COLONEL JOSEPH R. FUENTES
Superintendent

Dear Reader:

In 2007, the number of fatal motor vehicle crashes in New Jersey fell to a near historic low. There were 674 fatal crashes resulting in 724 fatalities. The nationwide death toll of 41,059 also shows a decreasing number of overall traffic fatalities but still represents an average of more than 112 deaths per day. As highway fatalities remain a leading cause of death in New Jersey and the nation, our efforts in reducing motor vehicle deaths on our roadways must continue. The New Jersey State Police is committed in its efforts, through traffic enforcement and education of the motoring public, to reduce the number of people killed in motor vehicle crashes.

On the following pages you will find statistics of the fatal motor vehicle accident records compiled by the Fatal Accident Investigation Unit of the Division of State Police for 2007. This report constitutes a detailed look at the causes and results of fatal accidents throughout the state during 2007. Hopefully, the continued efforts and cooperation of the public, federal, state, and local agencies will help us maintain our traffic safety record in the years ahead.

Sincerely,

Joseph R. Fuentes
Colonel
Superintendent
