU) which comprises CWA, AFSCME, IFPTE, the Service Employees International Union, OPEIU, and the International Brotherhood of Teamsters. The constituent unions of the Council represent specific titles within a given jurisdiction of a particular Court, and the representation of employees in certain titles may vary from one county to the next. The JCAU bargaining unit is identified in the twelfth column of the tables of union representation on the next two pages.

The tables show that CWA represents more State Government employees than any other union, with 47.7 percent of the workforce in its bargaining units. The other large organizations are AFSCME, with 12.6 percent of the workforce; the PBA, with 8.1 percent; and IFPTE, with 6.3 percent. CWA is unique in that it represents many of the State Government's medical and scientific specialists, some of whom are paid at higher rates than some of the unrepresented managers and executives.

### UNION REPRESENTATION OF STATE GOVERNMENT EMPLOYEES

INTRODUCTION

It is important to note that not all employees who are represented by unions are union members. Represented employees who do not choose to join a union are obliged to pay a representation fee that may not exceed 85 percent of union dues. This arrangement is known as "agency shop."

The Employer-Employee Relations Act was adopted in 1968, and the first collective bargaining agreements date from the early 1970s. Later in the 1970s the impact of the negotiation process became more pronounced, supplementing market research as a factor affecting pay levels. Higher-level supervisors were unionized in 1979, and in 1980 collective bargaining led to several different pay schedules instead of just one. In 1981, after a representation election organized by the Public Employee Relations Commission, CWA became the bargaining agent for the professional, supervisory, clerical, and administrative bargaining units. In 2001, the compensation of individual titles was made subject to negotiation.

The first of the following two tables gives counts by agency for State Government employees represented by the different unions. The second table shows the salary distributions for State Government employees in each union. We have limited our reporting of employees by salary to full-time employees, and we use much the same criteria as for our other salary data; we do not include Bar Examiners or members of various Commissions and Boards (see Page 32).

### MILITARY INVOLVEMENT OF STATE EMPLOYEES

Traditionally, large employers have taken a relatively liberal view toward the participation of their employees in the Reserve Components of the United States Armed Forces. This is partly because their size mitigates the impact of absences. The State Government of New Jersey is no exception. It has been a long-standing State Government policy to pay employees who are members of the Reserves or National Guard while they perform their statutory two weeks of annual training. To achieve this objective, current policy provides that members of the Reserves (or of the National Guards of other States) may be paid for any period of active duty that does not exceed 30 workdays in a single calendar year (because annual training is scheduled by Federal fiscal year, it is possible for a member to have two annual training periods in one calendar year). Because the New Jersey National Guard is part of the State Armed Forces, the State Government has paid employees who are members of the New Jersey Guard for up to 90 workdays in a calendar year while they are engaged in Federal active duty service. State Government also has paid their salaries when the New Jersey National Guard has been called out in response to State emergencies – the amount of paid Military Leave in a calendar year for this purpose (State Active Duty) is unlimited.

In the past, the State Government has not paid members of the National Guard or the Reserves beyond the 30 and 90 workday limits mentioned above while they are on extended active duty, whether for initial training or when their units have been activated by the Federal Government. However, as the role of the Reserve Components has changed and Federal activations have become more frequent, the State Government has begun to join other progressive employers who, during periods when Guard and Reserve units are activated by the Federal Government, and pay their employees the difference between their military salaries and their regular civilian salaries. Since many members of the Reserve Components are better paid in civilian life than they are on active duty, this policy avoids family hardships that reduce employees' military effectiveness. The policy was first adopted by Governor James J. Florio during Operation Desert Storm in 1991. More recently, it was adopted by Governor Donald T. DiFrancesco during Operation Noble Eagle (the reaction to the attack on the World Trade Center in September 2001), and extended by Governor James E. McGreevey to cover the global war on terrorism, including Operation Enduring Freedom (Afghanistan) and Operation Iraqi Freedom.

The following chart shows the number of military leaves granted by the State Government during Calendar Years 2002 through 2010 in conjunction with Operations Noble Eagle, Enduring Freedom, and Iraqi Freedom. It is no exaggeration to report that everyone in State Government is proud of the State employees who have served and are continuing to serve. It is also worth mentioning that many State employees are working harder than ever to provide essential services while their co-workers are absent on Guard and Reserve deployments.

### STATE OF NEW JERSEY STATE COLLEGE EMPLOYEES UNDER THE MERIT SYSTEM

INTRODUCTION

In June 1994, the Higher Education Restructuring Act abolished the Department of Higher Education and gave the State Colleges autonomy over personnel matters. Under the State Merit System, career classified employees retained their rights. As a result of State College autonomy, State Colleges are separate employers and their employees are reported separately. Starting with the 2003 Workforce Profile, State Government tables and charts that previously included State College totals have been modified accordingly.

On the following page is a table analyzing the State College career workforce within each college by service division. Our records indicate that there are 4,342 employees in State Colleges who hold positions with Merit System protections, 49 fewer than the previous year. As of December 31, 2010, there were 2,125 employees whose titles were in the competitive division and 2,217 employees whose titles were in the non-competitive division.

### STATE COLLEGE EMPLOYEES UNDER THE MERIT SYSTEM BY SERVICE DIVISION

**DECEMBER 31, 2010** 

COLLEGE	COMPETITIVE	NON- COMPETITIVE	GRAND TOTAL
KEAN UNIVERSITY	288	264	552
MONTCLAIR STATE UNIVERSITY	293	388	681
NEW JERSEY CITY UNIVERSITY	177	375	552
RAMAPO COLLEGE OF NEW JERSEY	115	145	260
ROWAN UNIVERSITY	359	322	681
STATE LIBRARY	60	15	75
THE COLLEGE OF NEW JERSEY	218	220	438
THE RICHARD STOCKTON COLLEGE OF NEW JERSEY	264	249	513
THOMAS EDISON STATE COLLEGE	46	16	62
WILLIAM PATERSON UNIVERSITY	305	223	528
TOTAL STATE COLLEGES	2,125	2,217	4,342

Our records indicate that there are 4,342 employees in State Colleges who hold positions with Merit System protections. There are 2,125 employees whose titles are in the competitive division and 2,217 employees whose titles are in the non-competitive division. As a result of the State College autonomy over personnel matters which was granted in June 1994, State College employees who do not retain rights under the State Merit System are reported only as part of the totals on Page 12.

### STATE GOVERNMENT WORKFORCE: HISTORICAL DATA

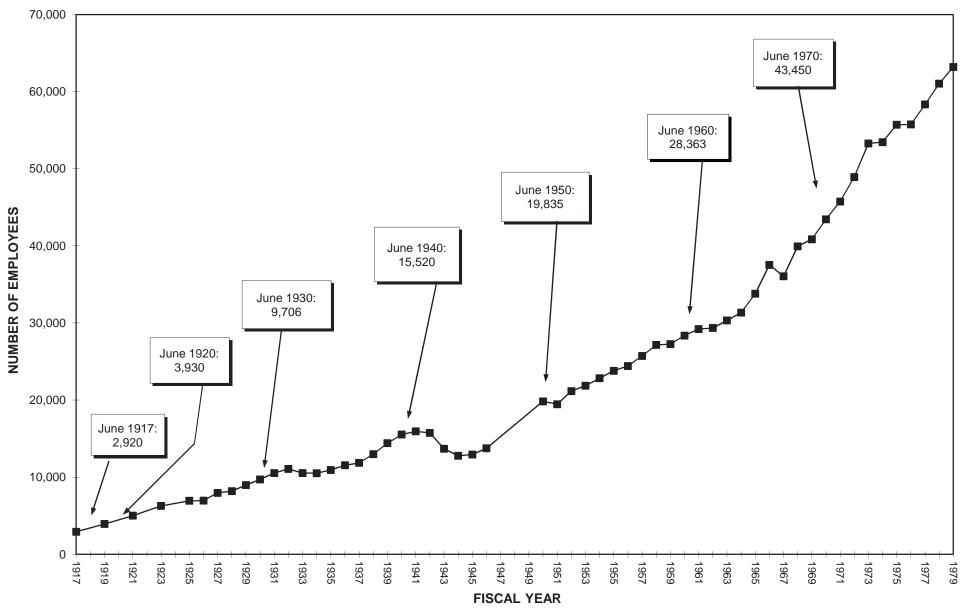

INTRODUCTION

The following two pages present charts showing the size of the State Government workforce from 1917 to the present. Data are unavailable for 1918, 1920, 1922, 1924, and 1947 through 1949. We have labeled the initial point, every point that represents a new decade, and the most recent point. Various commissions and authorities were included as a separate category until 1993. At present, counts for members of commissions and authorities or agencies that the Statutes place "in but not of" the Executive Departments are reflected in the departments that house them or are reported as "Other State Government Employment" on Page 12.

We follow with a two page analysis of the change in the size of the workforce from year to year since 1917. Pages 52 and 53 are based on the same data and show the net change in the number of employees from the previous year. The years when the workforce grew the most rapidly have the tallest columns; years when the workforce declined in number have columns extending below the baseline. In the second of the two types of charts depicting net change, beginning with 1980, we have labeled all of the columns with the change in the number of employees as well as the percentage of change from the previous year.

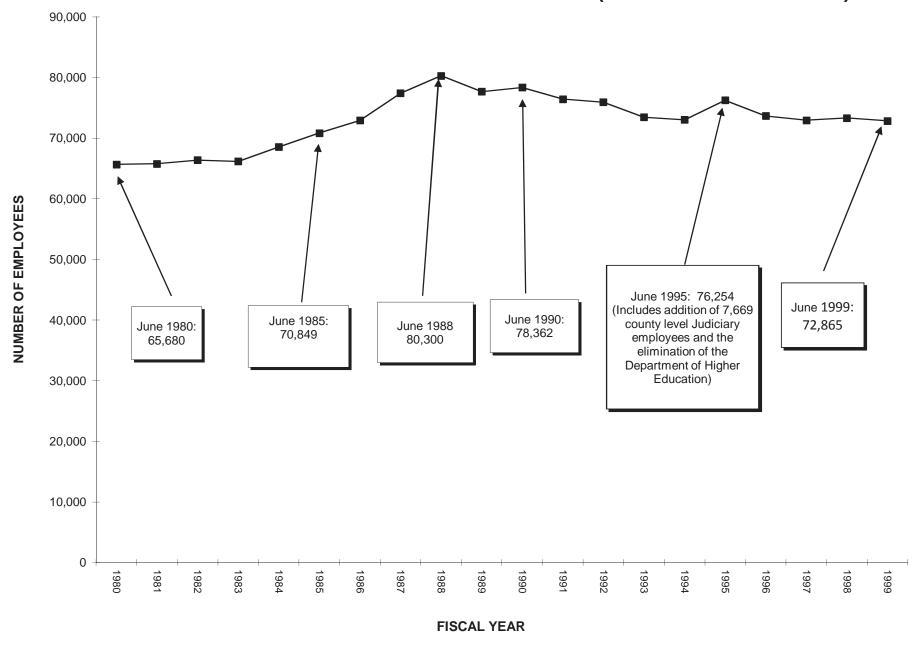

The remaining pages in this section present data for the different agencies since 1960 in tabular form. Some of our counts of employees at various agencies have been revised since previous editions of the Workforce Profile due to the discovery of inconsistent coding of certain historical transactions. This includes the column totals that represent Fiscal Years 1995 to 2002. Because the Higher Education Restructuring Act of 1994 abolished the Department of Higher Education and provided for State College autonomy over personnel matters, State Colleges are no longer included in those totals. In other cases, or where State Government structure was modified, we have added footnotes to comment on major changes. Most agencies that the statutes place "in but not of" various departments are included in the figures for those departments; the larger of these agencies are identified separately and listed adjacent to each department with which they are associated. All figures are from the close of each fiscal year, so that changes in the workforce since July of 2010 are not reflected in the table.

### STATE OF NEW JERSEY STATE GOVERNMENT EMPLOYMENT HISTORY FISCAL YEARS 1917 - 1979

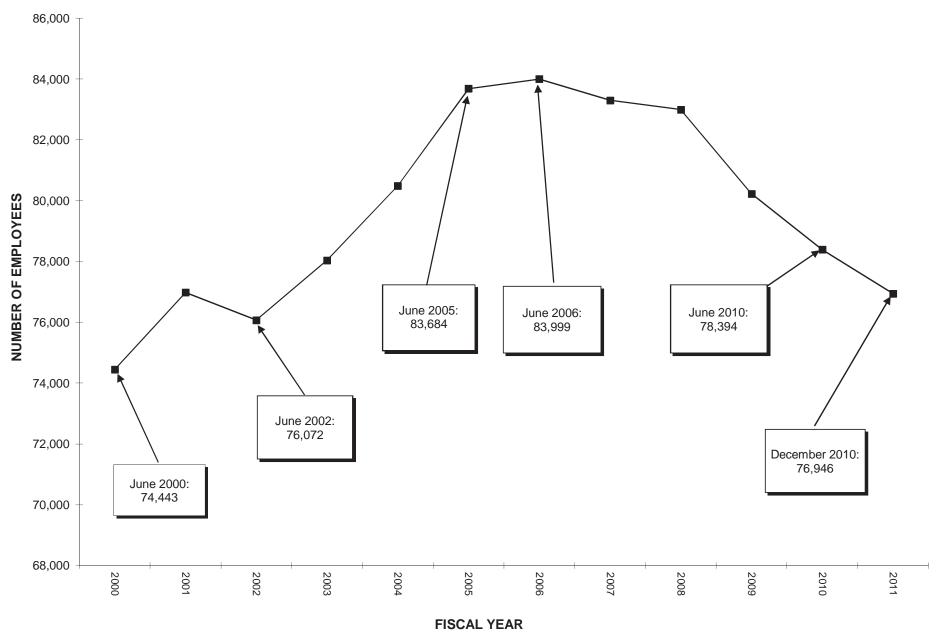

Data provided by the Civil Service Commission from Department of Civil Service annual reports (1917-1959) and separation reports (1960-1979).

### STATE OF NEW JERSEY STATE GOVERNMENT EMPLOYMENT HISTORY (JUNE 1980 - JUNE 1999)

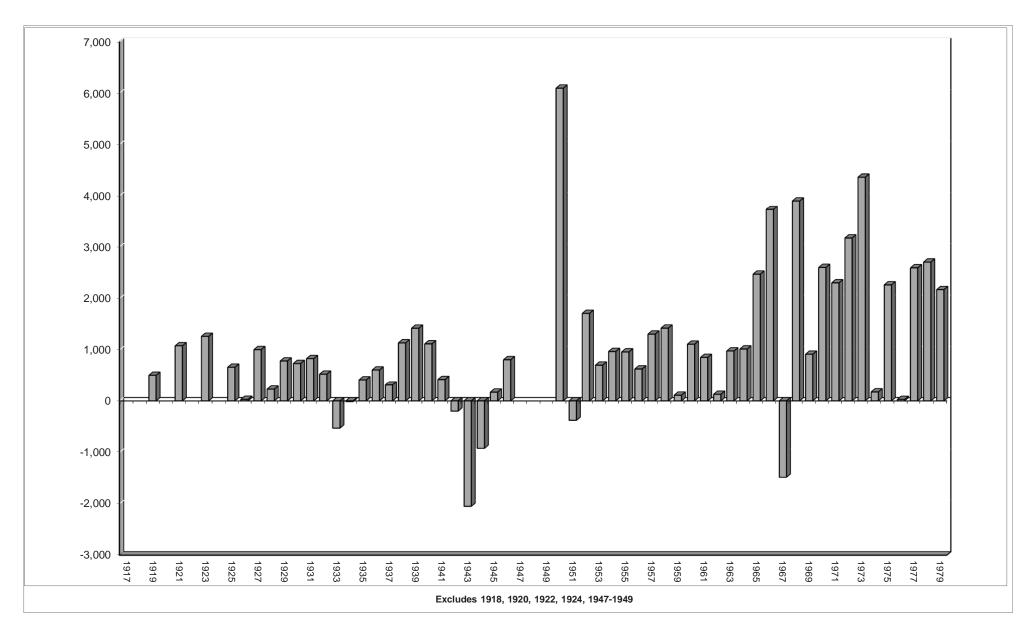

### STATE OF NEW JERSEY STATE GOVERNMENT EMPLOYMENT HISTORY (JUNE 2000 - DECEMBER 2010)

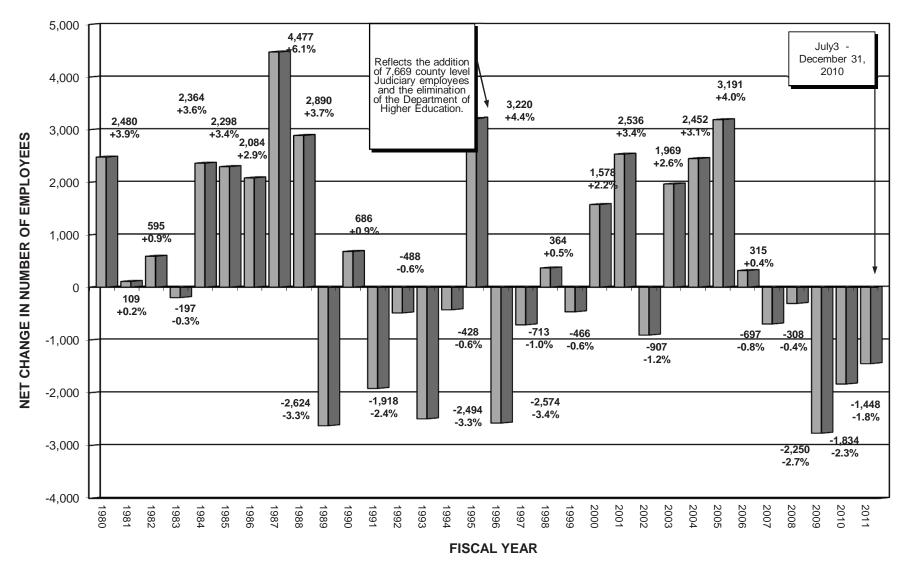

### **NET CHANGE IN NUMBER OF STATE GOVERNMENT EMPLOYEES**

**FISCAL YEARS 1917 - 1979** 

### NET CHANGE IN NUMBER OF STATE GOVERNMENT EMPLOYEES

July 1979 to December 2010

Data provided by the Civil Service Commission from separation reports (1980-1987) and automated personnel files (1987-2010). Various Commissions and Authorities included before FY1993.

signed legislation that established the Department of Children and Families. The agency was primarily staffed by the transfer of employees from the Department of Human Services. <sup>2</sup> In March 2006, Governor Corzine signed an Executive Order establishing the Office of Homeland Security and Preparedness. <sup>3</sup> The Office of Information Technology was created in September 1998. A separate identity in PMIS was established in Fiscal Year 2000. <sup>4</sup> In June 2008, the Department of Personnel was abolished, and its function and powers were tranferred to the newly established Civil Sevice Commission, which is in but not of the Department of Labor and Workforce Development, and to the Office of Workforce Initiatives and Development in the Department of the Treasury. <sup>5</sup> The Office of the Child Advocate was created in September 2003. A separate PMIS identity was established the following year. <sup>6</sup> In 2005, the Department of the Public Advocate was restored as a principal department in the Executive branch of State government. The Offices of the Child Advocate and the Ratepayer Advocate were allocated within the restored Department. The Department was abolished again in 2010.

<sup>7</sup> In 2003 the Division of Motor Vehicles in the Department of Transportation was abolished and the New Jersey Motor Vehicle Commission was established. The Commission is allocated in but not of the Department of

Transportation.

<sup>1</sup> In July 2006 ,Governor Corzine

### STATE OF NEW JERSEY LOCAL GOVERNMENT MERIT SYSTEM JOBS

INTRODUCTION

In 1996, we expanded the *Workforce Profile* to include information on local government employment in New Jersey for the first time. The most important barrier to including all local government employment is the absence of a single uniform database that captures local government data in a degree of detail comparable to what we can provide about State Government employees. The most comprehensive database on local government employees to which we have access is the State Government Pensions database maintained by the Division of Pensions and Benefits, but this database is organized in a different manner. For the time being, the most useful database we have is the Civil Service Commission's Consolidated Employee File, which includes data on local government jobs that fall under the purview of the Merit System.

The New Jersey Civil Service Commission administers a merit system of employment for both the State Government and the local jurisdictions that have, by referendum, adopted Title 11A of the Revised Statutes. These jurisdictions comprise 20 of the State's 21 counties and more than 350 other jurisdictions, including both municipalities and special-purpose authorities and districts. Approximately a third of the State's 566 municipalities belong to the system, including most of the larger, older, and more urban ones. In addition, a small number of school districts have adopted the Merit System legislation.

The most recent New Jersey Department of Labor and Workforce Development figures for local government employment in New Jersey (December 2010) indicate total employment of approximately 429,500, with about 270,500 of these employed in education. Thus, the employees in Merit System jurisdictions who do not work in school districts (the vast majority of the 100,823 identified in our records) represent about 60 percent of the local government employees in New Jersey who are employed outside the education sector.

You will note that the following five tables and charts summarize local government Merit System employment in terms of <u>jobs</u> rather than in terms of <u>employees</u>. This reflects the way in which we keep the employment records. While in State Government employees are not authorized to hold more than one job at a time, in local government it is not unusual for one employee to hold several part-time jobs concurrently. There are 1,966 employees who hold more than one job in local government. Further, it is not unusual for these jobs to be relatively unrelated to one another, and to vary widely in terms of title and even in terms of occupational group. As a result, we find that keeping records in terms of jobs is more meaningful in the local government arena. That is why the following tables and charts summarize 102,978 jobs rather than 100,823 employees. It is important to observe, however, that since the State Government counts reflect both employees and jobs, we can use the tables in the profile to draw comparisons between State Government jobs and local government merit system jobs, even if we cannot draw comparisons between the two workforces as such.

### STATE OF NEW JERSEY LOCAL GOVERNMENT MERIT SYSTEM JOBS

INTRODUCTION

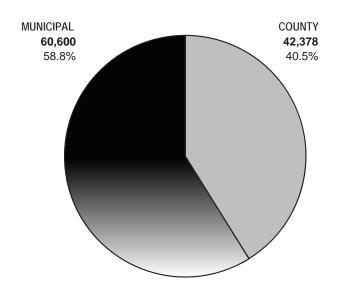

You will also note that the local government tables do not address many of the issues covered in tables dealing with State Government employees, such as age, ethnic identity, gender, and salary. This is because the data files we use for local government collect data from local jurisdictions, which differ from each other in the formats used for these types of information. Since the Civil Service Commission's responsibilities with respect to local jurisdictions have been largely confined to position classification and examinations, we have directed our most strenuous efforts in record maintenance to insuring the accuracy of data concerning class of service and title. Because data in our consolidated files is supplied by the local jurisdictions, it is not always as current or complete as the State employee data. This is due to the fact that the State does not regulate the salaries of local government employees. Thus there is less urgency in submitting updates to the records than there is in State Government service. With the implementation of new recording systems, we hope to be able to capture more data with greater accuracy.

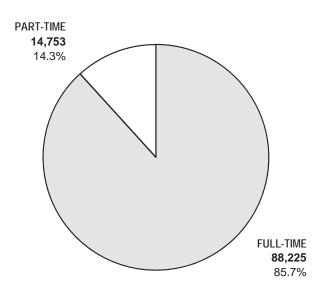

The following tables yield some broad outlines of the characteristics of local merit system jobs in New Jersey. Since 20 of our 21 counties have adopted Title 11A, it is not surprising that more than two of every five local jobs covered by the State Government merit system are county jobs. Approximately 89 percent of local jobs are in the Career Service. Reflecting both population distribution and the geographic spread of the merit system, most of the local government jobs are in North Jersey; about 46 percent of them are located in the five Northeast Jersey counties of Bergen, Essex, Hudson, Passaic, and Union. Although the number of local jobs has decreased by 5,609 since last year, these percentages remain about the same. More than 28 percent of the local jobs are in the professional/technical/managerial occupations, while more than half of them are in clerical or service occupations.

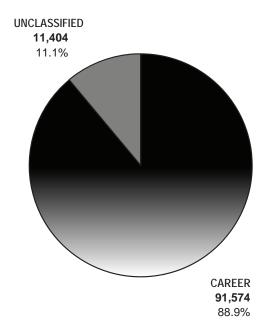

The tables also reveal some interesting comparisons between State Government jobs and local government Merit System jobs. Approximately one out of six State Government jobs is in the Unclassified Service, compared with about one out of nine local government merit system jobs. The concentration of State Government jobs in Mercer County contrasts significantly with the wider geographic distribution of local government merit system jobs. Finally, the occupational breakdown of local government merit system jobs is significantly different from that of State Government jobs. While the professional/technical/managerial group is by far the largest in State government, in the local jurisdictions the service occupations, which consist largely of protective services like police, fire fighting, and corrections, are most heavily represented. The service group is the second largest occupational group in State Government, while the second largest in local government is the professional/technical/managerial group. Clerical jobs are proportionally similar at both the State and local levels, coming in third in number in both State and local government. Employees engaged in structural work are much more significant at the local level then at the State level.

**NOTE:** For a number of years, we have included in the count of local government Merit System jobs some temporary engagements like Monitor and Student Assistant that are not subject to unemployment compensation. Our classification and compensation experts have now concluded that these engagements do not constitute regular jobs, so we are no longer counting them. As of January 3, 2011, these engagements amounted to 502 jobs with 488 incumbents.
