Not allowing me to log in, is this because of a system issue? I hope the interface that is previously online and Apple app is not the one they are changing to. How is powered by Google, and you can't search locations by addresses? Why are their no schools listed or Parks? Is the preview of the range for pick-up no longer available?

I was excited about this app bc the reg NJ Transit app just has an almost hidden link to the AL website. There are no real accessibility functions on this app, which is most likely used by people w/ disabilities. For ex: there is no dark theme for users who find it more difficult to read on a white screen. The 'Trip' text layout & nav buttons are difficult to follow if a phone's sys font size is enlarged. Also, 'Expected Pickup Time' is missing, which is very important. Back to the website. 😞

Where's a route map for Access Link? It would eliminate calls made to address mant issues, pick up locations, drop off locations, scheduling, arrangements for additional transportation to drop off/pick up etc ?
