MANAGERS' REPORT.

To His Excellency, Joseph D. Bedle, Governor of the State of New Jersey:

In obedience to the law providing for the organization of the New Jersey State Lunatic Asylum, the Board of Managers respectfully present their thirtieth annual report :

The number of patients in the Asylum on the 31st day of October, 1875, was seven hundred and four. The number received since that time was two hundred and thirty-one, making the whole number under treatment during the year nine hundred and thirty-five. Of this number sixty-eight have been discharged recovered. Two insane convicts have escaped, and forty-eight have died. Two hundred and ninety-two (292) have been removed to the Morristown Asylum. There remained in this institution, under treatment, on the 31st day of October, 1876, four hundred and seventy-two (472) patients. Of this number thirty-one are State patients, three hundred and forty-four are county patients, and ninety-seven are private patients.

The whole number of patients admitted and treated from the opening of the Asylum, on the fifteenth day of May, 1848, to the first day of November, 1876, was five thousand and thirty-seven. Of this number three thousand one hundred and ninety-four have been returned to their friends, recovered or improved. This is an important record, and bears strong testimony to the value of the institution. The condition of those who remain in it is greatly ameliorated and rendered as homelike and comfortable as possible.

The general health of the inmates of the Asylum has been good throughout the year. Through the kindness of an over-ruling Providence no epidemic has prevailed. The deaths which have occurred, have been (with a single exception) from natural causes connected with the condition of the patients.

The annual inventory, taken by the steward and two appraisers, as required by law, makes the personal property belonging to the Asylum amount to the sum of ninety-six thousand eight hundred and forty-nine dollars and fifty cents.

The annual reports of the Superintendent, Treasurer and Steward are herewith transmitted. These exhibit in detail the operations and satisfactory condition of the institution.

From the Treasurer's account, which has been kept with great care, it appears that the receipts during the year, from all sources, including the balance of \$3,899 22 on hand at the close of the preceding year, amounted to the sum of one hundred and eighty-nine thousand seven hundred and forty-two dollars and fifty-one cents (\$189,742 51).

The payments for the same period amounted to the sum of one hundred and eighty-two thousand six hundred and ninety-six dollars and seventy-four cents (\$182,696 74), leaving in the hand of the Treasurer, on the 31st day of October, 1876, a balance of seven thousand and forty-five dollars and seventy-seven cents (\$7,045 77).

Of the receipts, thirty-six thousand five hundred and seventy-five dollars and sixty-three cents (\$36,575 63) were from private patients; one hundred and eight thousand five hundred and six dollars and thirteen cents (\$108,506 13), from the counties for the indigent insane; thirty thousand six hundred and eighty-six dollars and twelve cents (\$30,686 12), from the State, for the same class of patients; and ten thousand and seventy-five dollars and forty-one cents (\$10,075 41), from the State, for insane convicts.

The Board would call attention to the recommendation in their report of last year, in relation to insane convicts. There are thirty-one of this class now in the Asylum, for whom some other provision should be made. The purity of the institution and the honor of the State alike demand that our afflicted fellow-citizens, who are without reproach, should not be thus compelled to associate with condemned criminals.

Since our last report, important changes have taken place in the executive force of the Asylum. Early in the year, Horace A. Buttolph, M. D. LL. D., resigned his position, so long and honorably filled, as Superintendent and leading Physician of the Institution, to take place on the first day of April, 1876, with a view to accept the superintendence of the new Asylum at Morristown, to which he had been chosen by the managers of that Institution. This Board reluctantly consented to the withdrawal of Dr. Buttolph. His connection with this institution from its first organization, his admirable and successful mode of conducting its affairs, and his faithful and conscientious discharge of duty, made his services invaluable. Their regret at parting with Dr. Buttolph, after so long and harmonious association with him, in the management of the institution, was offset by the conviction, that his large experience and administrative ability were calculated to make him eminently useful to the State and to suffering humanity in organizing the new asylum at Morris Plains.

To fill the vacancy created by the resignation of Dr. Buttolph, the Board of Managers elected John W. Ward, M. D. Dr. Ward had

been connected with the institution, as an assistant Physician for nine years, and for the last three years as the first assistant Physician. In these relations he had commended himself by his faithful discharge of duty.

Dr. John Kirby, an experienced practitioner, was chosen as first assistant Physician, to fill the vacancy created by Dr. Ward's promotion. Charles P. Britton, M. D., was chosen for the position of second assistant Physician, the duties of which place had been temporarily discharged by Dr. McDonald, who has been appointed to a similar position in the Morristown Asylum. Miss Tabor's resignation of the position of Matron, which she had filled for many years, to the entire satisfaction of the Board, left a vacancy which has been supplied by the appointment of Mrs. S. J. Clark.

The venerable Treasurer of the Asylum, Jasper S. Scudder, Esq., who had discharged the duties of this office faithfully, from the first organization of the institution, resigned his place in April last. This vacancy has been filled by the appointment of Austin Snider, of Trenton.

The newly selected officers have worked harmoniously together, and vindicated the wisdom of their appointment, giving promise of a successful future.

In accordance with the law authorizing a division of the State to be made by this Board, in connection with the Commissioners of the Morristown Asylum, and to be approved by the Governor, a division was made in July last, and sanctioned by your excellency.

This division assigned to the Morristown Asylum, the counties of Bergen, Essex, Hudson, Morris, Passaic, Sussex, Union and Warren, with a population aggregating (583,279), five hundred and eighty-three thousand, two hundred and seventy-nine; and to this institution the remaining counties of the state, with an aggregate population of four hundred and thirty-six thousand, one hundred and thirty-four, (436,134).

Under the above arrangement, two hundred and ninety-two patients from the counties aforesaid, were removed from the care of this institution, during the month of August, to the Asylum at Morristown. Through an arrangement made by Dr. Lilly, with the Belvidere and Delaware and Morris and Essex Railroad Companies, special cars were secured to carry out this transfer. Seventy-five men on the 17th of August, and sixty-four more on the 23d, were removed under the care of Dr. McDonald, and several attendants. Eighty women on the 18th of August, and seventy-three more on the 25th of the same month, were removed, under the charge of Dr. Smith, and several attendants. The entire company were transported from the Asylum Station to their new abode at Morris Plains, without change of cars, and without any casualty whatever.

The institution has thus been relieved of the surplus number of patients, which has kept it in an overcrowded state for several years.

The way has been opened for the admission of new cases for treatment in the asylum from the section of the State assigned to it.

Important improvements and necessary repairs have been made during the year, which have promoted the convenience of the institution and the comfort of the patients.

In view of the changes which have taken place since our last report, the Board congratulates your excellency and the State on the satisfactory condition of the institution at the close of the year.

For further information your excellency is referred to the Superintendent's report.

All which is respectfully submitted.

GENERAL RESULTS.

The number of patients under care at the close of the last year was seven hundred and four; three hundred and forty-three men, and three hundred and sixty-one women. The number received since, viz: from November 1, 1875, to October 31, 1876, inclusive, was two hundred and thirty-one; one hundred and seventeen men, and one hundred and fourteen women.

The whole number of cases under treatment during the year was nine hundred and thirty-five; four hundred and sixty men, and four hundred and seventy-five women. Of this number four hundred and sixty-three have been discharged, as follows: considered as recovered, sixty-eight; as improved, fifty-one; as unimproved or stationary, two;

escaped, two; forty-eight have died, and two hundred and ninety-two have been removed to State Asylum for the Insane, at Morris-town.

At the close of the year, there remained under treatment, four hundred and seventy-two; two hundred and fifty-one men, and two hundred and twenty-one women.

The largest number under care, at any one time during the year, was seven hundred and sixty, and the smallest number four hundred and fifty-three.

Death resulted in thirteen cases from general (chronic) exhaustion; in fourteen from pulmonary consumption; in six from epilepsy; in four from apoplexy; in four from exhaustion of acute mania; in four from general paresis; in two from pneumonia, and in one from suicide.

The mortality has been chiefly confined to persons who have been for a long time under care in the Asylum, and to those who have been admitted during the year, who were of advanced age and suffering from chronic bodily disease when they came to us. Many patients are sent to us simply because they are old, infirm and untidy in habits, and demand more care and attention than relatives and friends are able or willing to give them at home.

No deaths have occurred from any acute disease, in addition to those resulting from the exhaustion of high maniacal excitement and the two cases of pneumonia. It is proper to state, in regard to both of these cases, that they were brought to us very much prostrated and exhausted from the fatigue of the journey in coming here, and survived but a few days after their admission.

Of those who died, two were past eighty-five years of age; one was past eighty; one past seventy-five; three past seventy, and fourteen were between the ages of fifty and seventy.

The average length of time that those who died were under care in the institution, was a little more than four years.

The general health of the household has been good during the entire year, and continues to be so at the present time. We have been spared any epidemic of a serious nature, and have had but little of acute physical disease of any form.

In the table of statistics, at the commencement of this report, it will be observed that an unusually large number of patients have been discharged from the institution during the year. This is due mainly to the removal of all the indigent insane belonging to the northern counties of the State, to the new structure near Morris Plains.

In August last, in accordance with the "regulations for the distribution of patients in the New Jersey State Lunatic Asylum," approved by the Governor July 28th, 1876, the Commissioners of the State Asylum for the Insane, transferred two hundred and ninety-two of our patients to the latter institution. Of those who were removed there were from :

Counties.	Men.	Women.	Total.
Bergen,	14	14	28
Essex,	35	43	78
Hudson,	18	31	49
Morris,	11	12	23
Passaic,	19	18	37
Sussex,	8	5	13
Union,	18	19	37
Warren,	16	11	27
Total,	139	153	292

By an arrangement of the commissioners with the railroad companies, in securing special trains to go directly to the new Asylum without change of cars, the whole number were conveyed to their new home without any accident or unpleasant occurrence.

By this removal of the patients from the northern counties of the State, our very greatly crowded house was much relieved, and we have since been enabled to receive many recent and necessitous cases who were seeking admission from that section of the State, which has been set apart as belonging to this institution.

On the twenty-eighth day of July last, the Governor approved of a rule for the division of the State, which had been previously acted upon by your Board and by the Commissioners of the new Asylum, and which provides that "all insane persons who may hereafter be sent to an asylum of this State, by virtue of any law thereof, from the counties of Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Hunterdon, Mercer, Middlesex, Monmouth, Ocean, Salem and Somerset shall be sent to and received into the New Jersey State Lunatic Asylum; and all such persons so sent from all other parts of the State, shall be sent to and received into the State Asylum for the Insane at Morristown; *provided however*, that the foregoing regulation shall apply only to insane persons who are supported, or to be supported, in said asylum at the public expense, and not to insane persons admitted, or to be admitted, therein, under the special agreements authorized by law."

The number of cases discharged as recovered, when compared with the large number under treatment during the year, would at first thought seem to be small. The results are as satisfactory as could be expected, however, when we consider that our household is mainly composed of chronic cases, a very large majority of whom have been for a long time under care in the institution. This accumulation of chronic and incurable cases is the common experience of nearly all Asylums for the Insane, after they have been established for a number of years. One cause for this state of things is doubtless to be found in the neglect of prompt and appropriate treatment in the early stages of the malady, and before the disease has become confirmed.

A large number of patients are brought to us annually, of whose recovery not the faintest hope can be entertained. Many of whom doubtless would have been much benefitted, if not entirely restored to mental health, had friends placed them under medical care in the forming stages of the malady, and before structural changes had taken place in the brain.

Of the two hundred and thirty-one patients who were brought to the institution during the year, sixty-nine, or nearly one-third of the whole number, were deranged for a longer period than four years prior to admission. This neglect of early treatment is perhaps due, in part, to the natural aversion that many have in regard to placing their friends and relatives away from home and under the care of strangers, but in the main we think it is due to mistaken views, or ignorance in regard to the malady itself. The popular mind does not recognize an individual as deranged, until some overt act has been committed, or until he has manifested a decided homicidal or suicidal tendency, or given expression to some extravagant hallucination or wild vagary. So long as there exists no active delusion, it is usually alleged that the individual cannot be insane.

He may become depressed, be tormented by an inability to sleep, have his whole feelings changed in regard to his friends or members of his family, become entirely apathetic in regard to business affairs, and yet his mental health is not questioned because he "understands what is said to him, recognizes those about him," &c.

For this reason the patient is detained at home for weeks and months, usually, in the mean while, growing steadily worse, until, when friends are no longer able to care for him, he is brought to the Asylum with delusions firmly established, the nervous system much prostrated, and too frequently the physical system enfeebled by want of sleep and proper and sufficient food. Insanity is a disease quite as amenable to treatment, in its early stages, as any other disorder of the nervous system.

It is also true that when neglected in its incipency, it is one of the most prone of all diseases to become chronic in its character.

In regard to the necessity for prompt treatment in mental diseases, Dr. Forbes Winslow, one of the most celebrated writers on psychological medicine, in his work on "Disease of the Brain and Mind," (third English edition), remarks that "the sad neglect of incipient brain disease, be the cause what it may, should demand the serious attention of the medical profession. It is a well established fact that *seventy*, if not *eighty*, per cent. of cases of insanity admit of easy and speedy cure, if treated in the early stage, provided there be no strong constitutional predisposition to cerebral and mental affections, or existing cranial malformation; and even when an hereditary taint exists, derangement of mind generally yields to the steady and persevering administration of therapeutic agents, combined with judicious moral measures, provided the first symptoms of the malady

be fully recognized, and the cerebral condition, without loss of time, combatted by remedial treatment."

While we have thus urged the necessity of prompt treatment in mental diseases, we would also urge that the most scrupulous care should be exercised in the case of patients in a feeble and exhausted state of health, that they be not subjected to the exposure and fatigue attendant upon removal from their homes to the Asylum.

We are led to make this remark because of several patients having been brought to the institution during the year, who were too much prostrated by disease to bear the excitement and fatigue of the journey. In three cases thus brought to us, death resulted in a short time after admission.

TREATMENT.

Of the means employed in the treatment of the insane we can only speak in general terms. We have endeavored to take advantage of all those agents usually placed under the head of moral treatment, and which have been so successfully employed in other hospitals. Our house has been well ventilated, care taken to observe scrupulous cleanliness, the corridors kept painted with agreeable tints, the walls hung with pictures and, so far as we have been able, the corridors and rooms carpeted.

During the fall, winter and spring months, when out-of-door exercises and games could not be enjoyed, we have had the usual amusements in-doors to assist in relieving the tedium of hospital life. These consist of minor theatricals, tableaux, concerts, dancing, and exhibitions of the stereopticon with an oxy-calcium light.

In the employment of therapeutic agents in the treatment of insanity, we have, as in other diseases, to meet the indications as they present themselves. We know of no specific. Stimulants and tonics are used to correct the debility and exhaustion of nervous energy so frequently found amongst those brought to us. One of the most constant symptoms, as well as one of the most important in mental diseases, is insomnia. Until sleep can be secured no hope of recovery can be entertained. As a *hypnotic* no remedy has as yet been found to substitute the hydrate of chloral. It is safe and prompt in its action, and its exhibition is followed by none of those unpleasant symptoms that usually result from the free administration of the opiates. Many physicians have almost, if not entirely, abandoned the use of this drug, because so frequently disappointed in obtaining the results desired.

If administered as an *anodyne* it will always disappoint, but as a tranquilizing agent to the patient tormented, with vigilance, it succeeds, even in those cases where failure follows the use of the opiates, bromides and other medicines usually employed to give relief.

When exposed to the action of air and light the drug undergoes change, and when an article which has been thus exposed is admin-

istered, it not unfrequently produces nausea, distress at the epigastrium and vertigo, and often fails entirely to secure any hypnotic effect. The custom followed with us is to give it freshly dissolved, simply in spring water, in from fifteen to twenty grain doses (rarely more is required), and administered at the hour of retiring for the night. The medical journals and public press speak of its injurious effects upon the economy, and of the formation of a chloral habit when it is taken for a length of time. We have not seen the least evidence that any injurious effects follow its use as administered in this Asylum, though the drug has been used for several years and patients under our care have taken it every night for several months. The article used by us is the German chloral. Croton chloral and the crystalized chloral have in our hands proved quite unreliable.

As heretofore the bromides of potassium and ammonium have been constantly used in the treatment of epilepsy, but our experience only confirms that of other observers, that while they diminish the frequency and mitigate the severity of the paroxysms, they cannot be in any sense considered as curative agents. In a few cases of incipient epilepsy the bromides have seemed to effect a cure, but in over one hundred cases of well-defined epilepsy, where the drug has been exhibited in some of them for weeks and months in succession, we cannot recall a single case where a cure has been effected.

REPAIRS AND IMPROVEMENTS.

In addition to the ordinary work constantly required to keep so large a structure in proper condition, we have, during the year, accomplished several very much needed repairs and improvements. Among the more important of these, in the main building, have been the entire renewal of condense pipes in cellar, the partial relaying of gas pipes in the attics, replastering ceilings in several of the corridors and rooms, and repainting side walls of same when necessary, and the renewal of the roofs over centre building and extremity of the east wing. The condense pipes in the cellar are necessary for the purpose of conveying the condense steam back to the boiler house, from the radiators used in warming the building. These had become so much worn and corroded by the action of the water as to render them entirely unfit for use during another winter. The work has been done thoroughly, and in as economical a manner as was possible.

We have used for this purpose twenty-six hundred feet of one and a half inch, and one thousand feet of half inch extra heavy and lap welded pipe.

Much inconvenience has been experienced heretofore from the condensation in the pipes, in cold weather, of the vapor of gasoline, used for the purpose of lighting the house.

This accumulation of liquid, in addition to the danger attending

it from its highly inflammable character, frequently collected in pendent portions of the pipes, in such a manner as to form traps, thus shutting off the gas from a section of the house. To remedy this evil, gas pipes of larger calibre have been laid in the attics, throughout the entire length of the building, with a gradual descent to a given point, where connection is made with a pipe leading to the cellar, and there arranged in such a manner as to catch all the condense. We hope by this arrangement to entirely escape the annoyance experienced in the past from this cause.

In accordance with instructions from your board a new roof of 1 x best charcoal tin has been placed upon both of the sections and a portion of the main building at the extremity of the east wing. This roof substitutes those of gravel and plastic slate formerly used, and which, in addition to the damage already done to the walls and plastering by leaking, had become a constant source of expense in keeping them in proper repair.

There is now a continuous roof of tin or slate over the entire east wing.

In addition to the painting, plastering, &c., already referred to, five large triple windows, each extending from floor to ceiling, have been placed at the ends of corridors on the west wing. These are similar to those which had been already introduced in like positions in the east wing and like them are substitutes in each case for two windows in pairs. These add much to the comfort of the patients as well as to the cheerfulness of the corridors on which placed.

Among the outside improvements may be mentioned new fences about the mill and farm buildings, the enclosure of the cattle yard with a substantial stone wall and a new roof on the wash house. This roof is of best Bangor slate, and replaces the one of glass, which was so much out of repair as to render a portion of the building quite uninhabitable during every rain storm.

FARM AND GARDEN.

All of the crops, notwithstanding the extraordinary drought of the past season, have been good, except those of corn and potatoes. The former was an average yield, the latter almost a total failure. The amount of land under cultivation, including orchards and that portion used for grazing purposes, is about two hundred and thirty-five acres, sixty-five only of which belong to the Asylum.

The remainder constitutes the farm adjoining our own, and which was rented by order of your board in April last: The following table furnished by the Steward shows the products of the farm with estimated values of same for the year:

102 tons of hay,	@ \$16 00,	.	.	\$1,632 00
624 bushels of wheat,	" 1 25,	.	.	780 00
900 bushels of oats,	" 40,	.	.	360 00
30 bushels early potatoes,	" 1 50,	.	.	45 00
18 weeks' pasture for 47 cows,	" 75,	.	.	634 50
1,321 bushels shelled corn,	" 55,	.	.	726 55
5,824 bundles of stalks,	" 03,	.	.	158 52
1 acre green corn,	"	.	.	35 00
457 bushels of apples,	" 40,	.	.	182 00
54 barrels of cider,	" 3 00,	.	.	162 00
Received for rents,	.	.	.	264 00
				<hr/>
				\$4,979 57

The expenses have been—

For rent of farm from April 1, 1876, to April 1,	
1877,	\$1,800 00
fertilizers, seed, &c.,	600 00
labor,	1,680 00
<hr/>	
	\$4,080 00
<hr/>	
	\$899 57

In this account it should be mentioned that no estimate is given of patients' labor.

From the garden, in addition to an abundant supply of fresh vegetables through the summer, we have preserved for winter use 3,000 cabbages, 300 bushels of parsnips, 700 red cabbages, 200 bushels beets, 10 bushels oyster plants, 30 bushels carrots, 500 bushels flat turnips, 200 bushels ruta бага turnips, and 6,000 heads celery.

DAIRY.

From the dairy, we have received an average daily supply of 66 gallons of milk. The following exhibit shows the receipts and expenditures of the dairy for the year:

Receipts as follows—

Manure,	\$400 00
7 beef cows,	380 85
Calves,	223 50
Milk for November, 1875,	1,500	gallons,	@ 20c.,	.	.	300 00
" December,	" 1,550	"	"	.	.	310 00
" January, 1876,	1,550	"	"	.	.	310 00
" February,	" 1,740	"	"	.	.	358 00
" March,	" 2,170	"	"	.	.	434 00
" April,	" 2,250	"	@ 18c.,	.	.	405 00
" May,	" 2,325	"	"	.	.	418 50

Milk for June,	1876, 2,550 gallons, @ 18c.,	. \$459 00
" July,	" 2,170 " "	. 390 60
" August,	" 2,170 " "	. 390 60
" September,	" 2,015 " "	. 380 70
" October,	" 2,000 " "	. 360 00
	<hr/> 23,990	<hr/> \$4,916 40

Expenditures as follows—

Corn and oats, ground, 57,682 lbs., @ \$1 20 ¢ cwt.,	. \$692 18
Bran, 32,796 lbs., @ \$1 ¢ cwt.,	. 327 96
Pasture for 47 cows, 18 weeks, @ 75c. ¢ week, .	. 634 50
Wages, two men, @ \$45 and \$40 ¢ month, .	. 1,020 00
3½ tons bran bought, .	. 88 50
8,880 bundles corn stalks, .	. 266 40
75 tons of hay, @ \$20, .	. 1,500 00
	<hr/> \$4,529 54
Balance in favor of dairy, .	. \$386 86

GRIST MILL.

This has been in successful operation during the year with only a short interruption in the spring, consequent upon repairing the canal, from which source power is derived for driving the machinery. The following statement will show the results of its operations for the year:

Ground for the use of the institution—

154,635 lbs. of extra flour.
9,565 " Graham flour.
57,682 " corn and oats.
32,796 " bran.

Grist work for customers—

1,670 bushels wheat.
217 " rye.
3,155 " corn.
1,731 " corn and oats.

TOLLS RECEIVED.

167 bushels wheat,	@ \$1 35	. \$225 45
21 " rye,	" 60	. 12 60
315 " corn,	" 60	. 189 00
173 " corn and oats,	" 50	. 86 50
		<hr/> \$513 55

We have used in the bakery, during the year, a daily average of 450 pounds of flour supplied regularly from the mill, and at an average cost to the institution of \$2.90 per hundred weight. The work of the mill has been performed by a miller and an apprentice, at a cost of fourteen dollars per week.

The large duplex or double cylinder pump, which was placed in the building adjoining the mill, for the purpose of duplicating steam pump used for raising water to the tanks from which the house is supplied, has been in successful operation during the year. The pump has accomplished all that was claimed for it, "by giving an ample supply of water for the use of the house at all hours, and saving from three to four tons of coal per week, the amount required by boilers to drive steam pumps for a similar purpose."

The institution has been regularly supplied with meat from the slaughter house during the year. The total number of animals slaughtered has been as follows: Steers, 247, cows, 7, sheep, 291, lambs, 311, and calves, 16. The cost of beef has averaged somewhat less than nine cents per pound, dressed weight.

By reference to the Steward's statement of accounts it will be found that there remained at the close of the year a balance in favor of the Treasurer of seven thousand and forty-five dollars and seventy-seven cents, (\$7,045.77).

CHANGES, ACKNOWLEDGEMENTS, &C.

On the sixth of April last in accordance with the purpose expressed in his resignation to your board three months previously, Dr. H. A. Buttolph left this institution, after over a quarter of a century's faithful service as its medical superintendent to assume the duties of a similar position at the State Asylum for the Insane at Morristown in this State.

Miss Mary Taber, who was connected with this institution since its organization, and for a period of twenty-three years was its efficient Matron, tendered her resignation in March last, and left us on the twentieth of April to assume the duties of Matron in the new institution near Morristown.

The place rendered vacant by the resignation of Dr. Buttolph was supplied through the promotion by your board of the assistant physician.

The remaining vacancies were filled in March last at a meeting of your board by the appointments of John Kirby, M. D., of Gloucester county, as assistant physician; Charles P. Britton, M. D., of Mercer county, as second assistant physician, and Mrs. S. J. Clark, of Cumberland county, as Matron.

To each of these officers I am under grateful obligations for intelli-

gent and faithful service and for the interest manifested by each in the work of their several departments, by which they have very greatly lightened my labors in conducting the affairs of the institution.

To Mr. Edmund White, Steward, I desire to express my obligations and thanks for the material assistance which he has rendered me in my work and for faithful service in the interest of the Asylum.

To the many faithful attendants and employes who have been engaged with me in carrying on the work of the institution, I desire to express my sincere thanks.

To the various clergymen of Trenton and vicinity we are under obligations, as in the past, for conducting the services in our chapel on the Sabbaths through the year.

Our thanks are also due the editors of the following daily and weekly newspapers for gratuitous copies, viz: Daily State Gazette, Daily True American, Daily Emporium, Trenton Herald and New Jersey Staats Journal, Trenton; Passaic Herald, Passaic City; Salem Sunbeam, and National Standard, Salem; Mount Holly Herald and Mount Holly Mirror, Mount Holly; Newark Weekly Courier and Newark Daily Journal, Newark; Middlesex County Democrat, Perth Amboy; Monmouth Weekly Democrat, Freehold; Burlington Gazette, Burlington; Family Casket, White House Station; The Catholic Standard, Philadelphia, Pa.; Hunterdon County Democrat, Flemington; Millville Herald, Millville; and National Democrat, Rahway; Somerville Messenger, Somerville; Frenchtown Press, Frenchtown.

We also gratefully acknowledge the following donations to the institution: from Mr. Leon M. Berg, New York city, a fine collection of artificial flowers; from Mrs. Joseph Sterling, Mrs. M. Yard and Mr. L. Wallis, Trenton, fancy articles; from Mr. Baylor, Milford, a collection of flowers for halls; from Edward T. Green, Esq., Trenton, twelve bound volumes of the Galaxy and a large collection of magazines, &c., for patients' library; from Mr. E. C. Stahl, of the Staats Journal, several lots of German and English magazines, &c.; from Joseph Thompson, M. D., Salem, copies of Littell's Living Age; from Mr. James Earle, Philadelphia, Pa., views of the centennial buildings; from General Lewis E. Perrine, nine hundred loaves of bread; from a friend, two handsome bagatelle tables, one a standard and one for parlor use, and from H. A. Buttolph, M. D., Morristown, a collection of fine steel engravings suitably framed, &c.

From Miss D. L. Dix we have received several tokens of her regard for the institution and of her sincere interest in those committed to our care.

In closing this review of the operations of the institution for the year, I take this opportunity to express my sincere thanks to your board for the honor conferred upon me by my promotion. The charge

has not been accepted without some knowledge of its high character and of the onerous duties which attend it. Trusting that I may have your counsel and support in every measure which has for its object the welfare of those committed to our care and that Deity will direct us in every proper undertaking this report is

Respectfully submitted,

JOHN W. WARD.

N. J. State Lunatic Asylum, Trenton, November 1, 1876.

New Jersey State Library

ADMISSION OF PATIENTS.

PRIVATE PATIENTS,*

Or those supported by themselves or their friends, are admitted to the Asylum when there are vacancies, on their complying with the directions and forms contained in chapters nineteen, twenty, twenty-one and twenty-two, of the by-laws of the institution, which are in substance as follows :

That patients of all classes be made perfectly clean and free from any contagious or infectious disease; that they be provided with suitable clothing, and sufficient in quantity for one or more changes; that a written history of patients be sent with them, or that they be accompanied by a person capable of giving such information; that a "request for their admission" be made by some friend; that a "certificate of insanity," by one respectable physician, be brought with the patient; and lastly, that a bond, with satisfactory sureties, be given for the payment of their expenses, such payment being made quarterly in advance, and for their removal when discharged.

The forms of "request for admission," "certificate of insanity," and "bond for support," &c., are as follows :

FORM OF REQUEST.

To the Superintendent of the New Jersey State Lunatic Asylum :

The undersigned, of the township of —, in the county of —, is desirous of placing in the State Lunatic Asylum, at Trenton, and hereby requests the admission therein of —, a resident of the township of —, in the county of —, who is aged — years, and has been [here state what the occupation, profession or business of the person has been]. He (or she) is a native of —, in the State of —, and is [here state what the relationship or circumstances of connection may be] of the undersigned.

[Then should follow a written history of the case, stating the alleged cause of insanity, when it commenced, and all the particulars of the case].

Dated —, 18—.

* Application for admission of patients, if made by letter, should be addressed to the Superintendent.

FORM OF CERTIFICATE OF INSANITY.

I, A. B., physician, of the township of —, in the county of —, do certify that I have examined into, or am acquainted with the state of health and mental condition of C. D., in the township of —, in the county of —, and that he is in my opinion, insane, and a fit subject to be sent to the State Lunatic Asylum.

Signed,

A. B.

Dated —, 18—.

[The law requiring the certificates of two physicians, under oath, was repealed by supplement of March 1, 1850].

FORM OF BOND.

Know all men by these presents, that we, — —, of the township of —, of the county of —, are held and firmly bound unto — —, Treasurer of the New Jersey State Lunatic Asylum, and his successors in office, in the sum of one thousand dollars, for the payment of which we jointly and severally bind ourselves firmly by these presents.

Sealed with our seals, and dated this — day of —, 18—.

Whereas, — —, of the township of —, in the county of —, a lunatic, has been admitted a boarder in the New Jersey State Lunatic Asylum, at Trenton; Now, therefore, the condition of this obligation is, that if the said obligators shall pay to the Treasurer, or his successor in office, the sum of — dollars and — cents per week, for the board of said lunatic, so long as — shall continue a boarder in said Asylum, with such extra charges as may be occasioned by — requiring more than ordinary care and attention, and shall provide for — suitable clothing, and pay for all such necessary articles of clothing as shall be procured for — by the Steward of the Asylum, and shall remove — from the Asylum whenever the room occupied by — shall be required for a class of patients having preference by law, or in the opinion of the Superintendent, to be received into said Asylum; and if — should be removed at the request of — before the expiration of six calendar months after reception, then if such obligators shall pay board for twenty-six weeks, unless — should sooner be cured, and if they shall also pay, not exceeding fifty dollars, for all damages — may do to the furniture or other property of the Asylum, and for reasonable charges in case of death; such payment for board and clothing to be made quarterly, in advance, from date of admission, and at the time of removal, with interest on each bill, from and after the time becomes due, then this obligation to be void, otherwise to remain in force.

Signed and sealed in presence of—

FORM OF ORDER, ETC., FOR JUDGES.

I, A. B., one of the Judges of the Court of Common Pleas of the county of —, and State of New Jersey, do hereby report that application has been made to me on behalf of C. D., a resident of the township of —, in said county, alleged to be insane, [and in indigent circumstances, or a pauper as the case may be], and that pursuant to the act of the Legislature in such cases made and provided, I have called before me Dr. —, a respectable physician, and other creditable witnesses, to wit: [state their names] and having examined them, and fully examined the case, and not deeming it necessary to call a jury, I do hereby decide and certify that satisfactory proof has been adduced before me, showing the said C. D. to be an insane person, and that — has not sufficient estate or means to support — under said visitation.

Given under my hand at —, in the county and State aforesaid, this — day of —, in the year of our Lord one thousand eight hundred and —.

A. B.

— County, *ss.*—I, A. B., being duly sworn according to law, do certify and declare that I have examined into the state of health and mental condition of C. D., of the township of —, of said county of —, and that I am of opinion that — is insane.

A. B., *Physician.*

Sworn to and subscribed before me this — day of — A. D. 18—.

A. B., *Judge, etc.*

Endorse on certificate "Approved."—A. B. and C. D., Chosen Freeholders of the township of —, and county of —.

STATE OF NEW JERSEY. }
— County. }

I, A. B., Clerk of the county of —, do hereby certify that the foregoing is a true copy of the report and certificate of —, one of the judges of the Court of Common Pleas of said county, in the case of —, and also the certificate of Dr. —, thereunto appended, as filed in my office; that the foregoing is a true copy of the endorsement thereon, and that A. B. and C. D., whose names are signed to the said endorsement of approval, are members of the Board of Chosen Freeholders of said township, in said county, and that said signatures are in their proper handwriting.

In witness whereof I have hereunto set my hand and seal of office, at —, this — day of —, A. D. 18—.

A. B., *Clerk.*

Document No. 28.

SPECIAL REPORT OF THE COMMISSIONERS

TO SELECT A SITE AND BUILD AN

Asylum for the Insane

OF THIS STATE, GIVING A

STATEMENT OF THE RECEIPTS & EXPENDITURES,

From Jan. 1, 1871, to Feb. 1, 1876,

IN ACCORDANCE WITH THE RESOLUTION ADOPTED BY HOUSE OF ASSEMBLY,
ON THE SEVENTEENTH DAY OF JANUARY, 1876.

New Jersey State Library

REPORT.

THE STATE OF NEW JERSEY IN ACCOUNT WITH COM- MISSIONERS TO SELECT A SITE AND BUILD AN ASYLUM FOR THE INSANE.

New Jersey State Library

Document No. 30.

REPORT

OF THE

JOINT COMMITTEE ON LUNATIC ASYLUMS,

IN REGARD TO

THE MANAGEMENT OF THE TRENTON ASYLUM.

REPORT.

To the Senate and General Assembly of the State of New Jersey :—

The Joint Committee on Lunatic Asylums, to whom was referred the concurrent resolution which passed the Senate on the seventh of February last, calling on said committee "to investigate the general management of the Trenton Asylum and other property belonging thereto, the medical treatment the patients therein receive, and what relation the management of the farm adjoining the Asylum bears to the administration of the New Jersey State Lunatic Asylum of Trenton," beg leave to report that your committee have visited the Asylum, and viewed and closely examined all the property belonging to the State connected with that institution, and there met the late Superintendent and Board of Managers of said Asylum, who frankly gave all the information in their power in regard to the management of the institution ; fully, freely and satisfactorily explained to them all matters pertaining to the Asylum, and properly belonging to it ; and said commissioners volunteered to prepare a full statement relating to the institution, which is herewith submitted. Your committee visited the several wards of the Asylum, which they found in perfect order, and the inmates apparently as well and comfortably and kindly provided for as is practicable in the present overcrowded state of the house. The buildings and improvements on the State property they find convenient, substantial and well built.

The Managers' report, in the opinion of your committee, gives the information desired in the concurrent resolution in regard to the "general management of the Asylum and other property belonging thereto, and what relations the management of the farm adjoining the Asylum bears to the administration of New Jersey State Lunatic Asylum of Trenton," and we trust will be satisfactory to your honorable body.

The attention of your committee has been specially called to the English property, or grist mill, near the Asylum, and referred to in the Board of Managers' report. In examining into this matter, we

find the Legislature of 1874 authorized the purchase of the English property, including water power and old grist mill, and arrangements were made, by direction of the Board of Managers, for utilizing the water power, by erecting the new grist mill for the use of the Asylum, in supplying them with fresh ground flour, meal and feed ; and also erecting a building with pumping apparatus, to force water up into the house ; from which, the Board of Managers state, they confidently expect "considerable economy and great convenience in procuring supplies." In the Managers' report for 1874, they make the following mention of this property, showing their high estimate of its value to the Asylum :—

"Notwithstanding the previous good condition of the buildings and appointments, additional improvements have been made during the year, as will be seen by reference to the Superintendent's report. The proper heating and ventilation of buildings so extensive as those of the asylum, and the power required for the machine shop, laundry, bakery, for pumping, and other purposes, have required the provision of boilers, steam engines, pumps, blowers, and other mechanical appliances, to the completeness of which we refer with great satisfaction. The arrangements for the generation and use of steam will compare favorably with the best engineering works, and are well calculated to secure the very highest degree of economy and efficiency possible with steam as a motor. The only means of making any material advance in the direction of cheaper power has been availed of, during the year, by the purchase of the property known as the English farm, and the mill and water power connected therewith. When the mill, which was in a dilapidated state, shall have been reconstructed, the water power can be utilized for pumping, and otherwise, thus affording greater safety, as well as greater economy.

"In accordance with the provisions of the act authorizing the purchase of the property above referred to, the sum of five thousand dollars has been drawn from the State Treasury, on the warrant of the Comptroller, under the requisition of the President of the Board of Managers, and the same has been paid on account of the purchase money, the title papers having been duly executed and delivered. A further requisition, for the sum of fifteen thousand dollars, to pay the balance of the purchase money, will be made during the ensuing year."

And again, in the Board of Managers' report for 1875, they express their satisfaction in regard to the improvements and work done on the mill property as follows:

"The number of patients received and discharged, the whole number treated during the year, deaths and escapes, the improvements and repairs of Asylum buildings, work done on mill property, adapting water power to pumping apparatus, the complete finishing of an excellent grist mill, and various other structures and improve-

ments, which are now in full use, as described in the accompanying reports, makes the New Jersey Asylum for the Insane, in all its appointments, a model, throughout, for such institutions."

It will be seen the Legislature authorized the purchase of the property for the purpose to which it has been applied, and, by the direction of the Board of Managers, it has been improved by the Superintendent, and the progress of the work reported to the Legislature by the Managers and Joint Committee of the Legislature, and received their sanction and endorsement. The Board of Managers, in their annual report for 1875, make the following comment in regard to the institution and improvements thereto:

"The Superintendent of the Asylum, from its organization, twenty-eight years since, to this time, has been devoted to the one purpose of making it, in all respects, a perfect hospital and home for the insane. It has the advantage of a healthy neighborhood; it is admirably situated as regards grounds and drainage; there is an abundant supply of good spring water. There are buildings constructed in capacity and appointments sufficient for every want of five hundred patients and their attendants. All these natural and acquired advantages have been improved and applied in such a manner as to leave but little to be required in construction and management, unless some new want, yet unimagined, should arise. The Managers, at their different meetings, have observed throughout the order, quiet and decorum, as well as the attention to the comfort of the patients, that is satisfactory in the highest degree."

The high character of the Board of Managers of this Asylum gives the above extract from their report great weight and importance having been for years carefully watching everything connected with the institution.

Still, your committee, after viewing this whole matter, feel that while it is important that the water power on the "old English property" should be utilized, yet it may be a matter of question whether it was expedient for the State to incur the expense that has been incurred on that property.

Your committee have had their attention directed to reports that some of the counties of the State have been refused, by the late Superintendent of the Asylum, to have their insane patients admitted to the institution. Calling on the late Superintendent in relation to the matter, he states that, at a time when the institution became greatly embarrassed by excessive numbers, the Managers issued a circular instructing him to "refuse all applications for the admission of new patients to the Asylum until the further order of the Board," without reference to the fact whether a given county was represented by patients in excess of quota or not; and he says it was at that time when Freeholders of some of the counties of the State became dissatisfied with his action in refusing to receive new patients, and

also, in the case of some counties, declined to exchange quiet for excited cases. Below we give the resolutions passed by the Board of Managers :

“NEW JERSEY STATE LUNATIC ASYLUM.

“WHEREAS, There are now in the Asylum nearly three hundred patients more than the building is designed to accommodate, and the applications for admission continue to increase rather than to diminish ; *and whereas*, the urgent appeals of the Managers for the relief of the institution by the removal of harmless and incurable patients have not been responded to by the County authorities ; *and whereas*, the health, safety and welfare of the patients now in the house not only imperatively forbid any further increase in the number by new admissions, but absolutely demand that the present number should be diminished ; therefore,

“*Resolved*, That the Superintendent be instructed to refuse all applications for the admission of new patients to the Asylum until the further order of the Board.

“*Resolved*, That a copy of the above preamble and resolution be immediately sent to the Director of the Board of Freeholders in each county of the State, and that the same be published in two newspapers in the cities of Trenton and Newark, and in such other manner as the Superintendent may deem expedient.

“By order of the Board of Managers.

“THOMAS J. STRYKER, *Secretary*.

“New Jersey State Lunatic Asylum, July 2, 1872.”

He states that copies of these resolutions were sent to officers of all the counties, accompanied by circular letter by way of introduction and explanation of their condition and action, as copied below :

“NEW JERSEY STATE LUNATIC ASYLUM, }
“TRENTON, , 18 }

“*Board of Chosen Freeholders,* , *county, New Jersey:*

“GENTLEMEN:—By direction of the Board of Managers of this Asylum, I enclose copy of resolutions passed at their last quarterly meeting, intended to give the several counties information in regard to the over-crowded state of the building, and the means proposed by them for its relief, until further provision can be made by the State for the accommodation of the insane, who require the care of an institution.

“Assuming the building to be capable of providing for six hundred patients and their attendants (which is one hundred more than it was intended to receive), the quota for , county, under the

last census of the State, is
from the county now in the Asylum, is
Surplus above the quota

. The number
.

“Very respectfully, your obedient servant,

“H. A. BUTTOLPH, M. D.,

“*Superintendent of Asylum.*”

He further states, with varying degrees of enquiry, the same state of things has continued from that day to this, and has led to a good deal of embarrassment and some censure of the officers of the institution, which they very much regret.

In reference to that part of the resolution relating to “the medical treatment of the patients” in the Asylum, your committee would say that a full compliance with the request was in a degree difficult if not impossible. By reference to the annual reports of the institution, however, we have found such reference to the subject as would perhaps enable the public to judge of its general character and fitness. Beginning with the first report of Doctor Buttolph, for 1848, we quote as follows:—

“The treatment of the insane in Asylums as elsewhere is properly divided into medical and moral, the former including the use of general and local depletion, medicine, baths, regulation of diet, &c., the latter, all those means and influences brought to bear upon the person in his new situation, as association with others, employment, amusements, regular habits of rising and retiring, of order and cleanliness, attendance on religious services, &c.” “In determining the treatment, reference is necessary to all the causes known to have had an influence in the development or progress of the case, whether nearly or remotely connected with it. With this view, his previous social, civil and domestic relations and pursuits should be understood and considered.

“The different classes of organs and functions shall be carefully examined to ascertain whether and how far his disease is connected with physical, mental or moral causes, either separately or combined; and lastly, what are the true indications for treatment, in view of all these circumstances.

“After this investigation the medical treatment is conducted on the same general principles as are applicable in other diseases, being modified by the age, sex, peculiarity of constitution and stage of disease.” “If there exists excitement, depression or disorder in any of the various organs or functions, it is sought out and corrected by a resort to the usual remedial means, having in view, of course, the modifications, if any, required on account of the mental disorder.”

By reference to a subsequent report, or that for the year 1852, we find a practical description of the subject of insanity, twenty-eight

pages in extent, and embraced under a general enquiry into its *natural forms and causes, means of prevention, and general principles of treatment*, including in the latter both medical and moral treatment.

Again, in the report for 1856, and in several subsequent years, we find the subject of the medical treatment resorted to in the institution freely discussed, not in detail with cases given, but in general terms.

In report of 1868, under the head of medical treatment, we find it stated "that in a large number of chronic cases, the subjects enjoying good general health, as is often the case, but little medical treatment is required, yet that a portion of this class and a large number of those more recently affected, are much benefited by judiciously applied medical means." "Among the classes of articles more generally called for in the treatment of the insane, are those adapted to regulate the digestive organs, to improve the general strength and tone of the system, and such as secure greater tranquility of the nerves and induce sleep. In regard to the latter effect in particular, it may be said that in many cases, where the rest has been much disturbed, in connection with the attack, and continuance of the disorder, about all that is required, after the advantage of change of place and association from home to the institution has been accomplished, is to secure several hours quiet sleep in the night, with shorter periods in the day, for a few days or weeks in succession. This seeming to be the one thing most needed to restore the brain to its healthy functional action; much discrimination and care, however, are often required to enable the practitioner to select the remedy best adapted to accomplish this object. Indeed it can only be done in some cases by trials, or by the aid of that practical skill acquired by experience in this class of diseases." "As an illustration of this may be mentioned, that in some extreme cases of maniacal excitement attended by great wakefulness, exhausted strength, &c., and in which ordinary anodyne treatment has failed to secure the much needed rest and sleep, a liberal stimulant of warm milk punch, frequently repeated, will overcome all the barriers to repose, and the worn-out sufferer will awaken, after several hours' sleep, feeling as if he had been transported to a different world in the interval of his consciousness." In subsequent reports still other references are made to medical treatment.

At the institution, your committee learned that information of the wants of the patients for medical and other treatment and care is regularly obtained by the physicians by visits through the wards, by reports of supervisors and attendants in the day, and by persons employed to watch at night. Medicine is regularly dispensed by an apothecary, on the prescription of physicians, four times a day, and, in special cases, at other periods, when required. It was stated, for convenience and facility of administration, medicine is prepared, when practicable, in a liquid form; and, as some indication of the

number of persons under medical treatment, and the amount of medicine used, it may be stated that, at the date of the committee's visit, between five and six hundred doses or portions of medicine were given daily.

From the report for 1875, we learn that, of the four thousand eight hundred and six cases treated since the opening of the institution in 1848, three thousand and seventy-five have been discharged as recovered or improved; a state of facts deemed, by your committee, as highly creditable, and indicating that, in the medical and other treatment of the patients, as in the financial and other affairs of the institution, as stated by the Board of Managers, the administration, by the late Superintendent, has been successful and satisfactory.

Your committee further report that, in their examination of the condition of the inmates of the Asylum, they find it very much crowded, and, in their opinion, too much so. The building, we are informed, was intended to accommodate about 500, has now 725—225 more than its capacity—some of the rooms being occupied by two and three individuals, when only calculated for one person; and some of the halls and sitting rooms are too full. We noticed, also, that some of the sitting rooms have been turned into sleeping apartments. All of this, it is expected, will be remedied as soon as the new Asylum is ready for patients. It cannot be done too soon.

Your committee find in the Asylum twenty-five insane, who have been sent there from the State Prison. Most of them are from the very lowest and degraded classes of society.

In the report of the Joint Committee on the State Lunatic Asylum to the Senate and General Assembly of the State of New Jersey, session of 1875, we find the following extract from the report of the Board of Managers for 1874, in reference to this subject:—

“The Managers say that ‘among the patients in the Asylum, are included twenty-one insane convicts, who have been transferred to the institution from the State Prison by virtue of the twelfth section of the act for the government and regulation of the State Prison,’ approved March 26, 1869.”

“While all must admit that the plainest dictates of humanity demand, on the part of the State, the provision of means for the merciful care and skillful treatment of insane convicts, yet there would seem to be a natural repugnance to placing these persons in contact with the other insane of the State. The affliction of insanity is sufficiently deplorable without causing to the relatives and friends of the sufferers the added grief of knowing that those to whom they are bound by the tenderest ties, may be forced to mingle with common convicts. We feel this to be a grievous wrong that calls for prompt and adequate remedy.”

“This evil, not easy to endure when the law was first enacted, and

there were but few insane convicts, has grown in magnitude with the increase of the number of cases, and ought to be no longer tolerated. We earnestly urge that provision be made by law for this class of cases, in some suitable place separate from the other insane of the State. We believe that this could be best done in the State Prison property. There those that have only occasional attacks of lunacy, could, in the interval, be provided with such useful employment as might be deemed compatible with their condition. Such an arrangement would also leave no inducement on the part of the prisoners to feign insanity, in order to accomplish a removal from the prison."

And in the report of the Board of Managers for 1875, we find the subject noticed as follows :—

"Attention must again be called to the insane convicts sent from the New Jersey State Prison to the Asylum. It seems hardly courteous or just to place condemned criminals in intimate association with others who, in most cases, in regard to morals, are beyond reproach. The county, no more than the pay patient, ought to be subject to this degradation. As a matter of economy, if regarded in no other light, the insane of the State Prison should be kept in a separate building on the prison grounds easily and as cheaply as in the Lunatic Asylum."

Your committee fully concur in the sentiments expressed by the Managers on the subject, and call special attention to this matter, and recommend action be taken during this session in regard to it.

In looking over the reports of the Managers and officers of the Asylum to the Governor and Legislature for several years past, we find they have been full and particular in regard to the finances and general management of the institution, we find also the Joint Committee of both branches of the Legislature have presented annually very favorable and flattering reports of the good management of the Asylum, in the kind treatment and care of the inmates, of its financial condition and everything pertaining to it.

Your committee feel, after careful examination and close observation, that the affairs of the Asylum appear to be well managed in every respect, and express their strong confidence in the Board of Managers, the late Superintendent and other officers connected with the institution, and trust the high character of the Trenton Asylum, as a home for the insane, will continue to receive that commendation which it so justly deserves.

All of which is respectfully submitted.

TRENTON, March 6, 1876.

REPORT OF BOARD OF MANAGERS.

REPORT.

Hon. John Hill and others, Members of the Joint and Special Committee on the Asylum :—

GENTLEMEN—The undersigned, Managers of the New Jersey State Lunatic Asylum, for the purpose of giving your committee full and satisfactory information in regard to the primary cost, general management, condition, &c., &c., of this institution, beg to do so by presenting the following statements :—

The amount of land originally purchased by the State for the use of this Asylum was one hundred and eleven acres. Since then, by two other purchases, fifty-nine more acres have been added, making in all at this time one hundred and seventy, of which, however, about fifty consist of timber land in the rear of the building and pleasure grounds in front, and are, therefore, not available for farming or gardening purposes.

The total cost to the State of the land, buildings, fixtures, furniture and repairs, so far as derived from the State Treasury by appropriations for these objects, from the commencement of the enterprise in 1845 to this date, is four hundred and twenty-three thousand six hundred dollars (\$423,600).

The original building was quite substantial, but very plain and inexpensive, and, when received by the Managers for care and control, was found to be deficient in many of the appointments, internal and external, that the wants of the enlarged structure developed at a later day. It was found, however, at that period difficult to obtain appropriations of money for collateral purposes, and that the means derived from the current income of the institution, while it was quite small, was totally inadequate to supply such deficiencies.

This state of things continued for many years, and, indeed, to a great extent, until within the last few years.

Since the latest enlargement of the building, however, and particularly *since it became so much over-crowded*, the somewhat diminished cost of supplies, but especially the reductions in comparative expense

for labor, &c., practically improved the financial state of the institution to a very considerable extent.

In these circumstances we have been able to supply several much needed outbuildings, and to partially rebuild several old structures, and apply them to such new uses as our wants revealed and dictated.

The thorough repair and renovation of the original building, centre and wings, including fixtures and much furniture, has been a source of large expenditure.

In carrying forward this system of annual improvements in the institution in connection with its current affairs, it has been found impossible, or at least so difficult, to keep the expenses for each separate from the other, that many of the improvements have been made without our being able to decide definitely as to their cost.

The fact, however, that by the addition of new structures and fixtures for necessary purposes, and the renovation and repair of old, the property of the State was by so much increased in value, seemed to us ample justification for the course adopted, and not to require more *particular* mention, as to purpose and cost, than has heretofore been made in the annual reports of the institution.

Knowing, as we have done, that by the aid of the well adapted machinery possessed by the institution, with the skilled men employed to work it, the construction and repair of buildings and fixtures was done in the most economical manner possible, we have felt authorized to do as much in making needed improvements as the means at our disposal would permit.

That a more definite impression may be had by your committee of the *nature* and *extent* of the work done, in the manner and by the means described, we beg to refer, in detail, to the following items:—

The grading, improvement and planting of pleasure grounds.

The erection of building for laundry, and the supplying of improved modern machinery for washing for one thousand persons, with the arrangements for drying either by natural or artificial means.

The erection of carpenters' and machine shops for wood and iron work, and the supply of such machinery as was called for in each to expedite the labor and economize the cost of work to be done therein.

An examination of the machinery in both these shops will convince any intelligent person of its general utility and value for the purposes intended.

The erection of a building thirty by fifty feet in extent and two stories high, situated immediately in rear of machine and carpenters' shops, for storing, classifying and seasoning lumber by natural or artificial means, also of a Root's blower, a fixture of considerable interest and importance, as it is associated with the warming and ventilation of the house. We find it well adapted for use in the winter season, when a less volume of air on account of its greater

density from low temperature is required, and because the air discharged by the *positive* action of this machine will, with the same amount of power, extend farther than if delivered by fan. By its use an estimated saving of fuel is made of from one to two tons of coal per day.

The enlargements of the boiler house and the supply of four new boilers of large capacity, one steam engine of seventy-five horse power, together with the entire renewal of the heating fixtures in the air chambers under the original building, including the conducting pipes for steam from boiler house, and the necessary pipes for returning condensed steam or water back to boiler house.

The arrangements, buildings and machinery for a *forced mechanical* ventilation of the house. These consists of an underground passage, about four hundred feet long and eight by nine feet in size, walled on either side with stone and covered by brick arch. A steam engine of fifteen horse power, a fan for forcing the air, a fan house, &c., &c., and costing altogether \$4,500.

It should be stated, however, that towards this object, an appropriation of \$2,500, made for the purpose of repairs and improvements, was applied.

Large renewals, improvements and repairs in and about the main central edifice and the wings occupied by patients, and amounting in the latter to a renewal of the floors of fourteen of the original halls—most of the base boards—of the plaster on several of the ceilings—extensive repainting, improved arrangements for exhaust ventilation by the aid of steam surfaces placed in six campanilies or ventilators above the general line of the roof of the building.

The renovation and fitting up of an old farm building for a slaughter house—raising, recovering and fitting an old barn for use for farm and other stock—a piggery—soap house and fixtures, and a building for storing wagons, carts and other farm utensils.

A new farm barn, forty by seventy feet in extent, with root cellar beneath, with wing projecting on one side containing stalls for horses, and on the other for forty-six cows. Near to this is another structure furnished on one side as an open shed for day use by stock in cold weather, and interiorly with square or box stalls, as a hospital or lying in ward for the herd of cows.

In the vicinity of this is a double corn crib with large storage room for corn and for farm implements, and near by, still another, furnished with water tank and a low pressure boiler to supply means for steaming food for stock.

A building has been erected near the rear entrance, composed of stone and substantially and neatly finished, and used as a general sewing, ironing and assorting room, for washed clothes.

Here from forty to fifty females, patients and others, are daily employed in attending to these branches of work.

A framed structure, thirty by fifty feet, has been erected in the low grounds in front of the main building to receive ice from a small lake or pond in its immediate vicinity. This building was made somewhat ornamental on account of its peculiar situation in the grounds. In an extension of this structure on one side, is a refrigerating room sixteen feet square, fitted with a wrought iron tank containing iced water for refrigerating purposes. The small lake will be surrounded by walks and drives, and should have a boat and summer house near it, to assist in the entertainment and amusement of patients when in that part of the grounds.

FENCES.—Aside from a large amount of paling and post and rail fence put up, we have made, with posts, rails and matched boards, planed and painted, and ten feet high, 9,012 feet in length, and finished in a similar way, six and a half feet high, 3,742 feet; also about 3,000 feet of board walk, and about 1,300 in length, and between five and six feet wide, projecting roofs, from top of fences, over board walks, in airing courts or exercise yards for patients.

The erection of a flour mill and water works, with improved arrangements, fixtures and machinery for both. The arrangement for drawing water from the canal and raising it to the main building, in case of an emergency from fire, is, of itself, of great value—perhaps equal to the entire expenditure for both mill and water works.

In this connection it may be proper to state that the cost of the mill and water works exceeded the amount already paid out of the Asylum funds by the sum of six thousand eight hundred and twenty-three dollars and six cents (\$6,823.06). Bills to this amount for fixtures and machinery for the pump house and mill, were paid by the Superintendent out of his own funds, at the time of their purchase and delivery, and have not yet been repaid by the Managers, it being deemed unwise to embarrass the working of the institution by defraying the whole cost of these improvements out of one year's income.

There are not, to the knowledge of the Managers, any bills outstanding against the Asylum. All materials and labor have been procured at the lowest price and paid for in cash. And it is hoped that these advances, made for the purpose of completing the work, and giving the institution the benefit of these valuable improvements, without unnecessary delay, can be repaid out of the current income of the Asylum, at an early day, without calling upon the Legislature for a special appropriation for that purpose.

Many other things might be mentioned in connection with improvements, renewals and repairs made, but these will sufficiently illustrate the amount and kind of work done and mainly during the last few years, for which no appropriation has been made from the State Treasury.

As this class of work is now substantially completed no embarrassment will arise in the affairs of the institution from the reduction in the number of patients on the opening of the new institution at Morris Plains. Still, it may be well for the committee to observe that the removal of two hundred patients will at once reduce the annual income of the Asylum over forty-five thousand dollars.

Mention may also here be made of the fact that all the additional furniture, including bedsteads, beds, bedding, chairs, &c., necessary for some two hundred and fifty patients over and above the proper number for which provision was originally made, has been purchased out of the current income of the Asylum, without any appropriation from the State for that purpose.

In regard to the land owned by the Superintendent, immediately adjoining the Asylum farm, and occupied and used by the institution since 1870, the Managers would state that said tract of land contains about 176 acres, and was originally purchased by Doctor Buttolph at the cost price of \$37,844, under the impression that it would be a very valuable accession to the State property, and with the declared intention on his part of having it transferred to the State at cost (if the Legislature elected to take the same) without having it conveyed to himself in the first instance. As this proposition was not accepted, and he was compelled by his agreement to take the property and provide for the payments of the purchase money, his original offer was withdrawn, after the lapse of a year, and a price put upon the property in accordance with his opinion of its actual value. The farm being then in Doctor Buttolph's possession, and the amount of land owned by the State and available to the institution for pasture and agricultural purposes, being much less than the amount desired, its occupation and use by us became a mutual convenience to both parties.

The land has been worked in common with that owned by the State. The Asylum farmer, under the general direction of the Steward, has had the management of the farming operations and kept the accounts connected therewith. The proceeds of the farm, all of which have been used by the institution, were valued and the prices fixed by the Steward and the appraisers appointed to make the annual appraisalment of the personal property of the Asylum. The amount paid to Doctor Buttolph for the produce, after deducting the costs and expenses of working the farm, has of course varied in different years according to the cost of production and the amount and value of the crops. The average for the six years has been about twenty-one hundred and twenty-three dollars, or a little more than five and a half per cent. on the cost of the property exclusive of taxes, all of which have been paid by the owner of the land.

Whether the past arrangement for working this land was the best under the circumstances, may be questionable. While convenient to both parties and believed upon the whole to be beneficial to the

institution, it was liable to objection and has been terminated by mutual consent. If used in the future, it will be taken at a fixed rental or upon terms more satisfactory, and not open to exception either by the parties or the State.

In relation to the general administration of the affairs of the institution by the Superintendent, the Managers can only say that from the earliest period of its organization, in all its varied details, whether relating to its finances or the general course of its external affairs, as the improvement of the grounds, the erection, renewal and repair of buildings and fences, the supply of water, the warming, ventilation and lighting of the building, and the use of power in driving machinery for various purposes that it has been highly successful and satisfactory to us who have, as its Board of Managers, followed these varied operations with attention and interest. The Managers also assert with great confidence, and with interest commensurate with the greater importance of its internal over its external affairs, that the house has been kept in an orderly, cleanly and wholesome condition; that the supply of food has been ample, well dispensed and of good quality, and that the medical, moral and physical treatment and care of the patients, to the best of our knowledge and belief, has been well adapted to the great ends of the institution and salutary in its effects. And upon this last point, the other members of this board would with confidence refer your honorable committee to those members of the medical profession now acting as managers, viz.: Doctors Coleman, Elmer and Vought, three of the leading physicians of the State, of acknowledged reputation and large experience.

In conclusion, the Board desire to express their high appreciation of Doctor Buttolph's unselfish devotion to the interests of this institution. From its first organization to the present hour he has labored unceasingly for its improvement and success as well as for the interests of those committed to his care, and has ever exhibited a versatility of talent and adaptation and capacity for his arduous position, which excites the admiration of all who know him, and the value of which, to the State of New Jersey, no words of ours can duly express. Under his administration the New Jersey State Lunatic Asylum at Trenton stands at the very head of the long list of similar institutions in this country, equalled by few, surpassed by none—an honor to the State, in which all her citizens feel just pride.

In closing our official relations with Doctor Buttolph, consequent upon his acceptance of the appointment as Superintendent of the Asylum at Morristown, we shall part with him with the deepest regret, feeling our great responsibility in the choice of his successor, and being reconciled to his departure only by the profound conviction that, upon a new and wider sphere of usefulness, his varied talents and ripe experience will be more beneficial to the State and

the public in the organization of the new Asylum, than in the management of one he has so nearly brought to perfection.

Signed by order of the Board of Managers.

ALEXANDER WURTS,

President.

CALEB S. GREEN, *Secretary.*
