MINUTES.

STATE OF NEW JERSEY,
HOUSE OF ASSEMBLY,
TRENTON, NEW JERSEY,

TUESDAY, January 13, 1925.

This being the day designated by the Constitution for the assembling of the One Hundred and Forty-ninth Legislature of the State of New Jersey, the House was duly called to order at 12 o'clock (noon) by Frederick A. Brodesser, of Union county, clerk of the last House, who presided pending the organization of the House.

Prayer was offered by the Reverend R. A Brotemarkle, pastor First Presbyterian Church, Mount Holly, N. J.

Upon the calling of the roll, the following members appeared and answered to their names:

Messrs. Abell, Altman, Anderson, Applegate, Barison, Beardsley, Birkenmeier, Black, Bostock, Botti, Bruno, Campbell, Carling, Carty, Chandless, Clift, Compton, Comstock, Delaney, Dodd, Donovan, Ebert, Finn, Freda, Gilfert, Hanson, Harrison, Hettinger, Hicks, Hudson, Hughes, Hurd, Iszard, Jordan, Kipsey, Knight, Lindsay, Loutrel, Mills, Minisi, Muir, Parvin, Pascoe, Pine, Powell, Reed, Reeves Renner, Robinson, Roll, Sharkey, Siracusa, Stratton, Thompson, Thropp, Vaughan, Welsh, West, White, Zlonczewski—60.

The following members presented their certificates of election:

Atlantic County—Joseph Altman, Anthony J. Siracusa.

Somerset County—Grover F. Kipsey.

Sussex County—George R. Vaughan.

Union County—John W. Clift, George Compton, Thomas M. Muir, Herbert J. Pascoe.

Warren County—Wilbur M. Roll.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the reading of the certificates of election of the respective members be dispensed with.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the Hon. Morris B. Barison, of Hudson county, who is a Master in Chancery of this State and a member of this House, administer the oath of office to the Hon. Anthony J. Siracusa, of Atlantic county, a member-elect, by whom the oath of office shall be administered to the members-elect.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the Hon. Thomas L. Hanson, of Middlesex county, who is a Master in Chancery of this State and a member-elect of this House, administer the oath of office to the Speaker and other officers when they are elected.

All members present signed the roll.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the House do now proceed with the election of Speaker.

Mr. Chandless, of Bergen county, presented the name of Clifford R. Powell, of Burlington county, for nomination for Speaker, in the following words:

Mr. Speaker and members of the Assembly, I arise to place in nomination our candidate for Speaker of this House.

Whom we are to name you know, for he is the unanimous choice of his party; no other has been considered. This, because he is manifestly so well qualified to properly fill this important position, the third highest executive office in our State government. Qualified he is, by reason of natural ability, and because of preparation and experience.

He is a lawyer and although yet a young man, has been in active practice for some eleven years.

As a man and citizen, he is held in the highest esteem by the people of his own county, and, as an attorney practicing there, he is honored and trusted in important official positions.

He is now, and has been for many years, an officer in the National Guard of the State of New Jersey, and as a member of the Guard, he competed a number of times on our State teams in National Rifle Matches, for he is one of the best rifle shots in our State.

This detail is referred to just to show the thoroughness of the man: He makes good in everything that he undertakes to do.

In the Great World War he served his country in overseas duty as a gallant, fighting American soldier. For this occasion today, he was asked to relate some of his war experiences, but modest man that he is, he declined to give any information whatever. Military men praise him, saying that his record in the Aviation service of his country is wonderful. We know that he was shot down and seriously wounded in combat; we know, too, that he suffered many long weeks in hospitals, and that when strength had returned to him, he went again to the front for more fighting. He was twice decorated with the Croix de Guerre of France, and he carries to his day embedded in his body an enemy bullet.

After the war he returned to active service for his State. This is his fourth term as a member of the Assembly. Last year he guided and directed as Majority Leader, and, because of his fine

personality, tact and knowledge of affairs, he held the respect and won the approval of everyone.

Opportunity again knocks at this young man's door, and it finds him prepared and ready.

We agree with, and like to think of, the great truth reflected by an ancient saying, and here paraphrased:

"What constitutes a State?
Not broad lands where material riches
in abundance may be found;
Not cities fair, with spires
and turrets crowned.
No; Men, High Minded Men."

Our country is favored among the nations of the earth. This in great measure because of our men, our high minded young men. In every walk of life here, we have young men with records of patriotic service; records of preparation for the duties of citizenship. These young men are the wonder of the world, and they are our pride. They have our love and they are our hope for the future; our hope for the preservation of American ideals and institutions, and for service to humanity.

Our candidate is one of that band; a member of that band in which we place our trust, and we delight to do him honor.

Such is the manner of man we now present to you as our choice for Speaker of the 149th session of the New Jersey House of Assembly, Clifford Ross Powell, of Burlington county.

Mr. Campbell, of Passaic county, seconded the nomination.

It was also seconded by Mr. Stratton, of Gloucester county.

Miss May M. Carty, of Hudson county, for the minority, placed in nomination for speaker the name of Mrs. Catherine M. Finn, of Hudson county.

Mr. Barison, of Hudson county, seconded the nomination.

Mr. Chandless then moved the nominations be closed.

Which motion was agreed to.

Upon calling the roll, Mr. Powell was elected by the following vote:

Messrs. Abell, Altman, Anderson, Applegate, Beardsley, Birkenmeier, Black, Bostock, Bruno, Campbell, Chandless, Clift, Compton, Comstock, Dodd, Ebert, Finn, Freda, Hanson, Harrison, Hettinger, Hicks, Hudson, Hughes, Hurd, Iszard, Jordan, Kipsey, Knight, Lindsay, Loutrel, Mills, Minisi, Muir, Parvin, Pascoe, Pine, Read, Reeves, Robin-

son, Roll, Siracusa, Stratton, Thompson, Thropp, West, White—47.

For Mrs. Finn:

Messrs. Barison, Botti, Carling, Carty, Delaney Donovan, Gilfert, Powell, Renner, Sharkey, Vaughan, Welsh, Zlonczewski —13.

The Clerk declared the Honorable Clifford R. Powell Speaker of the General Assembly for the session of 1925.

The Clerk requested Messrs. Clift, of Union county, Welsh, of Hunterdon, and Mrs. Thompson, of Ocean, to act as committee to escort the Speaker to the bar of the House, where he took and subscribed to the oath of office and was then escorted to the chair.

Upon assuming the chair the Speaker addressed the House as follows:

You understand the conflict of emotions within me and will accordingly deal charitably for the moment. Precedent has decreed that each newly elected speaker address the House. This duty will be undertaken briefly, expressing appreciation of the honor conferred and trusting that no one who has had any part in bringing it about may have occasion for regret.

I rejoice at the consideration shown Burlington county. As I am merely the instrumentality selected to represent that fine constituency, and as my legislative activities have been inspired by the good folks of Burlington, I am happy to feel that you are honoring them through me.

It is my pleasure to accept the speakership as a sacred trust, and to purpose exercising a full measure of energy, sincerity and devotion to the office. May our labors here be to the lasting benefit of New Jersey, and may they be conducted as speedily and briefly as will permit proper consideration of the problems confronting us.

The two-party system of government is one of the bulwarks of our nation, and a wholesome party division upon matters of importance is expected, but we must deal charitably with one another. May we be inherently fair in all differences of opinion and conflicts of interests which are sure to arise. Let us place common good for our commonwealth above factional and party disagreements.

Let it be our ambition to have the 149th Legislature conspicuous for its accomplishments, though there is apparently little to be done.

Proper education of its youth has materially aided in placing the United States in the front rank of World Powers. We must maintain the high standing of our educational system in this State, but its ever-mounting cost is a matter which should concern us immediately.

The proposed Child Labor Amendment is agitating our people and proving a potent source of disagreement amongst them. We must accurately ascertain the will of the majority before passing upon the question of ratification.

Thought for the future will prompt measures to conserve our water supply and forests, the depletion of which is rapidly bringing a crisis. Recent disclosures demand that further safeguards be thrown about the millions of dollars invested by our citizens in financial institutions and building and loan associations.

We must provide for the care and comfort of our wards in the State institutions. Proper transit facilities and adequate highways must be insured for the accommodation of our rapidly increasing population. We must co-operate with the Federal Government in maintaining efficient National Guard units, now a part of the United States Army and of the first line of defense. It will be well to consider a revision of our loosely-drawn election laws.

There is ever present the problem of increasing taxation. Of course, we cannot have the cake and penny, too. But we can economize, and by diligent application we may discover some method of more equitably distributing the tax burden.

It is said, with a large measure of truth, that too many laws are enacted. This can be remedied if members propose only such laws as they conceive to be necessary, and if committees report only bills worthy of passage. Substantial relief can be secured through biennial sessions.

These are some of the matters before us, but I trust we will enact a minimum of laws of maximum benefit to the State. To this end I pledge you my hearty co-operation.

The Speaker announced the appointment of Frank A. Matthews, Jr., of Burlington county, as his Secretary and Harold T. Parker, of Burlington county, as Assistant Secretary.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the House do now proceed with the election of the Clerk of the House.

Mr. Pascoe, of Union county, nominated Frederick A. Brodesser, of Union county, for Clerk of the House, which nomination

was seconded by Mr. Muir, of Union county, also by Mr. Barison, of Hudson county.

Upon the roll being called by Mr. Bennett, Assistant Clerk of the last House, Mr. Brodesser was elected by the following vote:

In the affirmative were—

Messrs. Abell, Altman, Anderson, Applegate, Barison, Beardsley, Birkenmeier, Black, Bostock, Botti, Bruno, Campbell, Carling, Carty, Chandless, Clift, Compton, Comstock, Delaney, Dodd, Donovan, Ebert, Finn, Freda, Gilfert, Hanson, Harrison, Hettinger, Hicks, Hudson, Hughes, Hurd, Iszard, Jordan, Kipsey, Knight, Lindsay, Loutrel, Mills, Minisi, Muir, Parvin, Pascoe, Pine, Powell (Speaker), Read, Reeves, Renner, Robinson, Roll, Sharkey, Siracusa, Stratton, Thompson, Thropp, Vaughan, Welsh, West, White, Zlonczewski—60.

The Speaker declared Frederick A. Brodesser unanimously elected Clerk of the General Assembly for the year 1925, and he took and subscribed to the oath of office.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the Speaker appoint forthwith a committee of three to wait upon the Governor and inform him that the House of Assembly has organized by the election as Speaker of Hon. Clifford R. Powell, of Burlington county, and of Frederick A. Brodesser, of Union county, as Clerk of the House, and is now ready to proceed to business and to receive any communication he may be pleased to make.

The Speaker named Messrs. Stratton, of Gloucester, Kipsey, of Somerset, and Vaughan, of Sussex, as the committee.

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the Clerk of the House is hereby directed to inform the Senate that the House of Assembly has organized by the election as Speaker of the Hon Clifford R. Powell, of Burlington county, and of Frederick A. Brodesser, of Union county, as Clerk and has proceeded to business.

Mr. Chandless offered the following resolution, which was read and adopted:

Mr. Chandless offered the following resolution, which was read and adopted:

Resolved, That the Rules of the House of Assembly as printed in the Legislative Manual for 1924 be adopted as the Rules of the House of Assembly for the session of 1925.

Mr. Barison offered the following resolution:

Resolved, That the following rule be substituted for present rule 67:

67. That hereafter any motion or resolution which will result in relieving a standing committee of a bill referred to it shall not be entertained unless twenty-four hours' notice shall be given the House of the introduction of such motion or resolution; *provided, however,* that on a written request made by thirteen members, duly presented to the House, said request shall be read, and delivered forthwith by the clerk to the chairman of the committee named therein: said committee shall, within twenty-four hours, report on the bill, resolution, motion or matter named in said request.

Mr. Chandless moved to lay the resolution on the table, which was agreed to.

A message was received from the Governor by the hands of his Secretary, as follows:

GOVERNOR'S MESSAGE.

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
To the Legislature: January 13, 1925.

In accordance with the mandate of the Constitution of New Jersey, it becomes my privilege to make to you recommendations in relation to matters which concern the government of the State and the welfare of its people.

REVIEW.

It is a pleasure to report to you that the financial affairs of the State are in a sound condition, and that the income of the State approximates the funds needed. The condition is such that it will not be necessary to burden the people with additional taxes for State purposes if proper economy is exercised.

Both the vehicular tunnel under the Hudson River and the suspension bridge across the Delaware River near completion. The people have authorized an additional bond issue to cover the added cost of both of these great enterprises, and the State Highway Commission has developed plans to accommodate the great increase in traffic which will come when these two great gates of commerce are opened to the public.

In addition to this, the State Highway Commission has added many miles of good roads, at a reasonable cost, to the already existing system of highways and has aided the counties, both by funds and by expert advice, in the repair and construction of County roads, pursuant to the mandate of the Legislature.

The Port of New York authority has taken up the problem of building two bridges across the Arthur Kill, connecting New Jersey with Greater New York, and will shortly be ready to enter upon the work of construction of either one, or both, of these bridges, if authorized.

The Delaware River Tri-State Commission, composed of members from New Jersey, New York and Pennsylvania, have met and studied plans for the allotment to each of the three States of the upper waters of the Delaware, and the New Jersey Commissioners will be prepared to report to the Legislature the result of this work to provide that each State shall receive its fair share of these waters so that a Treaty between the three States may be made to carry out this purpose.

At last, after many years of inaction, we are beginning to overcome the crowded conditions in our State institutions, and it is with particular gratification that attention is called to the progress of the work at Morris Plains. And what is true of this institution is true of all the other institutions for whom funds have been provided in the last two years.

A most satisfactory working agreement has been established between the State Department of Institutions and the State Highway Commission, so that prisoners may be employed and aid in building our State highways. The work which the prisoners have already done is highly approved of by engineers and contracts between the two departments have already been entered into for an extension of this work.

The building of the roads has not only furnished employment and training for the men, but the work itself has been economically done in a business-like manner.

Already, the work of dismantling the Morris Canal, which now belongs to the State, has proceeded so satisfactorily that many dangerous bridge and railroad crossings have been eliminated. The danger to health from stagnant water has been overcome. Portions of the canal-bed have been disposed of, and the new dam for the headwaters at Lake Hopatcong is well underway, this last work being of vital necessity, owing to the weakness of the old structure.

Public interest has been aroused over the plan proposed by the Executive year before last, and, again, last year for the erection of a bridge across the Hudson River near Fort Lee, in order to still further provide for the needs of the people in that part of the State for more adequate transportation facilities

across the Hudson River. Specific recommendations will be made later herein on this subject.

We were confronted with an emergency at the opening of the chief gunning season, owing to the lack of rain. Forest fires were prevalent, and it was necessary for the Governor to suspend, for a time, licenses for hunting. Those who were interested in gunning practically unanimously realized the seriousness of the situation and accepted the disappointment in a sportsmanlike manner. In this way, no doubt, many forest fires were avoided, and game depletion through forest fires was prevented.

The problem of supplying the people with wholesome drinking water has interested the business men who form the State Chamber of Commerce, and we will soon have the benefit of the study which they have made of this important subject.

The people are aroused to the necessity of taking an inventory of our Public School System, and, from all parts of the State, the demand comes for a survey of these affairs, to ascertain whether or not the children are receiving the best.

While much progress has been made, much remains to be done. We are proud of our accomplishments as a State. Our standards are high, and the work for the welfare of all the people must progress.

The following recommendations are made with the hope that the Legislature will consider the problems and enact into law those things which are planned for the betterment of the people and for their continued prosperity:

TAXATION.

In my campaign for Governor and since my election, I have been advocating tax reduction. During the first year of my term, considerable thought and study was given to the question, and the conclusions reached were communicated to the Legislative Session of 1924. That body, however, took no action.

It is not advisable or necessary to repeat in detail what was said at that time, because that Message is available to the members of the Legislature. I do desire, however, to say that if a study is made of the question it will be seen that there is little

comfort to be found in any other course than that which has been suggested. There are on file numerous reports made by Legislative committees on the question of taxation, and none of them has brought relief.

Taxation appears to be so complex in its application that most people think it is impossible to understand it. Apply primary principles, however, and it is quite apparent that the way to reduce taxes is to curtail expenditures. If you do not spend the money you are not obliged to raise it by taxation. That is a fundamental easily understood. The difficulty is, how to prevent the spending of too much money, and the answer is quite as simple. The method is to check those who have to do with the spending. Everyone knows that municipal bodies are practically free to spend what they like; that the taxpayer takes very little interest in what is going on, and then finds fault with the tax bill. We also know that there are always some people in the community who are willing to lend their efforts to the reduction of taxes, but that number is limited. We know, too, that when the tax budget has been adopted by the local board, there is no further relief to the taxpayer. Thereafter, he has nothing to do except to go down in his pocket and pay.

I desire to press upon your notice a suggestion which I have heretofore made for the adoption of what is known as the "Indiana Plan," or a modification of it. Under this plan, a few citizens may appeal from the determination of the local authorities to a State Board, either in the matter of the expenditures of public moneys, the making of a budget, or in the issuing of bonds. This plan, by experience, has shown that it serves a double purpose. First, it is a check upon those who do not want either an appeal from their action or a reversal thereof; and, second, by an actual reversal, upon appeal, of extravagant appropriations or bond issues, when such have been made.

We are living in extravagant days. Budgets have gone up and tax rates have soared.

The following are the average tax rates throughout the State for the last ten years:

1914	$2.024
1915	2.115
1916	2.193
1917	2.340
1918	2.377
1919	2.853
1920	2.853
1921	3.44
1922	3.561
1923	3.561
1924	3.671

In further illustrating tax increases, the following is a table of the comparative tax rates in the ten largest cities:

	1914	1924
Newark,	$2.08	$3.78
Jersey City,	2.113	3.605
Paterson,	1.91	3.11
Trenton,	2.16	3.24
Camden,	2.00	2.80
Elizabeth,	1.80	3.08
Bayonne,	2.243	4.010
Hoboken,	2.258	4.740
Passaic,	1.71	3.55
Atlantic City,	1.87138	3.000

Perhaps, the average tax rate tells the story as briefly as any. It shows the steady climb that we have been making. In addition to this, millions of dollars of bonds have been issued, which have pledged the credit of our municipalities, and upon which we are paying interest and amortization charges, and for which a day of reckoning must come.

In this State, in 1920, we had no bonded debt. Now, we have an authorized bonded State debt of $88,000,000.

Within the State, substantial economies have been made during the last two years, notwithstanding the fact that large public improvements have been under way.

To illustrate, large amounts of money have been saved in the building of our State highways by the honest, efficient and economical administration of that department.

In the issuing of road bonds, the rate of interest has been kept down to 4¼ per cent, with the bonds bringing a premium, and the bonds being issued only for fifteen and thirty years on bridges and roads, respectively.

Without further detail, it is sufficient to say that similar economies have been effected elsewhere in the State's business.

With the increasing tax rate and the constant inflation of municipal budgets and the issuing of large amounts of bonds, it is our clear duty to provide a method to check extravagance and so relieve the taxpayer.

I cannot impress this upon you too strongly.

If the Legislature, in its wisdom, can find anything more efficacious than the Indiana plan, I would be glad to have them do so, but experience has shown us that nothing has been as practical in its effect as that plan. Its operation in Indiana has demonstrated its usefulness and efficiency. First enacted into law, it was then repealed at the instance of those who were doing the spending, then re-enacted because of a great demand from the taxpayers, and since that time in active operation.

I urge strongly upon you the enactment of a law similar to the Indiana Plan in the interest of the reduction of taxes.

INHERITANCE TAXES.

The taxation of decedents' estates has gradually increased as a popular method of providing an income for the State Government.

The Federal Government itself has stepped into the field and now demands a tax where the estate is in excess of $50,000.

Annoyances and disputes, and, in some cases, hardships have arisen where the estate of the deceased has property in various jurisdictions, or holdings in corporations created under the laws of other States than the one of domicile. This situation creates in many instances double taxation and more.

Many plans have been proposed to remedy the difficulties, but none seem to solve them.

New Jersey cannot forego this source of income, as practically one-half of the money to run the State Government comes from this source. It is also true that we do not want an Income Tax in New Jersey.

The Federal Government, however, should be pursuaded to leave the field to the States, and a memorial to Congress is recommended. We should also request our representatives in Congress to urge the repeal of the Federal law.

The subject is a live one and of growing importance. Florida has already abolished such taxes by constitutional amendment in order to attract the wealthy. Other States may follow her example.

I am informed that a conference of the States has been called to meet in the City of Washington, to discuss this subject, in the near future. At that conference, some feasible plan may be devised, and I will take pleasure in forwarding to the Legislature the results of the conference.

TENEMENT HOUSE COMMISSION.

The Tenement House Commission has been in existence for 20 years, during which time it has been of much service to the State. With the growth of population its usefulness has grown, and it has been called upon to carry its work into regions of the State not contemplated at the time of its creation. This has required more employees and larger appropriations, in order that its work might be effectively carried out.

Its revenues have been very slight, being derived from fines for violations of its regulations.

The appropriation for this department last year (1924) was $110,200; its revenues in 1923-1924, $600.00.

This department should not only be self-sustaining, but productive of revenue as well.

In the City of Newark, there is a local board exercising functions very much like those of the Tenement House Commission and from this department the City of Newark in 1924 derived a revenue of $99,399.40.

There is no reason why the State should not do the same. State supervision at the time of the erection of a tenement house, as well as afterward, should not be provided gratis.

It is beneficial to the property owner and adds to the value of the property. It protects the owner from danger of lawsuits. A charge made by the State for the service it renders is properly a charge against cost of the property.

I would, therefore, recommend that a law be enacted fixing fees to be charged by the Tenement House Commission for the approval of plans, and that the fees be made large enough not only to pay the expenses of the Commission, but to add to the revenues of the State.

Study of the matter leads to the suggestion that the powers of this Commission should be further extended to a supervision of theatres, moving-picture houses and other public halls throughout the State.

Information comes to the Executive from time to time that in many communities, either local regulations are inadequate or that there are none at all. Thousands of our citizens, day and night, crowd into these places insufficiently provided with exits, ventilation and conveniences.

Before disaster occurs, aware of the dangers as we are, it is our immediate duty to invest sufficient authority in a competent State body to close those places that may be fire-traps and disease producers until proper alterations are made.

It is hoped that this recommendation will receive your earnest consideration.

FIRE INSURANCE FUND.

In 1913 (Chap. 123), by legislative act, there was established an Insurance Fund, the purpose being to provide a fund large enough so that the State might insure its buildings and personal property against fire, without resort to private Insurance companies

The following appropriations have been made to that fund:

1913	$50,000
1915	50,000
1921	50,000
Total	$150,000

The fund made up from these appropriations, with accrued interest, now amounts to the sum of, approximately, $202,000.

At the time the fund was established, it was decided, I am informed, that a fund of a million dollars would be sufficient to carry such a project. This fund is substantially ample now with, perhaps, some slight increase due to the increased number of buildings, which have since been erected, as well as the increased cost of reproduction. In this connection, we must also have in mind that the buildings of the State are good risks. The fires in them have been few; they are now being constructed of fireproof materials, and the risks are well and widely scattered over the entire State.

The establishment of this fund was a wise and thoughtful policy. It is just as wise to-day as it was then.

I am calling attention to the tendency of our legislators to leave out what is yearly required to perfect this fund, so that it will come into complete operation, and the above table is enlightening. This is usually done because there is someone who wants the money for some other purpose—very frequently a purpose not nearly so worthy.

The result is that the payment of Insurance premiums to private companies continues.

The payments by the State for insurance premiums amount to, approximately, $50,000 annually.

It is nothing short of wasteful to pay high insurance premiums to private companies, when the State might, by proper action, insure itself and save the money.

I know that there is opposition to this plan on the part of those who will naturally be deprived of the business. This, however, should not deter us from stopping the practice when we know it will save the State large sums.

We have established Pension funds, and the like, for those in the State service, and an Insurance fund for the State itself is just as wise.

I, therefore, urge upon you the continued appropriation of the sums required to build up this fund to the necessary amount.

STATE FUNDS.

It is of vital importance that all revenue and income collected by every department or agency of the State should, in the interests of economy and good business, be paid directly, in the first instance, into the State Treasury. I recommend such course.

EDUCATION.

Last year, in a Special Message to the Legislature, the Executive requested power to appoint a Commission to make a needed survey of the Public School System of the State, with necessary funds to accomplish the task.

Many criticisms of the Public School System were pointed out; statistics were furnished, setting forth the vast sums expended annually in the State and Nation, and attention was called to the duty of the representatives of the people to provide our children with the best that was obtainable, and to expend the taxpayers' money wisely and economically.

These requests were ignored by the Legislature of 1924.

Since that time, the criticisms have continued, and the annual expenditures have increased from Forty-six Millions to Sixty-three and one-half Millions. Whether the criticisms of the System are just, remains undetermined; whether the money of the people is wisely expended, remains to be seen.

Various Civic organizations interested in education and in other public questions have urged that the survey be made; the newspapers of the State, irrespective of their political leanings, have approved of the suggestion, and public opinion is, undoubtedly, in favor of it.

In the circumstances, having full appreciation of the importance of the subject, for the good of the children upon whom the future welfare of the State rests, and in the name of good judgment and common sense, let us learn the truth. As I have said before, if there is nothing in the criticisms, then the critics will be silenced. If the criticisms are well founded, then the evils should be speedily corrected. In any event, it is our duty to ascertain the truth.

I respectfully commend to you for your consideration the Special Message of last year, and urge upon you the duty which rests both upon the Legislative and Executive branches of the State Government to see to it at once that this important task is undertaken.

I desire to repeat what is most important, viz.: That the Commission to make the survey must be absolutely non-political. The personnel must be selected from those of our State best qualified to render impartial and effective service. They should be given ample funds with which to do the work.

If the Commission is not of the character suggested, then we had better have no Commission at all.

COAL.

Temporarily relieved of a coal shortage, this subject is not being discussed much at this time, but I desire to call your attention to the fact that we still have high and excessive prices for coal, and that the coal shortage will again be a reality. We cannot, therefore, pass these questions by without action.

Heretofore, the attention of the Legislatures was called to the Mackay Investigation with its recommendations, and the failure of the Legislature to adopt any of the recommendations of its own committee.

In fact, no helpful action has been taken by the Legislatures of the last two years, either to correct conditions or to provide against future scarcity or high prices.

You no doubt know that recently the Coal Tax imposed by Pennsylvania has been sustained by the Supreme Court of the United States, and so probably becomes a permanent addition to the cost of coal.

Why no action is taken for the relief of our people against the high price of coal and the prevention of periods of scarcity, I cannot understand, because nothing comes nearer to our people, or presses harder upon the poor.

The Federal Congress caused a fact-finding commission to be appointed, with the result that, in 1923, this Commission made a complete and comprehensive report of conditions in the coal

fields and of the methods used in the transportation and sale of coal, pointing out clearly that anthracite coal was a natural monopoly found only in three districts of the State of Pennsylvania, was controlled by a few Coal companies, and that many and serious abuses existed in the industry, which resulted at times in not only a curtailment of the supply, but in prohibitive prices to the consumer.

As a result of this investigation, Bills were introduced in the Congress of the United States to regulate this industry, but failed of passage. The President of the United States, in his Message to Congress, in December, 1923, informed the Congress that "the cost of coal has become unbearably high. It places a great burden of our industrial and domestic life. The public welfare requires a reduction in the price of fuel." His recommendation, however, for legislation goes only to the extent of asking for authority to deal with conditions when an emergency arises.

As the commodity, the moment it leaves the mines, becomes a subject of Interstate Commerce, its complete regulation can only be dealt with by the Federal Government.

At the same time, there are measures which may be adopted by the State of New Jersey for the protection of her citizens, to assure equal distribution of coal of the proper quality and some regulation of the price after it reaches the distributors in this State. The subject is one of vital importance to all of the people of the State, and it is earnestly called to your attention, so that, at this session of the Legislature, laws may be passed which will give to the proper authorities power to provide for an equal distribution of coal throughout the State and to curb extortion, and to provide, so far as lies within the power of the State, coal for domestic purposes at a reasonable price.

In my Message to the Legislature of 1924, I advised that the following action be taken:

First. The enactment of a statute which would protect the consumers of this State against all unlawful practices and profiteering after the coal gets within the State.

Second. An appeal by the State of New Jersey, through its Legislature and Governor, to the Congress of the United States to prevent extortionate and unlawful practices and profiteering

while the coal is in interstate commerce; together with a like appeal to the Senators and Congressmen from this State asking their co-operation.

Third. An appeal to the Governor and Legislature of Pennsylvania, on behalf of the coal consumers of this State, as well as in the interest of the coal consumers of Pennsylvania, for a statute regulating the industry in Pennsylvania, and for relief from the agencies which raise the price and limit the output.

I again suggest that this course be followed.

PRIVATE BANKERS.

The recent cases in Newark of men, while doing business as private bankers or agents for the transmission of money to foreign countries, who, apparently, succeeded in getting away with large sums of money, representing the savings of numerous poor people, again calls attention to the fact that these occurrences are all too frequent. It also emphasizes the fact that we, in this State, are not making a sufficient effort nor taking the necessary precautions to protect these poor people, who, in this way, lose their hard-earned savings.

In one case in question, the bankers had no license from the State Banking Department to do business. They were doing it unlawfully. The obvious remedy in a case of this kind is the detection and prosecution of such men who accept deposits of money from their victims, when they possess no license, and it is the duty of the Prosecutors of the Pleas, as well as the police officials, to make frequent examination into conditions in their jurisdictions and to prosecute promptly those who are carrying on the banking business without authority.

If this is done, a great deal of money will be saved to the people who are now being defrauded.

I believe that there is no longer any necessity for private bankers or forwarding agencies in the State of New Jersey. Our banking institutions, National and State, furnish abundant facilities and protection for all banking that is required and for transmitting money to foreign countries. These institutions have large assets, are under constant supervision, and are safe. In

Free Public Library, Newark, N. J.

addition to this, the United States Government, through the Post-Office Department, affords additional facilities for saving and transmitting money.

I am urging upon the Commissioner of Banking that no further licenses be granted to private bankers to do business within this State.

In order not to do an injustice to those who are now authorized to do private banking, it may be advisable to permit them to continue, provided security of not less than $100,000 is furnished. If legislation is necessary for this purpose, I advise that it be enacted.

One of the most important functions of government is the protection of the weak and helpless. It is our clear duty to protect those, who, because they have not yet acquired a complete knowledge of our methods, are led by unscrupulous persons to deposit money in questionable private banks and agencies and then lose what they have been at great trouble and sacrifice to save.

EXPLOSIVES AND DANGEROUS CHEMICALS.

Great scientific discoveries have only been made at the risk of life and limb. Progress follows in the path trodden by those who have been willing to make sacrifices for the good of humanity. Yet, at the same time, the State should exercise proper control over the manufacture of dangerous and poisonous chemicals and compounds, and demand and enforce reasonable protection, not only for those who must work and labor in these dangerous callings, but also to see to it that the public is safeguarded when the manufactured article is distributed for general commercial use.

To illustrate: It is said on reliable authority that in the manufacture of a chemical product commercially useful in the gasoline industry, the men so employed, under certain conditions have lost their lives or have been temporarily and perhaps permanently deprived of their reason. This should, under no condition, be allowed to continue. The public good requires no such sacrifice. It is also said that these dangerous compounds are retailed to the public without proper warning. This must be stopped.

It is, therefore, recommended that legislation be adopted which will empower the Department of Labor to prevent these industrial evils through proper restrictions and regulation. In this age of great industrial advancement and expansion, too little thought is given to the human side, and often those who receive the profits forget that labor is not a commodity, that human beings are not chattels, and that justice demands that the toiler should work only under conditions which will produce health and happiness, and where danger and risk are reduced to the minimum, and that adequate safeguards be thrown about him.

To again illustrate: The State recently was appalled at the loss of life and damage to property by an explosion which took place at a plant where dangerous and inflammable chemicals were stored. Punishing those responsible for such happenings is, of course, the part of wisdom and justice. Yet, the adoption of stricter regulations which will prevent these disasters is the duty of the State. Our laws must be strengthened in this respect. "Explosives" must be comprehensively defined, security must be required of those who engage in these undertakings, safe locations must be determined by competent authority and proper restrictions placed about their manufacture, storage, distribution and use. Drastic penalties must also be imposed upon those who, through a thoughtless disregard of human life, subject their neighbors to alarm, danger and injury.

I, therefore, recommend a close study of this subject, and after advisement with those who are familiar with and expert in these matters, alter the statutes which relate thereto.

The Commissioner of Labor will forward to the Legislature the result of his investigations into these matters, which will, no doubt, aid you in your deliberations.

STATE INSTITUTIONS.

As the Executive, and others having knowledge of the subject, have frequently pointed out, New Jersey is proud of the record made in the care of those in correctional and training institutions, of the insane, the mentally defective, those suffering from epilepsy and tuberculosis, and all of the other helpless wards of the State.

Yet we are still far behind, not alone in supplying present needs, but also in making adequate provision for the future. The things to be done are a vital necessity, from the standpoint of humanity, good morals and good economics. It is much wiser to provide suitable asylums for the care of those suffering from mental disorders than to pack already overcrowded hospitals, where recovery becomes impossible and the unfortunate victim remains behind closed doors until a kind Providence removes him by a merciful death.

The Board of Control of Institutions and Agencies in 1922-1923 adopted a well-considered plan to meet these needs by raising by direct taxation, over a period of five years, the sum of nine million dollars. This is only a little over half the sum actually required, but sufficient to make up in part for our past neglect. Previous Legislatures, however, have only seen fit to permit the raising of a portion of the money and have been unwilling to bind the State to carry on this work as requested. Already much has been accomplished with the funds furnished. But the task is far from completion.

By Chapter 172, Laws of 1923, a half-mill State tax was imposed to raise sufficient funds to make needed improvements at Morris Plains. This work is well on the way to completion, and conditions at Morris Plains are much improved, but the funds were insufficient and the plans have had to be curtailed.

By Chapter 237, Laws of 1924, the half-mill tax was continued for another year to provide funds for the following institutions:

(a) State Home for Girls	$150,000
(b) Institution for Feeble-Minded at Vineland	70,000
(c) State Hospital for the Insane at Trenton	624,000
(a) State Village for Epileptics at Skillman	127,500
(e) State Colony for Feeble-Minded Males at New Lisbon	147,857
(f) Sanatorium for Tuberculous Diseases at Glen Gardner	343,000
(g) State Home for Boys at Jamesburg	110,000

If any money remains it is to be used toward the erection of a much-needed training school for feeble-minded females in North Jersey, at a total estimated cost of $916,300.

It may be said, in passing, that the half-mill tax yields approximately two and one-half millions of dollars annually.

The above, however, is only a part of the plan devised by the Board of Control, which contemplates, among other improvements, the expansion of the Woodbine Colony for Idiots, a new Intermediate Reformatory for northern New Jersey, further facilities for the New Lisbon Colony for Feeble-Minded, extension of the Village for Epileptics at Skillman and reconstruction of the State Prison and provision for two industrial colonies.

Statistics show that insanity and other mental disorders are increasing in greater percentages than the increase in population, that crimes of violence have also increased, and that a watchful eye must be kept and preventive measures adopted to stop the spread of dread tuberculosis and to remove from society the mentally defective and degenerate, who menace the whole social structure when allowed, unrestrained, to propagate, passing on to posterity their unfortunate disorders.

There should be a continuation of the work under the plan proposed by the Board of Control, and legislation should authorize the necessary funds by the half-mill tax to provide these needed facilities.

There are already eleven thousand wards of the State, and the number is ever increasing. Present crowded conditions prevent decent living quarters, both for the inmates and those employed by the State to care for them. Many of the buildings now occupied are unsafe and dangerous, particularly from hazard by fire. The crowded condition prevents cures, and proper segregation and classification is impossible.

We have no place for young offenders under eighteen years of age, and many of them are in the State Prison,—a place intended only for mature offenders. These boys are subjected to evil influences from the older inmates. This institution is obviously no place for the training of boys, and the new institution which is proposed to house and train these young offenders is one of the needs of the State.

All these needs make a strong appeal to the hearts and consciences of the people. Their mandate to go on with the work has been clearly expressed. We who are their responsible representatives should do our duty.

NARCOTICS.

World-wide efforts are now being made to curb the growth, the manufacture and the sale of opium and other harmful and habit-forming drugs.

The United States has taken the lead at the recent conference in Geneva, and the nations of the earth are combining to stop this evil.

The harmful effects of the use of narcotics are far-reaching, and, as I pointed out in other Messages to the Legislature, their baneful effects rest not only upon the present generation, but are carried on to generations yet unborn. Therefore, every instrumentality, governmental or otherwise, which has any power to aid in suppressing the traffic in these drugs, should be exercised to its fullest extent. Not only should we punish those who are engaged in the traffic, but lend a helping hand to the unfortunate victims.

Therefore, I would recommend to the Legislature an amendment to the present laws, which will empower either the Court imposing sentence or the Board having control of the institution, to which a narcotic user may have been committed, to transfer the convicted person to some institution either under the control or under the jurisdiction of the Department of Institutions and Agencies, there to receive proper medical treatment to bring about, if possible, a cure.

I am informed that there is no legitimate need, either in medicine or surgery, for the use of heroin, nor any necessity for it being prescribed for the relief of pain. It has no curative properties.

I would, therefore, recommend a further amendment to our laws, prohibiting the use of heroin for any purpose.

I further recommend that if and when an asylum is provided for the cure of State prisoners, that the necessary power be given, to make arrangements with the Federal Government, so that Federal prisoners, convicted of using narcotics and now sent to our

County jails and workhouses, may, likewise, receive curative treatment, provision being made for payment by the Federal Government for such care and treatment.

POWER OF REMOVAL.

In the laws creating certain public offices, power of removal has been granted by the Legislature to the Governor, after hearing on charges. There are, however, a number of other boards and departments (as well as some Judges of statutory courts) over which the Governor has no such power. They may now only be removed upon impeachment proceedings by the Legislature. This is a cumbersome method and is seldom resorted to, except in the case of high Judicial officers of the State and when the Constitution requires it.

I would, therefore, recommend that the laws be so amended as to give the power of removal to the Governor, after charges and a hearing, of all members of any State Board appointed by the Governor and also of all Judges of District courts.

This is a power which the Governor should possess, in order that he may be able to replace those found guilty of misconduct or malfeasance in office, or of the failure to properly perform the duties imposed upon them. If there be any merit in giving the Governor this power over one department of the State, he should possess a like power over all. It will provide a speedy method of improving the public service.

PROVIDING FOR TEMPORARY EMERGENCIES.

At the time of the death of a former Commissioner of Labor, and before the Governor was able to name his successor, it was found that there was no provision in the law for the temporary designation of a person in that department, to take the place of the Commissioner and to act and function during the period when there was no Commissioner. There has been ample provision made to have the Deputy act for the Commissioner in his absence, etc., but the Deputy's powers ceased upon the death of his Chief.

Similar conditions have been found in the laws relating to other departments.

I would, therefore, recommend that a statute be passed permitting the Governor to designate some person to act in the place of the head of a department, during any period in which there is no head. This will prevent embarrassment to those departments during the time the Governor may be casting about to find the best man to fill the vacancy. It will enable those departments to function during such periods, and not subject their orders and actions to contempt and disobedience.

BUREAU OF ELECTIONS.

In the two first-class counties of this State there has been in existence, for a number of years, a so-called "Bureau of Elections," created for the ostensible purpose of preventing frauds in our elections, but really to provide political jobs. This has resulted in the expenditure of large sums of the taxpayers' money without any equivalent in service in return.

These bureaus, since their creation in 1918, have cost the taxpayers of Essex and Hudson Counties approximately $525,000. The records fail to show that any election frauds have been uncovered, or that any good whatsoever has been accomplished for the people.

These bureaus were foisted upon the people of these two counties without their consent, against their desires, and in the absence of any demand from those whose burden it is to pay the cost. Annually, a few weeks before each election, the activities of these bureaus are published for the purpose of creating the impression in the public mind that there is some excuse for their existence. As soon as the election is over, we hear nothing further from them until the next annual election.

The Executive has already, on two other occasions, urged the repeal of this law, and the representatives of the people of both these two counties in both the House and the Senate are in favor of its repeal.

As it has been demonstrated that these bureaus have served no good purpose, their abolition is again urged. We have no right to continue and countenance the waste of the taxpayers' money.

GAME PRESERVATION.

The continued dry spell during the last Fall, with the consequent fires in the woods and fallow lands, disclosed the fact that there is no statutory power for suspending the hunting season.

Although the situation was met by prompt and legal action, it would seem to be advisable to express the power in statutory form, by enacting a law which will give to the Governor the right to suspend the hunting season, whenever in his judgment he may determine that an emergency exists or that it is in the public interest so to do.

This action is necessary not only for the preservation of private and public property, but for the preservation of the game itself.

During the closed season, made necessary by the emergency, the gunners, by their fine sportsmanship, demonstrated that they were willing to acquiesce in any action required to preserve property and game.

SEASHORE RESERVATIONS.

It has been the policy of the State, for a number of years, to conserve the forests of the State, not only for purposes of reforestation and water conservation, but also for recreational purposes.

During this same period, the shore of New Jersey along the Atlantic Ocean has become a great playground, not only for the people of other States, but principally for the people of our own State. There is now a continuous city from Sandy Hook to Bay Head, and other sections are becoming populated quite as rapidly. It is evident that in time the entire shore will be preempted by those who can afford to buy this land.

A few miles of this shore-front is still available. Its value will never decrease and it could always be sold at a profit, and some portion of it should be acquired as a public reservation for the benefit of those who cannot afford to own or rent seashore homes, but who are entitled to enjoy this beneficial recreation.

The same reasons which apply to the conservation of forests for recreational purposes, apply with equal force to the seashore.

PORT DEVELOPMENT AT CAMDEN AND ALONG THE DELAWARE RIVER.

With the finishing of the bridge that is soon to span the Delaware River at Camden, that part of the State is sure to see rapid development. Camden will grow to larger proportions and the hinterland will develop as an attractive suburban section, with industry soon pushing the suburban communities further and further back.

It has been but natural that the great City of Philadelphia has grown more rapidly than Camden, but Camden is destined to become one of the largest cities of the country.

It has natural facilities equal to Philadelphia, and as the latter's facilities are limited, Philadelphia must soon seek relief elsewhere.

The Delaware River from Trenton to Cape May is available for a great port development. It is open to all ocean going steamships and affords excellent facilities for industry. Camden, by its location, is a component part of the great port of Philadelphia. We have here, duplicated, the conditions, in large part, found in the harbor of New York.

Camden and environs, for they are the ones upon whom immediate demands are being made for advancement, must see that this great port is fully developed and that they share in the benefits.

They must see that adequate railroad facilities are provided on this side of the river, and that all railroads serving the Philadelphia district are given free access to our industries.

The water-front must be developed in the public interest, and not reserved for private purposes and private advantage at public expense.

Warehouses must be built and railroads constructed or co-ordinated, so that rail and water may be brought together, industry served and developed and Foreign trade encouraged.

In short, a modern terminal district must be brought into existence.

The railroad commodity rates, which now discriminate against Camden should be equalized.

There should be created in this section of the State, from Camden to Cape May, a district, with power to develop commerce on this side of the river, to make a study of the whole problem, and eventually to include all the east side of the Delaware River as far as Cape May.

Much can be accomplished at the present time at Camden, because there is still considerable water-front property available there. From Camden the development will spread. The present is the time to act, for at a later day when all of this water-front property has been absorbed by private interests and by the railroads it will be more difficult and more expensive to obtain it for the public use.

The time is not yet ripe to negotiate with our friends across the river. But with docks completed, warehouses built, railroads connected and the facilities of the district unified for commercial activities, the amalgamation of all facilities, for mutual benefit, on both sides of the river, is sure to follow. This has been the experience at the Port of New York, as well as in other large commercial centers in the United States and throughout the world. What is true of them will be true of the Port of Philadelphia, if we take advantage of our present opportunities.

I would, therefore, recommend that a port district be created, with the necessary power to acquire public control and ownership of the water-front, to build warehouses and other facilities for the development of the water-front, and to co-ordinate by belt-lines all of the railroads which now reach into this district. This is a matter of great interest to the people of the City of Camden and South Jersey. I commend the enterprise to your earnest consideration, and advise appropriate legislation.

STATE REGULATION OF BUSINESS.

Every year, bills are prepared and brought to the Legislature and, sometimes, introduced for the purpose of regulating all kinds and sorts of business, and, each year, an effort is made to strengthen or, as the expression is, "put teeth in" some existing law which has for its main purpose the restriction of the business or calling, and making it more difficult or impossible to enter the

calling. While it is perfectly proper that the State should protect its citizens and demand certain requirements of those whose business or profession it is to deal with life, health and property, it is contrary to public policy to foster those things which create monopoly or to demand from any citizen unnecessary or unusual requirements before he enters a trade, profession or business.

If these things are permitted to continue, it will not be long before there is a bureau or a commission to license and regulate every conceivable occupation. To a great extent, these regulations do nothing more than protect from outside competition those already engaged in the business. Instead of creating more commissions or giving greater power to those already in existence, it might, perhaps, be wiser to abolish some of them. The Executive has, in the past two years, vetoed a number of bills, which had for their purpose such restrictions, and the vetoes of the Executive have been sustained by the Legislature.

The present Legislature is urged to consider any such proposed measures cautiously, and, unless their passage would do some public good, instead of fostering some selfish or private interest, refuse to enact them into law.

BLACKWELL DIVORCE LAW.

In 1923, there was passed what is popularly known as the Blackwell Divorce Law, which makes for easy divorce.

The bill was passed over the veto, although attention was called to the dangers to society from this kind of legislation.

Attention of the legislation of 1924 was again called to this law, but that body refused to relieve the State.

Experience has demonstrated the vicious character of this kind of legislation.

One of the main objections to the law is that it leaves no room for repentence. To be sure, after the last act of cruelty there is a waiting period of six months, to give the offended spouse an opportunity to cool off, but, as was said by Vice-Chancellor Backes in a recent case:

> "The right of action for extreme cruelty is vested when the offense is committed; the right of prosecu-

> tion is postponed for six months. There is no period for repentances, like in suits for constructive desertions based on extreme cruelty, in which the sinner may relieve himself of the sentence of divorce by contrition and assurance of future conjugal conduct. * * * The Court is powerless to relieve him, even though it believes the repentence to be sincere and future good conduct is assured."

The legislature should not hesitate to repeal this law, because it is in the interest of public morals and the public interest so to do. We should not lend further assistance to "easy-divorce."

CONSERVATION OF FORESTS.

Recent statistics have shown that if deforestation continues in the United States, without adequate replacement, in a very few years the supply of lumber will be exhausted.

Judging by recent developments in Washington, we may hope since the policy has been established by the Federal Government, that the Congress will provide further Federal aid to promote scientific growth of timber. Our share of the Federal moneys at the present time is based upon our own State activities and appropriations as compared with the other States of the Union. In our own State, we have two million acres of lands suitable for the purpose, and our Board of Conservation and Development has made a comprehensive study of the subject, and is prepared to carry out its plans for reforestation and encourage the development of timber lands.

I, therefore, recommend a generous appropriation to permit the department to carry on this work, so that our forest area may not only be increased and developed, but that we may be in a position to demand Federal aid whenever it may be extended to the States. A few thousand dollars wisely spent at this time will result in millions in added wealth in the future and guarantee to generations to come an adequate supply of timber to meet the growing needs of the people.

Its value also as protection to our water-supply is too important to be neglected.

AGRICULTURE.

New Jersey is to a great extent an Agricultural State. Many millions of dollars of the money of the people has been invested in this industry. New Jersey excels in the production of produce of all kinds and the fruit-growing industry is rapidly increasing year by year. Last year an act was passed to encourage the formation of co-operative associations among the agriculturists, and thereby promote not only economy of production, but easy methods to get the products of the farm to the market, so that the farmer might receive the profit to which he is entitled and the consumer purchase the necessaries of life at a reasonable price.

Year by year, the work of the farmer is handicapped and his crops destroyed through the ever-increasing attacks of disease and pests of various kinds.

I trust that the Legislature will consider the needs of this important part of our population, will pass all necessary legislation to encourage agriculture, and will provide the State Department of Agriculture with all needed powers, if they do not already exist, not only to quarantine against, but to provide sufficient funds to fight, disease and destructive insects.

The Executive has already recommended in his Budget Message the granting of substantial apropriations for all these propositions, and trusts that they will not be curtailed or reduced.

POLLUTION.

The Governor requested an appropriation last year to conduct investigations to ascertain from what sources garbage and refuse come which litter our beaches at times and pollute the waters along the shore.

The matter of garbage and refuse was constantly agitated, with the result that the Federal Supervisor of New York changed the regulations and compelled barges from the City of New York, containing garbage and refuse, to be dumped farther out at sea.

This brought a measure of relief, except when, either designedly or by accident, the regulations were disobeyed.

The City of New York has promised that in the near future it will adopt new methods of garbage and refuse disposal. Until this is done the nuisance may occasionally recur, not only to the detriment and annoyance of those who use the New Jersey beaches, but of those who use the Long Island beaches, as well.

Until the permanent change by the city of New York is made, funds should be at the disposal of the Governor to prevent, so far as may be possible, this intolerable nuisance which menaces the health of those who bathe, and deters thousands from using the beaches, with the consequent depreciation in the value of seashore property.

The request for an appropriation of $10,000 is renewed, and I trust the Legislature will see fit to grant it.

Another source of pollution and damage is oil, and oil refuse from steamships and oil manufacturing plants on land, affecting, as both do, the coastal waters and tidal tributaries. The prevention of this particular nuisance is, in the main, a function of the Federal Government. The efforts of some of our representatives in Congress, the Anti-Pollution League, the League of Municipalities and the Executive Department of the State were made to persuade Congress to pass a law to correct conditions and punish those who pollute our waters with oil. A bill was passed forbidding oil pollution from ships, but sinister influences were apparently successful in their efforts to except land plants from the operation of the law.

I therefore recommend that the Legislature memorialize Congress, requesting the passage of adequate laws to prevent oil pollution, either from land or sea. If something is not done, and done quickly, oil will continue to pollute our beaches and our valuable oyster, clam and fishing industries will be completely destroyed.

Realizing that we must be sure that we were adding no polluted matter, at the direction of the Executive, the Department of Health investigated all sewage disposal plants along the shore, ordered changes and repairs, so that when the bathing season opened in 1924, there was no pollution or contamination whatever from any of these sources.

The Sanitary Commission appointed under the Act of 1924, is functioning and will be helpful in avoiding pollution in the waters entirely under State control. I would urge that adequate appropriation be made to enable them to carry on the work.

STATE POLICE.

Our State troopers daily risk life and limb in the performance of their duty in maintaining law and order.

The whole State was recently shocked by the death of a trooper shot by an alleged bandit while the trooper had him under arrest. Many other men have been injured in the service, and some of them have been permanently disabled. Accidents happen while the trooper is pursuing violators of the law, and sometimes damage results, particularly through automobile accidents. The person who suffers damage cannot sue the State of New Jersey, so suit is brought against the individual trooper. If a judgment is recovered, the trooper, if he is financially able, must pay the damage out of his own pocket.

Last year the State troopers recovered stolen automobiles valued at approximately $67,500, and recovered other stolen property to the approximate value of $58,000.

If we are to maintain the high standard which at present exists in the force, the State must do its duty toward these men, and protect them financially against loss.

The State provides only sufficient funds to enable these troopers to carry life insurance to the extent of One Thousand Dollars. If, therefore, it can be done without too great expense to the taxpayers, some method should be provided for caring for them in case of loss of life or limb or financial loss through law suits recovered against them when accidents happen in the line of duty.

There are insurance companies doing business in the State, by permission of the State, which insure against theft and burglary. Since the State Police are the means of recovering so much stolen property and preventing thefts, saving these insurance companies large sums of money in losses which they would otherwise pay to the insured, it would seem but proper that an assessment of

two per cent be levied on their premiums, as is done in the case of fire insurance premiums. This sum could be paid into the State Treasury, and would provide the necessary funds to care for the men of the State Police in the event of death, disability or loss.

I direct your attention to this matter, and hope that it will receive your favorable consideration.

CONCEALED WEAPONS.

An act was passed last year regulating the sale of concealed weapons. For some reason, amendments made to the bill were not incorporated in the law as finally adopted and published.

As these amendments to the bill are important in providing a practical method of enforcing the same, and in order that certain public officials and others in the same class may properly be exempted from its provisions, I would recommend that these amendments be made to the law as it now stands, in order that the concealed weapon statute may be fully effective in this State and enforced with vigor, thus coming into harmony with our sister State of New York and bringing about, if possible, regulation of the sale of deadly weapons.

In this era of violence, it is imperative that weapons be kept away from criminals.

Notwithstanding State laws, criminals are able to secure deadly weapons through the mail and by express.

It is, therefore, recommended that the Federal Congress be memorialized to pass laws prohibiting the use of the mails for this purpose and preventing the transporting or forwarding of firearms in interstate commerce.

This will greatly aid the local and State authorities.

PUNISHMENT FOR CRIME.

Under our present statutes, the Court, in imposing sentence upon those convicted of crime, is required to impose a maximum and a minimum sentence, both of which are fixed by law, depending upon the crime committed.

A criticism which has been well directed to the system of sentencing for a maximum and minimum term is that the effect is bad, not only upon the prisoner but upon the general public. The impression is created, and justifiably so, that probably the prisoner will serve only the minimum term, and will have this minimum term further reduced by the allowances made for good behavior.

Another criticism is, that when a person is sentenced to prison for life, the minimum term is fifteen years; when a person is sentenced for other crimes of violence, the minimum term may be more than fifteen years. Life imprisonment is only imposed upon persons who have taken the life of another. Does it not seem to be in the public interest that one who has taken human life shall receive a shorter term than one who has committed a less heinous crime? Then too should not "life imprisonment" mean life imprisonment? Certainly "life imprisonment" does not mean 15 years. The recent Loeb case in Chicago, where life imprisonment was imposed, illustrates the point that life imprisonment should not mean 15 years.

The Court of Pardons is always open for the exercise of mercy in worthy cases.

It is, therefore, recommended that our statutes be amended, so as to provide that, at the time of sentence, the Court shall impose only the maximum term; that no minimum term be fixed for a life sentence, leaving the disposition of all these cases solely to the Court of Pardons. That the Board of Managers of the penal institution, together with the Judge who may have sentenced the prisoner, shall recommend to the Court of Pardons the release of the prisoner after an opportunity to observe the record and conduct of the prisoner and after considering the advisability of releasing him.

This will have the effect of impressing upon the prisoner the fact that in order to obtain his parole before the maximum term has been served, he must earn it, and it will have the further effect of dissipating from the public mind the general impression that the maximum term means nothing and that less than the minimum term only is served. I would further recommend a law

similar to that of New York imposing additional penalties upon those who are convicted a second and third time, and for persistent criminals permanent separation from society

It is further recommended that the law be amended with respect to the paroling of prisoners who have previously been convicted of crime for which they have served a term in State Prison or other similar institution, leaving the exclusive power to parole these prisoners with the Court of Pardons, where that power is now exercised concurrently either by the Court of Pardons or by the Board of Managers of the institution.

Experience has taught us that the Maximum and Minimum Sentence Law is unsatisfactory from all points of view and is no improvement upon the earlier system of fixed sentences. Vast improvements in recent years have been made in this State in the custody, care and training of those convicted of crime. For example; the so-called "State Use System" has been successfully carried on in the State Prison. The prisoners have been employed in useful occupations and have been taught trades by which an honest living may be earned when freedom is obtained. Through the co-operation of the Department of Institutions and Agencies with the State Highway Department, highways have been built by prisoners.

There is still room for further improvement in justice to the condemned and in the protection of the public against crimes of all kinds. Those who are in a position to know and who have made a study of these matters feel that, if the changes herein suggested are made in our laws, improved conditions will be brought about.

BRIDGES.

In the Inaugural attention, was called to the growing population in Northern Jersey especially in Hudson and Bergen Counties, and the need of better transit facilities to and over the Hudson River.

The attention of the Legislature of 1924 was called to the necessity of doing something to improve these conditions, but no progress was made.

There was passed, in 1923 (Chapter 176), an act granting to private interests franchises to build Tunnels on locations which they might pre-empt, and upon conditions which would be highly detrimental to the interests of the State and of the localities affected, and which might block progress if public authority attempted such work. Fortunately, the State of New York did not pass a companion act, and so the attempt to take advantage of the State has temporarily been blocked. This law should be repealed at once for the protection of the State, and of Bergen and Hudson Counties.

If a similar act is hereafter slipped through the New York State legislature, we will pay heavily for our neglect, and will not be able to relieve ourselves of the difficulties which we by our own neglect produced.

During the year the Governors of New York and of New Jersey advocated that the finishing of the Tunnels under the Hudson River be turned over to the Port Authority. This was advisable for many reasons, but especially so because it would have obviated the necessity of raising $8,000,000 by another State bond issue, and so increasing our bonded debt. Unfortunately, the legislature did not accept this suggestion. I am glad however to see that such a course is now being advocated, by those who opposed it then, for the building of a bridge from Fort Lee to New York City. The building of such a bridge by the Port Authority was advocated by me last year. I repeat the recommendation at this time.

Such a bridge will relieve both the railroad and highway congestion in that section, and in other parts of the State from which traffic will be diverted. It will make for the growth of the northern part of the State and for the great convenience of those who are employed in New York but seek beautiful northern Jersey for residence purposes. It will also serve valuable purposes for national defense.

If a limited appropriation is necessary it should be promptly given.

By legislative action last year the Port Authority was authorized and has made a study of the question of building a bridge or bridges over the Kill von Kull at Perth Amboy and Elizabeth.

These results will be laid before you and should be disposed of on their merits.

It is clear that at least one such bridge should be built, and can be built, by the Port Authority, with some slight help, if necessary, from the State.

After the erection of one such bridge, and when we shall have been able to determine the value thereof, and may judge of our ability to pay for the same from the revenues derived from the enterprise itself, then we may well undertake another, if experience has shown it to be wise and prudent.

It does not look like good business to build two, until we determine what our experience has been with one. If we find two advisable, the second can quickly follow the first, because these bridges are not of such magnitude as to require a long time to erect.

A bridge over the Kill von Kull will undoubtedly be of great value to the State, although more beneficial perhaps to Staten Island. It will serve, too, to relieve our highways from Jersey City to the Raritan River of much traffic now going over and congesting our roads. This will then go in large part over Staten Island.

The great advantage of the proposed plan of having the Port Authority undertake the work, is that the enterprise will be self-sustaining, and that the revenues from the bridges will be used to pay the bonds issued for their construction.

In this way, each enterprise will pay for itself, and when paid for, permit us to either throw it open for free public use, or to use the revenues for further public improvements of like kind; all without additional State tax, or increase of the State's bonded debt.

In contemplating these great projects we should always have this in mind. We know that when we have no such accommodations, we would be glad to pay the small tolls for such conveniences, but after we have them for a while, we then feel grieved if we are not relieved of the payment of toll. An agitation then starts to make the bridge free, and to throw the burden into general taxation. This should not be, for there are abundant uses for funds raised by general taxation. The people most directly

benefited should pay for such an improvement. From the moment it is opened, there comes a financial benefit as well as the greater convenience to those near to the bridge and who are able to make use of it.

The building of one such bridge may lead to the building of others. Among those now under discussion is one from Bayone to Staten Island.

BUILDING LOANS.

Building and Loan associations is another matter of importance, to which I desire to call to your attention, as it affects the welfare of a large proportion of the people of our State. These associations provide a method whereby our citizens may save money and own their own homes, and those who do own their own homes are necessarily good citizens. You will find that they have little sympathy with the various "isms" of the day, especially radicalism and bolshevism. These Building and Loan associations add greatly to the stability of the country. I know of no other factor which does more to encourage and promote peaceful occupations.

Every safeguard should, therefore, be thrown around these associations and every protection afforded for safeguarding the moneys invested in them by the people.

These associations are very popular with the people of New Jersey. New Jersey ranks second among the states in the number of associations, and third in the amount of money invested in this way. There are, practically, fourteen hundred Building and Loan associations with a membership of, approximately, 950,000. The money of the people invested in this way amounts to more than Six Hundred Million Dollars and the gain in assets amounts to Nine Hundred Thousand Dollars monthly.

Our Department of Banking and Insurance is entitled to credit for the way in which it has supervised this large number of associations, and inspired the confidence of the people in the safety of their savings. Our Building and Loan associations are well managed by honest and capable men, who are, themselves, members of the associations. These men take pride in performing this unselfish service with, practically, no compensation but with

pride in the success of the association to which they belong. As a matter of fact, there are only about two associations in the State of New Jersey which need correction at the present time, and the Commissioner of Banking and Insurance has the situation well in hand. Occasionally, something goes wrong in a particular association, but as soon as the trouble is discovered prompt steps are taken to remedy the situation. The result is that in the last eighteen years no shareholder in any New Jersey Building and Loan association has lost a single dollar of the money which he has saved and invested in this way.

The people may confidently feel secure in their investments in these associations, that the homes they are paying for in this way are safe, and that there is no reason for disquietude simply because an exceptional case occasionally arises. It only goes to illustrate that the loans are well managed and that the proper authorities are diligent in the performance of their duty. Our laws throw about these associations many safeguards against dishonesty and carelessness. Officers handling the money of the association are under bond; examination of the accounts and records of the associations are periodically made, not only by the department but also by the associations themselves. The amount which may be loaned on any one piece of property is limited, depending upon the value of the property after a fair and honest appraisal.

Attention has been directed particularly to this subject, at the present time, owing to a case which has arisen in the City of Hackensack. No conclusive report has, as yet, been made either by those who have been employed by the association itself or by the State Department. But a thorough and exhaustive examination by the department is under way, and when that report is received the true situation will be disclosed. The public will know who, if anyone, is responsible. It will be easy to determine what corrections, if any, are necessary for the additional protection of shareholders, and the guilty, if there are any, will be punished.

There has been close co-operation for several years between the State Department of Banking and Insurance and the New

Jersey League of Building and Loan Associations. An effort on the part of both has been made to strengthen the laws wherever necessary, so that losses may be prevented so far as is humanly possible. After exhaustive study of the subject, certain conclusions were reached by them and remedial legislation was suggested and bills drafted. In 1922, a Bill was introduced for this purpose (Assembly Bill No. 9), but failed to get out of Committee. Again, in 1923, a Bill for the same purpose was introduced (Senate Bill No. 28), but this Bill was allowed to die in Committee. This last Bill was a complete revision of the laws relating to Building and Loan associations, clarified the law as it existed, clothed the Commissioner of Banking and Insurance with greater powers, and placed further safeguards about the associations themselves.

The Legislatures of these two years failed to act, although the legislation was recommended not only by the Commissioner, but also by the New Jersey League, which is composed of men belonging to Building and Loan associations, interested in their welfare, having a broad knowledge of the subject, and whose only purpose is to keep up the high standard for efficiency and safety which the New Jersey Building and Loan associations already possess.

I sincerely trust that the recommendations which have already been made for improvement in our laws, together with such other suggestions which may come from responsible sources such as these, may receive the full attention of the Legislature; that the proposed legislation will not be buried in Committee, and that after full consideration of the proposals which will be made (considering, of course, objections, if the same are well taken), the Legislature will pass this remedial legislation.

Nothing should be done at this time to unduly alarm or excite the people whose money is invested in these associations. Nothing should be done to discourage others from joining these beneficial organizations. Nothing should be said or done to create the impression that these associations are not safe, and every precaution should be taken to see to it that no action is taken by anyone which will, in any way, destroy the great usefulness which these associations are to the people of the State.

GRADE CROSSINGS.

The large number of deaths at grade crossings has again brought this question acutely to public notice.

The increase in accidents can surely be accounted for, in part, by the increased number of those who pass over the crossings. The automobile has multiplied, and in our State 427,166 were licensed in 1923, and in 1925 this will reach over half a million. To this must be added the many who come to us from other States.

The number of injuries and deaths has no doubt increased because the number who have used these crossings has increased. Since the number who use the crossings cannot be decreased, we must look to a correction of some kind with regard to the railroad crossing itself. That this condition is general is evidenced by the following excerpt from the report of the Bureau of Safety of the Interstate Commerce Commission. A rapid increase was noted in the number of accidents at grade crossings. In this connection the report said:

> " 'During the calendar year 1923 there were 5,218 accidents at highway grade crossings, which resulted in the death of 2,268 persons and the injury of 6,314. Automobiles figured in 4,007 of these accidents, 1,759 being killed and 5,416 injured. There were eighteen derailments of trains as a result of collisions between trains and automobiles, causing the death of 19 persons and the injury of 77. In addition, there were six derailments of trains as a result of collisions with automobiles, but without death or personal injury.' "

Investigation also shows that a large number of accidents are due to the carelessness of the drivers. Although injury and death lie in wait at these grade crossings, some people continue to be careless, not only of their own safety, but of the safety of those who are traveling with them.

The danger from carelessness can be met only through further education and constant warning, coming from agencies which will reach the greatest number. Perhaps automobile associations and

our own Motor Vehicle Department can do more in this direction than anyone else.

The next and only remaining remedy is the abolition of grade crossings, wherever that is possible.

An effort was made in 1912, directing the abolition of a certain number of grade crossings each year. The Bill passed for this purpose was vetoed by Governor Wilson, who in his Message said, in part:

> "I know the seriousness and great consequence of the question affected by this important measure. There is a demand, well grounded and imperative, * * * that some practical legislation be adopted whereby the grade crossings of railways, which everywhere threaten life and interfere with the convenience of both city and rural communities, should, as rapidly as possible, be abolished. But there is certainly not a demand in New Jersey for legislation which is unjust and impracticable."
>
> * * * * * * * * *
>
> "It is not possible to lay down a hard and fast rule, and enforce it with the likelihood of bringing on conditions under which the whole undertaking would break down and result in utter disappointment."

Governor Wilson clearly stated the difficulties in having the Legislature adopt a hard and fast rule, and pointed out that better results could be accomplished by enlarging the powers of the Board of Public Utility Commissioners. This resulted in the passage of the Act of 1913, Chapter 57. Under this law, through the orders of the Board of Public Utility Commissioners, and by agreements between the railroad companies and the municipalities, many grade crossings have been abolished. The report of the Public Utility Commission shows that since the passage of the Act of 1913, one hundred and eighty-nine grade crossings have been eliminated, fifty-one are now under way, and sixty more are under consideration.

Since 1920, twenty-three crossings have been eliminated by separation of grades at a cost of, approximately, Six Million Dollars. Seven more are under way at a cost of Three and one-half

Million Dollars, and thirty-one more are under consideration, involving an expenditure of Fourteen and one-half Millions. The Highway Commission also avoids and abolishes grade crossings when possible.

Most of the grade crossings in larger communities have been eliminated, but there still remain many crossings in the rural districts which are dangerous, and where accidents happen, despite the safety devices placed at the crossings to warn the traveler on the highway of the approaching train.

Since the World War, the railroads all over the country have been in a weakened financial condition, although lately there has been some improvement. This, taken into consideration with the objections stated by Governor Wilson, would seem to show that to establish an inflexible legislative rule would be impractical. There is abundant power, through the Board of Public Utility Commissioners, to abolish grade crossings. If, in the judgment of the people of the State, more should be abolished and greater speed made in their elimination, action by them should be taken at once before this Board. There, all the questions involved may be considered judicially and determined fairly and justly to all.

This Board has also the power to compel the railroad companies to provide additional protection at crossings where the conditions warrant, and this remedy should be applied more frequently. Citizens and municipalities have the opportunity to apply to the Board for this purpose.

These facts are submitted to you for your information.

SIGN BOARDS.

A growing menace, especially in the suburbs, is the erection of advertising sign boards of all kinds along the highways and on private property in close proximity to railroad grade crossings. These, in many cases, obstruct the clear view of the traveler and increase the danger of collision.

Public sentiment ought to be created in such communities to prevent such signs from being erected. Anyone erecting them should be pointed out as one willing to endanger the lives of travelers for his own personal gain.

In addition to this, I would recommend that legislation be enacted which would make it unlawful for anyone, either upon public or private property, to erect any sign for advertising purposes within a reasonable distance of the nearest rail, if such sign be an obstruction to the view of the traveler upon the highway.

I would further recommend that if a property-owner permits bushes or other obstacles to grow upon his land within a like distance, he shall be subject to a penalty therefor, the same being by legislative act declared to be a common nuisance, in that it endangers the safety of the community.

It is also quite probable that these obstructions, which so often lead to disaster at grade crossings, could be removed by application to the Court of Chancery, upon the theory that they are a public nuisance.

Vice-Chancellor Buchanan, in a recent case, stated the principle as follows:

> "That the injury * * * which might result in actual injury to person or property of the traveling public, is a sufficiently serious public injury to warrant the intervention of the court." (The Court of Chancery.)

The Attorney-General might be instructed to make a test case, in order that the law upon this subject may be determined, and, if determined in favor of the removal of these obstructions, similar action should follow on the part of municipalities where such obstructions are found to be a danger to the traveler.

It would be useless to pursue visionary remedies in a case of this kind. It would be much better to take the obviously sensible course in order to determine definitely how results may be brought about.

During the last year, the number of accidents at grade crossings in this State has increased; many were of a serious character, resulting not only in injury to individuals, but in many cases in death.

Human life is too valuable to be lightly taken, neither should we permit people to be seriously injured. Our every effort should

be for the protection of human life. No effort is too great if a single life can be spared.

Whatever measures can be taken should be taken; if contrary to the Constitution, let us change the Constitution. Preservation of human life is more important than preservation of such a clause in the Constitution.

FILLING CONGRESSIONAL VACANCY.

Due to the death of Congressman Appleby, a vacancy will occur on the 4th of March, 1925. The Election Law requires: "Whenever any vacancy shall happen * * * it shall be the duty of the Governor to issue a writ of election to fill the vacancy, unless the term of service for which the person whose office shall become vacant will expire within six months next after the happening of the vacancy."

The term of Congressman Geran expires March 4, 1925, and if his successor is elected at once he will take office in December, 1925, so that, if there be no extra session in the interval, nothing will be gained by the election of a Congressman by special election. On the other hand, there will have been an expenditure made of approximately $125,000, without any return.

I would, therefore, in the interest of economy, and in order to save the taxpayers of the Third Congressional District this sum, recommend that under these circumstances, a law be passed relieving the Governor from the responsibility of calling a special election, and causing this expenditure.

Care should be taken in drawing this legislation so that under other circumstances, if there is a session of Congress, no district will be without representation.

There are a number of other matters of importance, which I desire to call to the attention of the Legislature, and which are not contained in this Message It will give me pleasure, from time to time, to submit these to you for your consideration.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

Attest:

FREDERIC M. P. PEARSE,
Secretary to the Governor.

Upon motion by Mr. Chandless, the Message was received and spread in full upon the Minutes.

WHEREAS, The House of Assembly of the State of New Jersey has sustained a great loss in the death of former Assemblyman John J. Matthews, member from Hunterdon, during the years 1909, 1910, 1911, and who in addition had the added distinction of representing the county of Union during the years 1887 and 1888;

AND WHEREAS, Since the close of his official connection as a member of this House he had given freely of his time and talents by acting as parliamentary adviser to the Democratic members of this House; therefore be it

Resolved, That the members of the one hundred and forty-ninth session of the Legislature extend to the family of the late Honorable John J. Matthews their sincerest sympathy in their bereavement; and be it further

Resolved, That a page in the Minutes of this session be reserved for the inscribing of this resolution and that a copy of the resolution suitably engrossed be forwarded to the widow of the late Honorable John J Matthews

A message entitled Budget Message was received from the Governor, by the hands of his Secretary, as follows:

Mr Chandless moved that the message be received and spread in full upon the Minutes.

Which motion was adopted.

BUDGET MESSAGE.

To the Legislature:

In accordance with the requirements of the Budget Act of 1916, as amended by the Laws of 1918, I am herewith transmitting to you a summary of the requests and reports made by the various State Departments, together with my recommendations thereon.

The total of such requests is $22,570,914.61 and I recommend total appropriations of $18,705,522.42; of this latter amount $14,318,852.49 will be appropriated from General State Funds. The balance of $4,386,669.93, represents appropriations from School Funds, Motor Vehicle Fees, Fish and Game Receipts, etc., to be expended for such purposes as are by law properly chargeable against such funds.

The estimate of available revenues as submitted by the State Comptroller and State Treasurer under date of December 31, 1924, shows available from General State Funds, $14,320,191.70. As required by the law, my recommendations are within that sum.

My recommendations for appropriations are as follows:

From General State Funds:

A—Executive and Administrative,		$1,047,917 00
B—Legislative,		103,341 32
C—Judicial,		802,090 12
D—Regulative,		2,281,416 60
E—Educational,		917,854 67
F—Agricultural,		729,946 00
G—Military,		829,739 89
H—Pension and Retirement Funds,		253,626 00
J—Constructive,		201,000 00
K—General,		414,150 00
L—Emergency Fund,		250,000 00
Insurance Fund,		50,000 00
X—Institutions and Agencies:		
Current Appropriation,	$7,321,647 89	
Less Receipts,	1,467,144 00	
	$5,854,503 89	
Additions and Improvements and New Buildings,	583,267 00	
		6,437,770 89
Total from General State Funds,		$14,318,852 49

From Motor Vehicle Fees.		
Motor Vehicle Department, .	$459,765 00	
Commission on Elimination of Toll Bridges, ...	75,000 00	
From Receipts of the Department of Commerce and Navigation:		
Expenses of the Department, .	64,220 00	
From Receipts of the Fish and Game Commission		
Expenses of the Commission, ...	267,684 93	
From School Funds.		
Educational Department, Schools, etc, . .	3,520,000 00	
		4,386,669 93
Total Expenditures as above recommended,		. $18,705,522 42

The difficulties of previous years have again been repeated. As in former years, I have found it impossible to comply with all of the requests, because they exceeded the available funds by $3,864,052.98, and the law requires that the budget shall balance.

Although the sums requested no doubt included many that were not necessary, I am sure that most of the requests had merit, and the inability to include them necessarily deprives the departments of the opportunity for improving their work and giving increased facilities. It is, however, inevitable that this should occur, when more money is asked for than is available. Of necessity, someone must suffer.

The practice which provides for automatic increases of salaries, which I called to your attention last year, was again a stumbling block to the conservation of State funds for other purposes.

I felt in conscience bound to reduce the application for legislative employees, made by the officers of last year's Legislature, in the sincere hope that your body would see the wisdom of abolishing the deplorable custom of spending these State funds for political favors.

I trust that your body will inaugurate the custom of selecting only so many employees as are necessary, and selecting them for merit. In this way perhaps a new custom will be established and hereafter these moneys now wasted, will be saved. In addition to this, the members of the Legislature will no doubt find it much more convenient, personally, to be served by qualified employees, in place of those who know nothing about their duties, care less, and many of whom are seldom present

I shall be glad to co-operate with you in this, not in any spirit of criticism, but one of mutual advantage, to practice economy.

I called your attention last year to the necessity of having all State funds paid into the State, but the Legislature did not react to my suggestion.

I am somewhat inclined to think that the Constitution requires that these funds should all be put into the State Treasury and appropriated by the Legislature.

The Legislature should be jealous of the authority placed in its hands by the fundamental law, and enact legislation to bring this about.

In the meantime, with this view in mind, in fixing the budget, for instance:

In the case of the Fish and Game Commission I have allowed for their disbursements this year the amount of their estimated receipts, in the belief that this department, as others, should balance its own budget. In order to secure the additional sums which they desire to spend this year over and above the $267,000 which represents their receipts, they are appropriating from a reserve fund, which they have built up to over $100,000. This reserve fund should be put into the general funds of the State, and could be used, among other things for the protection of our forests and the increase of our forest reservations, both of which are useful in the propagation and protection of game.

In my Annual Message I am again calling attention to the necessity for a continuation of the present State tax for the rehabilitation of our institutions and for the continuance of the institutional program. If such a law is enacted it will release some of our State funds for use in general State activities, and will provide funds for those who have had to be refused in this budget by reason of lack of funds.

This Budget Act has had a salutary effect upon our State finances, and is a useful instrument of efficiency and economy. With the experience gained since its enactment, much progress has been made. Heretofore, investigations and casual examinations have been made during the year, and in preparation for the budget hearings.

I believe there can be an extension of these activities which will bring beneficial results, and they will be pursued by the Budget Commissioners in cases where it is believed that additional information will produce greater economy, and at the same time not impair the efficiency.

With the passing of another year and the observations made during that time, together with the experience gained in the preparation of the budget, I am again impressed with the fact that public affairs cannot be conducted as prudently or as efficiently as private business. If they could, it would add much to our welfare and happiness. I am sure, however, that much more could be done to bring about this condition, if we could but convince those in authority that they should forget partisan politics, and think along business lines.

It is impossible to call to your attention, specifically or in detail, all the work done under the Budget Act.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

Appropriation.	Expenditures.	Appropriation.		Requested.	Recommended.
			No request is made for funds for this account because of the inability of this commission to complete surveys which must be in hand before the probable expenses of continuing the work can be properly estimated. In addition it may be stated the present appropriation will be insufficient to carry on this important work until July 1, when Budget recommendations are planned to become available. It is, therefore, recommended that the Appropriation Committee, in possession of information not now available, make adequate provision for the future requirements of this body.

The Division of Architecture is financed from the general appropriation, and fees charged for work on institutional construction.

In 1924, Institutional Fees amounted to $68,448 72 and are estimated at $99,086 22 for 1925 (the present fiscal year) and $105,560 00 for 1926, if appropriations are made for all the new buildings requested. This latter estimate deducted from the total requests for 1926 leaves $25,710 00 as requested from General State Funds appropriation.

SOLDIERS' BONUS BONDS.

Pursuant to Chapter 159, Laws of 1920, $12,000,000.00 5% bonds of the State of New Jersey were issued for the payment of a bonus to Soldiers and Sailors of our State in the late war with the German Empire, and a Sinking Fund created for the purpose of paying the principal of the bonds as required by the act. This issue was made previous to the current fiscal year.

STATE HIGHWAY EXTENSION BONDS.

Pursuant to Chapter 352, of the Laws of 1920, bonds of the State of New Jersey were issued in the sum of $5,000,000.00 during the fiscal year ending June 30, 1922, $7,000,000.00 issued during the fiscal year ending June 30, 1923, and $5,000,000.00 additional issued during the year just closed, making a total of $17,000,000.00 for the purpose of paying the cost of extending

the system of State highways by the construction of bridges and tunnels for vehicular or other traffic across the Delaware and Hudson Rivers. A Sinking Fund was created as provided by this act for paying the principal of the bonds.

STATE HIGHWAY FUND BONDS, ROADS AND BRIDGES.

Pursuant to Chapter 262, Laws of 1922, bonds of the State of New Jersey were issued in the sum of $8,000,000.00 during the fiscal year just closed, $6,000,000.00 of which sum was for the construction and improvement of roads, and $2,000,000.00 for bridges. A Sinking Fund was created as provided by said act for paying the principal of the bonds.

The condition of the Sinking Funds created by the three acts above referred to, is shown by statements of the balance sheet in the preceding pages.

CERTIFICATES OF THE STATE ISSUED TO THE COMMISSIONERS OF THE AGRICULTURAL COLLEGE.

Pursuant to Chapter 417 of the Laws of 1895, certificates amounting to $116,000.00 were issued to the Commissioners of the Agricultural College.

Under an act of Congress of the United States, approved July 2, 1862, entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," there was invested for the benefit of the State Agricultural College the sum of $116,000.00 in the war bonds of the State, being the proceeds from sales of land script. The war bonds have all matured and been paid. Owing to the inability of the Commissioners to invest the said sum of $116,000.00 conformably to the said act of Congress, which provides, "That all moneys derived from the sale of the lands aforesaid by the States to which the lands are apportioned, and from the sales of land script hereinbefore provided for, shall be invested in stocks of the United States, or of the States, or some other safe stocks, *yielding not less than five per centum*

upon the par value of said stock," the Legislature, at the session of 1895, passed an act authorizing the Commissioners to transfer and pay over, as money shall be by them received, to the Sinking Fund of this State, and authorizing the State Treasurer and Comptroller to issue and deliver therefor to said Commissioners a certificate of this State to the effect that the State will pay to said Commissioners five per centum annually of the amount so paid into or transferred to the Sinking Fund.

Under an act approved April 8, 1903, the Sinking Fund has been assigned and is now a part of the permanent School Fund of the State.

The assets of the State Fund consist of 1,887 shares of stock of the United Railroad and Canal Company of New Jersey, the market value of which amounts to about $370,000.00.

The attention of the Legislature is directed to the fact that the total of the Appropriation Act to be passed at the *present session* of the Legislature should not exceed the receipts for the current fiscal year estimated as amounting to $16,675,635.00.

An estimate of the revenue and income of the State available for appropriation for the fiscal year ending June 30, 1926, is required by the Budget Act.

This estimate is made the same as the year ending June 30, 1925, no new sources of revenue having been devised over those of last year.

Respectfully submitted,

NEWTON A. K. BUGBEE.
State Comptroller.

W. T. REED,
State Treasurer.

SUPPLEMENTAL APPROPRIATIONS

For the Fiscal Year 1924.

The total of items of appropriation for the fiscal year 1924, as set forth in the regular appropriation law (Chapter 165, P. L. 1923), was,		$15,422,745 57
Supplemental appropriations were made as listed below, Chapter 239, Laws of 1924,	$405,507 23	
Chapter 22, Laws of 1924,	35,000 00	
		440,507 23
Appropriation granted Board of Fish and Game Commissioners from Receipts for Purchase of Land, Account D-2,		11,000 00
Total appropriation for the fiscal year 1924,		$15,874,252 80

This total ($15,874,252.80), as stated includes not only the net appropriation for all items of current expenditures but also appropriations which were made to cover expenditures of prior years. This is done in order that the continuous record of appropriation might show a true record of appropriations over a period of years.

The above does not include reappropriations of unexpended balances, nor special receipts, nor the road and school funds.

SUPPLEMENTAL ESTIMATE OF FUNDS AVAILABLE FOR APPROPRIATION FOR THE FISCAL YEAR ENDING JUNE 30, 1926.

STATE OF NEW JERSEY.
OFFICE OF THE COMPTROLLER OF THE TREASURY.
TRENTON, N. J., December, 31, 1924.

Hon. George S. Silzer, Governor:

At the conclusion of the first six months of the fiscal year beginning July 1st, 1924, I beg to submit to you an increase in the estimate of moneys devoted exclusively for State purposes, payable from the general fund of the State in excess of that stated in my annual report, submitted July 1st, 1924.

At that time it was estimated by this department that the miscellaneous receipts of the State for the fiscal year ending June 30th, 1925, would be $16,675,635.00, which estimate included moneys appropriated from sources other than miscellaneous receipts, being the appropriation made for educational purposes, Motor Vehicle Department, Fish and Game Commission, Department of Commerce and Navigation and Elimination of Toll Bridges totaling $4,039,486.10.

Deducting this sum from the gross estimate above mentioned leaves the net sum to be devoted exclusively to the general State appropriation, $12,636,148.90.

In addition to the above estimate of receipts my report submitted on June 30th indicated a surplus above all liabilities of $984,042.80, which sum was increased September 30th, 1924, through lapsing of appropriations no longer needed in a sum of $700,000. The total of the free balance on June 30th, 1924, and the additional lapses of September 30th, leaves a free balance of $1,684,042.80, which together with the estimated receipts for the next fiscal year equivalent to that of the previous year of $12,636,148 90 will make available for appropriation exclusive of the five departments herein mentioned, the sum of $14,320,191.70.

Respectfully submitted,

N. A. K. BUGBEE,
Comptroller of the Treasury.
W. T. READ,
State Treasurer.

A message was received from the Senate, by the hands of its secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
Mr. Speaker January 13, 1925.

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following concurrent resolution:

Be it resolved by the Senate of the State of New Jersey (the House of Assembly concurring), That the State Printer be directed to furnish to the State Library, as soon as printed, for the use of the Legislative Department of said State Library, and for exchange by said State Library with the State libraries and Legislative references libraries of other States, thirty copies each of all bills and joint and concurrent resolutions introduced in the Senate and House of Assembly, as well as printed committee substitutes; also, twenty copies of each weekly installment of the Journal of the Senate and Minutes of the House of Assembly, and thirty copies each of the gummed slips containing synopses of Senate and Assembly bills introduced; also, one copy of each official copy reprint of all bills and joint and concurrent resolutions.

In which the concurrence of the House of Assembly is requested.

A message was received from the Governor by the hands of his secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
January 19th, 1925.

To the Legislature:

I am in receipt of a communication from the prosecutor of Union county, enclosing a true copy of the presentment returned by the Grand Jury at the October term, 1924, on the subject of vice and immorality, especially referring to the opening of moving picture houses on Sunday.

In accordance with their request, I am forwarding a copy, attached hereto, of the communication to you for your consideration.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

Attest:

FREDERIC M. P. PEARSE,
Secretary to the Governor.

UNION OYER AND TERMINER.

October Term, A. D. nineteen hundred and twenty-four.

Union County, to wit:

The Grand Inquest for the State of New Jersey, and for the body of the county of Union, upon their oath

Present, That this Grand Jury has had called to its attention the fact that moving picture houses, as well as other places of business, are open for the transaction of business on Sunday. We

have also had called to our attention the presentment filed by the Grand Jury of the May term, 1924, of Union county, covering this subject-matter and which presentment recommended to the law-making body of this State a change in the law to meet present-day conditions. We approve and endorse the presentment filed by the Grand Jury of the May term and again call the attention of the law-making body of this State to the conditions which obtain with reference to Sunday opening and request that a change be made in the law to meet present-day conditions in that regard.

We annex hereto a copy of the presentment filed by the Grand Jury of the May term, 1924, and direct the prosecutor to forward copies of this presentment to his Excellency Honorable George S. Silzer, Governor of the State, and to each branch of the State Legislature.

We further recommend to the Legislature that any legislation passed on this subject include a referendum thereon to the voters of the several communities of this State.

(Signed) ALEXANDER KAUFMAN,
Foreman of Grand Jury.

(Signed) ABE J. DAVID,
Prosecutor of the Pleas.

UNION OYER AND TERMINER.

May Term, A. D. nineteen hundred and twenty-four.

Union County, to wit:

The Grand Inquest for the State of New Jersey, and for the body of the county of Union, upon their oath,

Present, That following the charge of Justice Samuel Kalisch, the prosecutor brought to our attention, and this body fully discussed and considered, the conditions in this county with reference to the nonobservance of the Sabbath law, known as the Vice and Immorality act.

We do not believe this condition is due to any desire on the part of our people to violate the law, but rather to a change in conditions and customs in many, and especially the larger, communities, which make the present law governing the mode of life on the Sabbath more or less obsolete.

These places of business, amusement and recreation could not be operated on Sunday unless there was a demand for and patronage of them that invited and warranted their operation, and we believe, therefore, that the present condition of the manner of Sunday observance is due to the wishes and demands of a large proportion of our people.

Under these conditions we do not deem it wise, or proper, to hand in indictments against thousands of our citizens, nor to discriminate against some in favor of others, but rather deem it our duty to present this matter to the court, to the public, and especially to the law-making body of this State.

We, therefore, direct the prosecutor of the Pleas of this county to call these conditions to the attention of the Legislature at its next session, and to forward a copy of this presentment to his Excellency Honorable George S. Silzer, Governor of the State, and to each branch of the Legislature when it convenes, with a view that the statute law of this State governing the observance of the Sabbath, may be amended to meet present-day conditions and customs so that all of our people may obey the law in a reasonable mode of living rather than violate the law.

(Signed) GEORGE H. JOHNSON,
Foreman.

(Signed) ABE J. DAVID,
Prosecutor of the Pleas.

On motion of Mr. Chandless, the message was received and ordered spread in full upon the Minutes.

A message was received from the Senate, by the hands of its Secretary, as follows:

A message was received from the Governor by the hands of his secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT.

To the Legislature:

PORT OF NEW YORK AUTHORITY.

The Port of New York Authority was created by treaty between New York and New Jersey, and ratified by the Federal Congress. By this treaty and the creation of this body under it, the two States and the Federal Government provided an agency whereby a comprehensive plan for the unification of the Port of New York, and its environs might be effectuated as soon as it was economically practical to do so.

Since its creation, the Port Authority has set about to put into operation this comprehensive plan and to co-ordinate all of the railroad and other instrumentalities which may be used to improve and promote commerce with the nation and the world at large.

Remarkable progress has been made in this important work since the creation of the Commission in 1917. Valuable data

has been obtained, engineering plans have been perfected, and railroad and private interests have been educated to the point where they will co-operate with the Commission in its work of development in the public interest

Negotiations are pending with the Federal Government for the Port Authority to take over the Hoboken Shore Line Railroad (now Government owned), which is the strategic link in the chain of railroads connecting all the great terminals on the New Jersey side of the Hudson with the Government-owned piers and docks at Hoboken. The purchase from the Government by the Port Authority of these piers and docks is also under consideration Upon the complaint of shippers, the Port Authority has succeeded in bringing about enlarged facilities to end delays in receiving and dispatching freight on Long Island at a total cost to the railroads of $1,250,000

Railroad Belt-line No. 13 along the Hudson River, on the New Jersey side, is in practical operation, and stretches from Bayonne to Edgewater, physical improvements are rapidly approaching completion, the railroads have set aside sufficient funds to complete the work, and uniform freight rates have been established, instead of fifty-four different scales between the territory served by Belt-line 13 and suburban points in New Jersey.

Plans for the unification of service by car-floats are well under way, so that costly competition and wasted energy will shortly be a thing of the past. This will greatly benefit shippers from all points and will help to reduce the cost to the consumer of many of the necessaries of life. The engineering and technical staff have perfected a plan for the great inland system of universal freight terminals and warehouses on Manhattan Island, convenient to industry and consolidating shipments, foreign and domestic, at proper points.

All of these projects are solely for the public good. The Port Authority is created by the two States and the Federal Government, to protect the interests of the people and to aid in bringing about economy, prosperity and celerity of transportation at this great gateway of the world.

No more important functions are being performed at the present time, in the public interest, than these great enterprises of the Port Authority. Its work is of vital importance to every citizen of the State. The Commission needs, and is entitled, to be supported by public opinion. Only by hard and aggressive work has it been able to overcome opposition from private and political interests, working against, instead of for, the public welfare.

Besides the important economic task of port unification, the two States have called upon the Port Authority to undertake the related work of furnishing adequate transportation facilities for passenger and vehicular traffic by the construction of bridges to connect New Jersey with Staten Island, and are planning to call upon the Port Authority to construct the much-needed bridge across the Hudson at Fort Lee or near there.

Both in the unification of port facilities and in providing transportation across the Hudson River and the Arthur Kill, private property will be acquired for these public purposes. This means that the Port Authority must enter the municipalities of both States lying along these waterways.

It is necessary, therefore, to determine the relationship between the respective municipalities and this State and Federal agency, exercising as it does State and Federal functions for the States of New York and New Jersey and the United States Government

The most important question at present is that of taxation. Whether the property of the Port Authority shall be taxable at all, or, if taxable, by whom and to what extent is not fixed in the treaty creating the commission. If the courts shall hold that the Port Authority is a governmental agency, an arm of government, then, of course, it and property acquired by it, under our laws, would not be taxable.

This question of taxation is economic as well as legal. And the economic feature rises in importance. Because, as the power to tax is the power to destroy, the imposition of taxes, either by the States or the Federal Government, or both, may imperil its usefulness and the purposes for which the Port Authority was created, and may prevent it from carrying out the treaty mandates imposed upon it by the States themselves and the United States Government.

On the other hand, this question of taxation is important to the municipalities in both States. A concrete example has arisen in Hoboken over the proposition to take over the Hoboken Shore Line Railroad, above referred to, and the suggestion of ownership by the Port Authority of the now Government owned, untaxed, docks and piers, which were formerly private property sharing in the local tax burden.

The local municipality cannot be stripped of an undue proportion of its ratables, neither may this agency of government be strangled by over-taxation.

So, the tax question must be seriously studied by all concerned, and an immediate policy must be determined upon, which

will be fair to the municipalities, and, at the same time, not hamper the work of the Port Authority or retard the construction of its enterprises, or interfere with the economic growth of the Port District.

In order that this study may begin at once, I suggest that a committee be appointed, composed of two Senators and two Assemblymen, two members appointed by the Governor, and the Port Authority Commissioners, *ex-officio*—and, perhaps, representatives from some of the municipalities affected.

This committee can consider the problem and determine upon a plan, then confer with like representatives from New York, and finally, if necessary, present the result to the State and to Congress for its confirmation.

Action now is necessary, if we would progress. It should be disposed of at this legislative session. The time to settle this question has arrived. This is the most important matter confronting the Port Authority, and the future of the Port is dependent upon its determination.

Let me commend to your attention the Annual Report of the Port Authority where the work of the commission is admirably and fully set forth. It shows the progress which has already been made in the great undertaking sanctioned and directed by New York and New Jersey and ratified by the United States for the welfare and prosperity of the millions of people living within this great metropolitan district, as well as for the nation and the world at large.

They are asking legislation which they feel is needed to carry on their work. I hope, too, that you will give this your earnest consideration.

Respectfully submitted,

GEORGE S. SILZER,

Governor.

The following communication was sent to the desk and read by the clerk.

STATE OF TEXAS,
SENATE CHAMBER,
January 24, 1925.

To the Speaker, House of Representatives of New Jersey, Trenton, New Jersey:

DEAR SIR—I hand you herewith a copy of Senate Simple Resolution No. 8, as directed by its terms.

Very Respectfully,

W. V. HOWERTON,
Secretary of the Senate,
State of Texas.

SIMPLE RESOLUTION

WHEREAS, In times past the people of this State and of this nation believed that the several States and communities were able to provide ways and means of taking care of their own local problems and such problems were solved in view of the needs and ability of each community, and

WHEREAS, By this method we established and maintained a government of each community, and

WHEREAS, There have lately grown up among us a number of well organized minorities, who apparently believe that the chief end of government is to engage in, or to furnish finances to further undertakings which are not the primary functions of government; and in order to obtain the financial aid desired they have brought organized pressure to bear upon the Congress of the United States with the suggestion and provision that if the National Congress shall furnish to the several States certain aid or finances from the Treasury of the United States that the several States will furnish a like amount; and

WHEREAS, A number of bills have been presented to the National Congress and some have been enacted into law, making large appropriations out of the Federal Treasury, to be furnished and delivered to certain State authorities on condition that said State authorities make a contribution to or an appropriation for the same purpose, of a like or an equal amount; and

WHEREAS, Even though the Legislatures of the several States may not approve of or endorse the purpose of the appropriation, said Legislatures in a measure are forced to make an appropriation to meet the conditions imposed by the National Congress, so that the people of the respective States may obtain and receive a pro rata part of the funds going to other States out of moneys raised by taxation of all the people; and

WHEREAS, This character of Federal appropriations, followed by appropriations made by the Legislatures of the States to meet the appropriations from the Government of the United States is now contributing in increasing degree to the high Federal and State taxes, now therefore,

Be it resolved by the Senate of Texas, That we deplore and condemn this character of appropriations by the Federal Congress; and the Secretary of the Senate of Texas is directed to send a copy of this resolution to the President of the Senate and to the Speaker of the House of Representatives of each State Legislature in the United States, and also a copy to the President of the United States Senate and to the Speaker of the House of Representatives of the United States at Washington, D. C., and also a copy to each of the United States Senators from Texas, and a copy to each of the Congressmen from Texas, and

This resolution is not meant to be construed that the Senate of Texas is opposed to Federal aid for public highways; and

It is respectfully suggested that the Legislatures of the several States of the United States adopt a resolution similar to this

resolution and forward same to the Congressmen and Senators from said several States, so that the burdens of taxation now being borne by the people of the United States and of the several States may in part be removed.

I hereby certify that the above is a true copy of Simple Resolution No 8, adopted by the Senate of January 15th, 1925, by unanimous vote.

W. V. HOWERTON,
Secretary of the Senate,
State of Texas.

Mr. Chandless moved that the communication be received and spread in full upon the minutes

Which was agreed to.

The clerk read the following communication:

February 2d, 1925.

Hon Frederick A. Brodesser, Clerk of the House of Assembly, State House,

DEAR SIR—By Joint Resolution No. 6, approved March 14th, 1924, the Legislature authorized the creation of a Legislative Commission to investigate motor vehicle taxation and report thereon to the Legislature.

The Commission organized and has been conducting sessions throughout the year. Wide differences of opinion have developed The undersigned six members of the Commission of eleven members have found themselves in substantial agreement as to principles and policies

We, therefore, respectfully submit, for the consideration of the Legislature, the enclosed Majority Report of the Legislative Commission for Motor Vehicle Taxation

Respectfully yours,
FRANCIS B. DAVIS,
Representing the Senate.
DAVID H AGANS,
Representing the State Grange.
WILLIAM L DILL,
Motor Vehicle Commissioner.
L A. COOLEY,
Representing the Federation of County Boards of Agriculture.
SEDLEY H PHINNEY,
Representing the State League of Municipalities.
WILLIAM H ROBERTS,
Representing the Association of Boards of Freeholders.

MAJORITY REPORT LEGISLATIVE COMMISSION ON MOTOR VEHICLE TAXATION.

Since the preparation of the within so-called Minority Report, the signing of the report by another member converts it into a Majority Report, and it is respectfully submitted as such, to the honorable members of the Legislature.

The final signer is William H. Roberts, representing, on the Commission, the State Association of Boards of Freeholders

In signing the report Mr Roberts states that the Association of Boards of Freeholders, on his recommendation, has authorized him to sign the report favoring the recommended schedule of fees for motor trucks proposed by Commissioner Dill. The Association further suggests that the distribution of motor vehicle receipts should be 50 per cent to the counties, 10 per cent. to the municipalities and 40 per cent to the State Highway Department, after the cost of operation of the Motor Vehicle Department is deducted. This latter proposal is solely the suggestion of the Association of Freeholders and is not concurred in by the original signers of the Minority Report.

MINORITY REPORT LEGISLATIVE COMMISSION ON MOTOR VEHICLE TAXATION.

Statement.—A minority of the Legislative Commission on Motor Vehicle Taxation, finding itself unable to agree with the majority on certain fundamentals and finding in the report radical departures and new elements not agreed upon at any meeting of the Commission, respectfully submits the following report for the consideration of the Legislature. The following are the signers of this Minority Report: Hon. David H. Agans, representing the New Jersey State Grange, L A. Cooley, representing the New Jersey Federation of County Boards of Agriculture, Sedley H Phinney, representing the New Jersey State League of Municipalities, Hon Francis B Davis, representing the Senate, and Hon. William L Dill, Commissioner of Motor Vehicles. The latter agrees with everything in this report except the schedule of truck fees proposed, for which he offers a schedule of his own, at lower rates.

Summary of Conclusions and Recommendations—The principal points that we desire to make are: that more revenues are needed for highway purposes if present demands are to be met, and if it is economically sound to do so; that a greater contribution for these purposes should be paid by the motorists of the State, both because they receive special benefits and because it

would be to their benefit to pay greater taxes and receive in return more highway construction; that the entire cost of highway maintenance should be met by motor vehicle taxation; that at least 25% of the cost of new highway construction should be paid for by motor vehicle taxation. We recommend a gasoline tax of two cents per gallon, with exemptions permitted for gasoline consumed in other ways than on the highways, three dollars flat fee for passenger car registration rates, a three dollar driver's license, a heavier registration fee on motor trucks, the fee being proportioned to the gross weight of truck and load. We recommend that the resulting revenues be used solely for the maintenance and construction of highways in the State, county and municipal systems without the present stipulation that motor vehicle funds shall go solely for maintenance purposes. We suggest that the apportionment of the motor vehicle funds between the State and the counties should not depart radically from the present basis, but feel that due consideration should be given to the fact that many city streets are carrying a heavy burden of traffic which is State-wide in character, due to the fact that they are in effect integral parts of the State highway system The resulting cost of construction, maintenance and policing is a burden on the city taxpayers, for which they should receive some assistance from the State.

Are More Revenues Needed for Highway Purposes?—In studying any problem of taxation, the first consideration is the amount of revenue necessary for the desired purpose Are additional revenues needed for highway purposes in New Jersey? This all-important question has been dismissed with a bare mention in the Majority Report of this Commission, and there assumed, without proof or discussion, that no greater State revenues for highway purposes are needed. The Legislature evidently believes that more revenues are needed, for the preamble of the Resolution states: "It is generally agreed that if the system of State highways and county roads is to be adequately developed to meet the ever-increasing traffic demands, additional revenues must be provided to meet the cost of such construction and development * * * " The State Highway Engineer has stated in a letter to us that if additional funds for highways are not made available the State cannot continue to take advantage of the possibilities for increased economic advantage and prosperity and that our highway construction program is not keeping pace with the increased demands being made upon it by the increase in motor vehicle traffic. Excerpts from this letter are attached herewith The county roads and city streets also require greater finances than are now in sight Five years ago the State spent for State pur-

poses, exclusive of State aid, $10,200,000 and last year it spent $44,000,000 * Of this $34,000,000 increase during the period, $21,400,000 goes to expenditures for highways, bridges and tunnels. Five years ago the expenditure for these public works was $5,000,000 and last year it was $26,300,000 * The expenditure by the State for highways was 19 8% of the total last year and the expenditure for bridges and tunnels was 32 3% of the total. The State spent more than 50% of its total budget for these public works, all of which are for the purpose of carrying highway traffic. The State is thus becoming a great constructive agency, which necessity has been forced upon it by the ever-increasing growth of vehicular traffic. With the opening of the Camden bridge and the vehicular tunnel to New York still more traffic will thrust itself into the State of New Jersey, a large part of which begins and ends outside the State and is of no benefit to us whatever.

This traffic must be taken care of and it will cause great expense to our taxpayers. The problem cannot be evaded, for any failure to provide suitable highways would only result in intolerable, uneconomic delays and accidents which would be still more costly than the cost of highway construction. It is, therefore, high time to make a thorough examination of highway finance and endeavor to find a just, economically sound basis for financing highway construction. We need a statesman-like treatment of the problem on a broad-gauge scale and with absolute justice to all parties concerned, with as long a look into the future as possible

The State Highway Department reports that there are 195.8 miles of State highway authorized by the Legislature but not taken over by the State Highway Department for the reason that no funds were provided for their construction. Here is a definite outstanding instance of the need for additional highway revenues. They cannot be built without the provision of further revenues than those that are now available

The Present Distribution of the Highway Burden Between General Property Taxation and Taxation of the Motor Vehicle. —Up to the present, general property taxation, based largely on real estate, has borne the brunt of highway financing. It is estimated that the State, counties and municipalities, in 1923, spent $40,000,000 for highway purposes To this must be added $16,000,000 spent for the bridge and vehicular tunnel It is contended by the majority that the bridge and tunnel should not be included

* Reports of the State Comptroller.

although it is an expenditure made for the sole service of the motoring public and also that there should be deducted from the $40,000,000 about $15,000,000 which they estimate to come from bond issues. These bond issues are paid by the general property tax and they recur annually and are not an unusual item which occurs only in the year 1923. Therefore, they must, in justice, be included in the total which changes it from twenty-five to fifty-six million dollars.

The motor vehicles of the State during 1923 paid about $8,000,000 in registration fees. In the taxation of motor vehicles as personal property there was perhaps collected about two millions more This figure is based on a registration of 427,166 cars of $400 average value, one-third of them being assessed, multiplied by the average tax rate for the State, which was $3.56, the total contribution of the motor vehicle was, therefore, about $10,000,000 or 17.8 per centum of the total expenditure for highway purposes Is this a fair share for the motorist? The Majority Report has already agreed that 40 per centum would be a fair share for the motorists but their figures are incorrect in attempting to show that this 40 per centum is now being paid

A New Economic Situation—The outstanding fact of modern life is the vast increase in highway traffic. In the last six years automobile registrations in this State have increased 175 per centum while the assessed valuations during the same period increased 41 per centum and the population only 14 3 per centum. The studies of the Russell Sage Foundation show that in 1917 there was one automobile for every twenty persons in the environs of New York City and in 1924 there was one automobile for every six persons. This shows that car owners in this area increased more than three times as fast as the population. The traffic has increased even *faster than the registrations*

This highway traffic is not only placing unprecedented demands on existing highways, crowding them to the saturation point, but is demanding special types of highways and highway services. In the new by-pass route being constructed through Jersey City we have an outstanding example. Reinforced concrete slabs are being laid of greater thickness than was formerly necessary, curves, grades and grade crossings are being eliminated and reduced, parallel roads and road widenings are becoming necessary and soon we will have the segregation of truck traffic. Double-decked streets are being talked of. These demands are caused by the motor vehicle and are of benefit primarily to it rather than to the land itself.

Motor competition is becoming a serious factor to the railroads. In December a casual reading of the newspapers showed that the Boston and Maine Railroad planned a discontinuance of 1,000 miles of tracks and a $13,000,000 outlay for improvements on its other lines, due to motor truck competition; the Lehigh Valley Railroad inaugurated motor truck service to handle its local freight at a saving of 80 per centum of the former cost of service, trucks being operated under the orders of train despatcher; in Providence the New Haven Railroad applied for injunctions against bus lines in an effort to protect their revenues and service from irresponsible competition The railroads, when subjected to this sort of competition, which is operating under a subsidy in the form of publicly furnished rights of way, must either abandon certain types of business or must engage in motor trucking themselves The latter step has been taken by thirty-three railroads in the United States and Canada and twenty-one more are contemplating it in the near future * In either case this class of business is transferred to the highways. This competition is unfair because it is operating on rights of way furnished by the general public while the railroads must finance their own right of way. We are not concerned with protecting the railroads, although they are heavy taxpayers and an indispensable factor in our economic life. But we are concerned with protecting our taxpayers from injustice in a changing economic condition.
Automobile Chamber of Commerce

If motor highway transportation is more efficient for certain conditions than railroad transportation, then let it come. But let that competition be on the same basis as regards the financing of the right of way The operators of motor vehicles at present are not financing the construction of the rights of way which they use but are only meeting the maintenance costs. This is an injustice to the general property taxpayer.

Need for Heavier Contributions by the Motor Vehicle—The necessity for heavier contributions to highway financing by the motor vehicle is shown from the above. The motorists are receiving special benefits and services of far greater value than they have been paying and for this reason must pay more. It is unfair to keep this rapidly mounting burden on the general property taxpayer.

Having discussed special benefits received by motor vehicles, we will now discuss ability to pay. The motor vehicle operators of this State are well able to pay large sums for highway con-

* Facts About Railroad Use of Motor Trucks, No 203, published by National

struction in addition to what they are now paying, and it would be much to their advantage to do so. There is now being spent in this State probably millions of dollars annually by motor vehicle operators in wasteful operation that might be converted into useful highway construction. It costs more for automobiles to operate on dirt and gravel roads than on improved roads. Millions are undoubtedly being spent wastefully and unnecessarily for tires, gasoline, oil, repairs and by delays to trucks which rapidly runs into money, that might be spent in taxation and converted into improved roads. These wastes of operation have been thoroughly established by experiments and road tests in various States by different agencies. Tests by the General Tire Company, of Springfield, Illinois, by the Kentucky State Highway Department, by the Engineering Experiment Station, at Ames, Iowa, and others, prove that passenger cars can operate 2½ cents per mile cheaper on a bituminous or concrete road than on a gravel road The U. S. Bureau of Public Roads and the American Association of State Highway Officials agree that trucks can operate 1 cent per ton mile cheaper on improved roads than on the unimproved roads † In the case of trucks a still larger item is the fact that the average truck costs about 6 cents per minute whether it is going or standing still, and the saving in time by operating on improved roads rapidly runs into large figures.

Let us take some specific examples. Traffic counts have been made by the State Highway Department on four important stretches of gravel road. Using these figures and the standard method of computation advocated by the Highway Department the annual traffic passing over these roads has been computed. The roads are as follows:

New Gretna to Toms river, Route 4, 33½ miles of gravel; Woodstown to Downstown, Route 18 South, 22½ miles of gravel, Rio Grande to Millville, Route 15, 34½ miles of gravel; Freehold to Asbury Park, Route 7, 11½ miles of gravel

The computed results appear in a table in the appendix. Using very conservative figures of one cent per ton mile on trucks and one cent per mile on passenger cars we find that the costs of wasteful operation on this 102 miles of gravel highway was a total of $1,431,730 That is, the vehicles which are now operating over these particular roads are now wasting about a million

† Pages 50 and 51 of "Facts and Figures of the Automobile Industry," published by the National Automobile Chamber of Commerce

and a half dollars which is being spent needlessly for oil, gasoline, tires and repairs. These sums would be saved if these same roads were paved with bituminous or concrete construction. The first cost of one mile of concrete road averages about $61,000 with an estimated life of at least 15 years or say $4,000 per year for 15 years. The average maintenance each year is $502.50, making a total annual cost of $4,500 for one mile of concrete road. Multiplying this by 102 miles, which is the length of the roads we are considering, we get $460,000 as the annual cost of concrete construction over these particular roads for a 15-year period.

Thus, using conservative figures, the motor vehicle operators on these particular roads are wasting about a million and a half dollars annually in wasteful operation costs while for half a million dollars they could enjoy concrete roads and put back into their pockets a million dollars a year instead of paying it to the garage men and supply houses. This is solely on the basis of existing traffic, though we know that the improvement of these roads would attract more traffic.

The conclusion is inevitable, that where there is sufficient traffic to warrant it, the motor vehicle operators can well afford to pay much greater taxes or licenses and they would be money ahead as a result, if this money was put into improved highway construction, economically built and in suitable locations.

This may appeal to you as being a very theoretical approach and one which does injustice to the motorist. This is not the case, for several big highway systems are now being financed entirely by motor vehicle taxation. We refer you to the January, 1925, issue of the American Highways Magazine, published by the American Association of State Highway officials On page 14 is an article by Frank Sheets, Chief Highway Engineer of Illinois We find there a map showing the proposed State highway system of 9,800 miles being financed by a $100,000,000 bond issue financed entirely by auto license fees with no direct tax. In that article Mr Sheets says:

"Regardless of the fact that some State bond issues have been authorized and will be paid by direct taxation, I urge that any State contemplating issuing State highway bonds make the payment of interest and principal on these bonds by means of motor license fees or gasoline taxes, and that the direct tax on the real or personal property of the Commonwealth be drawn upon only in the event that the annual revenues derived from these specific forms of taxation be inadequate to meet the demand."

On page 15 in discussing Mr. Sheets' paper, Frank Page, the chairman of the North Carolina State Highway Commission, says:

"We have found in North Carolina that, on account of the continuous improvement of the State Highway System, which comprises only about 10 per centum of the total highways in the State, the consumption of gasoline per car per year has declined as follows:

1920,	520	gal.	of	gas	per	car
1921,	490	"	"	"	"	"
1922,	473	"	"	"	"	"
1923,	454	"	"	"	"	"

or a saving of 66 gallons per car in 1923 over an average consumption in 1920. This saving at 25 cents per gallon, which is a fair average for the cost of gas during this period, is $16 per car per year, and I believe it is conceded that the saving of gasoline by improved roads is only about 33 per centum of the total saving in operation of an automobile There will therefore be, upon this basis of calculation, a saving of about $50 per car per year on account of our expenditure for improved roads. Since this saving goes directly into the pocket of the motor operator, I am convinced that the motor operator should pay a very large per centum, if not all, of the cost of construction and maintenance of the State Highway System"

In the December, 1924, municipal and county engineering magazine on page 275 Major C P. Fortney, chairman of the West Virginia State Highway Commission, says:

"To the surprise of everybody, the construction of our State road system by a bond issue has not, so far, requitted a single cent of taxes from the general property owner. The money required to pay interest on the bonds, provide the annual sinking fund for the principal, pay the costs of road maintenance, and meet all the overhead expenses of the State Road Commission, is all being provided by the receipts from automobile licenses, and the gasoline tax."

In the same magazine on page 321 William H. Connell, acting secretary of highways of Pennsylvania, says:

"The cost per mile for the operation of the average passenger automobile—which includes interest on the investment, wear-and-tear, oil, gas, and so on, is about ten cents a mile. The average distance traveled daily by the motor vehicles paying registration fees in Pennsylvania is about 14 miles. Some travel more, some less, that is the average. The cost of operating some passenger

cars is 30 cents a mile, but the average approximates 10 cents. So if the average daily distance is 14 miles, the daily operating cost per car is $1.40 and the average Pennsylvania registration fees are $11 25 per year, it will be seen that in eight days the Pennsylvania motorist spends more money for the operation of his car than he pays for one year's use of the State highways."

What is the Just Share of Highway Expenditures to be Borne by Motor Vehicle Taxation?—It is contended by the majority that the proceeds of special taxation of the motor vehicle shall be reserved solely for the maintenance of the main arterial highways of the State and should not be used for new construction. This assumption is open to serious question on several grounds. It is entirely arbitrary and there is no justification for this assumption. It is inelastic, as was evidenced last year by the apportionment of two and one-half million dollars by the State Highway Department to construction purposes It bears no necessary relation to the economic needs of the State or to the economic justice of the case. Motor vehicle receipts will increase with the passing years while maintenance requirements of our main highway system will decrease as the construction of hard surfaced roads in this system nears completion. In fact, maintenance charges will decrease materially while the financial needs for new construction will probably increase. The chief reason for the advancement of this maintenance theory, which is originated and propagated by commercial automobile associations, is that its general acceptance would assure the motor vehicle operators a continually decreasing burden of taxation which would approach a ridiculously low point. This theory is unfair to the general property taxpayers as it places upon his shoulders the entire burden of new construction. This theory could only be justified if the construction of new highways were of benefit only to real estate and not at all to the motorist. This is an unsound assumption, for improved highway construction is of benefit both to the real estate served by it and to the motorist who passes over it, whether he be from New Jersey or from another State.

We believe, therefore, that justice demands that special taxation of the motor vehicle should be sufficient in amount to meet the entire cost of highway maintenance on the entire highway system whether State, county or municipal and should also pay a considerable share of the cost of new construction on these several highway systems. This share we assume somewhat arbitrarily should be at least 25%. In this assumption we are decidedly conservative, for we have already shown that the entire

cost of several great State highway systems is being met by motor vehicle taxation and the trend of modern highway theory lies in this direction.

Distribution of Motor Vehicle Receipts.—Let us consider the equitable distribution of motor vehicle funds to the various governmental units somewhat in proportion to the expenditures that they must make for highway purposes. Heretofore motor vehicle funds have been used for State highway and county road purposes, being distributed among the counties on an empirical basis, computed from areas, population, and county road mileage. A few townships have received State funds but no municipality over 12,000 population is legally permitted to share in this distribution.

There is a large percentage of the number of automobiles owned in unincorporated municipalities yet the fees paid go entirely to State and county roads. There is much heavy traffic, both passenger and trucking in cities, over the Lincoln Highway passing through main streets of several cities and adding to their costs. City taxes are increased by motor vehicles in many different ways, by police regulation of traffic, regulation of taxicabs and jitneys, cost of safety aisles and traffic signals, paving and street cleaning, also delays to fire apparatus.

These costs are heavy and they are just as real a burden for cities as is the maintenance of highways to the counties and the State, and equally caused by motor vehicle traffic. We feel that the cities should receive consideration, probably on a basis of through traffic carried, from actual traffic counts.

What are these costs? The incorporated municipalities of this State in 1923 spent $5,598,770 22 for their streets and it is likely that the costs each year are of similar extent. The 1924 budget statements for streets total is $6,773,225 89. An analysis of returns from 33 cities shows that on the average they are spending 15% of their police budgets for purposes of traffic control. The total municipal expenditures for police purposes in 1923 was $11,577,924.57, and 15% of this is $1,740,000.00 This amount was probably spent by municipalities for traffic control and is probably as accurate a figure as can be obtained. These two items total to $7,338,770.22. This is exclusive of the townships for which no figures are available, and debt service is extra.

Now let us consider the income that our municipalities receive from automobiles. An analysis of 8 cities which includes the four largest cities of the State, shows that 2% of the taxable valuations consisted of personal property in automobiles. This may be taken as a fair average for the cities. The total of all municipal budgets for all municipal purposes in 1923 was

$67,329,463.33. Let us ignore the fact that a considerable part of this, perhaps 20%, comes from other sources than taxation. Then, assuming that 2% of the total comes from taxation on automobiles and we get a total of $1,340,000 00. Let us estimate $250,000.00 more for jitney and taxicab fees and licenses. This gives us a total income from automobiles to the municipalities of $1,590,000.00 which is less than the cost of traffic regulation alone and leaves the taxpayers in the cities to bear entirely the heavy burden of pavement construction and maintenance. This is very close to $6,000,000 00 each year and it seems evident that the cities should receive some consideration in the distribution of motor vehicle funds.

Definite Recommendations.—While we believe that motor vehicle operators could well pay higher taxes than at present, and that if these sums were economically used for highway construction it would be profitable investment for them, in making our specific recommendations we recognize that public opinion in this State is not yet ready for this We therefore propose a gasoline tax of two cents per gallon with a corresponding reduction in passenger car fees to a three-dollar flat rate This will result in a more equitable distribution of motor taxes among the individual motorists, but with little increase in total amount from passenger cars. For reasons stated above we feel that trucks should pay much greater fees.

The gasoline tax is now in force in about thirty-six States. Experience has proven that it is a good revenue producer, that its yield is predictible and does not fluctuate much, that the cost of administration is less than one per cent. when collected from the wholesaler. It is a popular tax and provides a good measure of the use of the road. Provision should be made for refunds of taxes paid on gasoline used for other purposes than on highway travel, which may include motor boats, farm tractors and machinery, stationery engines and dry cleaning.

For motor trucks, we recommend the following fees, based on the gross weight of trucks and load, which are somewhat higher than the present fees.

Gross Weight	Present Fee	Proposed Fee
1000	$10	$10
2000	$12	$12
3000	$15	$15
4000	$20	$20
5000	$24	$25
6000	$27	$30

From this point on, we add $10 for each additional one thousand pounds, to a maximum fee of $270 for the 30,000 pound trucks. The present maximum is $99. In reaching these figures, we have made allowance for the fact that our motor trucks pay a personal property tax which we estimate to be a total of $1,-500,000 00 We have noted that the following maximum fees are paid on motor trucks in other States having a gas tax, as follows:

Alabama,	$1,000	2 cent	gas tax
Connecticut,	350	1 "	" "
Idaho,	360	2 "	" "
Maryland,	500	2 "	" "
Mississippi,	300	1 "	" "
Oklahoma,	300	1 "	" "
Pennsylvania,	200	2 "	" "
South Carolina,	350	3 "	" "
Vermont,	250	1 "	" "

Several States use a different method of computing commercial fees other than the New Jersey basis of gross weight, but the above figures are approximately correct. Several States such as Texas levy fees that appear to run up to very much higher totals.

The proposed fees would bring a revenue of $12,795,850.54 on the basis of 1924 registrations, assuming that all are pneumatic tired We propose a schedule of fees 25 per centum higher for all solid tired trucks, which will increase these revenues. As omnibusses already pay 5 per centum of their gross receipts, we do not advocate an increase in their rates. We propose that omnibusses carrying eight passengers or less be reduced to a flat fee of $3.00, to give them the same status as passenger cars.

This report is respectfully submitted for the consideration of the Legislature by the following members of the Legislative Commission on Motor Vehicle Taxation:

Hon. David H. Agans, representing the New Jersey State Grange.

L. A. Cooley, representing the New Jersey Federation of County Boards of Agriculture.

Sedley H. Phinney, representing the New Jersey State League of Municipalities.

Hon. Francis B. Davis, representing the Senate, agrees with the exception noted below.

Hon. William L. Dill, Motor Vehicle Commissioner, makes the following statement:

"To all of the Minority Report, with the exception of that portion which has to do with the registration fees for commercial motor vehicles, I heartily concur.

"I believe that commercial motor vehicles should be divided into two classes; those having a combined weight of vehicle and load of 5,000 pounds or under, and of which there were 61,857 registered in 1924, should pay only the registration fee of $3.00 now proposed for passenger vehicles. For all vehicles having a gross weight of more than 5,000 pounds, and of which there were 37,471 registered in 1924, it is my opinion the present registration fee should prevail.

"I, therefore, respectfully submit the following schedule of fees based upon the volume of business transacted by the Motor Vehicle Department last year.

"With an estimate of 425 gallons of gas per car, which is not conservative, the receipts would approximate $10,520,375.57.

"The gross receipts of the Department for 1924 approximate $9,277,928.06.

"I recommend that the present fees prevail in the matter of the registration of trailers of over 5,000 pounds gross weight, and of omnibus registrations where more than eight passengers are carried.

"Respectfully submitted,

"W L. DILL."

Senator Francis B. Davis concurs in the report, with the following exception:

"I think that commercial vehicles should be divided into two classes, as suggested by Commissioner Dill, and that the class having a combined weight of vehicle and load of five thousand pounds and under should pay the registration fee of $3.00 proposed for passenger vehicles. For the other class having a gross weight of more than five thousand pounds, I concur in the recommendations contained in the minority report as to the proposed additional fees, and that where solid tires are used on commercial vehicles that twenty-five per centum should be added to the registration fees."

Appendix A

November 11, 1924.

"In my opinion any additional funds made available for highway purposes could be used for such purposes to the economic advantage of the State and its citizens. I wish to go further and state that in my opinion if such additional funds are not made available for the above purpose, the State cannot continue to take advantage of the possibilities presented for increased economic advantage and prosperity.

"The highway construction program in this State is not keeping pace with the increased demands being made upon it by the increase in motor vehicle traffic. The early completion of the Vehicular Tunnel and the Camden River Bridge will place demands upon our highways which it is most essential to satisfactorily meet and in so meeting them very large expenditures of money would be required, particularly in the vicinity of Jersey City and Camden

"In order to justify the starting of this important work a financial program has been tentatively made on the basis of funds available and to become available under existing legislation, in which it has been necessary to take advantage of every existing source of revenue. Under this plan the completion of the existing State Highway System is not unduly deferred, but the completion of the two important projects at Camden and Jersey City would extend over a period of some twelve years, which is far from satisfactory. The Philadelphia-Camden bridge and the Vehicular Tunnel cannot satisfactorily function until proper provision is made for handling the traffic created by them, and in my opinion funds are most urgently needed to carry out the proposed construction in connection with these structures in the shortest possible time, as well as for the construction of additional State highways which the increase in motor vehicle traffic would demand

"State Highway Engineer."

To the Legislature of the State of New Jersey:

Herewith please find Final Report and Recommendations of the Special Commission appointed to investigate Motor Vehicle Taxation in the State of New Jersey:

FINAL REPORT AND RECOMMENDATIONS OF SPECIAL COMMISSION APPOINTED TO INVESTIGATE MOTOR VEHICLE TAXATION IN NEW JERSEY.

To the Legislature of the State of New Jersey:

In accordance with the instructions contained in Assembly Joint Resolution No. 12, enacted by your honorable bodies at the session of the New Jersey Legislature in 1924, we submit herewith our report and recommendations on the subject of motor vehicle taxation in New Jersey.

In approaching this subject two fundamental theories with reference to taxation have been kept in mind.

Under the first theory motor vehicle taxes are levied, justified and measured by ability to pay. Under the second theory they are levied, justified and measured by benefits derived through the expenditure of the proceeds from such special taxation.

The personal property taxes levied on the automobile in New Jersey come within the former theory; the annual registration fees under the latter.

Likewise two fundamental truths in the realm of taxation have continually been kept in mind. The first fact is that certain taxes are general in that they are imposed upon all individuals or property alike. The second fact is that certain other taxes are special in character, that is, they single out certain individuals or classes of individuals or certain property or classes of property upon whom or upon which distinctive levies are made

Here again the taxation of the motor vehicle in this State as personal property is a general tax since it does not single out the motor vehicle for special treatment while the annual registration fees for motor vehicles and the annual drivers' licenses for operators are special taxes in that they fall exclusively upon a certain class of property and upon a certain class of individuals.

Finally it must and has been borne in mind that whether taxes are levied on the theory of ability to pay, or benefits derived or imposed in general form or in special form, they are inspired by the needs of State, county or municipal governments for revenues to conduct functions of government.

In the case of the general taxes levied on motor vehicles as personal property, these have the same origin and destinations as the general taxes assessed upon and collected from other forms of personalty such as household goods, horses, wagons, etc., etc. As for special taxes on motor vehicles and their drivers, these first were justified and measured by the annual cost involved in issuing registration plates and license cards but now are called upon to meet an ever-increasing share of the highway financing burden.

With these preliminary remarks, therefore, we feel that it is highly essential in approaching the problem which you have entrusted to us, to set forth first of all the total governmental expenditures that are imposing tax demands upon our people; next, what share of these demands taxation of the motor vehicle is meeting, and after that to endeavor to determine whether the amount of tax as produced by the motor vehicle is ample and fair and then the form in which they should be paid.

GOVERNMENTAL EXPENDITURES IN 1923.

It is conservatively estimated that in the year 1923 the State of New Jersey, its 21 counties and its 500 or more municipalities, spent $236,000,000 to defray the expenses incident to the management of their respective governments

These governmental expenditures were made for all of those functions which ordinarily are the care of State, county, city, borough, village and township.

They embrace such matters as education; police protection, fire prevention; parks and recreation; charities and corrections; road, street and bridge construction and maintenance; and all of those other numerous activities which to an ever-increasing degree constitute public responsibility and expense.

HIGHWAYS REQUIRED $40,000,000 IN 1923.

What share of the $236,000,000 spent by the State, its counties and municipalities in 1923 to finance their governmental expenditures went for roads, streets and bridges, this Commission has been unable to determine with mathematical accuracy. Nevertheless, analyzing as well as possible the budgets and financial statements of the State, counties and of several so-called key-municipalities, the following estimate was adopted as a basis for the deliberations of this report, namely, forty million dollars.

Assuming, therefore, that forty million measures fairly well the total expenditures made by State, counties and municipalities in 1923 for roads, street and bridge purposes, it at once becomes

apparent that this particular function of government consumed approximately 17% of the grand total spent in 1923 to finance all the activities of State, county and municipal governments.

This big outlay of money for highway construction and maintenance has been made necessary and desirable by the present and ever-growing demand of our people for widely available, comfortable, cheap and quick highway transportation. It is very likely that for some time to come, therefore, New Jersey will be confronted with financial demands for highways, which will at least equal and indeed are far more likely to exceed the charge of $40,000,000 estimated for the year 1923.

If this demand for vast annual outlays on the part of the State, county and municipal governments for roads, streets and bridges is economically justified, ways and means must clearly be found to provide the money to meet these demands.

If the demands are not warranted then something must be done to cut down highway development programs to the limits of State, county and municipal purses and to the scope justified when measured by the needs for educational institutions and agencies and other important governmental functions, all of which are making urgent requests for more money.

PRESENT OUTLAYS FOR HIGHWAYS NOT TOO BIG COULD BE SPENT TO BETTER ADVANTAGE.

It is the opinion of this commission that the State of New Jersey, its counties and municipalities did not spend too much money for road, street and bridge purposes in 1923. Furthermore, the commission feels that similar outlays for highway purposes during the next decade will bring back economic returns many times more than the millions involved in the building and maintaining of thoroughfares for motor vehicle travel.

Notwithstanding this belief, however, the commission feels that far better and far greater results can be achieved if these annual outlays are spent, especially on the part of the counties and municipalities, with more foresight to meet the greatest good to the greatest number of taxpayers and road users.

At the present time it is estimated that there are approximately 82,000 miles of highways of all kinds in the State of New Jersey, Moreover, the jurisdictions in charge of these highways, conscious of the tremendous value of improved highways to their communities, are all striving to transform them into the highest type of modern, permanent thoroughfares whose construction will cost $50,000 a mile or more and are clamoring for State and county financial aid to do so.

Obviously to transform 82,000 miles at a cost of $50,000 a mile would entail an outlay of more than a billion dollars and is prohibitive.

Highway experts tell us that in any State a limited number of miles of the main arteries of travel will accommodate the bulk of vehicular traffic. It would, therefore, seem to this commission that, disregrading the question of municipal streets, it would be the part of economic wisdom for the State of New Jersey and its counties to fasten upon a comprehensive system of State and county thoroughfares aggregating, let us say, a total of 2,500 miles serving the most important transportation needs of every county of the State and concentrate their efforts and available money on this limited mileage of paramount importance.

Surely if every one would pull together for the creation of such a co-ordinated system of main and secondary thoroughfares during the next ten years, the taxpayer's dollar would go much farther than under efforts to build here, there and everywhere without reference to some comprehensive, economic, sound and farsighted plan.

To this end, therefore, the Special Commission recommends that·

1. In order to conserve and concentrate to the greatest advantage the revenue raised by the State by motor vehicle taxation—which is the subject under discussion here—and in order to keep motor vehicle taxes from being raised to unwarranted and uneconomic heights—limiting factors should be put upon its use.
2. That these limiting factors as to use should be:
    a. Administration of the Motor Vehicle Department.
    b. Administration of the distribution of motor vehicle moneys by the State Highway Commission.
    c. Maintenance of the State Highway System composed of what shall be designated Primary Highways.
    d. Maintenance of main highways—under county and municipal control—feeding the State Highway System and to be known as secondary highways.
    e Aid for construction of township highways
    f. Reconstruction of highways after a, b, c, d, and e have been taken care of.
3. That secondary highways should be selected by the boards of chosen freeholders of the respective counties in conjunction with the State Highway Commission, said selections to be united and co-ordinated into a system of secondary highways aggregating no more than 1,500 miles which shall then be

ratified by the State Legislature. (On the assumption of an ultimate State Highway System of 1,000 miles this would aggregate the combined total of 2,500 miles suggested for both primary and secondary highways.)

4. That subsequent extensions of, additions to or alterations in routes of this secondary highway system shall be made in the manner prescribed for their original selection.
5. That so far as additions to, extensions of or alterations in the routes of the State Highway System are concerned, power in the premises should be vested by the Legislature in the State Highway Commission upon whom should rest the responsibility of keeping its outlays within the limits of its financial resources.

With these limiting factors placed upon the use of the money at the disposal of the State, the next step is to show and compare the sources of money for highway expenditures in New Jersey.

SOURCE OF REVENUE FOR HIGHWAY EXPENDITURES.

Under New Jersey's present system of taxation there have been, and in the absence of change in our taxation scheme, there will be two sources or a combination of two sources from which the money needed to build and maintain our roads, streets and bridges can be obtained. These sources are:

1. General taxes on real and personal property, which are spent directly on highways or are used to carry and retire highway bond issues.
2. Special taxes on vehicles using the highways and on the owners or drivers of those vehicles, these revenues being spent directly for highway purposes, not being used to carry or retire bond issues.

Erroneously, it is customary to add another source, namely, the proceeds from bond issues. A little reflection will show, however, that such proceeds are merely the money advances from debts which must be carried and retired by either general or special taxes or a combination of both.

With this fact in mind the $40,000,000 estimated to have been spent on highways in New Jersey in 1923 is further estimated to have been derived as follows:

From proceeds of State, county and municipal bond issues,		$20,000,000
From general taxes on real and personal property,	$12,000,00	
From special taxes on motor vehicles,	8,000,000	
		20,000,000
		$40,000,000

On these estimates, which might better be called assumptions—for the financial data of the counties and municipalities do not lend themselves to accurate computation—it can be seen that of the $20,000,000 produced by both general and special taxes for highway purposes in New Jersey in 1923 the motor vehicle produced $8,000,000 or 40%.

Moreover, the $20,000,000 of revenue derived from general taxation for highway expenditures contains an unknown but large sum levied upon the motor vehicle as a piece of personal property.

CONSTITUTIONAL AMENDMENT NEEDED TO ALTER PERSONAL PROPERTY TAX ON MOTOR VEHICLES.

So far as the taxation of motor vehicles as personal property under the General Tax Laws is concerned, it is clear that this Special Commission can do nothing in the way of recommendations without opening up a broad discussion of the whole subject of general taxation of all personal property.

Even so, while it is a well-known fact that personal property to a very great degree escapes assessment and taxation, nevertheless, this is hardly the case when the personal property is expressed in the form of an automobile.

A piano in the parlor of a mansion may be worth $1,000 but taken in connection with all the personal property in that home, it may be assessed for no more than $15 or $20. On the other hand, the automobile of a relatively poor laborer employed about that same mansion may be assessed and taxed at its full value.

Furthermore, as between counties of a State, and municipalities within any particular county, the greatest discrepancies as to the valuations to be placed on motor cars exist. In one citus a motor car may be assessed for $500; in another a car of the same make and year may not be assessed at all or for no more than $50 or $100

To cure these defects and unfairnesses in the taxation of the motor vehicle as personal property a complete overhauling of the State's general taxation practice would be necessary, which in turn would doubtless require amending of the State Constitution, consequently this matter can not come within the scope of the investigation of the Special Commission.

STUDY OF SPECIAL TAXATION WAS COMMISSION'S DUTY.

It is obvious, therefore, that the Special Commission's vital problem has been the study of "special" as distinguished from

"general" taxation of the motor vehicle. In viewing the special taxation subject the following considerations are paramount:

1. Should motor vehicles and motor vehicle operators and owners be subject to special taxes which will produce annually an amount of money greater than the percentage they are now paying, namely, the estimated 40% of the total raised by taxation for highway purposes?
2. Since special taxes on motor vehicles take various forms, whose relative advantages are in question, should New Jersey supplant its present forms of raising special taxes with some other form or combination of forms?

QUESTION NO. 1—AMOUNT OF TAX.

Its answer to the question whether motor vehicles and motor vehicle operators and owners should be subjected to special taxes greater than they are now paying will depend entirely upon the viewpoint of the person or organization attempting to solve the problem.

MAINTENANCE THEORY.

Motor vehicle users, dealers and manufacturers are almost unanimous in their belief that the special taxes levied upon motor vehicles in New Jersey, now aggregating more than $8,000,000 per annum, are enough, yes, more than enough to meet the justifiable charges which should be levied upon motor vehicle users to help defray governmental expenditures on highways.

They contend that the measuring stick for these special taxes should be the costs annually necessary to enable the State and its counties adequately to *maintain* the main arteries of highway travel throughout New Jersey.

They are bitterly opposed to the imposition of extra special taxes or to the increase of existing special taxes for the purpose of obtaining money to *construct* highways.

They contend that these are capital investments which should be charged against the economic development of the State in general and against local communities and abutting property owners in particular, owing to the tremendous increases of property values brought about by highway development

If their contention is correct that special taxation of the motor vehicle should be strictly limited to the amount of money needed to maintain the main arteries of vehicular travel then it is, of course, highly essential, first, that the word "maintenance" should be defined in a clean-cut, circumscribed manner, and second, that those highways on which maintenance at the expense of the

motor vehicle is to be carried out should also be definitely located and their mileage limited.

RADICAL OPPOSITION TO MAINTENANCE THEORY.

Those opposed to this and of motor vehicle users, dealers and manufacturers divide themselves into two distinct groups. The one group is very radical in its views. It contends that the motor vehicle is the sole beneficiary of the expenditures made by State, counties and municipalities for roads, streets and bridges and should, therefore, be obliged to produce every year the entire amount of money necessary to pay for highway development.

In a word, in the year 1923 they would have called upon motor vehicles which operate on the highways of New Jersey to produce the full $40,000,000 which it is estimated were spent on highways last year.

MODERATE OPPOSITION TO MAINTENANCE THEORY.

The other group in this class opposed to the theory of limiting special taxation of the motorist to highway maintenance needs is not quite so harsh upon the motor vehicle It contends that those who own and operate cars should be obliged to pay for the maintenance of highways and in addition for the reconstruction of the highways, whenever such reconstruction of existing improved highways is made necessary by the great and growing use of the motor vehicles over certain thoroughfares.

What this would have amounted to in dollars and cents in the year 1923, it is impossible for this commission to say but there is no question that it would have been a far greater sum than the $8,000,000 which the motorist did pay in that year in the form of special taxes

DIVIDING LINE MUST BE FOUND.

Very clearly, therefore, in view of these three theories, the all-important decision not only for the Special Commission, but also for the people as a whole, and their representatives in the State Legislature, is to determine at once a policy which shall measurably define what share of the cost involved in road, street and bridge construction and maintenance in any one year, special taxation of the motor vehicle should bear.

It is clear that without a decision as to the amount, it is futile to attempt to prescribe the form which special taxation of the motor vehicle should take.

Granted a form of special tax which in theory and practical operation is ideal, nevertheless, such a tax would be rankly unjust if the amount of money annually collected by means of it is more than conditions warrant.

On the other hand, the crudest form of special tax might not prove burdensome and vexatious if it did not take from the pockets of a certain class of citizens an undue share of money.

Where then shall the line be drawn between the amounts of money to be raised for the purpose of building and maintaining highways, by general taxation of real and personal property and those to be obtained by special taxes on the motor vehicle?

To put the question in concrete form, assuming that the State, counties and municipalities must raise $20,000,000 by taxation per annum for the next ten years for roads, streets and bridge construction, shall they each year obtain $12,000,000 of the $20,000,000 from special taxation of motor vehicles; shall there be a "fifty-fifty" break or just where shall the line be drawn and why?

In New Jersey general taxation is theoretically and presumably based upon and measured by the ability to pay while special taxation of the motor vehicle is demanded and defended on the ground of peculiar and particular benefits to a special class.

Assuming that the special benefit theory is economically sound and just, it at once becomes an almost hopeless task to attempt to show by figures and mathematical computations in what matter and to what degree the motor vehicle, as distinct from, and as contrasted with, numerous other beneficiaries, fares from good highways.

Consequently, the Special Commission regards the whole matter as one of policy and recommends the following with regard to the amount of special taxes to be levied on the motor vehicle.

1. That the motor vehicle and its use should not be called upon in any year to meet a greater proportion of the cost of highway financing through taxation than that of 1923, namely, 40% ($8,000,000) of the combined total ($20,000,000) raised by general taxation of real and personal property and special taxation of the motor vehicle.

QUESTION NO. 2—FORM OF TAX.

If this recommendation of the Special Commission is granted —or in fact if a definite ratio either higher or lower than 40 per centum is fixed then it is possible to discuss the relative merits of the various forms of special taxes whereby the sum demanded can be raised.

A part of the money collected by fines and penalties, the $8,000,000 which found their way into the New Jersey motor vehicle fund in 1923 came from the following sources:

Annual registration fees levied as follows on passenger cars, commercial cars, tractors, motor cycles, dealers, etc.:

	Horse Power.	
Passenger,	29 H. P. or less,	$0.40
	Over 29,	.50
Commercial cars, trailers, semi-trailers and tractors,	Lbs. Gross Weight.	
	1,000 lbs or less,	$10.00
	1,001 lbs to 2,000 lbs,	12.00
	2,001 to 3,000 lbs,	15 00
	3,001 to 4,000 lbs,	20.00
	4,001 to 5,000 lbs,	24 00
	Per 1,000 lbs. over 5,000 lbs. up to 29,000 lbs gross,	3.00
	From 29,001 lbs to 30,000 lbs.,	99.00
	Tractors	
	Same as Commercial Cars.	
	Passenger Capacity.	
Omnibuses,	5 passengers or less,	$15 00
	6 to 8 passengers,	17.50
	9 to 12 passengers,	20 00
	13 to 17 passengers,	25 00
	18 to 22 passengers,	30.00
	23 to 26 passengers,	35.00
	27 to 30 passengers,	40.00
	Plus $2 00 per seat in excess of 30	
	For all vehicles except motor cycles:	
Dealers,	$25 00 per set, of 5 pairs of plates to a set.	
	Motor Cycles	
	$15 00 per set, or 3 pairs of plates to a set.	
Drivers' Licenses,	$3 00 per year.	
Motor Cycles,	1 00 per year.	

Miscellaneous items including fines and penalties.

So far as the annual registration fees are concerned, they are open to various serious objections on the score that they do not differentiate between the amount of use that various cars obtain from the highways.

To illustrate, take two cars of exactly the same model and make. One of them may travel 5,000 miles over the highways of New Jersey in one ear while the other is traveling 15,000 miles. The latter secured three times as much use of the thoroughfares as the former, but paid the same annual registration fees.

Furthermore, since use of highways expresses itself in wear and tear it is further contended by those who object to the present annual flat rate registration fees that not enough allowance is made in the size of the fees for the different weights of cars and for cars with different types of tire equipment. Nat-

urally, these people are in favor of some sort of special tax which to a degree at least measures the amount of use—that is, the wear and tear which any one vehicle imposes on highways of the State, counties and municipalities.

They contend that the nearest approach to such a measure is a tax upon gasoline, or, speaking generally, a motor fuel tax. A levy of this sort in their estimation takes care of all of those factors which have a tendency to wear out highways and occasion big outlays for maintenance and reconstruction.

These factors are primarily speed and weight; the factor weight playing a particularly important part when it is not properly distributed by tires of sufficient width and when such tires do not have protective resiliency.

Supporters of the present flat-rate annual fees contend that use of highways should not be measured by special taxation of the motor vehicle, but that value is the better criterion. This being the case, it is their belief that a flat rate fee graduated upon horse-power or weight or a combination of these two factors more clearly approximate a just levy than any other form that can be devised.

It should be said in passing, however, that this commission does not believe that horse-power and weight can be used as measuring sticks for the valuation of the motor car. There may be some sort of a rough and ready relationship, between horse-power, weight and value, but the exceptions are so numerous and important that it overthrows the proposition for practical use even if value as a basis for special taxation were a sound theory.

In the eyes of the general public and indeed of the motorist himself the special taxes levied upon him in addition to the general tax which he must pay through the present property tax are justified and are acceptable because they are used to maintain and reconstruct the highways over which he operates.

In return for his outlays, which are indeed virtually a double tax, the motorist obtains hard and smooth highways, convenient for travel at all seasons with a resulting lowering of the cost of operation and upkeep of his machine.

Indeed, it has been on this basis of use that the special taxation of the motor vehicle has been sustained whenever its validity has been challenged and fought out in the courts This being so this Special Commission accepts "use," which as has been said before, expressed itself in wear and tear of highways, as the measuring stick and justification for special levies imposed upon the operation of motor vehicles in the State, and believes that if any change is to be made in the form whereby special taxes

are to be levied on the motor vehicle, these changes might well be along the lines of the following recommendations:

1 A clean cut distinction should be made between the fees charged for the licensing of drivers and registration of vehicles and the levies made to provide revenue for highway financing purposes.

Along these lines, therefore, the annual cost of drivers' licenses and vehicle registrations should, as nearly as possible, approximate the overhead cost involved in the issuance of these licenses and registrations, and in the administration of the State Department charged with the responsibility for regulating motor vehicle use.

On the other hand, whatever annual expenditures for highway purposes are to be taken care of by the motor vehicle, should be obtained by proper and adequate taxation based on factors which so far as is possible divide the burden equitably between the various types of motor vehicle.

LICENSES.

2. Since the issuance of an original driver's license involves examination of the applicant's fitness to operate a motor vehicle, it is recommended that a charge for this original license should be $3, but that annual renewals thereof should be $1. The cost for a learner's permit should remain the same, namely, 50c.

The registration of a vehicle and the issuance of identification plates therefore should, without distinction or differentiation between vehicles, cost a flat charge of $3 per annum

Likewise a flat charge of $1 is advocated for all transfers, duplicate tags, duplicate certificates, physicians' insignias, etc.

TAXES OF GASOLINE CARS.

3. In the matter of motor vehicle taxation the commission advocates that in the case of all cars, distance traveled, as measured by gasoline consumption, be made the basis for levies, while in the case of commercial vehicles gross weight, as represented by the combined weight of the vehicle and its load, be also taken into consideration

Along these lines:

A. Passanger cars and commercial cars should be called upon to pay 2c. per gallons tax.

Note: The gasoline tax provided for in this recommendation is to be collected from wholesale distributors, provision being made for tax exemptions in case of gasoline sold for commer-

cial purposes, motor boat use or exclusive use on farms, said exemptions to be taken care of by sworn statements to authorize the necessary rebates.

B. Commercial cars should, in addition to the 2c per gallon tax, pay 25c. for each 100 weight of the vehicle and its load.

Note 1.—In the case of commercial vehicles carrying property this gross weight should be determined in the manner now employed by the Motor Vehicle Department or in accordance with the standard rating given any particular vehicle by the manufacturer thereof.

Note 2.—In the case of commercial vehicles carrying more than eight passengers which are to be included in this class the gross weight should be the weight of the vehicle plus allowance of 125 pounds per person for each seat of seating capacity.

TAXES FOR ELECTRICAL AND STEAM CARS.

4. Commercial vehicles propelled by electricity or steam shall pay 50c. per 100 weight of the gross weight of the vehicle and load.

TAXES FOR TRAILERS.

5. Trailers and semi-trailers should be charged on the weight basis provided for commercial vehicles namely 25c. for each 100 weight of the vehicle and its load.

TAXES FOR HORSE-DRAWN VEHICLES.

6. That all horse-drawn vehicles using the highways, except those used in direct connection with farms for agricultural purposes, shall pay a tax of 15c. per 100 weight of gross weight, said gross weight to be determined by the weight of the vehicle plus its estimated allowable load.

On the basis of the foregoing recommendations and on the basis also of the number of drivers licensed and motor vehicles registered in the year 1923, the following are the amounts which the commission estimated would have been raised by the new method of licensing and taxation suggested, if the schedule of rates suggested had been in force during that year.

LICENSES.

1. Auto and Motor Cycle—		
Assuming 100,000 originals, $3 00 per license, ...	$300,000	
Assuming 408,770 renewals, $1.00 per renewal, ...	408,770

DELAWARE RIVER BRIDGE JOINT COMMISSION.

January 29th, 1925.

Hon. Clifford R. Powell, Speaker, and Members of the Assembly of New Jersey, Trenton, New Jersey:

GENTLEMEN—We have the honor to transmit herewith for your consideration the annual report for 1924 of the Delaware River Bridge Joint Commission.

Appended thereto is the detailed report of the Board of Engineers of the Commission, setting forth the progress made

upon construction of the great bridge spanning the Delaware River between the Cities of Philadelphia and Camden.

Respectfully yours,

JOSEPTH K. COSTELLO,
Secretary.
CHARLES R. BACON,
Asst. Secretary.

Mr. Chandless moved that the communication be received and referred to the Judiciary Committee.

Which was agreed to.

Mr. Pascoe offered the following resolution, which was read and adopted:

DELAWARE RIVER TREATY COMMISSION
STATE OF NEW JERSEY

February 3d, 1925

Hon Clifford R Powell, Speaker of the Assembly, State House

DEAR SIR—I have the honor to transmit herewith the report of the Delaware River Treaty Commission (Tri-State Commission), which represents the results of its negotiations with similar commissions of the States of New York and Pennsylvania in the drafting of a Compact as to the Water Resources of the Delaware River, all in compliance with the provisions of Chapter 94, Laws of 1923.

Copies of this report together with the Compact and an outline thereof have been delivered to each Member of the Assembly for their information.

By direction of the Commission,

Respectfully submitted,

H. T. CRITCHLOW,
Secretary.

REPORT.

January 31st, 1925.

Hon. Clifford R. Powell, Speaker of the Assembly:

The Tri-State Commission, appointed by the Governor under the provisions of Chapter 94 of the Laws of 1923, "to act jointly with similar commissions of the States of New York and Pennsylvania in the investigation of the development and utilization of the water resources of the drainage basin of the Delaware River, and to submit a comprehensive report recommending the policy to be followed for the best interests of said States, and the legislation, State and Federal, which will be necessary to make such recommendations effective," now have the honor to render the following report:

Your commissioners, W. A. Starrett and Frederick C. Schneider, appointed on March 6, 1924, organized by selecting Colonel W A Starrett as chairman and immediately proceeded to familiarize themselves with all the various aspects of the problem Joint meetings were held from time to time with the commissioners duly appointed by the Governor of Pennsylvania under authority of the act approved May 24, 1923 (Pamphlet Laws 445) and by the Governor of New York under authority of Chapter 56, of the Laws of 1923, of that State

Your commissioners, before beginning their detailed studies, visited various parts of the area of the Delaware River watershed and inspected other areas jointly with the commissioners from Pennsylvania and New York They also held many joint meetings with the commissioners of the other States and with them carefully considered all matters pertaining to the many questions involved.

Your commissioners obtained as their legal advisor, Francis H McGee, Deputy Attorney-General, and as their technical and engineering advisor, H. T. Critchlow, Hydraulic Engineer of the Department of Conservation and Development. These gentlemen, working under our advice and guidance, served as our representatives on a joint Drafting Committee with the legal and technical advisors of the Pennsylvania and New York commissioners With our approval they also conferred with other legal and technical experts who were qualified to advise them on the subject matter This joint Drafting Committee held in all forty-two meetings and submitted their final report to the commissioners of the three States on January 23, 1925 The commissioners of the three States thereupon and after due consideration and deliberation unanimously agreed upon a form of com-

pact which comprehensively covers all matters relating to the conservation, use and development of the water resources of the drainage basin of the Delaware River.

Your commissioners on behalf of the State of New Jersey did, with the commissioners representing the States of Pennsylvania and New York, on January 24, 1925, duly sign the form of compact as jointly agreed upon. The original copy of the said compact was filed and deposited in the office of the Secretary of State on January 27, 1925.

Your commissioners did also transmit to the Governor certified copies of the compact in the form of a bill, and recommended its transmittal to the Legislature at the present session.

Governor Silzer in a special message to the Legislature dated January 27, 1925, entitled "Water," made the following statement:

"The Tri-State Commission has been in conference with the representatives of New York and Pennsylvania, and has made a report of an agreement for the equitable distribution of the waters of the Delaware River and its tributaries in the three States. Their report is before you for action, having been transmitted herewith This report represents the work of eminent engineers who have spent months of their time in conferences with the representatives of New York and Pennsylvania

"This report, I believe, amply protects New Jersey, and should be adopted and a treaty entered into carrying out the commission's recommendations."

Your commissioners have directed that printed copies of this compact be sent to you for your information.

Your commissioners respectfully advise that upon the passage and enactment of the law as above recommended and upon similar enactments in the States of Pennsylvania and New York, the State of New Jersey join with the States of Pennsylvania and New York in securing the consent of the Congress of the United States in order that the compact, as adopted by the three Legislatures, may be completely effectuated.

Your commissioners respectfully report that the form of compact signed by them and now submitted for adoption by the Legislature in every way conserves and protects the interests of the State of New Jersey. The adoption of the compact will secure to the State a definition of its rights in the waters of the Delaware River which for nearly its entire length, is a boundary stream between the three States In the absence of agreement as to the rights of the three States in these waters no development or use of them has been possible and they have flowed

unused and uncontrolled to the ocean. The compact, as proposed, by defining and fixing the rights of each State, will render possible the conservation, use and development of the great resources which lie dormant in the waters of the Delaware River and its tributaries.

The total drainage area of the Delaware River from its headwaters down to the Pennsylvania, New Jersey, Delaware State boundary point is 10,444 square miles. Of this area 2,389 square miles are in New York, 1,979 square miles in New Jersey and 6,076 square miles in Pennsylvania Under the compact as submitted each State is authorized and empowered under its own laws to develop three-fifths of the drainage area within its boundaries New York, therefore, may develop 1,435 square miles, New Jersey 1,187 square miles, and Pennsylvania 3,646 square miles.

The compact as a whole is founded on the following basic and fundamental principles:

(1) That no State should divert from the channel of the Delaware River all of the water which originates on its soil

(2) That each State should be enabled to make developments within its own territory, under its own laws, in its own manner and in proportion to its own drainage area

(3) That the water which, at any time, is flowing in the channel of the Delaware River should be divided between the three States as riparian proprietors.

(4) That there should always be permitted to remain in the river a flow sufficient to maintain the channel in good sanitary condition, and adequate for all purposes of navigation

The compact as presented is based on fundamental principles of equity. It is just and fair to the three States equally No one State secures even the slightest advantage over another.

Under the compact each State secures the following rights:

(a) The right to develop the water of its own tributaries and to divert such water from the channel of the Delaware River provided that the watershed area so developed does not exceed three-fifths of the entire watershed area within the State, and provided, further, that reasonable reserve flows are maintained for purposes of sanitation and navigation

(b) The right to take water from the channel of the Delaware River. Each State either above or below the Tri-State point near Port Jervis may take from the channel one-third of the water therein which has originated above the Tri-State point. Below the Tri-State point Pennsylvania and New Jersey may take one-half of the water which has originated below that point

and which is flowing in the channel of the Delaware River. Each State must, however, allow a reasonable reserve flow to remain in the channel at all times and the allotment of each State in the water flowing in the Delaware channel is reduced as it diverts water from the tributaries within its borders in accordance with a rule clearly set forth.

(c) Each State may use the channel of the Delaware River as a carrier of water developed by it from a higher to a lower point. Water flowing in the channel under this provision is given safe conduct and may not be used or interfered with by another State

(d) Each State may build dams across the channel of the Delaware River for the purpose of developing hydro-electric power or for any other purpose, subject to the general approval of the Tri-State Delaware River Commission, which is constituted by the compact to oversee all developments made thereunder and to prevent so far as may be possible conflict as between two proposed developments or uses.

(e) Each State may delegate the rights and privileges conferred by the compact to any of its administrative departments or political sub-divisions or to any corporation, partnership, association or person.

In return for the invaluable rights and privileges granted by the compact, each State agrees to the following limitations·

(1) That no water from the Delaware area may be carried outside the boundaries of the three signatory States.

(2) That no State may dispose of, to another signatory State, any of the water secured to it by the compact except by the authorization of its own legislature and with the consent of the Tri-State Delaware River Commission.

(3) That reasonable sanitary conditions will be maintained on all tributaries and along the channel of the Delaware and

(4) That each State will adhere to a reasonable policy of reforestation and fire protection on the Delaware drainage area.

All damages to lands and property resulting from the development of any project under the authorization of the compact are to be determined by the courts and under the laws of the State in which the damages are suffered. The compact expressly disclaims intent to abridge any vested right now existing and clearly sets forth that no property of any kind can be taken or interfered with for any purpose without just compensation to be determined by due process of law governing such matters in the respective States

Nothing in the compact is to be construed as invalidating any previous treaties between any two of the States except as any

provision thereof may be expressly repugnant to the provisions of this compact, but the old restrictions as to the building of dams across the channel of the Delaware River are expressly abrogated.

The compact lays down a plan of procedure to be followed in case of claim or controversy between two or more of the States and in case that modification of the compact should become desirable provision is made for appointment of commissioners to consider and adjust and make appropriate recommendations to the several Legislatures.

The compact further provides that if any part thereof should be held to be unconstitutional all other severable parts thereof shall continue in full force and effect. The compact may be terminated at any time by concurrent legislative action of the signatory States, but all rights which may have become established or vested will continue in full force and effect.

The Tri-State Delaware River Commission set up by the compact will have, in general, purely nominal duties and will include State officials or employees designated by the three Governors. All undertakings and decisions of the commission must be on the unanimous vote of the three States, thus avoiding the possibility of inequitable decisions as against any one of them. The compact itself carries no appropriation, but after it becomes effective the State Department charged with the duty of supervising the developments will require a small additional departmental appropriation to properly safeguard the interests of the State and this duty will be performed in connection with its present supervision of other watercourses, and will serve to protect the rights secured by the State under the compact.

In closing this progress report your commissioners will continue to function and to perform their duties until such time as the compact has been adopted by the States and consented to by the Congress of the United States.

Your commissioners for the purpose of record desire to acknowledge the lofty ideals, the high-minded co-operation, and the spirit of helpfulness which, at all stages of the negotiations, were in so generous a manner extended by the commissioners from Pennsylvania and New York. In consequence of the mutual trust so engendered it has been possible for us to agree with them on every point embraced in the compact, with the result that it is a document not only fair and reasonable in its tenor but just in every particular to each of the sovereign States which is party thereto.

There is also appended hereto an outline of the compact, article by article, which gives the subject of each article and a brief summary of its contents.

Respectfully submitted,
DELAWARE RIVER TREATY COMMISSION.
W. A. STARRETT,
Chairman.

Attest:
H. T. CRITCHLOW,
Secretary.

A message was received from the Governor by the hands of his secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
February 2d, 1925.

HIGHWAYS.

To the Legislature:

I desire to communicate with you upon the subject of our State highways.

In March, 1923, the present Highway Commission qualified and took office. Since that time, they have done excellent work in the interest of the people of the State.

Not only did the commission make great headway during the year 1923, despite the fact that it was late in the season before they were appointed and in a position to take control of the highway situation, but, during the year 1924, they have completed seventy-seven more miles of permanent concrete pavements on the Highway System. Four hundred and ninety-five miles of the entire State Highway System is now in permanent pavements. This is, practically, five-eighths of the whole system, there being a total of eight hundred and forty miles.

On account of the immense amount of travel over the White Horse Pike between Camden and Atlantic City, it was found necessary to widen this highway, and thirty-three miles of this work has been done.

For the first time in the history of the State, there are no detours, on any part of the Highway System, which have to be carried over the winter months. This means that the work planned for the year 1924 has been completed during the year, and that it will not be necessary to carry any of last year's work over to 1925.

In addition to the work which has been done on permanent pavements, the commission has succeeded in eliminating a number of dangerous grade crossings. Besides this, the great bridge across the Raritan River is being rapidly built, and will be ready for public travel on or before June, 1926, the date fixed in the contract.

The Highway Commission has taken over one hundred miles of the new routes, which were authorized by the Legislature in the last few years, which go to make up the present total of eight hundred and forty miles

A saving of over a million dollars has been effected in improved methods of construction. The average cost per mile for permanent pavement during 1924 was $65,000. This is $14,000 per mile less than it was in 1923 The maintenance work on the System has also been reduced to the extent of $135,000 over the cost in 1923, although there was an increase in mileage under maintenance of about one hundred miles

The Commission plans to continue the high mileage record of construction of permanent pavements in 1925. It will, among other things, complete Route No. 4, making a continuous State highway from New York to Atlantic City; more grade crossings will be eliminated, and there will be built a number of bridges that have become necessary.

Some of the chief problems which have confronted the Commission are the provisions to take care of the great traffic increase, which is bound to come when the vehicular tunnel under the Hudson river and the bridge across the Delaware, at Camden, are opened, as well as the so-called cut-off to eliminate the dangerous grade crossing and congestion on the seashore route between South Amboy and Keyport To this end, the Commission conferred with others who were familiar with transportation problems and created an advisory board to aid them in their work. The result is that before the tunnel and bridge are opened, highways will be constructed through Jersey City and Camden, so that neither the streets of Jersey City or Camden will be further congested by the increased traffic, and traffic along the shore will be accommodated.

The funds to pay for these improvements will come out of the bond issue for highways, already authorized, and moneys available for this purpose from the Motor Vehicle Fund under the resolution of 1924, so that, for a time, at least, it will not be necessary to impose additional tax burdens upon the people to take care of these undertakings.

All of the roads have been built honestly, under a board that has exercised fine judgment in the doing of this work. The beneficial results of this administration will not be apparent until the public realizes, after years of use, that these roads were so well built that they lasted long beyond the period of expectation—a period longer than that to which the public were accustomed under the older methods.

Free competition in road building has been restored under this administration, this being one of the reasons why the cost of road building has been reduced.

The Commission has had to be firm, and at times has had to set up its own operating road plant, in order to demonstrate that roads could be built for the price which they had fixed.

Many counties have been checked in their extravagant methods by the rule of the Commission, that they would give no State aid where they were convinced that the roads were not being honestly or properly built, or where roads were not so located as to be generally beneficial or useful.

Where efforts were made to work through closed specifications, the Commission, finding the present statute inadequate, had to resort to their own power in the distribution of funds to destroy such practices and bring about open competition.

The most striking examples are those cases which arose in Atlantic county, Morris county and Passaic county.

In the Atlantic county case, a request was made by the board of freeholders for aid in the construction on the Absecon boulevard. This aid was not granted, however, on account of the fact that the pavement proposed was asphalt block and on account of the decision of the State Highway Commission that it would not share in the cost of work where a patented or controlled pavement was specified, it being the feeling of the State Highway Commission that the asphalt block type of paving, while not patented, was a closely controlled pavement.

Advertisements were placed for bids and bids received for the work, the price being $935,711.71. Immediately after receipt of the bids, Certiorari proceedings were instituted by a citizen of Atlantic County, which Certiorari was sustained by the Court on technical grounds The Atlantic County Board of Freeholders

thereupon directed that the specifications be changed to include a concrete base and sheet asphalt surface pavement and renewed their request for State aid in this construction. The Commission gave further careful consideration to this request and granted a special allotment of $50,000 00 as State aid in this work in view of the fact that the type had been changed to asphalt surface pavement.

Bids were later received on this type, the low bid being $710,281 88, this being a saving over the low bid on the first advertisement of $225,429 83

In Morris County, a situation arose concerning the paving of East Main Street, Boonton.

The matter first came up in 1922 under the former State Highway Commission, at which time the Board of Freeholders of Morris County were informed that the State Highway Commission would grant a special allotment of State moneys to the extent of one-half of the cost of reconstruction of this project. Bids were received late in 1922, but no action was taken by the Commission then in office

When the present Commission received the matter for consideration, approval of the award of contract as refused on account of the fact that it provided for a patented type of paving. The Board of Freeholders were advised that an allotment of $25,000 00 would be made provided the work was readvertised on a non-patented type. Bids were, thereupon, advertised to be received on a sheet asphalt and open specification topeka type of pavement. The State Highway Commission then refused approval of award of contract on account of the bids being too high and the fact that there were only two bids received The low bid at this time was $59,720 00.

The work was again readvertised with the result that a low bid of $57,302 25 was received, on which approval was again refused, the Commission feeling that the price was still too high.

After some discussion, the Commission then approved of a transfer of funds held for the East Main Street, Boonton, project to a cement concrete project known at the "Long Valley-Hunterdon County Line Road," there being retained for the East Main Street, Boonton, project, only $4,840 55 as State Aid, which was applied on the work which was performed by County forces without contract. The total cost of the work on this basis as finally approved by the Commission was $48,216.55, a saving of approximately $11,500, or about twenty-five per cent.

In Passaic County, a connecting link on State Highway Route 11 was to be constructed, it being located in a city having a popu-

lation greater than sixteen thousand, and, therefore, an agreement was entered into between the State Highway Commission and the Board of Freeholders of the County of Passaic under whose jurisdiction these streets lie, whereby the Commission agreed to pay a portion of the cost of the improvement.

Bids were advertised to be received by the Board of Freeholders of Passaic County in the summer of 1923. When the bids were received it was found that the low bid on the sheet asphalt surface paving was $2.07 per square yard. This, the State Highway Commission refused to approve and eliminated the item of sheet asphalt surface from the contract for the paving of the said sections of Route 11.

Bids were again asked for by the Board of Freeholders for the furnishing and placing of the sheet asphalt surface pavement on this section and the low bid was $2.05 per square yard, which was again held to be excessive by the State Highway Commission. Advertisements were later placed for a third time, requesting bids on this sheet asphalt surface paving and the low bid on this third bidding was $2 20 per square yard.

Upon receipt of the third set of bids, the State Highway Commission thereupon advised the Board of Freeholders of Passaic County that it would place the sheet asphalt surface paving as required on the said Route 11, Sections 6 and 7, with its own forces and equipment at a price of $1 76 per square yard, and the work was done This price, you will note, was twenty-nine cents per square yard lower than the lowest bid received by the Passaic County Board of Freeholders and forty-four cents per square yard lower than the high bid received

There was included in the work a total of 22,888 square yards Based on the saving of twenty-nine cents per square yard, this represents a total saving of $6,636 94, and on the basis of a saving of forty-four cents per square yard, a total saving of $10,089.84.

Not the least pleasing result of this honest administration is the co-operation of road contractors, most of whom were glad of the opportunity of doing business with a board where they know that they can bid honestly on the work, that they will be fairly treated in return, and cognizant of the fact that there need not be included in their bids any sum or sums to be paid to anybody connected with the administration of the Road Department. This has led not only to a better understanding, but better work as well, and I am sure that the contractors are glad that these conditions exist; in fact, some of them have so stated

The roads are our important arteries of transportation and communication, and in a State of such industrial importance it is necessary that they be kept open at all times, both during the summer and winter.

It was a matter of common comment, during the past winter (and so far this winter) that the State Highways were free from snow and ice for travel immediately after every snowstorm. This was in great contrast to the streets in cities and towns, which were impassable for long periods after the Highway Commission had made the State highways fit for use The thousands of dollars saved by this foresight, both in repairs to cars and in savings to the industries and others, who were required to travel, as well as to the convenience, and to the roads themselves, have been a matter of much favorable comment by our citizens Plans of the Highway Commission contemplate an even more thorough and well-organized effort during the present year, to keep our eight hundred and forty miles of highways open at all times

The sale of the Highway bonds met a favorable response from bankers, and the rate of 4¼ per centum and the fixing of the bonds at short-term periods have resulted in the saving of more than a million dollars.

Open Specifications—There still seems to be some misapprehension on the question of open specifications There are some who do not, and some who will not, understand the situation

The fact is, as it always has been, and as I frequently stated it to be, there is not upon the statute-books an Open-Specifications Law Under the present law, it is possible to have closed specifications The Atlantic County case is the best illustration that can be given, as demonstrated by the facts herein set out In this case, notwithstanding the statute, there were closed specifications, and the contract was awarded by the county to the favored contractor When this was accomplished, the State Highway Commission refused to contribute or permit any State funds to be used in connection with this road until the evil was remedied

If we had had to rely on the so-called "Open Specifications" Law, the taxpayers would have had no relief whatever Fortunately, however, there were public-spirited citizens in Atlantic County and a conscientious Highway Commission to prevent the waste of the taxpayers' money

It was clearly demonstrated by these entire proceedings that the law now upon the statute-books does not compel the use of open specifications, insuring free and open competition where Municipal or County boards desire otherwise.

There have been a number of instances throughout the State where it has been demonstrated that the law, in the hands of unscrupulous officers, is ineffective, and that favored contractors can be taken care of.

I have deemed it advisable to again call your attention to this situation.

The main purpose of a so-called "Open Specifications" law is to prevent unfair bidding and the stifling of competition for public works and to prevent a waste of the taxpayers' money through the use of patented or controlled processes and materials, for the use of which a royalty is demanded, when there are other processes and materials equally as suitable and costing much less money.

The present law does not accomplish this purpose and should be amended.

I would, therefore, recommend that the Legislature examine the reasons which I gave for my veto year before last, and I would respectfully reiterate my recommendations of last year, and urge upon the Legislature the amendment of this law in such a way as to really bring about and compel open competition in the building of public works. This is of utmost importance, because roads and other public improvements can be and are being built under what are, practically, closed specifications or collusive bids.

We must also, in the interest of the taxpayers, be ready for the day, if it comes, when, so far as road-building is concerned, the personnel of the State Highway Commission may be changed, and that body may fall into less secure and less capable hands.

Prison Labor.—Previous to 1923, efforts were made, from time to time, to use our convicts in the building of public roads. All these efforts were more or less fruitless and unsatisfactory, and the statements were made that the prisoners not only did not, but could not build roads that were either satisfactory or economical. Up to 1923 this was true. It was true because those who were in charge of this work wanted it to be true. The enterprise was loaded up with numerous inspectors and other employees, and the work was retarded. It followed, of necessity, that under such conditions the work must be a failure. It was about to be abandoned when I took it up again in 1923, and secured the hearty co-operation of the State Highway Commission and the Department of Institutions and Agencies.

It has been demonstrated beyond dispute that this work can be done satisfactorily, that roads are well built, and that they are economically built. At the same time, the prisoners are being

given an opportunity to develop, both physically and morally. Some of those who have been engaged in this work, after their terms have expired, have taken positions of responsibility in road-building, and are on their way to better citizenship.

The first road undertaken was from Bordentown to Crosswicks Creek—a distance of about three miles This work was done on time and well done—so well done that it has been the subject of favorable comment by all who have observed and examined it. Due to the delays of the trolley company and some other agencies, there was a deficit.

In 1924, a similar enterprise was undertaken by the convicts for the building of a road between Lakewood and Toms River. This road was finished before the time specified. Thorough and excellent work has been done, and it has been a financial success. Not only was the contract carried out, but the deficit on the Bordentown road job was wiped out. So satisfactory has this work been that an additional contract was taken on by the Department of Institutions and Agencies to grade the road from Toms River toward Atlantic City during the winter, and a new contract has been awarded for the coming summer.

It is a great pleasure to report to your body that we have been able to establish that work of this kind can be done satisfactorily, being at once beneficial both to the State and to our wards in the State Prison.

Having been satisfactorily demonstrated, it is hoped that this work will be continued and become a permanent part of our State Use System

With the progress made in the building of our State highways, the increase in travel, the necessity for scientific planning to accommodate this travel, it becomes ever more important that the Highway Commission should be given the power to fix the routes of the system.

I have urged it before and, with greater force, I urge it again. Economy demands it, and experience teaches that as the problem of traffic relief becomes greater year by year, haphazard methods must be abandoned. Those whose duty it is to study these things and who are trained and skilled in this work are best qualified to decide in which directions the roads should be extended and improved.

I trust that the present Legislature will enact legislation to give the State Highway Commission sole authority to designate the routes of State highways.

Power should, likewise, be given to the Commission, so that in the acquisition of land for highways, it is not limited to the width

required by law It frequently happens that the Commission could buy all of a tract for what it now pays for that part which is included within the boundaries of the road. If the Commission had this power, it could often buy such tracts, use what is needed for the highway, and sell the remainder for enough to pay for the part actually used as a highway. I recommend that such power be given the Commission.

In addition to this, some discretion should be left to the Commission as to the width of the highway in certain places. Under the present law, the State highways must be at least thirty feet in width. In a number of instances, when passing through a settlement, this width can only be obtained by sacrificing old and beautiful shade trees. Power should be given to prevent this. All are striving to beautify our highways by planting shade trees. It should not be necessary to destroy those which we already have.

As the mileage of permanent concrete roads has increased and has thus decreased the cost of maintenance of the Highway System, and as the Motor Vehicle funds have increased in amount, it would seem advisable to permit the State Highway Commission to use for permanent improvement a sum not exceeding twenty-five per centum annually of these funds, which are available for roads.

This will, probably, obviate the necessity of any further bond issue for the development of our State Highway System and avoid the necessity of further taxation for this purpose.

I, therefore, recommend that such legislation be enacted.

Respectfully submitted,

GEORGE S. SILZER,

Governor

DEPARTMENT OF STATE,
MADISON, WISCONSIN,
February 4th, 1925.

Speaker of the Assembly, State Capitol, Trenton, N J:

MY DEAR SIR—By direction of the Legislature of Wisconsin, I am sending you a copy of Joint Resolution No 1, protesting to the Congress and to the Secretary of War of the United States against the continuation of the illegal taking of water from the Great Lakes through the Chicago Drainage Canal

Very truly yours,
FRED R ZIMMERMAN,
Secretary of State.

[Jt. Res No. 9, A.] No. 1, 1925.

Joint Resolution protesting to the Congress and to the Secretary of War of the United States against the continuation of the illegal taking of water from the Great Lakes through the Chicago Drainage canal.

WHEREAS, Actions were instituted by the United States in 1908 and 1913 against the sanitary district of Chicago praying an injunction to restrain the diversion of water from the Great Lakes through the Chicago Drainage canal in excess of four thousand one hundred sixty-seven cubic feet per second, and over the protest of the government a decision was delayed until, after the resignation of Judge Landis, on June 18, 1923, Judge Carpenter decided the case in favor of the government and ordered that the injunction be granted;

WHEREAS, The States of Wisconsin, Minnesota, Michigan, Indiana, Ohio, Pennsylvania and New York joined in appearing as amici curiae with the United States against the sanitary district of Chicago in said action on appeal before the Supreme Court of the United States;

WHEREAS, The United States Supreme Court on January 5, 1925, affirmed the decision of Judge Carpenter, holding that the sanitary district of Chicago has violated the laws of the United States, that its action is in violation of our treaty with Great Britain and enjoining any abstraction of water in excess of four thousand one hundred sixty-seven cubic feet per second;

WHEREAS, The Legislature of Wisconsin in 1921 ordered and directed the beginning of a suit in the Supreme Court of the United States by the State of Wisconsin against the State of Illinois and the sanitary district of Chicago to restrain the taking of water from the Great Lakes by the sanitary district of Chicago and such action has begun and is still pending, no proceedings therein having been had awaiting the final decision in the case just decided;

WHEREAS, The present illegal abstraction of water from the Great Lakes now, and for many years past, has reached the enormous amount of upwards of ten thousand cubic feet per second and has seriously lowered the levels of the Great Lakes and the St. Clair, Detroit, Niagara and St. Lawrence rivers, and has greatly restricted and interfered with navigation thereon;

WHEREAS, The Great Lakes constitutes the greatest waterway in the world, carrying at the present time a tonnage equal to one-fourth of all the railroad tonnage of the United States at a cost of less than one-fifth that of railroad freight rates, and the diversion by the sanitary district of Chicago has already increased lake freight rates by not less than three million dollars annually and has damaged lake harbors and other works fully twelve million dollars;

The enormous diversion has created currents in the Chicago harbor which have destroyed Chicago as a lake port to its own

great loss and to the great loss of all other ports thereby deprived of economical lake transportation to and from this great center of the Middle West;

Incalculable damage has been done to farm and other property along the Illinois river and its fishing and pearl industry has been destroyed by the dumping of Chicago sewage into the stream,

The action of the Sanitary District in abstracting nearly ten thousand cubic second feet where less than one thousand cubic second feet is necessary or desirable for navigation has rendered futile all projects for a lake to the gulf waterway by way of the drainage canal and the Desplaines, Illinois and Mississippi rivers, and if continued will forever prevent the development of such waterway,

The Chicago Sanitary District is deriving a revenue of more than one million dollars annually from electric power produced by the waters so taken, and by this diversion is preventing the United States from obtaining its fair share of water for power purposes at Niagara Falls and along the St Lawrence river where the same quantity of water will produce at least ten times the amount of power produced by the Sanitary District,

The controversy over the diversion by the Sanitary District stands in the way of the immediate undertaking of the St Lawrence waterway to give to ocean-going vessels access to the Great Lakes and to give to the middle and northwestern part of the United States the advantages of ocean-going ports and the enormous development of power possible through such improvement of the St Lawrence river; and

WHEREAS, The Sanitary District of Chicago has repeatedly asked Congress to enact legislation permitting such diversion and Congress has refused to enact such legislation, and bills are now pending in Congress for such permission, and the Sanitary District has repeatedly petitioned Secretaries of War for permits authorizing such diversion, and Secretary of War Stimson, in 1913, refused any permission in excess of four thousand one hundred sixty-seven cubic feet per second, and the Sanitary District now gives out that it will make application for a permit to increase said amount and is carrying on a propaganda and gives out that it must continue to take not less than ten thousand cubic feet per second until the year 1945, with the implication that it intends to continue to abstract this amount of water or more during this period and all time thereafter and will not erect sewage disposal plants other than to take care of sewage from the growth of population and industries during this time, and the Sanitary Dis-

trict is not now making provisions for the immediate practical disposal of sewage by modern methods as is being done in other large lake cities; and,

WHEREAS, The States appearing with the government in the recent case take the position that the waters and the right to have these waters flow down the natural watershed of the Great Lakes is a property right of these States within their respective boundaries, and that there has been delegated to the Government of the United States no power to divert these waters for any purpose except possibly so far as needed for the protection and improvement of navigation for which purpose there will at no time be needed more than one thousand cubic feet per second along the Chicago, Desplaines and Illinois rivers.

Resolved, by the Assembly, the Senate concurring, That the State of Wisconsin hereby respectfully protests to the Congress of the United States and to the Secretary of War against any action by either recognizing or continuing any permit to the Sanitary District of Chicago to divert water from the Great Lakes through the Chicago Drainage Canal for any purpose other than the protection and improvement of navigation;

Resolved, That a copy of this resolution, properly attested by the presiding officers and chief clerks of both houses, be sent to the President of the United States, the Secretary of War, the presiding officers of the Senate and the House of Representatives, and to each United States Senator and member of Congress from Wisconsin;

Resolved, That a copy of this resolution so attested be sent to the Governor and the presiding officers of both Houses of the Legislature in each of the States of the Union, inviting the co-operation of the States in like protest to the Congress and to the Secretary of War.

HENRY A. HUBER,
President of the Senate.

H. W. SACHTJEN,
Speaker of the Assembly.

S. W. SCHOENFELD,
Chief Clerk of the Senate

C. E SHAFFER,
Chief Clerk of the Assembly.

On motion of Mr Chandless, the resolution was referred to the Committee on Judiciary.

Mr. Reeves offered the following resolution, which was read:

Resolved, That the Attorney-General be requested to submit to the General Assembly his opinion in connection with the provisions of Senate Bill No. 1:

1 Whether in the event that the bonds issued by the Port of New York Authority for the construction of the bridge as contemplated in this act, should prove unmarketable because of uncertainty as to their security, the State of New Jersey becomes liable for the payment of principal and interest of said bonds.

2 Whether the State of New Jersey can be made liable for the payment of principal and interest of such bonds, without a State-wide referendum thereon, in accordance with the provisions of the Constitution

Mr. Chandless moved that the resolution be laid on the table.

Which was agreed to

Miss Thropp offered the following resolution, which was read: as follows:

WHEREAS, Senate Bill No. 1 contains unusual and unprecedented provisions in that (1) it entirely supersedes the established statutory procedure of this State relating to the condemnation

of lands; (2) delegates to an independent sovereignty, practically constituting a superstate over the sovereignty of New Jersey, the power to issue and sell bonds under circumstances which may render the State of New Jersey liable for the principal and interest of said bonds, without limit as to amount, and without the constitutional requirement providing for a public referendum thereon; (3) empowers an independent body or commission to construct a bridge involving a very large sum of money, without reserving to the State Legislature or any of the usual agencies of the State the right to scrutinize or approve the scope and magnitude of the project, or the type of construction of said bridge, or the feasibility of the project, as a whole, and (4) entails upon the State of New Jersey probable obligations of which the present members of the Legislature are not fully advised involving the expenditure of unknown sums, running into perhaps millions for actual construction, and large sums for collateral purposes, such as roads, approaches and other like additions to the proposition; and

WHEREAS, It is believed that these are matters which have not been sufficiently inquired into, and that before committing the State of New Jersey to this project further investigation should be made and more complete information obtained thereon; therefore,

Be it resolved that Senate Bill No. 1 be committed to a special committee or to the Committee on Miscellaneous Business, with instructions to hold one or more public hearings thereon, and make a full detailed report to this body, covering the financial and other obligations for which New Jersey becomes liable under this legislation.

The resolution was discussed.

Mr. Chandless moved that the resolution be laid upon the table after discussion.

Mr. Chandless moved the previous question.

Mr. Frederick A. Brodesser, Clerk of the House of Assembly, State House, Trenton, N. J.

DEAR SIR—I have been instructed to present to you for the consideration of the House of Assembly a copy of the enclosed resolutions which were adopted by the Tenth Annual Convention of the League of Municipalities on February 6.

The first resolution expresses the disapproval of our members of Assembly Bills Nos. 155 and 157, which would, if enacted, permit the State Board of Taxes to control local budget and bond issues, matters in which our members believe power and responsibility should remain with the local officials.

The second resolution favors Senate Joint Resolution No. 7, which provides for the continuance of the North Jersey Rapid Transit Commission and an appropriation of $75,000 for their work. May I ask that these resolutions be brought to the attention of the Senate?

Respectfully yours,

SEDLEY H. PHINNEY,
Executive Secretary.

Resolution unanimously adopted at Tenth Annual Convention of the New Jersey State League of Municipalities, Newark, N J, February 6th, 1925.

Indiana plan for State regulation of municipal budgets and bond issues.

Assembly Bills Nos. 155 and 157.

WHEREAS, There has been introduced in the Legislature Assembly Bills Nos 155 and 157, empowering the State Board of Taxes and Assessments upon petition of twenty-five taxpayers to conduct hearings and reduce or eliminate items in any county, municipal or school district budgets and bond issues, the claim

being made that municipalities are extravagant in their expenditures, and

WHEREAS, Correspondence with Indiana cities has proved that the workings of the so-called Indiana plan there have resulted in delays to public business in complaints by irresponsible individuals who are in some cases not taxpayers and do not take the trouble to attend the hearings and have not in general resulted in decreased costs to the taxpayer; and

WHEREAS, Under the admirable requirements of the New Jersey Municipal Finance laws, generally recognized as models throughout the United States, there is already ample opportunity for the general public to influence local budgets through the required publication in the newspapers and the budget hearings, the public usually not taking the trouble to attend these hearings; and

WHEREAS, The proposals of Assembly Bills Nos. 155 and 157 are likely to permit irresponsible individuals to make complaints, resulting in intolerable delay on the adoption of the necessary financial programs and costing the State large sums of money for investigators and hearings to travel about the State, and learn facts at second hand that are already better known to the local officials, thus resulting in greater expense to the taxpayers instead of relief, and

WHEREAS, The proposals of Assembly Bills Nos. 155 and 157 are a denial of the home rule principle and would remove from local elective officials the power and responsibility for the administration of their duties and place them in the hands of a distant board in whose appointment political considerations may prevail, thereby diffusing power and permitting officials to evade responsibility; therefore,

Be it resolved, That we, the New Jersey State League of Municipalities, assembled in our tenth annual convention, do oppose said bills for the reasons above given, and given also in resolutions adopted by the league a year ago when similar bills were introduced.

Further be it resolved, That the secretary of the league is hereby instructed to send copies of this resolution to the Governor, to the members of the Legislature and to the press.

Resolution Adopted at the Tenth Annual Convention of the New Jersey State League of Municipalities, February 6th, 1925.

New Jersey Rapid Transit Commission.

WHEREAS, Passenger service and commuter traffic on the North Jersey metropolitan district is in an unsatisfactory condi-

tion and there are many intricate factors that must be considered in working out permanent and satisfactory solutions, and

WHEREAS, Encouraging progress along these lines has been made by the North Jersey Rapid Transit Commission,

THEREFORE, It is the sense of this commission that said commission should be continued in office, and we hereby respectfully petition the Legislature to pass Senate Joint Resolution No. 9 which would continue the Commission in office and would appropriate $75,000 for their work

Mr Chandless moved that the resolutions be received and referred to the Judiciary Committee

Which motion was adopted

Mr Stratton offered the following resolution for the Speaker, which was read and adopted:

WHEREAS, John Smith, Custodian of the State House is now seriously ill, and

WHEREAS, This House of Assembly recognize with a deep appreciation the efficiency, untiring energy, devotion to service and the many courtesies extended by him to the members of this House; now, therefore,

Be it resolved, That this House of Assembly go on record as extending the hearty sympathy of the members to Mr Smith in his illness and their sincere wishes for a speedy recovery;

And be it further resolved, That this resolution be spread upon the minutes and a copy thereof, duly attested by the Speaker, be forwarded to Mr Smith by the Clerk of the House

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
To the Legislature. February 9th, 1925

In 1923, by chapter 144 of the laws of that year, the Legislature, in its wisdom, enacted a law to regulate and limit the hours of employment of females in manufacturing and merchantile establishments, bakeries, laundries and restaurants.

This was done in response to insistent demands from the women of the State who were interested in the welfare of the women of the State who were obliged to work in the industries at night.

Since the enactment of that law, an attack has been made, not only upon its constitutionality, but also upon the ability of the Commissioner of Labor to enforce the same

Since the Legislature passed this act, it must be inferred that it intended that it should be enforced. This being so, every necessary step should be taken to see that it can be enforced, for

any failure to do so would lay the Legislature open to the criticism that the passing of this law was a mere gesture.

I would, therefore, recommend that since this law has been attacked in the Supreme Court, that the brief of the attacking counsel be taken, and that every point raised by them against the constitutionality of the law and its enforcement shall be met by appropriate legislation to cure the alleged defects and to remove all doubt both as to the constitutionality of the law and its complete and adequate enforcement.

In this way, the demands of these earnest women, who advocated this law and the good faith of the law-making power of the State will be vindicated

Respectfully submitted,
GEORGE S. SILZER,
Governor.

Attest:
FREDERIC M. P. PEARSE,
Secretary to the Governor.

The Speaker declared the motion of Mr Chandless, carried

A message was received from the Governor by the hands of his secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
To the Legislature February 16th, 1925

Due to the geographical position of New Jersey, lying, as it does, between two large States and two of the largest cities of the country, a question of much importance is presented to us in the matter of zoning.

Many of our residents work in the cities of New York and Philadelphia, to which places they commute daily. They have sought homes in New Jersey because of the attractive surroundings offered them here.

Our unfortunate experience has been that after attractive suburban communities have been established, manufacture and business, pushing their way out of the more thickly populated centers, constantly encroach upon these attractive suburban communities, with the result that the communities are destroyed for suburban purposes, and those seeking the comforts of suburban life are being driven farther and farther away from the place of their daily occupations and subjected to the additional inconvenience of travel. Ultimately the time must come when the encroachments upon these communities will extend so far from the centers of population that it will be impossible for men to work in New York and Philadelphia and make the daily journey to their suburban homes This will result in communities made less attractive, and will destroy their character as places of suburban residence, and require these men and women to live in communities surrounded by factories and business houses.

Our suburban communities have recognized this peril and have endeavored to meet it by the enactment of statutes permitting zoning, but every such effort has met with failure when appealed to the courts, for the courts have uniformly set aside such statutes as being in contravention of the Constitution

I do not believe that we can longer afford to neglect this condition. Our experience, up to this time, has shown us that many who would be most desirable citizens, would erect handsome homes, and establish themselves in our communities, have been driven from here into other States because of our failure to provide proper zoning restrictions, as well as proper transit facilities

Many of them have gone to New York, where protection is given them by zoning laws, and where they are assured that, once having erected a handsome home in a suburban community, the character of that community will not change

In this way we have been deprived not only of those who would have added to the quality of our citizenship, but also a large amount of ratables, as well

I believe that our failure to meet the requirements has been of real damage to the State, and that it is going to be of lasting and permanent injury if we do not act soon

It is easily possible to provide for business and manufacture and for residential requirements, as well The whole character and type of our communities within easy reach of the large cities

will be determined beyond possibility of change if we do not act soon. The experience of other States has been that they must provide for both manufacture and business on the one hand, and comfortable suburban residential life on the other. A little more delay, and the matter will not be possible.

I cannot emphasize too strongly what this would mean to the State, and the natural exodus from the State to other places if we continue our present policy.

I would, therefore, recommend that we proceed at once to start in motion machinery for a constitutional amendment which will permit zoning and the development of communities under proper restrictions.

I further recommend that, while this effort is being made, we make another attempt to enact a statute endeavoring to meet the objections made by the courts in setting aside the former acts.

In order to overcome the objection, I would suggest that the statute provide that wherever power is to be exercised by the municipality beyond the ordinary police power of the State, any property-owner who may suffer injury because of the exercise of this additional power shall have a right of action against the municipality to recover damages for such injury. Such a provision would, probably, protect the property-owner in his constitutional right and overcome the constitutional objections which have been raised in the courts.

You will no doubt be advised of other changes to bring the new statute within the decisions of our courts.

In this way we can make a last effort to accomplish results by statutory methods, and if that fails, no time will have been lost in putting the machinery in motion to change the Constitution so that zoning may be legally brought about.

Respectfully submitted,

GEORGE S. SILZER,

Governor.

February 16th, 1925.

Speaker, House of Assembly, Trenton, New Jersey:

DEAR SIR—We herewith enclose a copy of resolution adopted by this club for your consideration and would ask you to kindly co-operate with us in making it possible to carry out the purpose of said resolution.

May we ask you to please acknowledge receipt of same, advising us as to your opinion with respect to the merits of said resolution.

Yours truly,

BAYONNE CITY REPUBLICAN CLUB,
(Signed) by A. S. NEWMAN,
President.

The following resolution was adopted by the Bayonne City Republican Club:

WHEREAS, It is the concensus of opinion of the majority of the citizens of the City of Bayonne, as well as the unanimous opinion of the Bayonne City Republican Club that a bridge across the Kill von Kull, connecting the City of Bayonne with Port Richmond, Staten Island, would be advantageous to the City of Bayonne, County of Hudson and State of New Jersey, and also an improvement and advantage to the people of Staten Island and also encourage industries to locate in both States and thereby bring about a substantial increase in real estate valuations and assist commercial enterprises; therefore

Be it resolved, That the Bayonne City Republican Club, at a regular meeting assembled, do endorse and approve of the erection of such bridge connecting the City of Bayonne with Staten Island, and urge the Legislature of the State of New Jersey and the Governor of this State to make every effort to bring about the erection of said bridge.

And be it further resolved, That a copy of this resolution be forwarded to the Governor of the State of New Jersey, the President of the Senate and Speaker of the House of Assembly.

BAYONNE CITY REPUBLICAN CLUB.
(Signed) By A. S. NEWMAN,
President.

Mr. Chandless moved that the communication be received and spread in full upon the Minutes; and the said resolution be referred to the Judiciary Committee.

Which motion was adopted.

The following communication was sent to the desk and read by the Clerk:

NEW JERSEY CLAY WORKERS ASSOCIATION.
RUTGERS UNIVERSITY,
NEW BRUNSWICK, N. J.
February 19th, 1925.

To the Legislature of New Jersey:

The members of the Executive Committee of the New Jersey Clay Workers' Association, in session at New Brunswick, February 9th, 1925, respectfully present to your body that:

There is before the Nation and for your consideration a proposed amendment to the Constitution of the United States,

granting authority to the Congress to legislate and create laws regarding the employment of persons under the age of eighteen years.

We register and again record our disapproval of child labor in gainful occupations and are proud of the laws made by our State of New Jersey prohibiting such labor by young people or children under the age of sixteen years.

We respectfully call this subject to your attention and ask that the laws of our State never be changed to lower the age limit now on the Statutes of the State.

However, we respectfully declare that this subject is one that should be governed only and entirely by the State and therefore we respectfully petition your honorable body to give the proposed amendment most careful consideration and in your wisdom uphold the authority of the State of New Jersey and that your body refuse to concur in the proposed amendment of the United States.

Respectfully submitted,

LESLIE BROWN,
President.

Mr. Chandless moved that the communication be received and referred to the Judiciary Committee.

The Speaker called upon Mr. Mills to address the House, in order to pay tribute and honor to America's greatest patriot and the first President, this being the day so designated. Mr. Mills arose and made the following address:

I arise, Mr. Speaker, to speak of the man whose birthday we all celebrate.

In the early summer following the hard winter of 1780, when the American army lay at Morristown, General George Washington came to the little town of Springfield, N. J. It was here at the farm of my 3d great grandfather, whose sons were also in the service, that the general was entertained. There occurred at that time a bit of unrecorded history, which has long been treasured and handed down as a tradition in my family. Washington advised that the silver and valuables should be taken into the fields and buried. This advice was fortunately followed, for after fourteen days at Springfield the army moved slowly toward the North river to frustrate the British designs against West Point. On Washington's departure the British

descended upon Springfield, burned and ransacked the village. I recite this merely to show a little personality that makes me feel a closeness, Mr. Speaker, to the Great Leader, and I cannot let the opportunity go by without saying something of Washington as a man.

Henry VanDyke tells us that "hard is the task at this late day to say anything new about Washington" The characteristics of the Father of our Country, however, are sometimes lightly passed over.

We know him as an American, as a hero, as a soldier and as a President. Do we know him as a human being and as a man? Dignified and reserved he was. This manner was natural to him and undoubtedly he won more true friends thereby than by disguising himself and forcing familiarity. Working in the bonds of companionship, he trusted his comrades even though they were not his intimates. It has been said he had no friends.

Washington's education was limited owing to the early death of his father. Like many of us in our youth he longed for the romance of the sea. It is certain that most of his military knowledge came from practice, and not from books, but despite his want of education, he had understanding

Agriculture had ever been his most favorite amusement in life, and a visitor at Mt. Vernon stated that Washington said his greatest pride was to be thought the first farmer in America. His love for his home at Mt. Vernon was such that he seemed never to have been entirely happy away from it, and during his various and enforced absences he longed for his own vine and fig tree Like the true Virginian of his time, this man was preeminently social, and particularly enjoyed having a "few social friends at a cheerful board." At Mt. Vernon he offered the most cordial welcome. He enjoyed a good joke, though he seldom made one himself. Though accredited as never laughing, he is known to have done so heartily among his own family Washington was extremely fond of dancing, and had a marked fancy for fine clothes As a matter of course his liking for horses, and his stable at Mt. Vernon made Washington fond of racing, and with his taste for riding to hounds was one for gunning.

While first in war, first in peace, and first in the hearts of his countrymen, he was second to none in the humble and endearing scenes of private life; pious, just, humane, dignified and commanding, his example was as edifying to all around him as were the effects of that example lasting

High in the firmament of human destiny is set his star of faith in mankind, unselfish courage and loyalty to the ideal While his star shines the Americanism of Washington shall never die

Mr. Pascoe arose to commend Mr. Mills upon his able address and further moved that the address be spread in full upon the Minutes.

Which was agreed to.

Mr. Chandless moved that the House be placed under call.

Which motion was carried.

Upon the calling of the roll, the following members appeared and answered to their names:

PHILADELPHIA, PA.
February 14th, 1925.

Speaker of the Assembly, Trenton, N. J.:

After conferring today with a delegation of prominent Pennsylvanians, headed by the Mayor of Philadelphia, and vigorously supported by Secretary Hoover, President Coolidge signified his approval of the coming Sesqui Centennial Exhibition and the scope by dispatching within the hour a special message to Congress recommending that immediate action be taken by that body on appropriate legislation. The President will officially invite all foreign governments to participate and will request that units of their naval fleets be dispatched to Philadelphia for participation in the celebration and to remain during the term of the exhibition. The international aspect of the Sesqui Centennial is now assured and we are confident that more foreign governments will be represented on this occasion of the celebration of the birth of our independence than have ever before participated in any exposition The State Department will immediately notify the nations of the world by cable through diplomatic channels and the formal invitation will be sent by mail, and we have every assurance that foreign participation will be on a large scale. The exhibition will open on June fourteenth (Flag Day), 1926, and will extend well into the fall of that year. Ample space has been provided for state buildings on the grounds or if desired arrangements can be made for space in our buildings. The time is short, but it gives us more opportunity to display American initiative and capability. Many States have already made provision for representation and if your State has not already done so may we urge upon you the necessity of prompt action in order that you may be adequately represented at the first great exposition to be held in the Eastern center of population since 1876, held as that was in the same cradle of American liberty. We suggest that your participation, if possible, take form of an appropriate building to house the official educational and commercial exhibits as selected by your various State departments to demonstrate to the world your manufacturers, commercial, mineral and agricultural products. May we ask your support and invaluable aid in the assembly for this important project? Let's go.

W. FREELAND KENDRICK,
Mayor of Philadelphia and President Sesquicentennial.
D. C. COLLIER,
Director General.

STATE OF NEW JERSEY,
SENATE CHAMBER,
Mr. Speaker: February 24th, 1925.

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following bills:

Senate Bill No. 163, entitled "An act to amend an act entitled 'An act to regulate elections' (Revision of 1920), passed May fifth, one thousand nine hundred and twenty,"

And

Senate Bill No. 164, entitled "An act to repeal certain sections of an act entitled 'An act to regulate elections' (Revision of 1920), passed May fifth, one thousand nine hundred and twenty,"

The Governor's objections thereto notwithstanding

In which the concurrence of the House of Assembly is requested.

ROBERT M. JOHNSTON,
Secretary of the Senate.

A message was received from the Governor, by the hands of his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
February 23d, 1925.

SENATE NO. 163

To the Senate:

Senate Bills Nos 163 and 164 are companion bills. Senate No. 164 repeals numerous sections of the Election Law in order that Senate 163 may provide for Spring primaries.

I can see no reason whatever for the enactment of these bills into law. I have not had a single request from an independent source for their approval, and have seen little or no editorial comment favoring them.

Legislation should be in the interest of the people of New Jersey, and not in the interest of particular individuals. I do not see, and have not been able to learn of any good that this will accomplish for the people at large.

The only effect that I can see from the enactment of this bill is to disgust the people of the State generally with elections. After every Presidential campaign, running, as it does, from June until November, the people give a sigh of relief when they know that election is over and politics is to be forgotten, and that business is no longer to be interfered with.

Under these bills the State will be kept in a constant state of turmoil and unrest from political agitation. To illustrate:

In the city of Newark petitions for mayor and members of the city government must be filed on April 4th About the first of March the agitation will start. On April 14th will be primary day in Newark On May 12th will be election day. The people of Newark will just about settle down to peace of mind when, on June 2d, will come the first registration day for State elections; on June 16th will come the primary day, and then the agitation will continue until election day, on November 3d.

I do not believe it to be the desire of the people of New Jersey to keep up this political agitation during all of this time. I can readily understand that with a law of this kind upon the books, and an active campaign taking place, running from June until November, the people of the State may well be in a frame of mind of wishing that they might get rid of both candidates who have been agitating for five months, and might have the opportunity of voting for some man who has not been electioneering during that time.

From my own personal experience I am sure that after the first test the successful candidate and the unsuccessful one will both join in the heartfelt request that the law be repealed.

I do not believe it to be to the best interest of the State to have the primary election in June, when the actual election is not to take place until November. Many things may happen from June until November. Conditions may change; the desires of the people may change; the necessities of the State may change, and many other things may happen which would make it advisable, not only for the parties, but for the people, to select candidates which might not be those selected in June It might, by reason of illness, absence, or for other reasons, bar certain men from the possibility of becoming candidates. It is much safer for the State to bring the time for the selection of candidates within a reasonable period of the election than to take it back several months.

Another serious objection to the bill lies in the provision permitting an independent candidate to file a petition At the present time such a petition could be filed as late as September 19th of this year. Under Senate Bill No 163 the independent petition must be filed on June 11th

It is quite evident that one of the purposes of this legislation is to discourage independent voters and independent candidates, and to keep the choice of candidates within the control of the political parties I do not believe that this is a healthy condition, and do not believe that it leads to the best government. Independent voters should have an opportunity to have a candidate if they want one, and independence of thought and action should be encouraged, if for no other reason at least for the purpose of keeping the parties in check and in fear. Senate Bill No 163 is the strongest kind of encouragement to machine politics and machine methods.

Since I am unwilling to inflict upon the people of New Jersey the inconvenience and annoyances provided for in these bills, and since I do not see that they accomplish anything of value to the people generally, and because they have the objectionable features above set forth, I must return this bill without my approval

Respectfully submitted,
GEORGE S. SILZER,
Governor.

Secretary to the Governor

OFFICE OF THE CITY CLERK,
CITY HALL, CAMDEN, NEW JERSEY,
February 27th, 1925.

Mr. Frederick A. Brodesser, Clerk, House of Assembly, Trenton, N. J.

DEAR SIR—As per request of the Board of Commissioners of the city of Camden, N. J, I have enclosed a certified copy of a resolution adopted by said board at the regular meeting of said Board held Thursday evening, February 26th, 1925.

Will you kindly see that the same receives the proper consideration and oblige,

Very truly yours,
A. R. WHITE,
City Clerk.

BE IT RESOLVED, by the Board of Commissioners of the city of Camden, New Jersey, That this board favors Assembly Bill No. 451, which bill will allow municipalities of this State to share in the motor vehicle receipts now paid in to the State of New Jersey.

The Board of Commissioners of the city of Camden urge the passage and adoption of this bill, and

BE IT FURTHER RESOLVED, That a copy of this resolution be forwarded to the Senator and Assemblyman representing this county and also a copy to the Clerk of each House.

I, Alfred R. White, clerk of the city of Camden, New Jersey, do hereby certify that the foregoing copy is a true and correct copy of a resolution adopted by the Board of Commissioners of the city of Camden, N. J., at a regular stated meeting held Thursday evening, February 26, 1925.

(Signed) A. R. WHITE,
City Clerk.

PROSECUTOR OF THE PLEAS,
UNION COUNTY,
ELIZABETH, N. J., February 26th, 1925

Clerk of the House of Assembly of the State of New Jersey, State House, Trenton, N. J.

DEAR SIR—As directed by the Grand Inquest of this county, January Term 1925, I am enclosing herewith petition addressed to the Senate and General Assembly of this State.

Will you kindly see that this petition is duly presented and oblige,

Yours very truly,
ABE J. DAVID,
Prosecutor of the Pleas.

To the Honorables, the Senate and the General Assembly of the State of New Jersey:

The Grand Inquest in and for the body of the county of Union, summoned for the January term, A. D. 1925, respectfully petition your Honorable Bodies and represent:

1. That the Grand Jury at the May term, 1924, of this county, and the Grand Jury at the October term, 1924, of this county, each called attention of your Honorable Bodies to the nonobservance in this county of the provisions of the Vice and Immorality Act of this State, governing the mode of life on the Sabbath day, and pointed out that such violations of the law, in their opinion, were not due to any desire on the part of the people to violate the law, but rather that in the course of time changes

in conditions and customs in many, and especially of the larger communities, acquiesced in by a large majority of the people, had made such laws obsolete, and expressed a belief that conduct on Sunday of certain businesses, places of amusement and recreation were approved by the general public.

2. These bodies recommended that the law governing the subject be changed so as to meet present day conditions, and copies of these presentments were directed to be, and were, we are informed, forwarded to your Honorable Bodies.

3. This body has also had called to its attention the conditions which obtain throughout the county and the State with reference to the nonobservance of the Sabbath law by persons engaged in various classes of business, as well as owners of places of amusement and recreation.

4. This condition as it appeals to this body, presents the question of the reasonableness and propriety of indictment in cases of violation of this law by one class of persons, and no indictment in cases of violations by others, as well as the propriety and reasonableness of indictment of thousands of our citizens in various lines of business, amusement and recreation.

5. This body believes that it and other Grand Juries in this State should not be compelled to choose between portions of the law, governing the same general subject for enforcement, and that the enforcement of the law should be without discrimination and against each and every offender.

6. We believe that any law, if it is to be observed and is capable of enforcement, should be such as to serve the common welfare, and should be respected and supported by the will of a majority of the people; that when it becomes honored in the breach thereof because it specifies offenses which common sentiment and common practice and to some extent the common welfare, have discarded, the demand for revision of, and change in, such a law seems to be imperative.

7. We believe that it is necessary to the enforcement of the vital provisions of the Vice and Immorality Act relating to the observance of the Sabbath day, that such portions of it should be amended, changed or repealed as common sense and present day sentiment throughout the State demands.

8. We feel that by discarding the obsolete portions of this act, the portions that are necessary and advisable to a decent, reverent, responsible and constructive observance of the Sabbath, will be revitalized and made capable of enforcement, and that such portions of the law as the responsible sentiment of the commonwealth of this State may decide in the interest of

the present order, safety and future security of our common society shall and must be enforced, should be made to stand out distinctly from those that seem entirely obsolete.

9. In the interest of law enforcement in the county of Union and throughout this State, and without condoning the violation of any law or portion of any law, this Grand Jury most earnestly and respectfully calls upon the law making bodies of this State to revise and change the laws relating to the observance of the Sabbath so that these laws shall command respect and obedience and be capable of indiscriminate enforcement.

We therefore respectfully petition your Honorable Bodies to give this matter prompt, careful and thorough consideration to the end that such changes may be made in our laws concerning the observance of the Sabbath day, as shall conform with present day conditions, and will bring about a respect for and observance of the policy and provisions of our laws.

Respectfully submitted,
THE GRAND JURY OF THE COUNTY OF UNION,
January term, 1925.
EDGAR A. KNAPP,
Foreman.
ABE J. DAVID,

ASSEMBLY, No. 171.

To the House of Assembly.

This bill is a mandatory one, fastening upon the board of education of every school district a continued yearly expense.

I am opposed to further mandatory legislation, the effect of which is to add to the cost of education.

This bill compels the Board of Education in each school district to have printed and suitably bound copies of the Declaration of Independence, the Constitution of the United States and amendments, and the Constitution of the State of New Jersey and amendments, and to distribute them to each pupil upon his graduation from the grammar schools.

This year, it is estimated, forty-five thousand pupils will graduate from the grammar schools of the State.

If there is any demand or need to be met in the matter of the distribution of these documents, it seems to me it would be much more sensible to give the State Board of Education the power to prepare these books and pamphlets and distribute them, upon request. Then they could be given to those who desire to have them, instead of giving them to everybody,—a large portion of whom would probably throw them in the waste basket.

I understand, however, that the State Board of Education now has power to do this, but up to this time has not been confronted with any great demand for the distribution of these documents.

This same bill came before me last year, and was vetoed by me, and the veto sustained by the Legislature. I therefore disapprove this bill.

Respectfully submitted,
(Signed) GEORGE S. SILZER,
Governor.

FREDERIC M. P. PEARSE,
Secretary to the Governor.

Mr. Chandless moved that the message be received and spread in full upon the Minutes and the bill lie over.

Which motion was adopted.

A message was received from the Governor, by the hands of his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 3d, 1925.

COMMITTEE SUBSTITUTE FOR ASSEMBLY BILL NO. 21.

To the House of Assembly:

This bill is evidently intended for the protection of particular individuals, rather than in the public interest.

It provides that no person shall be eligible to a superior position in certain paid fire departments unless such person shall have served for a period at least three years in the grade of permanent paid firemen.

It bars the authorities from appointing anyone from outside the department, or appointing one who has been in the department less than three years.

I have no doubt that public authorities will make their selections from within the department if it is possible to do so. If, however, the public authorities find it to be for the public interest to go outside of the department, they should not be debarred from doing so. After all, the public welfare is the primary purpose to be accomplished—not the advancement of an incompetent inferior.

I can see no reason for making this a close corporation and limiting the selection if the public authorities believe it to be in the public interest to go outside of this limited number. The undoubted purpose is that those who are in the service want a monopoly of the superior positions.

The bill is not altogether clear in its terms, as, for instance, the requirement that all promotions shall be made from the membership of the department. This is quite superfluous, as no one could be promoted if he were not already in the department. Neither can I see any reason for making the act so special as to apply only to paid fire departments that have been in existence at least three years.

For all of these reasons I disapprove the bill.

Respectfully submitted,
GEORGE S. SILZER,
Governor.

Frederick M. P. Pearse,
Secretary to the Governor.

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 2d, 1925.

ASSEMBLY, NO. 126.

To the House of Assembly

It is now the law of the State that public officers expending sums in excess of one thousand dollars are required to publicly advertise for bids therefor, and to award the contract to the lowest responsible bidder.

The purpose of this bill is to make an exception of county clerks so as to permit them to have the ballots and other election printing done without advertising for bids or awarding the contract to the lowest responsible bidder.

I do not believe that this is in the public interest. County clerks know approximately what will be required, and can readily secure bids on that basis in ample time to carry out the provisions of the Election Law. If any further legislation were needed to make it more convenient it would be much better to make such amendment to the law than to make an exception in the doing of this public work.

This bill, as passed, will permit county clerks to give all election printing to favored printers, at such prices as might be agreed upon It could be used for personal and political advantage, and be made exceedingly expensive to the taxpayer. The policy that there should be public bidding and advertising for all work in excess of one thousand dollars is too well settled to change at this time. If we do it in this case, others will ask for the same privilege, and in a short time we will be back to the old vicious system, when favoritism and corruption were the order of the day

I therefore disapprove the bill.

Respectfully submitted,
GEORGE S. SILZER,
Governor.

STATE OF NEW JERSEY,
SENATE CHAMBER,
March 3d, 1925.

Mr. Speaker:

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following bills:

Committee Substitute for Senate Bill No. 7, entitled "A supplement to an act entitled 'An act to provide for the selection, location, appropriation and management of certain lands along the Palisades of the Hudson river for an interstate park, and thereby to preserve the scenery of the Palisades,' approved March twenty-second, one thousand nine hundred,"

In which the concurrence of the House of Assembly is requested.

ROBERT M. JOHNSTON,
Secretary of the Senate.

The following messages were received from the Govehnor at the hands of his Secretary:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 2d, 1925.

COMMITTEE SUBSTITUTE FOR SENATE NO. 7.

To the Senate:

This bill attempts to give to municipalities lying adjacent to the Palisades Interstate Park the right to cross, occupy and use park lands for the purpose of constructing, operating and maintaining pipe lines and outlets for public sewage to empty into the Hudson river.

Under this bill the Palisades Interstate Park Commission is given no right to any such location, nor to impose terms. All the concessions to the Commission are that it is to be given notice of a hearing before the State Board of Health on the question of the location of said pipe lines.

The Palisades Interstate Park Commission is made up of representatives from the State of New Jersey and the State of New York. It is the title in fee to the lands which it controls. I do not believe that in these circumstances, especially with another State involved, the Legislature has the right to enter upon these lands without the consent of the Commission. If the Legislature can give the right to lay a pipe line across these lands, it could, if it so decided, strip the Commission of the title to the entire park. It is obvious that after an agreement with the other State, and the appointment of joint commissioners from the two States, no such thing can be done.

Since this park is also maintained by bequests and contributions made to a maintenance fund, the Legislature has no power to impair the obligations created thereby.

Even in the absence of the objections just stated I can see no reason for trespassing upon this property without first securing the consent of the Commission which the State of New Jersey has set up to take care of it.

Furthermore, the location of the pipe line or sewer outlet is left to the State Department of Health. That department, being interested only in the sanitary side of the matter, would only consider that feature, and since there are many other things to be taken into consideration, certainly those in charge of the park for the public welfare should be consulted and their consent required.

In addition to this, there is provision that the land crossed by the sewer "shall be replaced in a condition satisfactory to the Commissioners of the Palisades Interstate Park, and maintained in a condition satisfactory to the Commissioners."

I see no provision, however, for enforcing the rights of the Commissioners of the Interstate Park. If the sewers were replaced in an unsatisfactory condition, or maintained in the same way, there would be no way of enforcing the remedy.

It would seem to be quite as easy to bring all of these instrumentalities, so interested in the welfare of the State, together, to accomplish what may be necessary, without attempting to deprive the Commissioners of the Interstate Park of all control over their own land when municipalities lying adjacent desire to use them for sewage purposes.

For the reasons stated, I disapprove this bill.

Respectfully submitted,

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
February 16th, 1925.

SENATE No. 29.

To the Senate:

This bill has for its purpose the giving to savings banks the right to conduct the business of renting safe deposit boxes for the deposit and safekeeping of securities, valuables, evidences of ownership, and other personal property.

Our savings institutions make a very strong appeal to a class of our citizens who could probably not be reached in any other way to make deposits of their savings. One reason for this is that they are known to be institutions for savings, and nothing else.

Whenever these institutions embark on other enterprises, they will lose their character as savings banks, and with it lose their appeal to that great class who now have confidence in them as institutions of savings.

For this reason I am led to believe that it would be bad policy on the part of the State to encourage these institutions to change their character.

They are distinctly savings institutions, and are mutual organizations not designed for profit on the part of anyone There seems to be a growing tendency on the part of these institutions to break away from their traditions because of the competition which is offered by other banking institutions. There may be real peril in the effort to meet this competition, especially in its effect on the confidence of those who are now its depositors.

The tendency to change it is evidenced by Chapter 6, of the Laws of 1924, wherein savings banks are authorized to loan money on collateral security

This bill would permit them to go into the safe deposit business, and Senate Bill No 144, now pending before the Legislature, would permit savings banks to open branches All of this seems to me to be evidence of a tendency that should be discouraged, in the interest of the savings banks themselves.

There are other objections to Senate Bill No. 29. At the present time the surplus is pledged as a security to those who deposit their money in savings banks. This money is set aside to protect them when they need protection. If a savings bank goes into the safe deposit business, it assumes additional obligations If it does not exercise that care which it should, and the safe deposit boxes are robbed, the bank assumes the responsibility of reimbursing those who have lost their money thereby, and such reimbursement can come only from the surplus fund now set aside for the protection of the depositors.

In such a case, if a depositor left fifty thousand dollars worth of securities in a safe deposit box, and it was lost through negligence of the bank, that fifty thousand dollars would have to be paid, and would decrease the protection of the depositors to that extent. That surplus is at this very moment pledged to every person who has a deposit in the bank, and we have no right to take it away from them to insure those who may hereafter deposit and secure safe deposit boxes.

No bank can tell, at any time, how much responsibility it is assuming in safe deposits, because it does not know what amount is being kept in them.

Practically every financial institution in the State has invested in safe deposit facilities, upon the belief that there would be free and fair competition.

If the privilege is granted to savings banks there can be no such competition.

Savings banks do not operate for profit; they put their earnings into surplus, and when that surplus is adequate they are not called upon to earn more. In that case, they can well afford to underbid all competitors, especially competitors who pay National, State, county and local taxes.

Since there is not equality of opportunity and fair competition, this privilege should not be granted.

I have interviewed officers of savings banks, and found many of them who agree with the views stated herein.

For the reasons stated, I am compelled to return this bill without my approval.

Respectfully submitted,
(Signed) GEO. S. SILZER,
Governor.

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 2d, 1925.

SENATE NO. 68.

To the Senate.

I regret that I am forced to veto this measure, but I cannot see the withering hand of politics laid upon this worthy enterprise without recording my protest.

In my annual message I strongly advocated the development of the Port of Camden and of the Delaware river from Camden to Cape May, because I believe this section has a great future.

The Chamber of Commerce of Camden had a bill drawn to carry out that purpose. Realizing that the success of the movement depended upon the personnel of the Commission, and its freedom from politics, they provided that the Commissioners be appointed by the Governor, subject to confirmation by the Senate.

When the bill was introduced in the Senate, however, all this was changed, and it provided for appointment of the Commissioners by the Legislature. This was the result of a political caucus.

Thus this worthy cause was at the very start thrown into the field of partisan politics, with all its blighting influence.

It is most unfortunate that politics has fastened itself upon this great enterprise, even before it is born, and so threatens to destroy it at the very start. The history of this legislation compels this conclusion to be drawn.

The appropriation of $25,000 made in this bill, and all subsequent appropriations, must come from the taxpayers of the entire State, most of them remote from and not benefited by this port development. They are not going to be very enthusiastic about it, nor anxious to go down into their pockets to help it, when they realize that instead of being a great public enterprise it is a mere adjunct to a political party and machine. The people of North Jersey and other remote parts are going to resent the making of appropriations under such conditions, and rightly so.

Why start with such a handicap? Nothing could kill an enterprise more quickly.

I return this bill without my approval, but with the hope that it may be corrected so that the development of the Delaware river and of the Port of Camden may get off to a favorable start and be sure of success. Let us have a nonpartisan commission, composed of the four best qualified men in South Jersey.

Respectfully submitted,

GEORGE S. SILZER,

66 WATSON AVENUE
WEST ORANGE, NEW JERSEY, March 4th, 1925.

Hon. Clifford R. Powell, Speaker of the Assembly, State House, Trenton, New Jersey:

DEAR MR. POWELL—I enclose herewith copy of a resolution passed by the Orange-West Orange and East Orange Kiwanis Clubs, at their meeting yesterday, with regard to the passage of legislation pending for relief of congested conditions amongst feeble-minded children in the State. It is earnestly hoped that the

bill will be put through at this session, in order that the pressing problem now existing will be to some extent lightened.

Faithfully yours,

(Signed) A. EDMUND WILLIAMSON,
Chairman Special Committee.

At a joint meeting of the Kiwanis Clubs of East Orange and Orange-West Orange, held on Tuesday, March 3, 1925, the following resolutions were unanimously and enthusiastically adopted:

"WHEREAS, The needs of under-privileged children constitutes a large part of the service Kiwanis seeks to render to its community, and

"WHEREAS, In Essex county at this time an annual average of four thousand cases of youthful delinquency pass through the Juvenile Court, of which number from four hundred to six hundred are mentally defective in a distinct degree; and

"WHEREAS, The institutions now existing in the State for the proper care and treatment of these mentally deficient children are entirely inadequate to meet these conditions, and the authorities are compelled to make disposition of such cases in other institutions, not properly equipped for mental defectives, or already crowded with cases they were properly designed for, and

"WHEREAS, There is now pending before the State Legislature a measure known as Pascoe Assembly Bill Number 274, in which provision is made for increasing the facilities for handling cases of feeble-mindedness, and making more adequate arrangements for treatment along the lines of prevention and analysis of underlying causes

"*Therefore, be it resolved* by the Kiwanis Club of Orange-West Orange and East Orange, in regular meeting assembled, That the legislation now pending, known as Pascoe Assembly Bill No 274, should receive the emphatic endorsement and active support of these clubs, and that we respectfully request our several legislative representatives to support the said bill with their influence and votes, in order that as speedy relief as possible may be afforded to the conditions now existing respecting the appropriate care of feeble-minded, especially the children who are the specific objects of the Kiwanis program of helpfulness,

"*And be it further resolved,* That we shall extend hearty support to such further legislation as shall later be introduced looking toward the completion of the program of the State for the adequate provision of facilities to meet the needs of mentally defective children of the State of New Jersey"

A. EDMUND WILLIAMSON,
Chairman, Special Committee of Orange-West Orange Club on State Legislation for Children

Mr Chandless moved that the communication be received and spread in full upon the Minutes, and said resolution be referred to the Judiciary Committee.

Which motion was adopted

A message was received from the Governor by the hands of his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
To the Legislature: March 10th, 1925.

There now exists in New Jersey, by legislative sanction, a monopoly in the matter of fire insurance rates, which increases the cost to every man who insures his real estate or his household furniture This burden should be lifted at once.

We should not permit monopoly in any business, particularly so when it puts a burden upon those who cannot and should not pay this extra tribute.

In 1907, a number of insurance companies in Newark entered into an agreement, under the name of the "Newark Fire Insurance Exchange," to fix rates within that territory. The Attorney-General of the State made an attack upon this combination of companies, and the Court of Errors and Appeals decided that the business of fire insurance was one affected with a public interest; that the contract was in restraint of trade; and that the necessary effect, and actual result was to control business within a certain area, and to fix and regulate prices, and to limit and eliminate competition to the injury of the public, that all of this was contrary to public policy As a result, an injunction was issued restraining further action

Thereupon the insurance companies became active and succeeded in passing chapter 85 of the Laws of 1913, wherein and whereby they brought about throughout the entire State what the court had enjoined them from doing in Newark.

By the enactment of this statute, they nullified the decision of our highest court and legalized monopoly and the fixing of rates.

Since that time, the rates have been fixed by one employee selected by all the insurance companies, and the people of the State have had to pay this extra tribute. A combination has no other purpose than to enrich those who are in it When competition is stifled, it always follows that the consumer is mulcted.

So long as this law remains upon our statute-books, every householder and every owner of property is paying more for fire insurance than he should. Increase in real estate values requires increase in the amount of insurance, and, hence, payment of larger premiums. Fireproof construction and efficient fire departments have reduced the risk of loss from fire. All of this should work to the advantage of the property owner, but, because of our statute, only the fire insurance companies benefit thereby.

That inordinate profits have been made is seen from the large dividends of some of the insurance companies, and also in their declaration of stock dividends of two hundred, three hundred and four hundred per cent. It is also seen in the largely increased value of insurance company stock as quoted on the market.

I am calling this to your attention at this time, because, on February 3, 1925, there was introduced, Assembly Bill No. 218, referred to the Committee on Banking and Insurance, and not yet reported from that committee. There is yet time for action, and I am calling it to your attention now, so that the law creating this monopoly may be speedily repealed.

I can see no excuse whatever for continuing this vicious law upon the statute-books. I can see no reason for endorsing by legislative action that which is a monopoly and which destroys and crushes competition. Above all, I can see no reason to tax every person who has a fire insurance policy an extra sum, in order that it may add that much more profit to those who are insuring us.

I can see no reason for longer betraying the people, or for subjecting them to the excessive demands of a legalized monopoly.

Respectfully submitted,

GEORGE S. SILZER,

Governor.

Attest:

FREDERIC M. P. PEARSE,

Secretary to the Governor.

Mr. Chandless moved that the Governor's message be received and referred to the Judiciary Committee.

Consent being granted,

The following bill was introduced, was read for the first time by the title, ordered printed, and referred to committee as follows:

Assembly Bill No. 489, a bond validating bill,

Referred to the Committee on Judiciary.

A message was received from the Governor, by the hands of his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 11th, 1925.

To the Legislature:

We have reached a new era in the generation and transmission of electric light and power. With the development of higher power it is evident that transmission lines are no longer restricted to, but cross State lines. Power from the State of Pennsylvania is already coming into New Jersey, and power from the State of New York is coming into the State of New Jersey, and across the State to Staten Island. Power developed in the State of New Jersey is being carried to Long Island City, and similar projects are contemplated. A proposal is now being made in Pennsylvania for the transmission of power as high as 220,000 volts, power to be generated at the coal mines and delivered in Pennsylvania, New Jersey and New York. Two such plants are in operation in the State of California—one transmitting such power for a distance of 270 miles to the city of Los Angeles. In the development of this industry, there seems to be a feeling that, instead of bringing the coal from the mines to generating stations in New Jersey and there generating power, electric power will be developed directly at the mines and at places where there is large water power. This will entirely change the present method of manufacturing electrical energy, and with that change must come changes in the method of regulation.

Advantage is being taken of new methods for producing electrical energy Water power is being highly developed for the generation of electricity. Niagara stands at the head, with numerous water powers of smaller capacity. In addition to this, power is to be developed at or near the coal mines of Pennsylvania.

New Jersey is not so fortunate as its neighbors in the possession of coal mines or water power from which electricity can be generated. It must, therefore, take advantage of these out-State developments and permit electrical power to be brought into the State, in order that the cost may be reduced to consumers in the home and in industry. These foreign companies are looking eagerly to the securing of business in the large manufacturing and populous centers of our State.

If we can take advantage of all of this, it will add much to the comfort of our citizens, and should reduce the cost to users of electrical current.

This, however, will not be the result unless we are forehanded and anticipate what is about to happen. If these large companies develop their plants and enter our State, and if, as the natural consequence thereof, combinations and agreements are made between the various companies from within and without the State, we shall soon find ourselves unable to regulate either the rates or the service. We shall be promptly told that since this current moves from State to State, it is the subject of interstate commerce, and only to be regulated by the Federal Government. Local companies and those from without the State will not long remain in competition. If they did, there would soon be a reduction of rates for electric current. After a short period of competition, they will combine so as to prevent competition—then will come again an increase in rates

The modern trend is for these companies to get together, either by agreement or by combination and consolidation—then they will insist that the only way to regulate them is by appeal to the Federal Government By that time, we shall have lost our hold and control over them and it will be too late to act.

It is quite apparent, therefore, that the States must come together for their mutual protection; that they must shake off Federal control and regulation, and assume that control and regulation themselves

Since the three States primarily interested are the States of New York and Pennsylvania (where most of the power will be generated), and the State of New Jersey (over which the lines must go to provide a proper transmission), it becomes important that these three States enter into a treaty or compact; that treaty or compact to provide for the regulation of service and rates for companies operating between these States. In this way, the three States can regulate, without interference from the Federal Government, and we can prevent these companies from combining or entering into agreements which will place upon us another new burden, and which will give them an excessive and unfair profit.

The Federal Constitution provides for such compacts, and, when entered into, the Federal Government does not assume to interfere and will not attempt to regulate.

The Governor of Pennsylvania has had a thorough and comprehensive study made of this problem, and has, in a clear and forceful message, laid before the people of his State recommendations similar to those which I am making.

I would, therefore, recommend that the Governor, by and with the advice of the Senate, be authorized to appoint a bi-partisan commission of four citizens, to meet with similar commissions from the States of New York and Pennsylvania, to draft a treaty or compact, to be thereafter submitted to the Legislatures of these States, to carry out the recommendations herein made, which treaty or compact shall have for its purpose the regulation of the service and rates of those companies which may transmit electric light or power from one of the three mentioned States to or across one or both of the other States.

If this authority is granted, it will be my purpose to select men not interested, directly or indirectly, in electric light and power companies, either within or without the State, but men solely concerned with the welfare and well-being of the State.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

Attest:

FREDERIC M P PEARSE,
Secretary to the Governor.

Mr. Chandless moved that the Governor's message be received and referred to the Judiciary Committee.

Which motion was adopted.

Mr. Hanson moved to take from the table the motion to reconsider the vote by which Assembly Bill No. 261 was lost.

Which motion was adopted.

Mr. Hanson, moved to reconsider the vote by which Assembly Bill No. 261 was lost.

Which motion, the ayes and nays being called, was carried by the following vote:

In the affirmative were—

Messrs Abell, Anderson, Applegate, Beardsley, Black, Bostock, Campbell, Chandless, Clift, Freda, Hanson, Harrison, Hicks, Hurd, Iszard, Kipsey, Knight, Loutrel, Mills, Minisi, Muir, Parvin, Pascoe, Pine, Powell (Speaker), Read, Robinson, Roll, Siracusa, West, White—32.

Assembly Bill No. 261, entitled "An act to authorize street railway and traction companies and companies operating as street railways to acquire, own and operate for hire motor vehicles and auto busses,"

Was taken up on third reading.

Mr. Hanson asked unanimous consent to amend said bill on third reading.

Which was agreed to.

Mr. Hanson offered the following proposed amendments to Assembly Bill No. 261, which were read and adopted:

Amend section one by striking out the words "motor vehicles and auto busses and carrying passengers therein for hire" in lines 3 and 4 and insert in lieu thereof the words "auto busses commonly called jitneys".

Strike out the words "motor vehicle or auto bus" in lines 5 and 7, and insert in lieu thereof the words auto bus".

Strike out the words "whenever other owners or operators thereof are so required by law" in lines 7 and 8

Strike out the words "motor vehicles and auto busses" in line 10 and insert in lieu thereof the words "auto busses, commonly called jitneys".

Add after line 11 the following:

"Every street railway, traction railway or other company operating as a street railway which may operate auto busses, commonly called jitneys, shall keep books, records and accounts of the operation of such auto busses, so that the receipts and expenses of such operation may be distinguished from the receipts and expenses of street railway operation. No fare for transportation on any auto bus shall be increased because of any deficit from street railway operation, nor shall any street railway fare be increased because of any deficit from the operation of any auto bus or busses

"Every such company shall be required to pay the same franchise taxes upon gross receipts from the operation of auto busses, commonly called jitneys, as other owners and operators of auto busses, commonly called jitneys, and shall also be required to pay the same franchise and other taxes upon gross receipts from the operation of its street railway as other street railway or traction companies or other companies operating as street railways; and the gross receipts from the operation of auto busses, commonly called jitneys, shall not be included in fixing the franchise

or other taxes payable by such company because of its operation of its street railway; and the gross receipts from the operation of its street railway shall not be included in fixing franchise or other taxes payable by said company because of its operation of auto busses, commonly called jitneys."

Assembly Bill No. 261, entitled "An act to authorize street railway and traction companies and companies operating as street railways to acquire, own and operate for hire motor vehicles and auto busses,"

Was taken up on third reading.

Mr. Minisi asked unanimous consent to amend said bill on third reading.

Which was agreed to.

Mr. Minisi offered the following proposed amendments to Assembly Bill No. 234, which were read and adopted:

Section 1, line 9, by inserting between the figure "($500,000)", and the word "may" the following: "may carry its own liability insurance providing it can reasonably satisfy the Commissioner of Banking and Insurance as to the permanence and financial standing of its business. Any owner desiring to be exempt from obtaining or filing such insurance policy, as aforesaid, shall make application to the Commissioner of Banking and Insurance, showing its financial ability to pay such damages, whereupon the Commissioner of Banking and Insurance, if reasonably satisfied of the applicant's financial ability, shall by written order make such exemption. The Commissioner of Banking and Insurance may from time to time require further statements of the financial ability of such company; and if at any time, in the opinion of the Commissioner of Banking and Insurance, such company appears no longer able to pay damages, the commissioner shall revoke his order granting exemption, in which case the said company shall immediately insure its liability as required by law, and such owner".

Amend section 1, line 13, by inserting between the figure "($500,000)" and the word "which" the following: "and that the Commissioner of Banking and Insurance has made such exemption,".

Amend section 1, line 16, by striking out the period after the figure "($500,000)" and adding the following: "And the order of the Commissioner of Banking and Insurance shall remain in force"

Assembly Bill No. 234, entitled "An act concerning auto busses, commonly called jitneys,"

twenty-one, as amended by an act approved March nineteenth, one thousand nine hundred and twenty-three, and as further amended by an act approved March twelfth, one thousand nine hundred and twenty-four,"

With the following committee amendments, which were read and adopted:

Immediately preceding the first section of said bill insert the following three sections to be known as section 1, 2 and 3, respectively:

1. Section one of the act to which this is an amendment is hereby amended to read as follows:

(1) The terms used in this act shall be construed as follows, unless other meaning is clearly apparent from the language or context, or unless such construction is inconsistent with the manifest intention of the Legislature.

(1) The term "Motor Vehicle" includes all vehicles propelled otherwise than by muscular power, excepting such vehicles as run only upon rails or tracks.

(2) The term "Motor Cycle" shall include all motor operated vehicles of the bicycle or tricycle type, whether the motive power be a part thereof or attached thereto, and having pedals and saddle with driver sitting astride, or a platform on which said driver stands.

(3) The term "Automobile" includes all motor vehicles except motor cycles.

(4) The term "Omnibus" as used in this act shall include all motor vehicles used for the transportation of passengers for hire, except such vehicles as are used to transport children to and from school outside of a city, provided such motor vehicle is not otherwise used in the transportation of passengers for hire.

(5) The term "Commercial Motor Vehicles" as used in this act shall include every type of motor driven vehicle used for commercial purposes on the highways, such as the transportation of foods, wares, or merchandise, excepting such vehicles as are run only upon rails or tracks and vehicles of the passenger car type used for touring purposes or the carrying of merchandise, farm products and milk, as the case may be.

(6) The term "Motor Drawn Vehicles" as used in this act shall include trailers, semitrailers, or any other type of vehicle drawn by a motor driven vehicle.

(7) The term "Tractor" as used in this act is a motor-driven vehicle designed for drawing other vehicles but having no provision for carrying loads independently.

(8) The term "Trailer" as used in this act is a vehicle of more than two wheels, designed to carry a load wholly on its own structure and for being drawn by a motor-driven vehicle, except those running exclusively on tracks.

(9) The term "Semitrailer" as used in this act is a two-wheeled vehicle without motor power, drawn by a motor-driven vehicle, and so designed and used in connection with a self-propelled vehicle that a considerable part of its own weight rests upon the towing vehicle

(10) The term "Manufacturer" as used in this act is an individual, partnership or corporation engaged in the business of manufacturing or assembling motor vehicles, who will, under normal business conditions during the year, manufacture or assemble at least ten new motor vehicles.

(11) The term "Dealer" as used in this act, shall include every person, firm or corporation actively engaged in the business of buying, selling or exchanging motor vehicles or motor cycles and who has an established place of business.

(12) The word "Magistrate" shall be deemed and understood to mean and include all justices of the peace, judges of the city criminal courts, police justices, recorders, mayors and other officers having the power of a committing magistrate.

2. Section 2 of the act to which this is an amendment is hereby amended to read as follows:

(2) Automobile fire engines and such self-propelling vehicles as are used neither for the conveyancing of persons for hire, pleasure or business, nor for the transportation of freight, such as steam road rollers, and traction engines, are excepted from the provisions of this act. No fee shall be charged for the registration of motor vehicles owned by the United States, the State of New Jersey, or by any city, borough, incorporated town, township, or county, duly authorized fire department, hospital, humane society, any anticruelty society in the State, or by the American Red Cross, providing such vehicles are not used for pleasure or hire, but all such vehicles shall be registered and shall display number plates as is provided for in this act.

3. Section nine of the act to which this is an amendment is hereby amended to read as follows:

9. (1) Every resident of this State, and every nonresident whose automobile or motor cycle shall be driven in this State except as is hereinafter provided, shall before using such vehicle on the public highways, register the same, and no motor vehicle or motor cycle shall be driven unless so registered. Every registration shall expire and the certificate thereof become void on the thirty-first day of December of each year; and the Commissioner

of Motor Vehicles shall issue licenses for the following year on and after November fifteenth of each year, such licenses so issued not to be used until the twenty-sixth day of December of the year preceding the year for which such license is issued.

(2) Such registration shall be made in the following manner: A statement in writing shall be made to the Commissioner of Motor Vehicles, or his lawful agent, containing the name and address of such owner, together with a description of the character of such motor vehicle or motor cycle, including the name of the maker and the manufacturer's number and the motor number. Such statement shall be submitted on forms prepared by the Commissioner of Motor Vehicles and shall be sworn to by the applicant before any one authorized to take acknowledgments. Thereupon, the said commissioner shall have power to grant a registration certificate to the owner of any motor vehicle, application for registration having properly been made and the fee therefor paid, and the vehicle being of a type that complies with the requirements of this act. But it shall be lawful for the Commissioner of Motor Vehicles to refuse registrations to any vehicle that in his estimation is not a proper vehicle to be used upon public roads and highways of this State.

(3) The holder of any registration certificate issued by the Commissioner of Motor Vehicles, when requested to do so by any motor vehicle inspector, police officer or magistrate, may thereby determine the correctness of the said certificate as the same relates to the registration number plates of the automobile or the motor cycle for which the said certificate was issued.

(4) Each owner having a residence outside of the State shall file with the Secretary of State a duly executed instrument, constituting the Secretary of State and his successors in office the true and lawful attorney upon whom all original process in any action or legal proceeding caused by the operation of his registered motor vehicle or motor cycle, within this State, against such owner may be served, and therein shall agree that any original process against such owner shall be of the same force and effect as if served on such owner within this State; the service of such process shall be made by leaving a copy of the same in the office of the Secretary of State, with a service fee of two dollars to be taxed on the plaintiff's costs of suit. Said Commissioner of Motor Vehicles shall forthwith notify such owner of such service by letter directed to him at the postoffice address stated in his application.

Section 1, line 1, of the original bill to be changed to section 4, and each of the several subsections on pages 2, 3, 4, 6 and 7 of the original bill to be so indicated as subsections of section num-

ber 11 of the act which is being amended by enclosing the numbers in parenthesis as follows: (2), (3), (4), (5), (6), (7), (8), (9), (10).

Strike out lines 25 to 31 inclusive on page 3 and insert in lieu thereof the following:

Dealers plates shall be issued to bona fide dealers only, and said plates shall be used only on motor vehicles owned by such dealers; nor shall any dealer lend dealer's plates to any person or persons whatsoever for display upon any motor vehicle not exclusively owned by said dealer, nor shall said plates be used by his employees for any other purpose than demonstrating said vehicle to a prospective purchaser or testing or removing same from storage place, shipping point, or place of delivery before or after sale.

Page 7, line 8, strike out the words (Amend. P. L. 1924, p. 451).

Add new section as follows:

5. All acts and parts of acts inconsistent with the provisions of this act be and the same are hereby repealed, and this act shall take effect November fifteenth, one thousand nine hundred and twenty-five.

Further amend House Bill No. 452 by inserting after line forty-three the following:

"Provided, that the registration fee for the registration of motor vehicles, other than commercial motor vehicles, which are propelled by steam or electricity, shall be seventy-five cents per horse power, and that the minimum fee for such registrations shall be ten dollars.

Electrically operated commercial motor vehicles and tractors shall be divided into eight classes.

The fee for each such commercial motor vehicle in Class A, the gross maximum weight of which, including chassis, battery, body, and load, does not exceed five thousand (5,000) pounds, shall be fifteen ($15) dollars.

The fee for each such commercial motor vehicle in Class B, the gross maximum weight of which, including chassis, battery, body and load, does not exceed seven thousand (7,000) pounds, shall be forty ($40) dollars.

body and load, does not exceed fifteen thousand (15,000) pounds, shall be eighty ($80) dollars.

The fee for each such commercial motor vehicle in Class E, the gross maximum weight of which, including chassis, battery, body and load, does not exceed eighteen thousand (18,000) pounds, shall be one hundred dollars.

The fee for each such commercial motor vehicle in Class F, the gross maximum weight of which, including chassis, battery, body and load, does not exceed twenty-two thousand (22,000) pounds, shall be one hundred and twenty-five ($125) dollars.

The fee for each such commercial motor vehicle in Class G, the gross maximum weight of which, including chassis, battery, body and load, does not exceed twenty-five thousand (25,000) pounds, shall be one hundred and fifty ($150) dollars.

The fee for each such commercial motor vehicle in Class H, the gross maximum weight of which, including chassis, battery, body and load, does not exceed thirty thousand (30,000) pounds, shall be one hundred and seventy-five ($175) dollars.

Mr. Hurd, Chairman of the Committee on Highways, reported

Assembly Bill No. 453, entitled "An act to impose a tax on the sale of motor vehicle fuels as herein defined to be paid by distributors as herein defined; regulating the sale of such fuels; providing for the collection of said tax, for reports of sales of such motor fuels, and for the disposition of the revenue derived from such tax; and fixing penalties for the violation of the terms thereof,"

With the following committee amendments, which were read and adopted:

Paragraph one (1), line seven, after the comma following the word "hospitals", insert the following: "motor cycles of State and municipal police. Auto busses, commonly called jitneys, which now pay a franchise tax on their gross receipts."

Page two, section three, strike out lines one to nine, inclusive, and insert in lieu thereof the following:

"3. Every such distributor shall keep a record of all of such fuels sold or used which shall include the name of the purchaser, the number of gallons sold or used and the date of the sale or use. Every such distributor shall also deliver with every consignment of such fuel to a purchaser within this State a written statement containing the date and the number of gallons delivered and the names of the purchaser and seller Said records and said written statements shall be preserved by said distributor and said purchaser respectively for the period of one year and shall be

offered for inspection upon the verbal or written demand of the Commissioner of Motor Vehicles or any Motor Vehicle Inspector."

Page two, section four, strike out lines one to eight, inclusive, and insert in lieu thereof the following:

"4. Every distributor shall, on or before the last business day of each month, render a report to the Commissioner of Motor Vehicles stating the number of gallons of such fuel sold or used in the State by him during the preceding calendar month on forms to be furnished by said Commissioner of Motor Vehicles. On or before the first day of the calendar month succeeding the filing of said report, each distributor shall pay to the Commissioner of Motor Vehicles a tax of two cents per gallon upon each gallon so reported, which shall be in addition to any motor vehicle license fee now or hereafter assessed in this State."

Page two, section five, line three, after the comma following the word "boats", insert the following: "or for any of the vehicles enumerated in section one (1) of this act,"

Page three, section six, strike out lines one to four, inclusive, and insert in lieu thereof the following:

"6. Neither this act nor any provision hereof shall apply to fuels when exported or sold for exportation from the State of New Jersey to any other State or country."

Page three, section nine, strike out lines one and two and add new section number nine as follows:

"9. For the purpose of enforcing the provisions of this act, the Commissioner of Motor Vehicles, on any motor vehicle inspector, or other person designated by the Commissioner of Motor Vehicles, may enter upon the property and review and inspect the records of any distributor, purchaser and|or seller, of fuels coming under the provisions of this act."

And add new section number 10.

"10. All acts and parts of acts inconsistent with the provisions of this act be and the same are hereby repealed, and this act shall take effect January first, one thousand nine hundred and twenty-six"

Senate Bill No. 184, entitled "An act regulating the use of commercial vehicles on the streets, roads and highways of this State,"

In which the concurrence of the House of Assembly is requested.

ROBERT M. JOHNSTON,
Secretary of the Senate.

The Senate message was taken up, and,

Senate Bill No. 184, entitled "An act regulating the use of commercial vehicles on the streets, roads and highways of this State,"

Was read for the first time by its title, ordered to have a second reading, and referred to the Committee on Bill Revision.

A message was received from the Senate, by the hands of its Secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
Mr. Speaker: March 12th, 1925.

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following joint resolution:

Senate Joint Resolution No. 11, entitled "Joint resolution creating a commission to formulate a comprehensive policy for the State of New Jersey in relation to the potable waters of the State, whether arising within or without its boundaries, and making an appropriation therefor,"

In which the concurrence of the House of Assembly is requested.

ROBERT M. JOHNSTON,
Secretary of the Senate.

A message was received from the Senate, by the hands of its Secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
March 12th, 1925.

Mr. Speaker:

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following concurrent resolution:

Senate Concurrent Resolution No. 7, entitled "Amendments proposed to the Constitution,"

In which the concurrence of the House of Assembly is requested.

ROBERT M. JOHNSTON,
Secretary of the Senate.

The Senate message was taken up, and

Senate Concurrent Resolution No. 7, entitled "Amendments proposed to the Constitution," was referred to the Committee on Judiciary.

Mr. Anderson, Chairman of the Committee on Banking and Insurance, reported

Assembly Bill No. 218, entitled "An act to repeal an act entitled 'A further supplement to an act entitled "An act to provide for the regulation and incorporation of insurance companies and to regulate the transaction of insurance business in this State," approved April third, one thousand nine hundred and two,' approved March eighteenth, one thousand nine hundred and thirteen,"

In accordance with attached report as the majority report:

The Committee on Banking and Insurance reports Assembly Bill No. 218 adversely, for the following reasons:

Assembly Bill No. 218 is for the purpose of abolishing the schedule rating experts created by Chapter 85 of the Laws of 1913, which is antidiscriminatory legislation and prevents the various fire insurance companies from unfairly charging different rates for properties of a similar character. This law enables licensed fire insurance companies to either singly or jointly employ an expert for the purpose of determining their rates.

It is not true that all companies appoint the same one expert but many companies still appoint their own expert to make their rates so that competition has not, as yet, ever been stifled.

The practical explanation of his Excellency the Governor's attitude with repect to the present form of the law appears to be found in the failure of the schedule rating experts to reduce Jersey City fire insurance rates, after the Jersey City City Commission had, some years ago, spent thousands of dollars of the taxpayers' money for fire equipment which was not of value because of the inadequate city water supply

Since the improvement of the Jersey City water supply no formal application has been made for new rates to which, upon investigation, it may be found they will be entitled. Because of the above facts and the evident intention to make this law a political football, the committte reports the repealer adversely.

Mr Renner, member of the Committee on Banking and Insurance, reported

Assembly Bill No. 218, entitled "An act to repeal an act entitled 'A further supplement to an act entitled "An act to provide for the regulation and incorporation of insurance companies and to regulate the transaction of insurance business in this State," approved April third, one thousand nine hundred and two,' approved March eighteenth, one thousand nine hundred and thirteen,"

Favorably, without amendment.

As a minority report.

Mr. Barison moved to adopt the minority report which was lost by the following roll call:

In the affirmative were—

Messrs. Barison, Botti, Carling, Carty, Donovan, Finn, Renner, Sharkey, Vaughan—9.

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 12th, 1925.

To the Legislature:

As many legal questions have arisen with reference to the proposed construction of bridges by the Port Authority, con-

necting New York with New Jersey, I called upon the Attorney-General for an opinion, particularly with reference to Senate 54 of this session, which is now a law

I am enclosing a copy of this opinion, because of its comprehensive nature, covering, as it does, many of the phases which have already arisen and which undoubtedly will arise in the future.

His views on the legal questions involved may be of benefit to you in your future deliberations, and should be a matter of public record.

Respectfully submitted,
GEORGE S. SILZER,
Governor.

(SEAL)
Attest:
FREDERIC M. P. PEARSE,
Secretary to the Governor.

EDWARD L. KATZENBACH,
Attorney-General.
Trenton, New Jersey,
March 5th, 1925.

YOUR EXCELLENCY—The questions in your letter of February 26th, concerning the so-called "Finance Bill" (Senate No. 54), are of grave importance both from an economic and a legal point of view Such being the case, they demanded and have received exhaustive and prolonged consideration.

Presumably your Excellency does not desire comment from me upon the economic situation involved further than it is inevitably bound up in the legal situation created. For that reason this opinion is confined briefly to the legal questions involved.

The matters suggested in your letter ask my opinion concerning the following things:

(a) Whether appropriations made as they are in the bill to be paid in five yearly installments, comply with the constitutional requirements.

(b) Whether the one Legislature can bind the subsequent ones.

The answers are in the order of the questions.

The act refers to a method of financing bridge construction work to be done by "The Authority of the Port of New York." The Port Authority is a municipal corporate instrumentality of the States of New York and New Jersey, created by treaty between said States, acting by virtue of the authority given to them through proper legislative enactments to make such treaty, with the approval of the Congress of the United States. Proper

preliminary steps for the creation of this instrumentality have been carried out pursuant to the Constitution of the United States, in accordance with Article 1, Section X, Par. 3, which provides that "no State shall, without the consent of Congress, * * * enter into any agreement or compact with another State, * * * . Such steps having been so taken under this section of the Constitution, and with the consent of Congress, the Port Authority is a super-government, created by the treaty of the States. It is an instrumentality of each State, and yet more, being an instrumentality of both States. Having once entered into this treaty, its terms control, in my opinion, unless modification thereof is had by each of the States, with the consent of Congress

It is, in my judgment, such a municipal corporate entity as to be able to issue its independent bonds for work contemplated by it, without such bonds being binding upon the State. The bill under consideration provides for the construction work to be done by the Port Authority, and for the issuance by the Port Authority of such bonds. So far I believe that it is entirely lawful and without obligation upon the State.

As an instrumentality of the State the Port Authority is legally a proper body to receive appropriations made by the Legislature for its legitimate purposes.

The Constitution of the State of New Jersey provides, in Article VI, Section VI, Par. 2, that "no money shall be drawn from the treasury but for appropriations made by law," and in the same Article and Section, Par. 3, that "the credit of the State shall not be directly or indirectly loaned in any case," and again, in Par. 4, that "the Legislature shall not, in any manner, create any debt or debts, liability or liabilities, of the State which shall, singly or in the aggregate with any previous debts or liabilities, at any time exceed one hundred thousand dollars, * * * unless the same shall be authorized by a law for some single object or work, to be distinctly specified therein; which law shall provide the ways and means, exclusive of loans, to pay the interest of such debt or liability as it falls due, and also to pay and discharge the principal of such debt or liability within thirty-five years from the time of the contracting thereof, and shall be irrepealable until such debt or liability, and the interest thereon, are fully paid and discharged;" with further provisions that such law should not take effect until submitted to the people and sanctioned as provided in same section.

The real question involved is whether the provisions of the present bill are a subtle attempt to avoid the foregoing requirements of the Constitution, and actually create a debt or liability

of the State in excess of the amount authorized, without submission of the matter to a vote of the people, or whether it is an actual appropriation in due form of law and by the authority of the Constitution, to an instrumentality of the State which in itself is a super-government created by treaty.

The bill provides that two million dollars is appropriated. It provides also that the said two million dollars shall be payable in five annual installments of four hundred thousand dollars each; but the whole appropriation and all of the payments are contingent upon the passage of a similar act by the Legislature of the State of New York.

While I am of the view that a definite appropriation can be made by the present Legislature to the objects of an instrumentality of the State, I also feel that there must be a certainty that what purports to be an appropriation in the present act is, in fact, such. In form at least it is a present appropriation, payable in installments. There is no requirement that the money must actually be in hand, as appropriations are frequently lawfully made from funds in future to be received. If an appropriation is made, then there is no debt or liability of the State created, or the loaning of the credit of the State within the constitutional prohibition.

To proceed to the answer of your second inquiry.

It is fundamental in the common law that "acts of parliament derogatory from the power of subsequent parliaments bind not." Cooley's Blackstone, 4th Ed, Vol. 1, p. *90-91. Such is still the law as applying to a single sovereignty. It follows as a matter of logic that if one Legislature were in itself able to bind a subsequent Legislature the whole ultimate power of the government might be exercised by one Legislature in derogation of the rights of the people and the powers of its successors. I therefore feel that by legislative enactment, in the absence of interstate treaty, it would be impossible for one Legislature lawfully to pass an act which a succeeding Legislature might not repeal The answer to this question has been given and such would be the ordinary case, but the matter involved in the bill under consideration goes further because an interstate treaty is involved.

The power of appropriation lies with the Legislature Whether the appropriation is economically desirable or not is a legislative question and not a legal one In the present instance, if we consider that the appropriation is one complete act presently made, we then pass to the question as to whether, under existing circumstances, a subsequent Legislature could undo that which the present Legislature seeks in this bill to do. The present instance

involves more than the ordinary action of a Legislature of one sovereignty. This appropriation would be made in pursuance and in aid of an interstate treaty, and is contingent upon similar agreements entered into by another State, which when made will together form part of an interstate contract. This involves, therefore, a very much more complicated question than that suggested by your Excellency's letter. I venture to discuss this broader question

Relying upon the authority of the Supreme Court of the United States in Green et al, v Biddle, 8 Wheat, p 1, and of the Supreme Court of California, in McCauley v. Brooks, 16 Cal, p. 11, as leading cases, I am of the opinion that if under the solemn agreement made between the States, an appropriation of two million dollars were actually made, it would be binding upon the State to carry out the provisions of the contract thus made, and it would be beyond the power of a succeeding Legislature to repeal such appropriation. If such action should take place, the repealer would be void, as being an impairment of contract forbidden by both the Federal and State Constitutions.

In the Green case cited above, the court, quoting from an opinion in a former case, which it adopted, said that "the Constitution of the United States embraces all contracts executed and executory, whether between individuals or between the State and individuals, and that a State has no more power to impair an obligation into which she herself has entered than she can the contracts of individuals."

The California case hereinabove cited is interesting, and substantiates the same reasoning.

It would seem unnecessary in support of this contention to refer your Excellency to additional cases, as they would cast no greater light upon the subject at issue than those to which reference has been made. I may say, however, that there is certainly no authority to the contrary.

To quote from the California case at page 50:

"A contract once made cannot be impaired, much less destroyed by subsequent legislation, without violation of both Federal and State Constitutions. Nothing is clearer or better settled than this. If the Legislature could destroy a contract entered into by the State by the repeal of the law which authorized it, no contract could ever be made binding upon the State. The performance of the stipulations of any contract on her part, and the obligations to such performance, would depend purely upon the will of the Legislature. Such a proposition cannot be maintained. To assert it is to assert, in effect, that a principal who

authorizes his agent to enter into a contract can set aside such contract, after it has been duly made, by revoking his power of attorney."

Assuming that the appropriation has been made, the contract could not be repealed by a subsequent Legislature, according to the reported decisions, of which leading examples have been given to your Excellency herein.

In conclusion, therefore, may I say that a present appropriation made by a Legislature to the aid of a State instrumentality is possible and lawful. May I say further that if such present appropriation is made in pursuance of the purposes of the interstate agreement made under the Constitution, and in itself thus becomes a part of the contract between two States, it is beyond the power of a subsequent Legislature to repeal it.

Trusting that I have furnished your Excellency with adequate and complete answers to the questions submitted, I am

Very respectfully yours,
(Signed) EDWARD L. KATZENBACH,
Attorney-General.

A message was received from the Governor by the hands of his secretary, as follows:

ASSEMBLY NO. 138.

To the Assembly:

This bill provides that the State Highway Commission shall reimburse the counties of the State for any interest charges that may have been paid by them in connection with the reconstruction of State Highway routes under what was known as the "Reimbursement Act" (chapter 183 of the Laws of 1912).

There are strong reasons why this bill should not become a law. My information is that the former State Highway Commission, when entering into contracts with the counties for the construction of highways under the Reimbursement Act, expressly stated that the counties would be reimbursed for the cost of construction exclusive of engineering and interest charges Since the agreement between the Highway Commission and the counties was that interest charges were not to be included, there is no reason why the State, through its Highway Commission, should now be charged with this interest. This would be the effect of the approval of this bill.

A further objection is that, if this bill becomes a law, it will entail the expenditure of a considerable sum from the State road fund, and would result in a serious interruption to the program of construction as budgeted by the commission I believe that the people of the State are very much more interested in the use of this money to build highways, rather than to paying it in interest to the counties and so divert it from road purposes

I desire also to call your attention to the fact that chapter 132 and chapter 133 of the Laws of 1923 repealed the Reimbursement Act and prohibited further agreements in connection with reimbursement projects.

While the bill does not state what sum would be involved, I am inclined to believe it would be upward of a million dollars, and I am unwilling to divert this money from road purposes, especially when there is no equitable, legal or moral grounds for the payment of this interest in the face of contracts that interest should not be included in reimbursement charges

For the reasons stated, I disapprove this bill.

Respectfully submitted,

GEORGE S. SILZER,

Governor.

Attest:

FREDERIC M P. PEARSE,

Secretary to the Governor.

Mr. Chandless moved that the Governor's message be received, spread in full upon the Minutes, and the bill lie over.

A message was received from the Governor by the hands of his secretary, as follows:

ASSEMBLY JOINT RESOLUTION NO. 4.

To the House of Assembly:

This resolution, as it was originally introduced, provided that a committee should "investigate the conditions of living and working among women in New Jersey." As finally passed, it is to investigate only the working conditions, and has left out any reference to investigating the living conditions.

The clear purpose of this omission is to eliminate from the investigation the living conditions of working women in New Jersey.

The joint resolution, as introduced, used the exact phraseology of a plank in the last Republican State Platform. As passed, it leaves out half of what was to be accomplished. No investigation on this subject can amount to anything which investigates alone the working conditions and neglects to ascertain the living conditions.

The committee is required to make a report. That report is not to include either living or working conditions On the contrary, the report required is "as to the necessary cost of living and wages adequate to maintain women." The committee is called upon to report upon something which they are not required to investigate, namely; they are called upon to report upon the cost of living and the adequacy of wages, while the only power which they have is to investigate the working conditions.

Protests have been received by me from all of the leading organizations of women, objecting to the resolution, and requesting its veto, it being the belief of these women that this resolution is a mere gesture and a waste of money, and does not accomplish what the women of the State requested should be done. If for no other reason than this, I would veto the bill.

In addition to this, this useless resolution carries a provision for the expenditure of five thousand dollars, which no doubt will be used to pay counsel, clerks and sergeants-at-arms, and will be money wasted, as the women of the State predict.

Furthermore, it is quite probable that in the absence of an indication in this bill that the investigation is to include the swearing of witnesses, it will be impossible to force any employer to give any information which he does not desire to give, and so the real sources of information will be closed to the committee.

For these reasons, the bill is disapproved.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

Attest:

FREDERIC M. P. PEARSE,
Secretary to the Governor.

Mr. Chandless moved that the Governor's message be received, spread in full upon the Minutes and the bill lie over.

Mr. Pascoe read the following and moved it be spread in full upon the Minutes.

Which motion was adopted.

MR SPEAKER—The work of this session of the present Legislature is about to close. As a member of the majority, may I have this opportunity to outline a few of the constructive accomplishments in fulfillment of the party program.

The commission to investigate the Building and Loan section of the Department of Banking and Insurance, for the better protection of the vast army of people who use this method of savings.

The Building and Loan Revision Act, embodying a number of constructive changes for the conduct of our Building and Loan associations in this State.

The extensive interstate bridge program.

The appointment of a Water Fact-Finding Commission.

The constitutional amendment for strengthening zoning.

The institutional one-half mill tax.

The Delaware Port Commission.

The commission to study and survey the cost of State Government, an economy measure.

Commission to study the salary of State employees.

These, Mr. Speaker, are only a few of the outstanding accomplishments of this Legislature on which the Republican majority will go forth in the next campaign seeking a renewed vote of confidence and feel safe that it will be received.

While the Republican record is one of achievement in the interest of the people, what is the picture presented by our friends of the Democratic minority?

Bereft of real State leadership, the Democrats in the Legislature have been driven to and fro by conflicting advisers until their record has excited merriment when it has not provoked sympathy. When an investigation of the State Banking and Insurance Department was first proposed, following the scandalous disclosures in connection with building and loan affairs in one of our municipalities, both the Democratic Governor and his Democratic followers in the Legislature offered captious criticism, and tried to block such an investigation. Happily their advice was ignored and a fearless probing committee is about to make a much needed investigation.

When a meritorious bill to place Hackensack's faithful assessors under a tenure was proposed here, the Democratic minority objected, presumably as the mouthpiece of the discredited Democratic administration in that city.

Even more astounding has been the attitude of Mayor Hague and his candidate for Governor, A. Harry Moore, and those supposed to represent them. While in Jersey City, octopus spearing is the favorite occupation and the lambasting of the Public Service is among the daily dozen of Commissioner Moore and his political mentor, Mayor Hague. How different is the attitude of the same Democratic machine here in Trenton.

We find Mr. Moore proclaiming loudly against Public Service domination in Jersey City, while in Trenton his Camden campaign manager, Horace Brewer, is seen personally gathering votes

for what the Hudson organization now asserts is a Public Service bill

In Jersey City the Public Service is set up as the man of straw against which the shafts and darts of the brave Mayor and Democratic leader are hurled While here in Trenton his obedient representatives meekly cast their votes for a bill proclaimed in Hudson as an inquitous measure in the interest of the trolley company. It was only when the newspapers called attention to the amazing duplicity and threw the spotlight of pitiless publicity on this deplorable story of double-dealing and Dr. Jekyl and Mr. Hyde performances, that Mr Hague and his frightened candidate for Governor, execute a right-about-face and try to undo the record made here in the Legislature. Bills against which the Democratic Hudson minority in the House frothed and raged and declaimed, are allowed to pass in the Senate without a word of protest by the Hudson Democratic representative The people of the State have a right to know what all this means. How long do the Democratic managers expect to fool a long suffering and innocent public?

Mr. Speaker, the outlook for the election of a Republican Governor in the State of New Jersey, after the result of our constructive legislative session and the present lack of harmony and wide open rift that seems to exist among the Democrats, is even rosier than it has ever been before. All that is necessary is for every Republican member of this House to return to their constituency and continue their untiring efforts to promote the interests of the Republican Party and to secure the election of a Republican Governor in order that the affairs of the State may be in safe hands

Mrs. Mets has been a valued employee of this House for many years' standing. We, therefore, at this time earnestly wish her a speedy recovery, and hope that we may have her presence before the close of the 1925 session.

A message was received from the Governor by the hands of his Secretary, as follows:

SENATE BILLS NOS. 38, 186, 262 AND ASSEMBLY BILLS NOS. 107, 464.

I have before me a number of bills adding to the routes of the Highway System, and some giving the State Highway Commission the right to lay out certain routes when they believe

it to be practical If the Legislature would give the State Highway Commission the power to designate such routes as they think advisable, the State Highway System could be developed by the adding of such routes as would best serve the people of the State, and, at the same time, keep down the expense.

Instead of doing this, I have had presented to me Senate No. 92, Senate No. 38, Assembly No 107, Assembly 464, Senate No 262 and Senate No. 186

Each one of these bills attempts to add a particular route to the State Highway System. These particular routes are designated because their sponsors are able to get the votes for them These routes have not been designated because of any State-wide policy for the betterment of the roads or the saving of cost. They do not fit into any plan of the State Highway Commission

So long as designation of routes depends upon the ability to get a particular bill through the Legislature just so long will it be necessary to reject them

If the Legislature passed a bill, declaring all roads of the State eligible for inclusion in the State Highway System, these special bills would not be necessary Then such roads could be improved as would do the greatest good for the greatest number

I cannot understand why the Legislature is unwilling to have the body which is constituted for this purpose, and which has the confidence of the entire people of the State, undertake this work.

There are no funds available at this time for the numerous highways mentioned in the bills before me, and since no funds are available, the designation of these routes will have no practical value now, nor for some time to come When the funds are available, and the State Highway Commission believes that they should, in the interest of convenience and economy, be built, the State Highway Commission may designate them for such purpose

I have signed some bills adding to the Highway System, but only those which the State Highway Commission has requested that I should sign, in order that they may fit them into their plans

For the reasons stated, these bills are disapproved

Respectfully submitted,

GEORGE S SILZER,
Governor.

Which motion was adopted

A message was received from the Governor, by the hands of his Secretary, as follows

ASSEMBLY NO. 51.

Under the present law, there is set aside annually, on the first of July, from the Motor Vehicle Fund, the sum of $525,000 for aid from the State Highway Commission for the improvement of township roads, and the sum of $25,000 reserved to meet the State's share in each county until the first of January

This bill sets aside instead $840,000 for the township roads on the first of July, and $40,000 for the State's share on the first of January

This is an increase of almost fifty per centum over what has heretofore been done

Everybody appreciates the importance of aiding in the betterment of township roads, notwithstanding the fact that they are usually in sparsely settled districts, and that they do not carry the heavy burden of State roads We must remember, however, that the State Highway Commission has worked out a very definite financial program, taking into account all existing sources of revenue This taking away of about $400,000 from the State roads and turning it over to township roads would seriously embarrass the program for the building and maintenance of State roads, and a necessary consequence would be that some of them would have to be neglected

The State road program is based upon the theory that the State (respresenting the people from all parts thereof and taxpayers from every section) is willing to take over certain roads in which all of the people of the State are interested, directly or indirectly, and improve them for the general welfare. In furtherance of this, the State has been willing to lend some aid to township roads in sparsely settled districts in relief of those districts But the theory has never been, however, that the State program is to be interfered with or that State moneys are to be used in undue proportion for the improvement of these comparatively little used roads

The bill, is therefore, disapproved

Respectfully submitted,

GEORGE S. SILZER,

Governor.

A message was received from the Governor, by the hands of his Secretary, as follows.

ASSEMBLY NO. 93.

This bill provides for the compensation of public officers who hold office *de facto*

This bill seems to be unnecessary, because there are abundant court decisions holding that a *de facto* officer who has performed the duties of the office is entitled to compensation.

Furthermore, the bill provides that such *de facto* officer shall be entitled to the emoluments of office, and to sue for the same, "notwithstanding any refusal or failure of any other person or officer"

The bill does not disclose any particular refusal or failure, and, in fact, the language is very obscure.

The bill is therefore disapproved.

ASSEMBLY NO. 95.

This bill gives the Board of Commerce and Navigation power to contract for the dredging and construction of a channel from the present inland waterway near Main Marsh Point in Great bay, and up Oyster creek—a distance of one-half mile, and appropriates the sum of $15,000, which $15,000 appears in the appropriation bill.

My information is that this waterway is very little used; that there is little demand for this channel and that it would only accommodate about twenty people in that neighborhood.

I do not believe that the Senate should go to this expense in these circumstances.

It must also be noted that there is no provision for contribution on the part of the county or locality, although this is purely a local affair. There seems to be no reason why the State should do this work. If the local communities desire it to be done, and they think it important enough, they should undertake it. There must be some limit to the demands upon the State treasury. For this reason the bill is disapproved

Respectfully submitted,
GEORGE S. SILZER,
Governor.

ASSEMBLY NO. 129.

Under the General Corporation Act, when a corporation is organized, a certificate of incorporation is recorded in the county clerk's office, and then filed with the Secretary of State.

This bill provides that in case the certificate of incorporation is amended or changed, this certificate, too, should be recorded in the county clerk's office, where the original certificate of incorporation is recorded.

I can see no reason for this; in fact, the present law would be better if it did not require the recording of certificates of incorporation in the county clerk's office, because this is merely an unnecessary duplication of records. Every lawyer and every person interested in corporations knows that if he wants any real information about corporations, he must obtain that information from the Secretary of State. At the present time, if he inquires there, he will find not only the certificates of incorporation, but all changes in and amendments thereto. To require that the certificates shall also be filed in the county clerk's office makes a duplication of work and cost, and adds nothing of value.

The bill is therefore disapproved.

Respectfully submitted,

ASSEMBLY NO 266.

I have had no request from any source to sign this bill. There have, however, been objections to it

It seems to apply to the county of Camden, where I understand there is a voluntary commission acting and gathering information which it would be the duty of the commission, under this bill, to do. This would put an expenditure of ten thousand dollars upon the county of Camden, which is now being served by the voluntary commission.

In view of that fact, the bill seems to be unnecessary, and it is therefore disapproved.

ASSEMBLY NO 471.

This bill provides, in Section 5, not only that engines and vehicles of fire departments shall have the exclusive right of way; but it also provides that it is the duty of all persons engaged in traveling in a vehicle on the highway, and of pedestrians, to remove themselves from the path of the fire department apparatus, upon first knowledge or warning of the approach

It is a well-settled principle of law that disobedience of a statute is evidence of negligence, and if a pedestrian or a driver of a vehicle were injured, the presumption would immediately be that he had violated the statute, and the burden would be upon him to prove that he did not.

While fire engines should have the right of way, in view of the congestion of traffic on our public streets these days, they

should not be relieved from the exercise of care. They should have no right, through their negligence and careless driving, to injure anyone.

It is a well known fact, that, without this law, the right of way is given to fire and police equipment in all municipalities, because the people recognize that they must act and move quickly.

For these reasons the bill is disapproved.

Respectfully submitted,

GEORGE S. SILZER,

Governor.

Mr. Chandless moved that the Governor's message be received and spread in full upon the Minutes, and that the bill lie over.

Which motion was adopted.

A message was received from the Governor, by the hands of his Secretary, as follows:

ASSEMBLY NO. 487.

This bill authorizes the formation of companies for the purpose of constructing, maintaining and operating bridges over the Delaware river, and regulating the same.

The State has adopted a policy of either building the bridges itself or having one of its instrumentalities to do so In the eastern part of the State, that authority has already been exercised by the State building its own vehicular tunnel, and of delegating to the Port Authority the building of bridges over the Kill-von-Kull and Arthur Kill, and the bridge over the Hudson river at Fort Lee.

It has found this not only necessary, but advisable, in order to conserve the interest of the State and the users of these bridges and tunnels. It has been obliged to eliminate competition from private companies, in order that the State itself might be able to finance the building of bridges and tunnels, and to sell the bonds therefor This has been found necessary, because private companies would come in competition with the State, and the building of bridges and tunnels by them would divide or reduce the income. By setting up such competition on the part of private companies it has been found that brokers and others who will be asked to float the bonds would hesitate to do so, because of the uncertainty of the revenue.

On the Delaware river, to which this bill applies, the States of New Jersey and Pennsylvania have already undertaken the building of a bridge over the river at Camden, and the bonds issued for the building of that bridge must be paid for by the tolls derived from the use thereof.

If we authorize private companies to build bridges over the Delaware river, the tolls which they would get from these bridges would reduce the income which would, in the natural course of events, be derived from using the present bridge at Camden, and so lengthen the time during which this must remain a toll bridge

This bill would authorize companies to build not only one bridge, but more, perhaps, each of which would have this same effect, namely, of keeping the Camden bridge a toll bridge for many more years than would naturally pass without such opposition.

In addition to this, the State is just undertaking to set up a Port Authority for the Delaware river. This would be the natural body to undertake the building of bridges over the Delaware river, as has been done in the eastern part of the State.

If this bill becomes a law it will interfere with the proper development of the Port of Camden and the Delaware river, through its Port Authority. It will handicap them at the start, and probably destroy, in large measure, their usefulness.

This bill is almost identical in form with the act known as chapter 176 of the Laws of 1923, creating this same embarrassment on the Hudson river. It was feared that the Fort Lee bridge could not be built—certainly not advantageously—with this law in existence. The result was that the Legislature has just repealed that statute.

If it was advisable and necessary to repeal that law—doing the very thing that this bill does—in order that the Fort Lee and other bridges might be built, the people along the Delaware river would be foolish, indeed, to have this bill enacted into law, and thus at once provide a stumbling block for future progress

The enactment into law of this bill would permit private individuals and private capital to organize under it, endeavor to secure similar rights in Pennsylvania, and then build the bridges—bridges which belong to the people of New Jersey.

If we approach Pennsylvania and the Federal Government for port development along the Delaware river, we will be at once confronted by this statute and those who organize under it.

Any company incorporated under this bill could designate where the terminal points of the proposed bridges are to be located; could build more than one bridge; and could pre-empt im-

portant locations and acquire a perpetual right to these locations. It could prevent the State from coming in and building bridges on these locations. Furthermore, there is no limitation to the time within which a bridge could be built and in operation after the location or locations have been pre-empted. The franchise granted would be practically perpetual, because the limitation of fifty years only starts from the time the bridges are completed.

The bill does not protect the interests of the people of the State because it contains no provision limiting any one company to a definite location, and no security to be deposited as evidence of good faith, except the provision for the deposit of $25,000 with the State Treasurer, to be repaid to the company when $25,000 has been expended on the construction of the bridge, or repaid to the directors of the company upon a dissolution of the corporation

The bill contains no provision for the limitation of time for the commencement of the work, or penalty for a forfeiture, and no limitation of time within which to complete any bridge, once commenced.

The bill contains a schedule of rates, but this function should be left to the Board of Public Utility Commissioners, at least until such time as this inter-state structure would be taken under the jurisdiction of a Federal or other tribunal

If any company under this bill is permitted to mortgage its franchises, this would undoubtedly lead to the same abuses which we now have to deal with in the case of other public utility corporations, where franchises have been mortgaged for excessive amounts in bonds issued This once having been done, it would be impossible to reduce such inflated values.

Past experience should be a sufficient warning against our permitting a repetition of these conditions.

While the bill provides that the State of New Jersey may take over the bridges upon the payment of the total cost thereof, of whatever nature, upon assumption of all obligations and liabilities for construction, with the approaches and appurtenances, plus fifteen per centum of such cost, no method is provided for ascertaining the real costs of the undertaking, either through the Board of Public Utility Commissioners or any other public body. With no such supervision it would be possible to load upon the State fictitious costs, promotion costs, watered obligations, and a tremendous and unwarranted profit If the State did not choose to pay these sums, it could not take over the bridges

As I have pointed out, this bill has all of the defects contained in chapter 176 of the Laws of 1923, which has now been re-

pealed, and the enactment of this bill into law would be an imposition upon the people of the State.

The bill is therefore disapproved.

GEORGE S SILZER,

Governor

Mr Chandless moved that the Governor's message be received and spread in full upon the Minutes, and that the bill lie over.

Which motion was adopted

A message was received from the Governor, by the hands of his Secretary, as follows:

ASSEMBLY NO 45.

This bill changes the present law, which has been in force for twenty-one years

During that time, it has been the settled policy of the State, as provided by statute, to require definite and specific things from those erecting buildings, especially in the matter of fireproofing and fire-escapes

This bill, in short, substitutes for this definite fixed policy a new policy The new policy provided for in this bill is that there shall be nothing definite, but that in all of these questions covered by the bill, discretion is left in the Board of Tenement House Supervision to waive, in whole or in part, any of these provisions which, for twenty-one years, we have felt necessary for the protection of life and property.

If the present law had not worked satisfactorily for all these years, it would have been changed before.

Under the present law, every architect and builder knows what requirements are standard, and he knows that he must live up to them If this becomes a law, the Tenement House Commission may waive any provision which it likes We will immediately have a condition of chaos in the matter of building. The commission will be flooded by requests of all kinds to relax its requirements. There will be political and other pressure brought to bear to relieve certain builders and certain architects of the present building requirements It will have to relieve some builders of complying with the law, and it will compel others to fully comply with it In a short time, instead of having order, we will have chaos in this department; we will have no building restrictions,

because they will not depend upon the law, but rather upon the whim of the commissioners As a result of all of this, the character of the buildings will deteriorate, and people who live in tenement houses will no longer have the protection, which it is intended shall be given them

With this relaxing, there will be greater danger from fire and a greater loss of life. There seems to be no particular reason to relax to this extent.

If the whole matter of tenement house supervision and the construction of buildings is to be left entirely to the discretion of the board, a bill of this length is not necessary All we would have to do would be to repeal the present law, which specifies the kind of material and the method of construction, and simply say: "Hereafter, any tenement house may be built of such material and in such a manner as the Board of Tenement House Supervision shall direct."

To illustrate some of the things that would happen under this bill, I am calling your atention to page 4, paragraph 43, dealing with fire-escapes. Under the present law and the present practice, fire-escapes are of a standard character. This section permits the board to change it to such material and to make it of such strength as the board may direct.

It would be quite easy under such a provision to relax our vigilance to weaken the law and to make tenement houses more dangerous

We find the same thing in the matter of enclosing stairs, in the thickness of walls, in the matter of stud partitions, and in partitions separating rooms If the board desire to, it could have these made of cardboard or canvas

I am not suggesting, or even intimating, that the Tenement House Board would not exercise its best judgment and do what is best for the State and the people who must live in these tenements. But, we may not always have a board of this high character, and the board, itself, should not be subjected to the pulling and hauling that will result if this bill becomes a law.

Judging from the number of letters and telegrams I have received from those who are interested in building, it is quite evident that there is a desire to have the law weakened One telegram advises me to sign the bill, because we will have better and cheaper tenements. Cheaper tenements mean tenements with less protection for those who must live in them.

For the reasons stated, this bill is disapproved

Respectfully submitted.

ASSEMBLY NO. 172.

The change in this act is that it makes it unlawful for any person, etc, to temporarily or otherwise engage in the business of real estate broker or salesman, and further provides that "any single act, transaction or sale shall constitute engaging in business within the meaning of this act."

It has never been held in New Jersey that a single act constitutes engaging in a business.

This bill attempts to construe such single act as the doing of business. This is contrary, not only to the law, but to common sense, and would prevent a man sending his friend or a trusted business associate to buy a piece of property. It would require, in such a case, that the man should disclose his business and desires to some real estate agent or broker. It might well be that he would not care to do such a thing Certainly he should not be forced to.

If it is good policy to regulate the business, there certainly is no necessity of regulating a single transaction

This bill further eliminates all of section 18 of the present act, and substitutes in place thereof a provision for a penalty. For the first offense it provides a penalty of not less than fifty dollars nor more than one hundred dollars, second, a penalty of not less than one hundred dollars nor more than two hundred dollars. It provides that the action for the penalty shall be brought in the name of the commission. Where a penalty is sued for it must be a definite sum Under this bill it is not definite, and, therefore, the provision is unenforceable.

I, therefore, disapprove this bill.

This bill has for its purpose the giving of additional powers to the Interstate Bridge and Tunnel Commission.

I am opposed to giving this, or a similar body, any additional powers so long as the members thereof are appointed by the Legislature and are practically not responsible to or under the control of the Executive or State authority

Another objection to this bill is that there is no money available for the purposes of the bill. The moneys now in the hands of the Bridge and Tunnel Commission are moneys derived from bond issues, which are pledged to the purposes for which the bonds were issued.

This bill also disregards the fact that the development of the Delaware river is to be studied by a Port Commission, authorized at this session of the Legislature, and that that commission should be consulted before it is determined that a bridge shall be built

I therefore disapprove this bill

This seems to be the same bill that came to me under the title of Assembly Bill No. 375 in the session of 1924, the purpose of which was to permit the city of Beverly to pay the county of Burlington for road work which was done under contract, but which payment was prevented by court order.

The bill does not seem to me to be any better this year than it was last year, and I am unwilling to be a party to legislation which will interfere with the order of the court.

Besides this, the bill is very general in its terms, and would permit cities in the class provided for by this bill to exceed their debt and bond limit

Section two of the bill seems to be particularly objectionable in that it ratifies, approves and confirms all contracts and agreements heretofore made by any such city with any person, corporation or partnership, or county, and validates all ordinances and resolutions No one can tell what illegal contract is being ratified by this provision

The bill evidently is not in the public interest.

Under the present law, the manufacturer of condensed milk must put his name upon the label. This was for the protection of the consumer, so that manufacturer might be punished in case he manufactured and sold an inferior or impure article.

This law permits such milk to be sold, if it has the name of either the manufacturer or distributor thereon. This would not give protection to the children who use this milk. The distributor could say that he assumed that the article was pure, and that he relied upon the manufacturer and could, probably, not be held responsible.

We should not relax in our efforts to prevent deception in the sale of condensed milk.

ASSEMBLY NO 408.

This is a bill to exempt from taxation all personal property stored in warehouses in New Jersey. It is said to be needed because in neighboring States personal property stored in warehouses is exempt, thus creating an advantage in favor of the warehouseman of other States.

The bill applies not only to bonded warehouses, but would exempt from taxation all personal property stored in any warehouse engaged in the business of storing goods for hire. The bill, therefore, would apply not only to the bonded warehouses of Jersey City, Newark and other large cities, but would apply to every building that is leased for storage purposes There would be a vast amount of personal property exempt from taxation under this act, other than the specific property designed to be exempted. The bill would permit the storage of food products, pending a rising market and free them from taxation. A man could put his valuable works of art in such a warehouse and thus escape taxation

There are already too many exemptions under the General Tax Laws The policy should be to restrict, rather than extend, exemptions I quote from the report of the 1919 Commission to Investigate the Tax Laws:

> "We would, therefore, recommend a drastic revision of the tax-exempting statues, with a view to restricting them to only such property as shall clearly meet the test of giving to the general public an equivalent for the immunity from taxation. In the matter of exemptions the aim of the State should be justice to all the people, rather than generosity to a few"

I believe, too, that this act is unconstitutional It was held in the case of Tippett v. McGrath, 70 N J. Law 110; affirmed 71 N J Law 338, that property could not be exempted from taxation by reason of the peculiar personal status or conduct of its owners, but that the exemption of property from taxation must be based upon the peculiar characteristics of the property itself. The exemption in the instant case would be allowed because of the location of certain personal property.

For the reasons stated, the bill is disapproved.

The following communication was sent to the desk and read by the Clerk.

THE MECHANICS NATIONAL BANK OF TRENTON
TRENTON, N J., March 19th, 1925.

Edward C Stokes, President

Hon. M. E Barison, House of Assembly, State House.

MY DEAR ASSEMBLYMAN—I understand that you made a statement on the floor of the Assembly or somewhere to the effect that I was directly or indirectly connected with the removal of an item of $500,000 for the Hudson County Normal School, from the Appropriation Bill I am sure you would not purposely misrepresent me I want to assure you that I knew nothing about such an appropriation of any amount for the Normal School Bill in Hudson county or any other Normal School until I read in the Legislative reports that the item had been shifted As I was not aware of the existence of the item I could not have been in any way connected with its removal, nor was I.

I should very much appreciate if in a proper way you would make known to the Assembly, the facts in this connection

Very truly yours,

E. C. STOKES.

Mr Barison moved that his statement be spread in full upon the Minutes.

Mr. Barison sent to the desk of the Clerk a written reply, which was read as follows:

Governor Stokes, in his letter, denies that he was the one responsible for eliminating from the Appropriation bill the appropriation of $500,000 for the education of children in the Normal School to be erected at Jersey City for the children of Hudson, Bergen, Monmouth and other counties, and if Governor Stokes said that he did not do so I am going to take his word for it, notwithstanding the fact that I have heard that the former Governor and present Chairman of the Republican State Committee had a conversation with the chairman of the Appropriations Committee at the Stacy-Trent a few days ago, and directed that this item be eliminated

Of course, if the former Governor says it is not so, as I said before, I will take his word. In the former Governor's letter he

says that he did not know of any such item, notwithstanding the fact that he is usually very much interested in schools, and that the State Board of Education several years ago recommended the building of this school, $100,000 has already been appropriated for it, and last year and this year the Governor included $800,000 for this school in the budget, and notwithstanding the fact that the Appropriation Bill, early in the session, presumptively carried an item of $500,000.

This Appropriation bill is a million dollars more than that recommended by the Governor and the Budget Commisson, which included the $800,000 for the education of the children. Not only is the State put to the expense of this extra million dollars, but the $800,000 has been used somewhere else It may be possible that there are more important things than the education of our children. It may be that the building of waterways, bridges and obscure roads and other things are important, but I have still to be convinced that they are more important than the proper education of the children of several counties of the State, all of whom contribute perhaps forty per centum of the taxes of the State.

I know that the people of Hudson, Bergen, Monmouth and the other counties whose children would attend this Normal school, are going to resent this diversion of this money from education to other purposes.

Former Governor Stokes, who has always been so much interested in schools and the education of children, can still prevail upon the majority party in the Legislature to do justice to the children of these various counties who are now being deprived of a normal school education.

The last thought that occurs to me is in the form of a question. If Governor Stokes was not the man who killed this appropriation, and deprived these children of their opportunity, what responsible person in the Republican party was?

Mr. Chandless moved that the statement of Mr Barison be referred to the Judiciary Committee.

Which motion was adopted

A message was received from the Governor by the hands of his Secretary, as follows:

ASSEMBLY NO 256.

This bill provides that whenever a bail piece is given creating a lien on lands, the lien shall be limited to the respective premises

mentioned in the recognizance. A recognizance does not contain a description of any premises, so the bill could not apply—recognizance is always general in character.

I do not think this bill should become a law. Before the court could be satisfied that adequate security for the appearance of the defendant had been given, it would be necessary to make an examination of the records for the purpose of ascertaining whether or not the surety on the recognizance was the owner of the particular piece of land designated in the recognizance. This, of course, would not be practicable, and would tend to hamper the due administration of justice There are sufficient methods existing at the present time to relieve those who are bound in a recognizance so that they may sell their property

If this bill became a law it would serve no good purpose, and would seriously hamper the clerks of the courts

The bill is disapproved.

A special message was received from the Governor, by the hands of his Secretary, as follows:

SENATE NO. 241.

In my annual message I recommended that the State Board of Tenement House Supervision be given power to supervise and control the erection and operation of motion picture houses

The bill now before me, Senate 241, is a weak attempt to follow out this suggestion.

First, it applies only to municipalities under ten thousand inhabitants. It has been called to my attention that there are motion picture houses, not only in municipalities under ten thousand, but also over ten thousand, in which there is no regulation whatever; in fact, it is a surprising fact that in many municipalities of the State these buildings are not regulated in any way.

There is positive danger in case of fire or other emergency to the people who frequent these moving picture places. Supervision of the buildings and the operation are absolutely necessary for the protection of the lives of the men, women and children who frequent these places of amusement.

This bill, Senate No. 241, not only limits it to municipalities under ten thousand, but delays the matter for at least a year.

I have called the attention of the Legislature to the conditions and the necessity for immediate regulation. The condition has existed for some time. If, during the coming year, due to legislative neglect, there is a serious loss of life in one of these houses, the responsibility must be upon those who failed to take the necessary action to protect the innocent people who enter into these places of amusement without the protecting arm of the State about them.

Section 3 of the act is meaningless, especially that part which says that "the permit may be revoked for any violation of the act," when what it, evidently, wanted to say is "violation of a code when adopted."

I can see no reason why this matter should be delayed.

I am signing the bill because there is, in section one, a provision for an inspection of all of these places of amusement, which will be of some benefit; and because, in section two, there is a provision for the preparation of a code.

These two sections will accomplish something, notwithstanding the apparent disposition to either delay or prevent regulation.

"The purpose of this bill is to put the registry books and laws of municipalities of more than fifteen thousand inhabitants in counties of the first class in the hands of the county clerks, instead of leaving them in the hands of the election board, from the primary in June to the third Tuesday before election in November.

It is for this reason that I signed the bill

This is a splendid illustration of the carelessness of legislation. ASSEMBLY COMMITTEE SUBSTITUTE FOR SENATE NO. 10.

This is an act prohibiting discrimination on account of sex in the employment of teachers in any school, college, university, or other educational institution in this State supported in whole or in part by public funds.

I am thoroughly in favor of having no discrimination based on sex, but this bill would fix the scale of wages and regulate the appointment, assignment, compensation, promotion, transfer, resignation, dismissal and all other matters pertaining to the employment of teachers, on a non-sex basis

I do not believe that we should, in all of these matters, lay down so rigid a rule Those who engage teachers in these institutions should have full discretion to do the best they can in the public in-

terest, exercising their judgment, as an employer in any other business or calling would do and does do

With this freedom of movement and discretion there ought not to be any discrimination on account of sex, and if there is, and public attention is called to it, the public body discriminating would soon find itself so embarrassed that the condition would be corrected.

Since I believe that full discretion should be given to those who engage those who teach, the bill is disapproved

The Legislature might well pass a bill declaring it to be the public policy of the State that in the employment of teachers in any such institution there shall be no discrimination based on sex If a bill embodying this principle should come to me for signature, I will sign it.

STATE OF NEW JERSEY,

SENATE NO. 92.

To the Senate:

This bill adds to the State Highway System a road from Far Hills to the New York State line, through Chester, Flanders, Netcong, Andover, Newton, Rosses Corner, Branchville and Hainesville—a distance of about forty-five miles.

The bill also provides that it shall be a part of the highway system, but not laid out until the Highway Commission may deem it advisable.

This road would cost several million dollars, and I am advised by the State Highway Commission that there are not funds for it. I do not believe there is any possibility of the building of the road for many years to come, but if this bill is signed it takes its place in the State Highway System, and will eventually have to be built.

My insistment has always been that routes should be designated by the State Highway Commission, and I had hoped that the Legislature would give that commission such power. I do not believe that routes should be added to the State Highway System by legislative enactment, but only after recommendation from the State Highway Commission, so that there may be continuity of routes and the greatest convenience to the State.

I have signed some bills designating highway routes, but only in order to carry out the plans of the Highway Commission, either already under way or soon to be carried out. If the Legislature does not grant the right to the Highway Commission to designate routes, then the route set out in Senate No. 92 may be designated later, and at a time when there is a probability of its being built. It would do the people of this section no good merely to designate this as a part of the Highway System unless there is also a probability that the road will be constructed.

The bill is therefore disapproved.

SENATE NO. 144.

This bill provides that any savings bank, with the approval of the Commissioner of Banking and Insurance, may maintain branch offices or agencies for the transaction of business under certain restrictions. The bill is objectionable for a number of reasons.

These savings banks are not required to pay an income tax or a local tax, and, if permitted to establish branches, unfair competition will be created between them and National banks and trust companies. Savings banks were created and authorized when there was a necessity for them and when no other similar facilities were proposed, but experience has shown that with other and different banking facilities, savings banks are no longer so much in demand. There are, at present, twenty-eight savings banks doing business in this State, and only one new charter has been granted in the past fifteen years. If there is no necessity for establishing new savings banks, there is, certainly, no necessity for extending the powers of those already in existence. These banks, under recent legislation, are already changing their original character. Over the Executive veto, they are now allowed to maintain safe deposit boxes, and, last year, power was granted to them to loan money on collateral. Now, they ask for power to establish branch banks and agencies.

They are mutual concerns not operating for profit, and, if they continue in existence, should continue only for the purpose for which they were originally intended with no further extension of power.

The State has always been opposed to the policy of branch banks. We have, however, been forced into the position of grant-

ing this power to trust companies, because of Federal legislation, but no such necessity exists so far as savings banks are concerned.

For these reasons, the bill is disapproved.

SENATE NO. 175.

To the Senate:

The law which this bill seeks to amend provides that "any member of such board of assessors may be removed by a majority vote of the improvement commission, after a hearing upon written charges."

This seems to be a provision which is fair, not only to the assessors, but necessary in the interest of good government.

Under this bill this helpful clause is entirely omitted, so that there would be no provision for removing an assessor, even after a hearing and upon written charges, no matter how necessary it might be to remove such assessor. In place thereof this bill substitutes a provision that after an assessor has served for two years or more he shall not be removed except upon hearing and charges. This, of course, leaves no provision in the bill for the removal of those who have served less than two years, and it only applies to those who have served over two years.

If, as this bill provides, it is proper to remove an assessor upon charges after he has served two years, and that is in the interest of good government, then it is equally true that the same power should exist for the removal of those who have been in the service less than two years.

Because this bill weakens government and the power of government authorities to remove incompetent or corrupt assessors, this bill is disapproved.

SENATE JOINT RESOLUTION NO. 6.

To the Senate:

Senate Joint Resolution No. 6 creates a commission consisting of the President of the Senate, the Speaker of the House, and four other members, "for the purpose of making a study of questions of public interest, to present violations of law, and the conduct of any State official, State department, board, commission or other agency of the State government."

It further provides for the employment of necessary legal and other assistants, and appropriates the sum of $10,000.

This commission seems to be wholly useless and unnecessary, and the expenditure of $10,000 a public waste. If there has been a condition known to the public calling for any investigation, there might have been some excuse for this commission. At the present time, however, not a single suggestion has been made of anything wrong anywhere in any department of the State, or elsewhere, justifying the organization of this commission.

Let us examine the expressed purpose for which this commission was organized. First, it is to make "a study of questions of public interest." Every legislator is elected by the people in the belief that he has already made a study of questions of public interest, and has qualified himself to deal with them. The taxpayers, I am sure, are not impressed with the idea that they are to spend $10,000 of the State's money for the purpose of educating a selected legislative group in questions of public interest.

The Constitution provides that "the Executive shall communicate, by message, to the Legislature, at the opening of each session, and at such other times as he may deem necessary, the condition of the State, and recommend such measures as he may deem expedient."

Under this provision, communications have been sent to the Legislature on the following subjects of public interest—each of great importance:

Reduction of taxation.

A self-sustaining Tenement House Commission, with power to supervise theatres and public places in all municipalities.

A survey of the public school system.

Payment of funds collected by State agencies into the State treasury.

Regulation of the distribution, quality and price of coal.

Protecting the depositors in private banks.

Providing for the care and cure of narcotic users convicted of crime.

Empowering the Governor to remove statutory officers for cause, and power of temporary appointment in cases of emergency caused by death, etc.

Repealing the useless bureau of elections in counties of the first class.

Repealing the Blackwell divorce law.

Adequate laws to prevent pollution of our waterways.

Amendment of statutes relating to crime, to aid in suppressing the crime wave.

Improving conditions at grade crossings, and the elimination of sign boards.

Definite action establishing a State policy for supplying the people with potable water.

Amendment to the laws relating to the zoning system, and a constitutional amendment, if necessary, granting the power.

Confirming the Tri-State treaty relating to the Delaware river.

Repealing the law which now permits fire insurance monopoly and unjust rates.

Appointing a commission to make a treaty with adjoining States, and regulating the distribution of electric power between the States.

Power in the Highway Commission to select routes for the highway system, and to regulate and protect, by additional powers, the highways.

Curing the defect in the No-Night-Work Bill for women in factories, by providing a penalty for violation of the law.

Upon none of these recommendations in the public interest has any action been taken If, instead of having the commission spend $10,000 in studying "these questions of public interest," the Legislature would act upon those already recommended, not only would the $10,000 be saved, but much would be accomplished for the people of the State.

The next thing which the commission is to do is to "present violations of law." That is now the province of twenty-one prosecutors, as well as of every police officer of the State, and

of every citizen who knows of any violations of the law. It has never been the function, so far as I know, of the legislative branch of the government to present violations of law. Under the Constitution, it is their duty to enact laws and submit them to the Executive for approval.

The third avowed purpose is to look into the conduct of State officials and State departments

If the real purpose is to see whether State departments can be made more efficient, or whether they are functioning properly, this cannot be done by a legislative commission In order to reorganize a State department it is necessary that a thorough examination be made of it—an examination that will take much time and close attention The Budget Commission has been established for this very purpose, and after having passed through its formative period, is gradually undertaking this work. Much has already been done in this direction, and with a sufficient appropriation more could be done during the coming year. The request for an appropriation large enough to cover this work for the coming year, to be done by the bi-partisan Budget Commission, was denied by the Legislature.

Another objection to this resolution is that it is so strongly partisan. I do not believe that the people of New Jersey are altogether pleased with the expenditure of $10,000 of the taxpayers' money for the gratification of partisan desires and political commissions. There does not seem to be, from any point of view, any justification for the creation or existence of the commission, except upon the ground that it may serve some political advantage.

The press has been informed that one of the purposes is to examine the Department of Institutions and Agencies. There is no indication in this resolution that such is the case. There is no evidence whatever before any one that that department is not conducted as it ought to be The Board of Control of that department is non-partisan and composed of members of the highest type, who are doing a fine work in the care of our dependants.

If there had been disclosed, in any department, a single act of wrong-doing, there might be some excuse for the creation of this commission, but such has not been the case.

For the reasons stated, this resolution is disapproved.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

On motion of Mr Chandless, the messages were received and the bills laid over.

Which motion was adopted

Mr Chandless, Chairman of the Committee on Judiciary, reports as follows concerning the statement offered by Assemblyman Morris E Barison for inclusion in the Minutes of today's session

The Committee on Judiciary finds that the written statement as submitted today is not a true and correct declaration of the remarks made by Mr Barison on the floor of the House

The minority leader has been playing politics all during the session But since his recent unpleasant experience in connection with jitney legislation when he did a complete right-about-face to save the Democratic Party record he has frantically tried to set his party right in the eyes of the voters

He made a rather rash statement relative to the elimination of the proposed appropriation for the additional normal school claiming that ex-Governor Stokes had directed its elimination from the annual appropriation bill. Today Mr Stokes flatly denies Mr Barison's statement.

To offset the effect of the denial Mr. Barison presents a statement which in language sounds very much like the Governor's veto message Do we understand that the minority leader bes des taking his orders from King Hague in Hudson now has to rely upon the Secretary to the Governor, Mr. Frederic M P Pearse, to write his statements of explanation?

By reference to the Governor's budget message we fail to find any mention of the amount necessary to meet the requirements of the Teachers' Pension Fund. Many years ago this State established a pension system for the teachers of our public schools This plan called for the appropriation of a given amount annually There is some question in the minds of the teachers as to whether the State has maintained their appropriation in sufficient amount to keep this pension fund sound

The Republican majority feeling their responsibility to the 20,000 teachers of the State decided that it was vastly more important at this time to keep our faith with these 20,000 teachers who have given years of service to the State and who are confidently expecting the State to keep their contract by maintaining their pension fund actuarily sound have appropriated more than $2,000,000 00 in the annual appropriation bill for this purpose.

If the minority leader and the candidate of their party, Mr. A. Harry Moore, of Hudson county, hope to fool the people by their false statements relative to the proposed normal school, how are they going to explain to the 20,000 teachers that they think the normal school more important than that our teachers should be protected by pension against old age when they will have become incapacitated from further active service.

Mr Pascoe moved that appropriate recognition be given to Lieutenant Leigh Wade of the U S Aviation Service, one of the heroes of around the world flight for appearing this evening at the session of the House and giving to the members a wonderful descriptive address of the world flight. Mr. Pascoe further moved that Lieutenant Wade's presence be noted upon the Minutes of the House in full,

Which motion was unanimously adopted.

Mr Vaughan offered the following resolution, which was read and adopted:

Resolved, That the privileges of the floor be extended to William A Nolan, Counselor-at-law, and former prosecutor of Sussex county.

Mr Chandless offered the following resolution, which was read and adopted:

Resolved, That when the House adjourn it adjourn to meet Friday next, at 11 A. M.

On motion of Mr Chandless the House adjourned

FRIDAY, March 20th, 1925.

House met at 11 o'clock A. M.

Prayer was offered by Rev John Goorley, Trinity Methodist Episcopal church, 117 Perry St, Trenton, N. J.

Upon the calling of the roll the following members appeared and answered to their names.

Absent—

Messrs. Altman, Anderson, Carling, Donovan, Gilfert, Hanson, Hughes, Lindsay, Minisi, Sharkey, Siracusa, Welsh—12.

On motion of Mr. Chandless, the further reading of the Minutes was dispensed with.

Mr. Beardsley offered the following resolution, which was read and adopted:

Resolved, That the privilege of the floor be extended to Mrs. D. R Crotsley, of Essex county

Mr. Parvin offered the following resolution, which was read and adopted:

Resolved, That the privilege of the floor be extended to Eno Campbell, of Essex county

Mr Chandless moved that the House be placed under call.

ASSEMBLY JOINT RESOLUTION NO. 15.

This resolution appointed a commission of two members of the Senate and two members of the House to make an investigation of the accommodations and facilities now being furnished for the use of the departments of the State in the city of Newark; of studying the question of changing and consolidating the quarters now being used by said departments, or the erection by the State of a building in which all departments may be housed

It carries with it an appropriation of one thousand dollars There is no necessity of spending one thousand dollars in order to find this out In fact, several months ago I requested Budget Commissioner Reddan, Dr. McBride, Commissioner of Labor, and Commissioner Lewis, of the Department of Institutions and Agencies, to look into this matter They have already made an investigation of this matter, and will soon be able to report All of this will be done without any expense to the State

The bill is therefore disapproved.

ASSEMBLY NO 190

This bill has for its purpose exempting from the bond limit the erection and equipment of a free public library building, providing it does not exceed the cost of $100,000.

I am opposed to interference with the bond limit We have put that limit upon our statute-books, in order that municipalities will keep within it, but constant efforts are made to break it down If we do not stop these constant efforts, there will be no bond limit left; municipalities will be free to go as far as they like and the value of municipal bonds will be impaired and the rate of interest advanced.

We should be jealous to keep within the bond limit. Any community that is so close to the limit that $100,000 will take them over had better adopt other means to secure this library

It is so often the case that municipalities recklessly expend their money and then, when they have reached the bond limit, ask to exceed it.

I do not know whether that is so in the case in which this

bill is meant to apply, but I am sure that we should not relax from our policy of having a bond limit and sticking to it.

The bill is, therefore, disapproved

ASSEMBLY NO 233.

This bill has for its purpose the changing of the name of Joseph Carracino to Joseph Carr.

There is abundant law now for changing a man's name without resorting to the expensive procedure of doing it by legislative act. There is no reason why this man should not apply in the usual way, and submit himself to the scrutiny of the court, and comply with the act provided for that purpose.

There is no reason to put the State to this expense or to put this law upon the statute books

The bill is, therefore, disapproved

ASSEMBLY NO. 235.

This bill provides that no person shall hold office or position as sergeant-at-arms, clerk, stenographer, or in any other capacity in a District Court located in any county of the first class unless he is a legal resident of the county.

The second section provides that if he abandons his legal residence, the office shall become vacant.

I am informed that this bill is the aftermath of the recent primary campaign, and seeks to punish a District Court employee, who favored one of the candidates over the other.

Legislation should not be enacted to vent spite upon anyone, and the legislative halls should not be used for any such purpose.

Beyond this, however, there is strong objection to the bill, in that it includes stenographers Experience has shown every judge that there are times when stenographers are needed, and, since they are scarce, it is often necessary to go beyond the county limits to secure a capable one. This bill would prevent such action upon the part of the judge of the District Court, and would, accordingly, lead to inconvenience.

The bill seems to be unnecessary from every standpoint. It will be observed that it applies only to counties of the first class, and, if it has any virtue, it should apply to all counties.

The fact that the title applies to all District Courts and the body of the act limits it to counties of the first class, would seem to make it unconstitutional.

The bill is disapproved.

Which motion was adopted.

A message was received from the Governor by the hands of his Secretary, as follows:

ASSEMBLY NO 453

Assembly No. 451, No. 452 and No 453 will be dealt with together, because they are all bills carrying out the one purpose

Assembly No. 453, in short, provides that "a tax of two cents per gallon" shall be paid upon all gasoline sold in this State and used by motor vehicles.

In section 8, it provides that the money received is "to be used by the State Highway Commission as a fund for the construction of public roads, regard being had by the State Highway Com-

mission for the advantageous distribution of the benefits of this act through the several counties of this State."

Assembly No. 451 provides that the moneys derived from this tax shall be forwarded by the Commissioner of Motor Vehicles to the Treasurer of the State, to be distributed as follows:

1. There shall be deducted expenses of the Motor Vehicle Department.

2. There shall be deducted the amount appropriated by the Legislature to defray the expenses of and maintain the free bridge across the Delaware river.

3. The balance of the moneys after those deductions shall be held by the State Treasurer and paid out on order of the State Highway Commission and distributed by them as follows:

(a) The administration expenses;

(b) The amount authorized by law to be paid to the townships and boroughs for the construction, grading, and drainage of unimproved township and borough roads,

(c) Fifty per centum of the balance to the several counties of this State based on the present method of allotment used by the Highway Commission, to be applied by said counties for the construction, maintenance and repair of county roads and bridges, the remainder of the balance to be used by the State Highway Commission for the construction, maintenance and repair of State highways and bridges.

Assembly No 452 rearranges the fees to be paid for licenses for motor vehicles.

I believe these three bills together are ill-considered legislation; in fact, I have had many protests, because no hearings were given on these bills while before the Legislature and because the bills were passed at the last moments of the session when they could not receive the consideration so necessary to such important legislation.

I shall disapprove all three bills If I did it for no other reason, I would do it because I am opposed to the saddling of any more taxes upon the people of New Jersey. This adds a new form of taxation to those which we now have, and there is no doubt whatever that every new tax adds a new burden Argue it as we may, the fact always remains that when a new tax is put upon the people, there are always ways found to spend the money that comes from that tax.

I have never heard of a new tax put upon any people that has the effect of reducing their burden. This tax will be no exception to that experience

The commission that reported on this question gave the following estimate from the proposed rates based on the 1924 figures:

Present revenue $9,277,000;
Proposed revenue 12,800,000;

an increase of $3,500,000. Certainly any tax measure which increases the revenue $3,500,000 is not going to reduce anybody's tax; in fact, it increases somebody's burden three and one-half million dollars.

Of the twelve million, $4,300,000 is from the gas tax, and there is a reduction of about one million in motor vehicle fees, so that while we reduce the motor vehicle fees a million, we raise three million and a half more through the gas tax This, surely, is not a reduction in taxation .

If the mere purpose of this bill is to equalize the rates as between pleasure vehicles and commercial vehicles and trucks, that can easily be done by changing the schedule of rates in our present law, so as to bring about such equalization If this is the sole reason, there is no sense of going through this complicated procedure of enacting a gasoline tax, and setting up the expensive machinery necessary for its collection and distribution.

This bill not only adds a burden of three million and a half, but does not give it all back to us, because a large part of it must be used up for administrative purposes and in evasions of the law.

Coming to the distribution of the tax, we are confronted with a very serious situation.

Until a few years ago, all roads were built by the respective counties and local communities, then came some small State aid; finally, the State policy was adopted of establishing a State Highway System, which would provide communication between the various counties and centers of population, so that there would be free access from one part of the State to another, for the transportation of goods and merchandise and for pleasure The principle underlying this was that the State would adopt a system that would co-ordinate all the requirements and produce the best results In doing this, the counties and localities were relieved of the necessity of raising the money to pay for this State system, and most of the money for them came from the motor vehicle funds pledged for that purpose

Thereafter, the State obligated itself to a bond issue of $40,000,000 for the further construction of this State Highway System.

These bills are in distinct violation of all that has gone before, and seeks to break down that which, by careful planning, has been built up.

The State Highway Commission has adopted a funding program covering a period of five years in order to meet the urgent necessities of construction, reconstruction, maintenance and repair of the present State Highway System. This funding program takes into consideration the use of certain motor vehicle fund moneys and includes the estimated net increase under the legislation heretofore enacted. The method of distribution of motor vehicle funds as provided by Assembly No. 451 will result in a decrease of funds available to the State Highway Commission of about $2,000,000 for the year 1926 and a larger decrease in subsequent years It will, therefore, be seen that the effect of this bill will be to seriously curtail the proposed funding program which has been considered by the State Highway Commission in order to provide for the completion of the present State Highway System at the earliest possible moment This bill will, of course, result in an increase of funds distributed to the counties, a further result of which may be the construction of many disconnected sections by various counties without any well thought out plan, or formation of a comprehensive system, while there are many good roads that the Legislature has already authorized which we are unable to take over because of the lack of funds

Included in the plans of the Highway Commission are the provisions for the necessary approaches to the vehicular tunnel and the Camden bridge, to take care of the enormous increase of traffic when those enterprises are open to the public With the diversion of the funds provided for in these bills, there may be serious results to both of these enterprises

There are any number of roads which should be included in the State Highway System, as evidenced by the number of bills which come to the Executive each year for approval, but none of these can now be built, because there are no funds now available for that purpose, and, if these bills become law, there never will be, unless the people again indulge in the further levy of another bond issue I doubt whether they will do that

If we are to abandon altogether the plans which have been so carefully worked out for the construction and completion of a State Highway System, then we ought to pass these bills. Then we would find that our fine plans for the careful and comprehensive development of a Highway system would all be destroyed, and that we would substitute therefor a disjointed, ill-conceived plan of distributing moneys among the counties, to be spent upon obscure, unimportant and in many cases, little used roads, the

money to be spent by boards of freeholders. I think everyone will admit that the expenditure of money by boards of freeholders has not, in every case, been satisfactory to the taxpayer, and, in this particular case, these boards would not be responsible to the people of their own localities, because the money would not come from them.

I cannot permit that which has been built up with so much care to be destroyed by this ill-considered legislation.

There have been many protests against the rearranged schedule of fees for motor vehicles, and, in many cases, these objections were well taken, as I am convinced that these schedules are not based upon a well-considered plan of taxing these vehicles

In a matter of this importance, legislation of this kind should not be disposed of in the last hours of the closing session.

Among the results is the inclusion in this bill of a passenger fee of $3.00, although members of the Legislature have stated that it was amended to read $5 00. This item alone would mean a loss to the State of, approximately, between eight hundred thousand and a million dollars.

For the reasons above stated, these bills are disapproved.

ASSEMBLY NO. 243

This bill amends the act creating a real estate commission and regulating licenses for real estate brokers and salesmen.

In my annual message, I called the attention of the Legislature to a condition existing in our State. I said:

"Every year bills are brought to the Legislature and introduced for the purpose of regulating all kinds and sorts of business * * * The main purpose is the restriction of the business or calling, and making it more difficult and impossible to enter the calling * * * If these things are permitted to continue, it will not be long before there is a bureau or a commission to license and regulate every conceivable occupation * * * These regulations do nothing more than to protect from outside competition those already engaged in the business. * * * The Executive has, in the past two years, vetoed a number of bills, which had for their purpose such restrictions and the vetoes have been sustained.

"The present Legislature is urged to consider any such proposed measure cautiously, and, unless their passage would do some public good, instead of fostering some selfish or private interest, refuse to enact them into law."

Assembly No 243 comes within this classification It requires that the person desiring to go into business of selling real estate shall submit himself to a board and take an examination, which shall include "reading, writing, spelling, elementary arithmetic, a general knowledge of the statutes of New Jersey concerning

real property, conveyancing, mortgages, agreements of sale, leases, and of the provisions of this act."

The selling of real estate has not yet reached the dignity of a profession, and, probably, never will. It has been carried on for over a hundred and fifty years in the State of New Jersey by many men, who, probably, could not pass this examination.

It is entirely proper that a board should regulate the business and see that innocent purchasers are not imposed upon, and that the business is honestly conducted. This bill, however, has for its purpose limiting the number who may engage in the business by keeping others out through the examination, although those who have been engaged in the business for a period of five years may still continue in business, even though they might not be able to pass the examination

Similar efforts to limit those in the business have been made by undertakers, electricians, plumbers and others, whose effort was also directed towards limiting the number who might engage in the calling, and all have been vetoed and the veto sustained

The whole modern tendency seems to be to try to limit every calling If this is encouraged, it will lead to a very disastrous condition of public affairs, and should be discouraged There is no reason to make a monopoly of any business or calling, or to limit those who may enter it

The present law requires that an applicant shall be of good moral character If he is, he ought to have the opportunity that every American boy has of entering into any business he desires, and he should not be shut out by an examination that is unnecessary

I observe, too, in this bill that the present provision, which permits a person to give another power of attorney to act for him is eliminated, so that, if this bill becomes a law, a man could not even give a power of attorney to sell his own real estate, unless he selected a real estate broker for that purpose There might be many reasons why he preferred to select someone else

The bill, is therefore, disapproved

GEORGE S SILZER,
Governor.

A message was received from the Governor, by the hands of his Secretary, as follows:

ASSEMBLY NO 284.

This bill is a departure from the well-settled customs and practices in this State

It has been well-settled that Federal and State functions should be kept apart, and each has been jealous of the encroachments of the other.

This bill seeks to destroy that relationship, in that it permits the Federal Government to come into our State and to file in the offices of the clerks of the Courts of Common Pleas or in offices of registers of deeds and mortgages, notices of the pending of suits, etc

Our State records and offices of the clerks of our State courts should be free from Federal interference

If this bill becomes a law, notices of all kinds in the Federal court may be entered upon the books of our State courts and registers' offices, and it will be impossible to remove them by any orders from our own courts. People whose property is affected will have to go into the Federal courts for relief This, at best, is a long, tedious, costly and inconvenient procedure, and, very often, an unsuccessful one. We should have, at all times, our own records under our own control and not surrender that control to the Federal Government The Federal Government and the State Government each has its functions, and they should be kept apart

The purpose of a *lis pendens* is to give notice to prospective purchasers or people interested in real estate. Those who are so interested have abundant protection at this time, because no careful searcher of title or a lawyer would think of advising the purchase of a property without having a search made in the Federal courts Everything that this bill would accomplish is already accomplished in the records of the Federal courts, which are readily accessible.

It will be observed that any agency of the Federal Government, any district attorney, or other Federal officer in any Federal proceeding affecting the possession or title of lands in the State of New Jersey might file in our courts and registry offices a notice of the pendency of such suit.

No property-owner ought to be put to the additional expense, inconvenience and annoyance of attempting to free his property

in this State from a Federal *lis pendens* when we already know how difficult it is to get action from Federal departments.

The bill is, therefore, disapproved.

GEORGE S. SILZER,

A message was received from the Governor, by the hands of his Secretary, as follows:

ASSEMBLY NO. 410.

This is a bill to provide a general act concerning bottles and other containers, and it is designated as the "New Jersey Bottle Act."

We already have upon our statute books laws for the protection of owners of bottles. I do not know that this statute is any better than those we have.

There is abundant reason, however, why this bill should not become a law, and that will be found in the penalty clauses.

Section 7 provides that any person or corporation offending against the provisions of the act shall be punished for the first offense by imprisonment of not less than ten days nor more than one year, or by a fine of fifty cents for each and every bottle, etc., filled, etc., or by both such fine and imprisonment, and for each subsequent offense, by imprisonment of not less than twenty days or more than one year, or by a fine of not less than one dollar or more than five dollars for each and every such bottle, etc , filled, etc.

I do not believe that our statute books should contain any penalty which provides no discretion on the part of the magistrate. There may be many circumstances which would not warrant the imprisonment of a man for ten days. This bill provides that a man must be imprisoned ten days, even though there may be strong mitigating circumstances. I do not believe in these definite, inelastic and mandatory sentences, especially in an act designed for the protection of a particular trade or business.

Paragraph 14, providing for a civil penalty, means nothing, because it says: "Any person or corporation offending the posi-

tions of such act shall be liable to a penalty," etc. The word "positions" means nothing in this provision.

Paragraph 15 provides imprisonment for debt. When judgment shall have been rendered against a defendant and he has not sufficient goods and chattels to satisfy the judgment, this section provides that he shall be taken to the common jail, "there to be detained until discharged by the court in which such judgment was obtained, or by one of the justices of the Supreme Court, when such court or justice shall be satisfied that further confinement will not result in payment of the judgment and costs,"

It makes none of these provisions any better because they have already been adopted and used in other acts for the enforcement of penalties. Instead of following those acts, we should take care to avoid their defects

This bill also seems to provide not only a punishment for a violation of the act, but also a civil proceeding to recover a penalty, resulting in double punishment for the same offense.

The bill is disapproved.

SENATE BILLS NOS 38, 186 AND 262, AND ASSEMBLY BILLS NOS. 107, 464.

I have before me a number of bills adding to the routes of the Highway System, and some giving the State Highway Commission the right to lay out certain routes when they believe it to be practical. If the Legislature would give the State Highway Commission the power to designate such routes as they think advisable, the State Highway System could be developed by the adding of such routes as would best serve the people of the State, and, at the time time, keep down the expense.

Instead of doing this, I have had presented to me Senate No. 92, Senate No 38, Assembly No 107, Assembly No. 464, Senate No. 262 and Senate No. 186

Each one of these bills attempts to add a particular route to the State Highway System These particular routes are designated because their sponsors are able to get the votes for them These routes have not been designated because of any State-wide policy for the betterment of the roads or the saving of cost They do not fit into any plan of the State Highway Commission

So long as designation of routes depends upon the ability to get a particular bill through the Legislature just so long will it be necessary to reject them

If the Legislature passed a bill, declaring all roads of the State eligible for inclusion in the State Highway System, these special bills would not be necessary Then such roads could be improved as would do the greatest good for the greatest number

I cannot understands why the Legislature is unwilling to have the body which is constituted for this purpose, and which has the confidence of the entire people of the State, undertake this work

There are no funds available at this time for the numerous highways mentioned in the bills before me, and since no funds are available, the designation of these routes will have no practical value now, nor for some time to come When the funds are available, and the State Highway Commission believes that they should, in the interest of convenience and economy, be built, the State Highway Commission may designate them for such purpose

I have signed some bills adding to the Highway System, but only those which the State Highway Commission has requested that I should sign, in order that they may fit them into their plans.

For the reasons stated, these bills are disapproved

Respectfully submitted,

GEORGE S SILZER,

Governor

Attest:

FREDERIC M P PEARSE,

Secretary to the Governor.

Mr Chandless moved that the message be received, spread in full upon the Minutes, and that the bill lie over

Upon the passage of Committee Substitute for Assembly Bill No. 21 the objections of the Governor to the contrary notwithstanding, Mr. Pascoe of Union moved that the statement he made relative to Committee Substitute for Assembly Bill No. 21 be spread in full upon the Minutes as follows:

Which motion was adopted.

MR. SPEAKER—For the past three years the Republican majority of the Legislature have been harassed by a Democratic Governor who elects to set up his personal judgment on matters of legislation against the combined views and opinions of the elected representatives of the people, constituting the both Houses of the Legislature.

This Governor has suffered from a violent case of yetoitis. One of the outstanding features of his malady is his inconsistency. First, we find him taking a definite stand that the State Highway Commission and not the Legislature, should select the several routes to be a part of the State Highway, and yet last year he signed a highway bill introduced by the Democratic member of the Senate from Hunterdon county.

This year likewise he has made exceptions to his policy and signed some highway bills, vetoing a number of others.

Two years ago it was my privilege to introduce in this House a bill for the State Civil Service Commission. The Governor vetoed the bill, but the very next year it was re-introduced by a Democratic member and signed by the Governor.

I understand you, yourself, Mr. Speaker, have been the victim of this self same inconsistency on the part of the Governor wherein he vetoed several of your bills last year that bore your name, which bills were later introduced by other members of the House and promptly signed by the Governor.

The bill that we have before us, Mr. Speaker, vetoed by the Governor, evidences another glaring case of inconsistency on his part and I am surprised to find the minority leader and his Democratic associates in this House opposing the passage of this bill over the Governor's veto.

Chapter 192, of the Laws of 1922, afford certain protection and privileges to the policemen of our State in connection with their employment and promotion. Assembly Bill No. 21, which we now have before us, endeavors to extend precisely the same

protection and privileges to the men of the various fire departments of our State, and yet the Governor, in vetoing the bill, has discriminated against the firemen and practically states that the firemen are not entitled to the same consideration as that enjoyed by the policemen at the present time.

Mr. Speaker, I feel that notwithstanding the Governor and his Democratic marionettes in the House encourage this unfair treatment of the firemen, that the Republicans should bravely stand out and by passing this bill, the Governor's veto to the contrary notwithstanding, maintain the established principle that fairness must be done and that the firemen must be given the protection that this bill proposes.

A message was received from the Senate, by the hands of its secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
March 20th, 1925

Mr. Speaker

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following bills:

Committee Substitute for Senate Bill No. 38, entitled "A supplement to an act entitled 'An act to establish a State Highway System, and to provide for the improvement, betterment, reconstruction, resurfacing, maintenance, repair and regulation of the use thereof,' approved March thirteenth, one thousand nine hundred and seventeen,"

Senate Bill No. 199, entitled "An act authorizing the State Board of Commerce and Navigation to acquire and thereafter to preserve the Barnegat lighthouse,"

Senate Bill No 237, entitled "A supplement to an act entitled 'An act authorizing the construction of the Inland Waterway, extending from Cape May to Bay Head, along the Atlantic coast, and making an appropriation therefor,"

Senate Bill No. 262, entitled "A supplement to an act entitled 'An act to establish a State Highway System, and to provide for the improvement, betterment, reconstruction, resurfacing, maintenance, repair and regulation of the use thereof,' approved March thirteenth, one thousand nine hundred and seventeen,"

Senate Joint Resolution No 11, entitled "Joint resolution creating a commission to formulate a comprehensive policy for the State of New Jersey in relation to the potable waters of

the State, whether arising within or without its boundaries, and making an appropriation therefor,"

The Governor's objections thereto notwithstanding.

In which the concurrence of the House of Assembly is requested.

ROBERT M. JOHNSTON,
Secretary of the Senate.

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 19th, 1925.

SENATE JOINT RESOLUTION, NO. 11

To the Senate.

The members of the Legislative and Executive departments are, theoretically at least, chosen upon the understanding that they are familiar with State problems, capable of dealing with them and willing to do so. If this be not true, then we are guilty of deceiving the people, and should surrender the task to someone who is capable and willing.

The water problem has been one of many years' standing, having been called to public attention so long ago as 1910 by Governor Fort It has become more and more acute

Public attention has been focused upon it by the pressing needs of twenty-nine municipal cities in Union county, as well as by those of other counties. Bills have been presented to Legislatures for several years past dealing with one or another phase of the question.

A year ago, I called attention to the whole subject in a public address before the State Chamber of Commerce.

That body has during the year made a study of the question. The press of the State for several years has discussed the problem.

As time has gone on, the needs have become more and more pressing, and each day's delay adds to the inconvenience, the cost and the difficulties.

In January, I called the attention of the Legislature to this question and recommended that action be taken thereon. Three months have passed with no effort even to study the question, much less to take action.

Now, it is proposed that a commission be appointed to study the question and report in another year.

It is our duty to study the question, not to ask someone else to look into it; it is our duty to solve it, not postpone it.

We cannot substitute someone else's study for our duty to dispose of it.

There is no reason for the Legislature to adjourn without solving this question, unless we are to admit that we are unwilling or incapable of doing so. If we make that admission we should resign and let someone else undertake the job—someone who is capable and willing.

With a question of such magnitude and such pressing importance, it is our duty not to adjourn the legislative session but to remain here upon the job until we have done our full duty by the people of the State who selected us for that purpose.

Studies and Reports—I can see no necessity for another commission to study this question. It has been studied for years.

The following reports and studies are available to anyone who is not already familiar with the question:

Report on Water Supply, C. C Vermeule, 1894, Vol III—Final Reports State Geologist.

Report of the Commissioners to Investigate the Practicability and Probable Cost of the Acquisition by the State of the Title to the Potable Waters of the State—1906.

Report on the Water Resources of the State and their Development, Hazen, Whipple and Fuller—1922.

Water Commission Offers a Program for Development—Chimney Rock Project Outlined by Mr. Sherrerd—Newark Evening News—January 31, 1925.

Report on the Floods of April Twenty-eighth to March 5, 1902—C. C. Vermeule, Annual Report of the State Geologist, 1902.

Floods of October, 1903—Passaic Floods and Their Control, C. C. Vermeule, Annual Report—State Geologist, 1903.

Lake Passaic Considered as a Storage Reservoir—C. C. Vermeule, Annual Report—State Geologist, 1905.

Report on the Development of the Passaic Water Shed by Small Storage Reservoirs—C. C. Vermeule—Annual Report State Geologist, 1909.

Report of Committee to Investigate the Water Situation, City of Elizabeth—December 27, 1923.

Report of Water Survey Commission, Westfield, New Jersey, including Report of Thomas F. Bowe, Consulting Engineer on Water Supply, for the Town of Westfield—1924

Report on Water Supply, City of Bayonne—Western & Samson; Also Report of Citizens' Committee of Twenty and Report of its Consulting Engineer, Weston E. Fuller—1924.

Compact as to the Water Resources of the Delaware River Tri-State Treaty—1925.

A mere casual look at this list will demonstrate that eniment men have given of their time, and that much money has already been spent on the subject.

For instance, Mr. Alan Hazen, perhaps the most eminent engineer on this subject, has given us the benefit of his study and expert knowledge.

I have serious doubts that any study made by the men named in this resolution would be of special value. And I am sure none of them would set his opinion up against that of this eminent and other eminent engineers.

If the Legislature would study these various reports, it would have all the information available This new commission has no other sources available We are just asking this commission to do what it is our duty to do ourselves.

The only result of this action is that we will delay the solution at least a year, and perhaps more; we continue the inconvenience of those municipalities now suffering; we continue the profits of private companies serving water; and we add heavily to the cost of the State, because property is becoming increasingly valuable, and prevention from pollution is becoming more difficult.

If there is any virtue in the study of these questions by commissions, I beg to call your attention to the fact that a committee of the State Chamber of Commerce has been studying this question for a year. Why not take the benefit of their study? It, certainly, should be as available as that of a new commission No one can say that it was not a non-partisan, disinterested body,

Personnel—A number of men have been chosen as members of this commission by this resolution I note that two of them, Messrs Hamilton and Parker, were members of the Chamber of Commerce Committee Why ask them to study it again, since they have already done so once? Why not listen to them and the rest of their committee on what they already know?

In a matter of such importance to all the people of New Jersey there should not enter the spectre of partisan politics. Yet, in this resolution, there is not named a single Democrat, or, at best, only one, it being the evident purpose, that this shall be purely and distinctly a partisan commission, to serve party advantages, instead of public advantage. Democrats and independent voters, all of whom share in the payment of tax burden, and who will be affected by whatever action is taken, have no right to be ignored. At least, they do not feel that this matter should be projected into partisan politics.

Tri-State Treaty.—Included in the work of the proposed commission is a study of the Tri-State Treaty with New York and Pennsylvania, concerning the waters of the Delaware river.

Why another commission? One commission appointed under legislative sanction has already studied and reported after a year's work, and the other two States have accepted the treaty

The men composing that commission were of the highest type, above suspicion, and, by my appointment, both Republicans. They did a fine piece of work in a large and patriotic way.

I can see no reason for a duplication of their work, and no one has yet pointed out a reason why this treaty should not be ratified.

There have been some who, through ignorance, timidity or design, have found fault, but not one has given a substantial reason for not accepting this treaty.

There is nothing so timid as ignorance or anything so designing as self-interest.

I am unwilling to be a party to this unnecessary delay. If the other States withdraw their consent, we are left high and dry, and may be seriously embarrassed. We will then have before us the difficult task of getting our share of the Delaware river water If New York and Pennsylvania develop the water-sheds within these States, we will have a long and difficult journey through the courts to recover our rights—if we ever recover them at all. No one can guarantee that we will.

Besides this, the delay will put a heavy burden upon us; and, besides that, the development of a comprehensive water plan must wait until we have been able to recover our rights and establish them.

Those who have selfish interests are, no doubt, happy in the thought that we are playing into their hands by this delay, and so continuing them in an advantageous position.

Those who are simply timid because ignorant, unconsciously do what leads to the same result.

Cost—The commission is to spend $20,000 This will go to engineers and lawyers to tell us what we already know or ought to know.

They will read the reports we already have and tell us what is in them. They will write a report. And, for all this, we are to pay $20,000.

Because I believe that we are wasting valuable time and much money; because I believe that this delay is unwarranted, and because I believe it is our duty to stay right here on the job and do

this work for which the people of New Jersey selected us, and which it is our clear duty to do, I disapprove this resolution.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

FREDERIC M. P. PEARSE,
Secretary to the Governor.

Mr Chandless moved that the Senate message be received and the bill lie over.

Which motion was adopted.

A message was received from the Senate, by the hands of its Secretary, as follows:

COMMITTEE SUBSTITUTE FOR SENATE NO. 38.

I have before me a number of bills adding to the routes of the Highway System, and some giving the State Highway Commission the right to lay out certain routes when they believe it to be practical. If the Legislature would give the State Highway Commission the power to designate such routes as they think advisable, the State Highway System could be developed by the adding of such routes as would best serve the people of the State and, at the same time, keep down the expense

Instead of doing this, I have had presented to me Senate No. 92, Senate No 38, Assembly No 107, Assembly No. 464, Senate No 262 and Senate No. 186.

Each one of these bills attempts to add a particular route to the State Highway System These particular routes are designated because their sponsors are able to get the votes for them. These routes have not been designated because of any State-wide policy for the betterment of the roads or the saving of cost. They do not fit into any plan of the State Highway Commission.

So long as designation of routes depends upon the ability to get a particular bill through the Legislature just so long will it be necessary to reject them.

If the Legislature passed a bill, declaring all roads of the State eligible for inclusion in the State Highway System, these special bills would not be necessary. Then such roads could be improved as would do the greatest good for the greatest number

I cannot understand why the Legislature is unwilling to have the body which is constituted for this purpose, and which has the confidence of the entire people of the State. undertake this work.

There are no funds available at this time for the numerous highways mentioned in the bills before me, and since no funds are available, the designation of these routes will have no practical value now, nor for some time to come. When the funds are available, and the State Highway Commission believes that they should, in the interest of convenience and economy, be built, the State Highway Commission may designate them for such purpose.

I have signed some bills adding to the Highway System, but only those which the State Highway Commission has requested that I should sign, in order that they may fit them into their plans.

For the reasons stated, these bills are disapproved.

Respectfully submitted,

GEORGE S. SILZER,
Governor.

A message was received from the Senate by the hands of its secretary, as follows:

STATE OF NEW JERSEY,

March 19th, 1925.

SENATE NO. 199

To the Senate.

This bill has for its purpose the acquiring and preserving of the Barnegat Lighthouse, and appropriates $75,000 for its acquisition and preservation

The preservation of this lighthouse serves no practical purpose, but is purely a matter of sentiment. I am thoroughly in accord with the sentimental views of the proponents of this bill, but there are practical difficulties in the way of carrying it out

This lighthouse, which some years ago stood well inland, is now within fifty feet of the shore, due to the encroachment of the sea. The United States Government refuses to do anything more toward its preservation, although it has spent many thousands of dollars in an attempt The estimates made by army engineers are that it will cost from $214,000 to over $400 000 to preserve it.

I do not believe that the State of New Jersey ought to undertake the expenditure of that sum of money for the purpose of preserving this lighthouse as a matter of sentiment. especially since there is even then no certainty that that sum of money will save it. I therefore disapprove this bill

Mr Chandless moved that the Senate message be received and the bill lie over.

Which motion was adopted

A message was received from the Senate, by the hands of its Secretary, as follows.

SENATE NO. 237.

This bill provides for the expenditure of $160,000 out of the State Fund for deepening the inland waterway from Atlantic City, through Great Bay to Grassy Channel, and to install range lights and lighted buoys throughout. The bill, therefor, not only causes the expenditure of $160,000 for deepening the channel, but also puts upon the State the maintenance charge, as it will have to keep up this channel, and also fastens upon the State a permanent charge for maintaining and keeping lighted the range lights and lighted buoys.

In view of the fact that the Appropriation Bill carries an appropriation of over a million dollars more than that submitted by the Budget Commission, I feel that expenditures of this kind should be curtailed

I also have in mind the fact that the State Board of Education has recommended the building of a Normal School in Hudson county, for the accommodation of the children of Hudson, Bergen and other adjoining counties; and that the Budget Commission recommended $800,000 for this purpose in the budget message This sum was entirely eliminated from the Appropriation Bill, and the children of those communities are to be left without the educational advantages to which they are entitled, and of which they are so sorely in need

Until we can supply these children with these educational facilities, I see no reason for taking from them $160,000 to deepen an inland waterway channel. The education of our children is much more important than the digging of waterways This

$160,000 would go a long way toward the erection of the necessary school buildings. Notwithstanding the fact that this $800.000 was eliminated, the Appropriation Bill is still one million dollars over that recommended by the Budget Commission This makes $1,800,000 diverted to other purposes—one of which was the expenditure of this $160,000 for dredging this channel.

For the reasons stated, this bill is disapproved

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,

SENATE NO. 262

To the Senate

I have before me a number of bills adding to the routes of the Highway System, and some giving the State Highway Commission the right to lay out certain routes when they believe it to be practical. If the Legislature would give the State Highway Commission the power to designate such routes as they think advisable, the State Highway System could be developed by the adding of such routes as would best serve the people of the State, and, at the same time, keep down the expense.

Instead of doing this, I have had presented to me Senate No. 92, Senate 38, Assembly No 107, Assembly No 464, Senate No 262 and Senate No 186.

Each one of these bills attempts to add a particular route to the State Highway System These particular routes are designated because their sponsors are able to get the votes for them. The routes haves not been designated because of any State-wide policy for the betterment of the roads or the saving of cost They do not fit into any plan of the State Highway System

So long as designation of routes depends upon the ability to get a particular bill through the Legislature just so long will it be necessary to reject them.

If the Legislature passed a bill declaring all roads of the State eligible for inclusion in the State Highway System, these special bills would not be necessary. Then such roads could be improved as would do the greatest good for the greatest number.

I cannot understand why the Legislature is unwilling to have the body which is constituted for this purpose, and which has the confidence of the entire people of the State, undertake this work.

There are no funds available at this time for the numerous highways mentioned in the bills before me, and since no funds are available, the designation of these routes will have no practical value now, nor for some time to come. When the funds are available, and the State Highway Commission believes that they should, in the interest of convenience and economy, be built, the State Highway Commission may designate them for such purpose.

I have signed some bills adding to the Highway System, but only those which the State Highway Commission has requested that I should sign, in order that they may fit them into their plans.

For the reasons stated, this bill is disapproved.

Respectfully submitted,

GEORGE S. SILZER,

Governor.

STATE OF NEW JERSEY,
SENATE CHAMBER,
March 20th, 1925.

Mr Speaker

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following bills.

Senate Bill No. 119, entitled "An act to amend an act entitled 'An act concerning corporations (Revision of 1896),' approved April twenty-first, one thousand eight hundred and ninety-six,"

Senate Bill No 120, entitled "An act to authorize and empower corporations now or hereafter organized and existing under and by virtue of any law of this State, for the purpose of supplying electricity for light, heat or power, and defined as public utilities, by an act entitled 'An act concerning public utilities; to create a board of public utility commissioners and to prescribe its duties and powers,' approved April twenty-first, one thousand nine hundred and eleven, and the amendments thereof and supple-

ments thereto, to acquire land or any interest therein, by condemnation, for the distribution of electricity,"

Senate Bill No. 186, entitled "A supplement to an act entitled 'An act to establish a State Highway System, and to provide for the improvement, betterment, reconstruction, resurfacing, maintenance, repair and regulation of the use thereof,' approved March thirteenth, one thousand nine hundred and seventeen,"

The Governor's objections thereto notwithstanding

In which the concurrence of the House of Assembly is requested

ROBERT M. JOHNSTON,
Secretary of the Senate

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 19th, 1925

SENATE NO. 119

To the Senate

This bill gives to electric light, heat and power companies the right of eminent domain, a right which they do not now possess.

There is no general act for the incorporation of these companies, and they are now compelled to incorporate under the General Corporation Act.

If this bill becomes a law and these companies are given the right of eminent domain, then no new companies for the furnishing of electric light, heat and power can be organized, because (a) there is no special act under which to incorporate them, (b) because the General Corporation Act, in section 6, forbids the organization of companies which shall need to possess the right of taking and condemning lands in this State

It follows, therefore, that, if this bill becomes a law, only those companies which are now in the business could function in the future, as no new companies could be organized. This would be an unfortunate condition, in that it would prevent new companies and new competition

Under section 28 of the Corporation Act, none of these companies may increase or decrease their capital stock, because they possess the right of taking and condemning lands

An effort is made by Senate No 119 to eliminate this difficulty by amending section 6 of the Corporation Act, by making it lawful to form a company "for the purpose of constructing, maintaining and operating works for the supply and distribution of

electricity for electric light, heat or power in or outside of this State"

I do not believe that we should authorize our electric companies to do business outside of the State or to carry electric power from this State to another State or from another State to New Jersey until we have made some provision for the regulation thereof The moment this current flows over the State lines, it may become subject to Federal regulation, and we will have lost our entire control over it.

To lose control of the regulation of these companies would be an unfortunate thing for the State. It might well be said that the moment the State had consented to their crossing State lines, that not only these lines, but the companies, themselves, and everything connected with them immediately fall under Federal jurisdiction. If this be true, then we would lose entirely our power to control these corporations dealing in electric light, heat and power.

The bill should at least have had a provision that any company exercising privileges under this bill should waive any claim or right to fall under Federal jurisdiction, and should consent to regulation by the State commission.

This, of course, presents difficulties of conflict between State and Federal regulation.

I have called the attention of the Legislature to the necessity of providing for this regulation through a compact between this State and the adjoining States to which and from which this power will be carried.

Until that is accomplished and a treaty is in force, power should not be given to these companies to go beyond State lines for the distribution of electricity, or for other companies from without the State to connect with them for a like purpose.

Since Senate No 119 and No 120 are so closely related, and since each would have its effect upon the other, both must fall if one is vetoed.

I, therefore, disapprove of both bills.

Respectfully submitted,

GEORGE S. SILZER,
Governor.
