Ethicon, Inc. 7002149 E86001	Route 22 West Bridgewater Twp. Somerset County	Sylvia Pearce BEECRA 609-633-1414	Discharge to Ground Water Raritan-Magothy Formation II-A	This public notice is for a draft renewal and major modification of the existing NJPDES-DGW permit (NJ7002149). Ethicon, Inc. is performing injections of a dilute molasses solution into the subsurface to enhance in-situ degradation of chlorinated hydrocarbons. Zero valent iron (ZVI) injections will also be conducted in the source area to stimulate rapid and efficient degradation of the contaminants source and accelerate the overall remediation effort. The molasses acts as a carbon source for bacteria present in the ground water. During the metabolism of the molasses, the chlorinated volatile organic compounds act as electron receptors which leads to a breakdown of the chlorinated compounds. The ZVI supports the direct chemical reduction of the chlorinated compounds to non-chlorinated compounds. Pneumatic fracturing by injection of nitrogen into the formation will enhance permeability of the ZVI process. The remediation is being monitored under the authority of the Bureau of Northern Case Management, Industrial Site Recovery Act Case # E86001.

Tier A Municipal Stormwater General Permit (NJ0141852) Tier B Municipal Stormwater General Permit (NJ0141861) Public Complex Stormwater General Permit (NJ0141879) Highway Agency Stormwater General Permit (NJ0141887)	Statewide	Bruce Friedman Bureau of Nonpoint Pollution Control (609) 633-7021	Statewide	The four New Jersey Pollutant Discharge Elimination System (NJPDES) General Permits (Tier A Permit, NJ0141852; Tier B Permit, NJ0141861; Public Complex Permit, NJ0141879; and Highway Permit, NJ0141887) are part of the Municipal Stormwater Regulation Program. Under this Program, 562 municipalities, all 21 counties, the New Jersey Department of Transportation, State highway authorities, and many other State, interstate, and Federal agencies obtained a NJPDES permit for discharges from municipal separate storm sewer systems (MS4s). The Department proposes to modify the general permits to further develop and refine certain aspects of the general permits. These include, where applicable, (1) expanding the scope of non-stormwater discharges authorized by the permits to include washwater from certain activities; (2) establishing a definition of “catch basin”; (3) revising requirements within the Post-Construction Stormwater Management in New Development and Redevelopment Statewide Basic Requirement (SBR); (4) revising the Yard Waste Ordinance / Collection Program to provide Tier A municipalities with additional flexibility on yard waste collection; and (5) establishing an Equipment and Vehicle Washing SBR. Pursuant to N.J.A.C. 7:14A-16.5 corrections of typographical errors and language changes, including language changes to the Street Sweeping SBR, that have no legal or substantive effect are “minor” modifications and are not subject to the procedures in N.J.A.C. 7:14A-15 and are therefore not open to public comment. Draft modifications to the NJPDES Tier A Permit (NJ0141852); Tier B Permit (NJ0141861); Public Complex Permit (NJ0141879); and Highway Permit (NJ0141887) have been prepared based on the administrative record (including the name and address of the permittees and, if different, of the facility authorized under these general permits) filed at the NJDEP, 401 East State Street, Trenton, New Jersey 08625. These draft permit modifications and their fact sheets can be viewed or downloaded on the Division of Water Quality website at http://www.state.nj.us/dep/dwg/municstw.html. A copy of the draft documents are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday. If you are interested in scheduling an appointment or requesting specific information regarding the draft permit modifications, contact Bruce Friedman of the Bureau of Nonpoint Pollution Control at (609) 633-7021.
