In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Sewage sludge from the treatment of sanitary wastewater is discharged to basins in which the reed bed grass <u>Phragmites</u> , or similar species, is cultivated to facilitate the sludge drying and treatment process. The Department has determined that this category requires similar monitoring and operating conditions, and is more appropriately regulated under a general permit than under individual permits. If finalized, the general permit will not supercede any existing permits that a <u>Phragmites</u> reed bed sludge management facility may currently possess. All <u>Phragmites</u> reed bed sludge management facilities with existing NJPDES permits will be encouraged to apply for and obtain the general permit, but will have the right to retain their individual permit until permit expiration.

The applicant is engaged in the manufacturing of storage batteries, Standard Industrial Classification (SIC) code 3691. Stormwater is collected from approximately 9 acres of the site. The stormwater is diverted to an on-site treatment system, which is designed to treat the runoff from a 100 year 24 hour storm event (7.5 inches/24-hours). The system has a holding capacity of 1,000,000 gallons. The treatment system is primarily for the removal of lead; and consists of pH adjustment, coagulation, clarification and sand filtration. Sludge that is generated from the treatment process is thickened and then filtered pressed. The pressed sludge cakes are then sent to a smelter to recover the lead content. Water from the sludge recovery process is reintroduced into the treatment system. The existing permit regulates stormwater discharged via storm sewer, from outfall DSN001, to the Mile Run Brook a tributary of the Raritan River, classified as FW2-NT. A second outfall (DSN002) has been closed.
