NEW JERSEY WORKER AND COMMUNITY RIGHT TO KNOW ACT RIGHT TO KNOW HAZARDOUS SUBSTANCE LIST

A. DESCRIPTION

The Right to Know Hazardous Substance List (RTKHSL) was modified in 2007 to reflect revisions made from sixteen source lists. These sources can be found in the reference sources section located at the end of the RTKHSL.

The revised RTKHSL, in alphabetical and CAS number order, and the Hazardous Substance Fact Sheets can be obtained online at <http://www.nj.gov/health/eoh/rtkweb>. Questions about hazardous substances should be directed to the Right To Know Program, Division of Epidemiology, Environmental and Occupational Health, New Jersey Department of Health and Senior Services, P.O. Box 368, Trenton, N.J. 08625-0368, (609) 984-2202.

NOTES:

1. Right to Know Substance numbers are not in numerical sequence. This was done to allow for inclusion of generics and the addition of new substances.
2. Substances with prefixes such as 1, 2, 3, o, m, p, n, sec, tert, alpha, beta, and gamma are alphabetized under the first upper case letter of the common name and not by the prefix.

PUBLIC EMPLOYERS should direct questions on how to complete the Right to Know Survey and how to label containers to the New Jersey Department of Health and Senior Services at the above address and phone number.

PRIVATE EMPLOYERS should direct questions on how to complete the Community Right to Know Survey to the New Jersey Department of Environmental Protection, Office of Pollution Prevention and Right to Know, P.O. Box 405, Trenton, N.J. 08625-0405, (609) 292-6714.

Questions about how to label containers should be directed to the Right to Know Program at the New Jersey Department of Health and Senior Services at the previously listed address and phone number.

B. EXPLANATION OF COLUMN HEADINGS

Right to Know Substance Number - A four-digit number that is assigned to each hazardous substance and used for reporting purposes. These numbers are not in sequence.

This column also contains the following notations:

Syn - Indicates that the name listed is a synonym and you must refer to the second name listed – “see _____” – to report this substance.

- This symbol is found between the substance number and the common name of the substance and indicates that a substance is on the Special Health Hazard Substance List.

Common name/Chemical name – The name on the first line is the common name for the substance; the name on the second line is the chemical name. When there is only one name, the common and the chemical name are the same.

CAS Number - Chemical Abstracts Service identification number.

DOT Number - A four-digit identification number used by the U.S. Department of Transportation.

Special Health Hazard Codes - These codes (SHH codes) are in the right column and refer to the hazardous categories of the substances:

CA - Carcinogen

MU - Mutagen

TE - Teratogen

CO - Corrosive

F4 – Flammable - Fourth Degree

F3 – Flammable - Third Degree

R4 – Reactive* - Fourth Degree

R3 – Reactive* - Third Degree

R2 – Reactive* - Second Degree

* “Reactive” is used interchangeably with the NFPA term “instability.”

According to the hazard criteria defined in N.J.A.C. 8:59 – 10.2(a):

Carcinogenic, mutagenic and teratogenic substances are considered to be special health hazard substances when they are present as pure substances or in mixtures at a concentration of one-tenth of one percent (0.1%) or greater.

Flammable, reactive/explosive, and corrosive substances are considered to be special health hazard substances when they are present as pure substances or in mixtures at a concentration of one percent (1%) or greater.

Source Number(s) - The source numbers correspond to the references listed in the reference sources section and are located in the last column.

C. HOW TO USE THE RIGHT TO KNOW HAZARDOUS SUBSTANCE LIST

- FIRST Identify the chemical ingredients of products present at your facility by common name and CAS number.
- SECOND Look up the common names of these chemicals on the Right to Know Hazardous Substances List.
- THIRD Report pure chemicals and products with chemical ingredients that are found on the RTK Hazardous Substance List on your annual RTK Survey.
