EMPLOYMENT TRENDS

june 1978

August 2, 1978

Report No. 10

Nonagricultural wage and salary employment dropped by 5,600 to 2,929,900 in June on a seasonally adjusted basis as job losses in the manufacturing sector outweighed gains in the nonmanufacturing sector. This marked the first drop since August to September 1977. Private sector employment dropped by 10,400 - the largest drop since April to May 1975. Since the recession low point of May 1975, nonfarm payroll employment has increased by 259,700 with the manufacturing sector recovering 36,200 jobs. On an unadjusted basis, nonagricultural wage and salary employment rose by 43,700 from May 1978 to 2,983,700 in June 1978, as both manufacturing and nonmanufacturing sectors increased.

Before seasonal adjustment, manufacturing employment rose by 4,800 as the 1,800 loss in durable goods was more than offset by an increase of 6,600 in the nondurable goods sector. Although seven out

Continued from page 1

of ten durable goods component industries increased, this could not overcome the 5,700 loss in the transportation equipment industry resulting from layoffs of almost 5,900 workers in the automotive industry. These temporary layoffs were due primarily to the revamping of assembly lines for the manufacture of smaller cars to conform to government regulations. Electrical machinery had the largest gain among durable goods industries, gaining by 2,400 as about 1,400 workers returned from strike, followed by fabricated metals which had broad based increases totaling 500. Nondurable goods employment rose by 6,600 over the month as all component industries increased except tobacco, which had no change. Chemicals and allied products had the largest increase as gains throughout the industry caused a total increase of 2,000, while the apparel and food industries each registered seasonal increases of 1,200 and 900 respectively.

Nonmanufacturing employment on an unadjusted basis expanded by 38,900 during June as no losses were recorded in any of the seven major industry divisions. The largest growth was in the wholesale and retail trade industries which had a seasonal growth of 15,900. Contributing to this expansion was a combined employment growth of over 500 from three new firm openings in the retail sector. Service employment, up by 11,700 had a larger than seasonal growth aided by the effects of casino gambling which added 1,300 new positions.

After discounting seasonal factors, manufacturing employment dropped by 7,200 as both durable and nondurable goods industries declined. Durable goods employment dropped by 5,600 due almost entirely to a 6,000 drop in the transportation equipment industry resulting from the auto industry layoff during the model changeover period. A significant increase was recorded in the electrical equipment industry, up by 1,800, due to workers returning from a strike, but over 450 striking workers in the nonelectrical machinery industry caused a decrease of 600 in June. Nondurable goods employment dropped by 1,600 on a seasonally adjusted basis as small gains were offset by losses except for the apparel industry which dropped by 1,500.

The nonmanufacturing sector increased slightly by 1,600 after seasonal adjustment as only three out of seven major industry groups showed growth in June. An increase of 4,800 jobs in government, mostly due to part-time summer hires on the local level, dominated nonmanufacturing growth. Offsetting this expansion were employment losses of 2,100 in the transportation and public utilities sector and 900 in wholesale and retail trade.

Over the past year employment on a not seasonally adjusted basis has increased by 81,400 or 2.8 percent. Employment advances in nonmanufacturing total 76,600 compared with an over-the-year increase of 4,800 in the manufacturing sector. Durable goods employment increased by 3,400 as seven out of ten industries increased while nondurable goods employment rose by 1,400 with seven out of ten industries also showing increases. Since June 1977, the electrical machinery industry, up by 3,800, and the chemical industry, increasing by 2,300, had the

Continued from page 3

largest gains. Transportation equipment, down by 4,000, and the apparel industry, down by 3,000, showed the largest losses.

Only mining, down by 100, had employment losses over the year among nonmanufacturing industries. Services, expanding by 24,300, had the largest growth since June 1977. Other increases over the past 12 months were in government, up by 15,600 (13,600 on the local level) and construction 11,800 over last year's level.

EMPLOYMENT UP IN MOST LABOR AREAS

From May to June unadjusted nonagricultural wage and salary employment rose in nine of the ten major labor areas with Trenton, the only labor area to register a decrease, down slightly by 100 workers. Every labor area increased over the month in nonmanufacturing employment led by sizeable increments in services, trade, government and construction. Part-time and temporary summer additions to local government payrolls expanded total government employment in most labor areas with Camden up by 1,400, having the largest increase.

HOURS AND EARNINGS OF PRODUCTION WORKERS INCREASE

The weekly earnings of manufacturing production workers averaged \$256.26 during June, an increase of \$4.32 from May and \$14.24 from a year ago. The average hourly earnings of \$6.16 were up 3 cents from May and up 37 cents from a year ago. During the June survey week, production workers averaged 41.6 hours compared with 41.1 hours a month ago.

After seasonal adjustment, the average weekly hours increased to 41.5 hours from 41.4 hours in May and decreased from 41.7 hours in June, 1977. The seasonally adjusted workweek decreased by 6 minutes from last summer when it averaged 41.6 hours. However, it was 1 hour and 18 minutes longer than the recession low of May, 1975.

On an unadjusted basis, 18 of the primary manufacturing industrial groups had increases in weekly earnings over the month, while one had a decrease. The leather products industry dropped \$4.03 due to a large number of new hires at lower salary rates. The largest increase occurred in transportation equipment, which rose by \$30.43, due to an increase in overtime at premium rates and layoffs of lower rated production workers caused by retooling and a production in the motor vehicle sector.

The highest average weekly earnings in June were in the petroleum industry with \$392.67 for a 48.9 hour workweek. The highest hourly earnings were registered in the transportation equipment industry with \$8.28. The lowest average weekly earnings were in the leather products industry with \$146.03 for a 36.6 hour workweek.

TECHNICAL NOTES

Nonfarm Wage and Salary Employment

Employment data refer to persons on establishment payrolls who received pay for any part of the pay period which includes the 12th of the month. The data exclude proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; federal military personnel are excluded.

Persons on an establishment payroll who are on paid sick leave (when pay is received directly from the firm), on paid holiday or paid vacation, or who work during any part of the pay period but are unemployed or on strike during the rest of the period, are counted as employed. Not counted as employed are persons who, during the pay period which includes the 12th, are laid off, on leave without pay or on strike for the entire period, or who are hired but do not work during the period.

Average Hours and Earnings

Hours and earnings data are derived from reports of payroll and man-hours for production and related workers in manufacturing. When the reported pay period exceeds one week, the payroll and man-hour figures are reduced to a weekly basis.

Average hourly earnings for manufacturing are on a "gross" basis, reflecting not only changes in basic hourly rates, but also such variable factors as premium pay for overtime and shift work, and changes in output of workers paid on an incentive plan. Excluded from average earnings are irregular bonuses, retroactive items, payments of various welfare benefits, and payroll taxes paid by employers.
