Recent Threat Analysis

August 12, 2015

[Advanced Cyber Threats Succeed Using Simplest of Tactics](#)

For several years, cybersecurity firms and the U.S. intelligence community have warned of the increasing frequency and scope of targeted cyber-attacks conducted by state-sponsored actors and sophisticated cyber-criminal groups – often referred to as Advanced Persistent Threats, or APTs. *The NJCCIC assesses that APTs will continue to target user credentials by exploiting basic human tendencies that result in weak email and web-browsing security, as well as poor authentication practices. To reduce the likelihood of account compromises and socially-engineered spear-phishing campaigns, the NJCCIC recommends implementing two-factor authentication (2FA) whenever possible*, particularly for remote access applications such as VPNs and web portals, email services like Microsoft Outlook Web Access, and cloud storage applications such as Google Drive, Dropbox, and Microsoft OneDrive.

Tip of the Week

"Dispose of Information Properly"

Protecting confidential and sensitive data from accidental disclosure is very important. We should strive to properly handle data erasure and the disposal of media. Erasing information or disposal of electronic media (e.g., PCs, CDs, thumb drives, cameras) often leads to a false sense of data security. Be aware of proper methods of sanitizing, destroying, or disposing of media containing sensitive or classified information.

[Social Engineering Insights from DefCon](#)

Last week, a NJCCIC Cyber Threat Analyst attended DefCon 23, an annual conference where hackers and cybersecurity professionals from around the world descend on Las Vegas to learn and share information about hacking techniques, system and software vulnerabilities, online privacy, and data protection.

NJCCIC Announcements

NJOHSP and the U.S. Department of Homeland Security (DHS) are collaborating to present a day and half-long cybersecurity workshop for local businesses and government. Register and learn more about this workshop here:
