### Statement of Gov. Christie Whitman on Receipt of Bids for Construction of Atlantic City Marina Roadway Connector

I am pleased to learn that two of the bids received today for the Atlantic City Marina Roadway Connector appear to fall within the budget parameters established for the project. This marks a major step forward for the economic growth of not only the Atlantic City region but for the entire state of New Jersey. When it is completed, this public transportation project will provide much-needed improvements in traffic patterns for area residents and visitors and serve as a linchpin for significant investment. These projects will generate thousands of permanent and construction jobs and tens of million dollars in yearly revenues for the city and the state.
