ENERGY MASTER PLAN

Clean energy is vital for our future from both an economic development and environmental sustainability policy perspective. With this in mind, Governor Murphy, through Executive Order 28, has set an ambitious goal of setting New Jersey on the path to 100% clean energy by 2050, and we are moving full speed ahead.

New Jersey's Energy Master Plan (EMP) sets forth a strategic vision for the production, distribution, consumption, and conservation of energy in the State of New Jersey. The state's energy policy reflects the full scope of New Jersey's current energy sector, as well as its future. We'll create new jobs, industries, and workforce development as the state expands its green economy, providing exciting new opportunities for New Jersey's residents and business community. **[Read more about the 2019 EMP.](#)**
